**Notes:**

- First-Year Composition: All students are placed in ENG 101 unless submission of SAT, ACT, Accuplacer, IELTS, or TOEFL score, or college-level transfer credit or test credit equivalent to ASU's first-year composition course(s), determine otherwise. Students on Polytechnic, Downtown Phoenix and West Campuses are encouraged to complete the Directed Self-Placement survey to choose the first-year composition option they believe best suits their needs. Visit: https://cisa.asu.edu/DSP
- Mathematics Placement Assessment score determines placement in first mathematics course.

**Total Hours:** 120
**Upper Division Hours:** 45 minimum
**Major GPA:** 2.00 minimum
**Cumulative GPA:** 2.00 minimum

**Notes:**

- First-Year Composition: All students are placed in ENG 101 unless submission of SAT, ACT, Accuplacer, IELTS, or TOEFL score, or college-level transfer credit or test credit equivalent to ASU's first-year composition course(s), determine otherwise. Students on Polytechnic, Downtown Phoenix and West Campuses are encouraged to complete the Directed Self-Placement survey to choose the first-year composition option they believe best suits their needs. Visit: https://cisa.asu.edu/DSP
- Mathematics Placement Assessment score determines placement in first mathematics course.

- First-Year Composition: All students are placed in ENG 101 unless submission of SAT, ACT, Accuplacer, IELTS, or TOEFL score, or college-level transfer credit or test credit equivalent to ASU's first-year composition course(s), determine otherwise. Students on Polytechnic, Downtown Phoenix and West Campuses are encouraged to complete the Directed Self-Placement survey to choose the first-year composition option they believe best suits their needs. Visit: https://cisa.asu.edu/DSP
- Mathematics Placement Assessment score determines placement in first mathematics course.
- Effective January 1, 2024, the Commission on Dietetic Registration (CDR) will require a minimum of a master's degree in any field of study to be eligible to take the credentialing exam to become a registered dietitian nutritionist (RDN). In addition, CDR requires that individuals complete coursework and supervised practice in program(s) accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). In most states, graduates also must obtain licensure or certification to practice.

- Focus Areas provide students an opportunity to focus their studies in a particular area of interest or expand their knowledge in various areas. Students must select at least three courses from a single focus area list, and can then select from any combination of the focus area lists to complete a total of 15 credit hours, nine of which must be upper division.
- Students interested in applying to the Mayo School of Health Sciences Echocardiography program must complete all prerequisite courses prior to matriculation to the 21 month professional program at Mayo. Students must be accepted into the program, which has limited slots for admission. For admission criteria and application process, go here. If a student is accepted for the program, completion requires the student to attend ASU to meet our remaining requirements in the summer prior to the beginning of the program. Students must work closely with their ASU academic advisor to make certain all prerequisites have been met. Upon successful completion of the Echocardiography curriculum at Mayo, the student must have the credits transferred back to ASU for acceptance as a block. At that time, the student may apply for graduation from ASU with the BS in Health Sciences.
- Students interested in the Health and Media focus area are encouraged to take at least two MCO courses offered by the Walter Cronkite School of Journalism and Mass Communication.
- Students interested in taking SPA courses to fulfill focus area requirements should plan ahead to complete prerequisites or the appropriate placement exam. Contact https://cisa.asu.edu/advising for more information on placement.
- CHS students are required to complete a minimum of three credits of experiential learning coursework. A list of recommended courses is below. The CHS student website also has up to date information on opportunities to fulfill this requirement, including research and internships, that are relevant to each major. Students should contact their academic advisor with any questions.
- Students who use a Focus Area course to fulfill the experiential learning requirement will need to complete an additional three credit upper division elective.

- Consider using upper division electives to take additional upper division coursework from Professional Track list if needed or fulfill upper division science pre-requisites for desired graduate programs. Meet with a pre-health advisor to discuss courses.

- 
  - A course in biochemistry with lab is strongly recommended for competitive application to most professional schools.
  - Students interested in applying to Physical Therapy graduate programs should major in Kinesiology.
  - Students in the MD track who plan to apply to the University of Arizona Medical School in Tucson must complete upper-division coursework in Cell Biology, Histology, Microbiology, Pathology, or Immunobiology as well as an upper-division course in Molecular Biology. This means that at least one of the upper-division electives should come from the Medical Studies Breadth Electives list.
  - Due to the high volume of overlap in curriculum, students enrolled in this degree are not permitted to declare a concurrent degree combination with the Biological Sciences BS, including the following

concentrations: Biomedical Sciences; Genetics, Cell and Developmental Biology; and Neurobiology, Physiology and Behavior. Students should speak with their academic advisor for any further questions.

- Population Health students must select and follow a single track to complete a total of 18 credit hours, at least six of which must be upper division. The selected track will allow students to move confidently into a career or into a population health graduate program.
- The population health program is designed to prepare students for future career and educational opportunities through hands on experiential learning. Students are required to complete nine credits of experiential learning coursework for the program, six of which must be upper division. Three credits of experiential learning are achieved through CHS 280, which offers several topics that students can choose from including Introduction to Citizen Science and Health, Translational Team, and Health Applications and Experience. Students select the remaining six credits of upper division experiential learning from a list of major specific course options below. The CHS student website also has up to date information on opportunities to fulfill this requirement, including research and internships, that are relevant to each major. Students should contact their academic advisor with any questions.

# Barrett, The Honors College Overview and Requirements

Barrett, The Honors College curriculum is designed to develop students' habits of mind that enable them to be lifelong learners, creative problem solvers, and participatory citizens in a democratic society. Barrett emphasizes:

- small classes and seminars
- multidisciplinary team-taught courses and other engaged modes of learning
- development of critical reading, discussion, and writing skills

Barrett honors faculty fellows who specialize in honors pedagogy are responsible for offering the core honors curriculum through honors signature seminars and special topics courses. Barrett also collaborates with all colleges at ASU to offer honors seminars and sections, honors enrichment contracts, and undergraduate research, thesis, and creative project opportunities.

### Admission to Barrett

Students first apply to ASU and then submit a separate application to Barrett.

Lower division entry: Students who begin with Barrett in their first year of college are required to take the HON 171 and HON 272: The Human Event course sequence, turn in either a successfully defended thesis or creative project, and complete 36 honors credit hours (18 of these credits must be upper-division coursework) with a cumulative GPA of 3.25 upon graduation.

Students in their first semester at ASU who are looking to join the honors college in their second semester may submit a Barrett lower division application if they will have three and a half academic years remaining to address the Barrett lower division requirements.

Upper division entry: Students who begin with Barrett midway through their college careers are required to take HON 370: History of Ideas, turn in either a successfully defended thesis or creative project, and complete 21 upper-division honors credit hours with a cumulative GPA of 3.25 upon graduation.

Transfer students: Students who have graduated or will graduate from an Arizona Community College honors program and who are joining Barrett as upper-division students complete 18 credit hours of an honors curriculum to graduate from Barrett, rather than 21 hours. The course HON 370: History of Ideas and the thesis experience remain required components of the program.

ASU Online students: Online students who have earned a minimum of 24 credits post high school graduation, including completing the ASU first-year composition requirement, and have a minimum of 60 credits remaining until intended ASU graduation, are invited to apply to join as a Barrett Online student. Barrett Online students are required to take HON 370: History of Ideas as a live synchronous course offered via Zoom, turn in either a successfully defended thesis or creative project, and complete 21 upper-division honors credit hours with a cumulative GPA of 3.25 upon graduation.

### Honors Signature Courses

All Barrett students are required to complete required signature courses and seminars taught by honors faculty fellows.

Students entering the college at the lower division are required to complete a two-semester sequence of HON 171 and HON 272: The Human Event. This is an interdisciplinary seminar focusing on key social and intellectual currents in the development of humanity. Students examine human thought and imagination from various disciplines, including philosophy, history, literature, religion, science, social science, and art. Coursework emphasizes critical thinking, discussion, and argumentative writing.

Transfer students entering at the upper division complete a one-semester seminar, reserved for them, titled HON 370: History of Ideas. The texts are generally selected based on a theme of the instructors' choosing. Coursework emphasizes critical thinking, discussion, and argumentative writing.

### Honors Thesis or Creative Project

The Barrett honors thesis or creative project is the culmination of a student's entire honors experience and undergraduate education. The thesis provides students with the opportunity to work closely with faculty and advance knowledge in the discipline in a meaningful way. A thesis or creative project demonstrates experience with design, execution, analysis, and presentation in the chosen field of study.

Students typically enroll in departmental courses numbered 492 and 493 for thesis work under the supervision of the ASU faculty thesis director. Passing credit in 493 will result in fulfillment of the student's upper division Literacy and Critical Inquiry (L) General Studies requirement.

Students may select their own thesis topic and supervising faculty member inside or outside their academic majors. Additionally, students may participate in honors thesis pathways programs. Thesis pathways are unique thesis opportunities in which students can be paired with faculty on interesting and engaging topics. The pathway options provide students a structured experience in completing their thesis while researching a topic that interests them.

Required thesis or creative project elements include a thesis committee, approved thesis prospectus, thesis defense form, formal thesis defense event, and the final thesis work (approved by the thesis committee) which must be submitted to the Barrett Thesis Digital Repository.

### Honors Credit Hours and Academic Opportunities

Students are responsible for earning honors credit hours outside of the HON signature courses and the thesis or creative project. They may do so by obtaining a grade of "C" or "Y" through participation in:

- honors sections
- honors enrichment contracts
- honors Special Topics courses
- internship, teaching assistant, and research credit
- honors study abroad programs
- T.W. Lewis honors coursework
- graduate-level (500+) coursework

**Honors Progress and Support**

A dedicated honors advisor is assigned to each incoming Barrett student. Barrett honors advising is mandatory for students. The honors advisor provides tools for navigating honors requirements, such as the Degree Audit Reporting System, or DARS, and connects students to campus-wide resources, extraordinary opportunities, and programs that create a unique honors experience. Additionally, Barrett students have an assigned major advisor in the college or department of their academic major and a faculty honors advisor.

Faculty honors advisors are disciplinary faculty members who serve as liaisons between their academic units and Barrett, The Honors College. Faculty honors advisors assist students with academic opportunities, information on graduate school, advice on the related field and profession, and assistance with the honors thesis or creative project. Barrett students are encouraged to work with these advisors throughout their undergraduate experience.

Questions should be directed to Barrettadvising@asu.edu.

**Notes:**

- - First-Year Composition: All students are placed in ENG 101 unless submission of SAT, ACT, Accuplacer, IELTS, or TOEFL score, or college-level transfer credit or test credit equivalent to ASU's first-year composition course(s), determine otherwise. Students on Polytechnic, Downtown Phoenix and West Campuses are encouraged to complete the Directed Self-Placement survey to choose the first-year composition option they believe best suits their needs. Visit: https://cisa.asu.edu/DSP
  - Mathematics Placement Assessment score determines placement in first mathematics course.
- Students must complete a minimum of 12 credit hours of science courses offered by the College of Integrative Sciences and Arts. Select from ABS, CHM, BIO, PHY, and MIC prefixes.

In order to complete the requirements of this program, some laboratory courses will be completed in-person at the Tempe Campus.

These laboratory courses will be offered during summer. This may impact your financial aid. Financial aid is available to those who apply and qualify, and students may receive funds to help cover costs for each semester of enrollment. The amount of financial aid that a student is eligible for varies depending on prior education experience and other individual factors. Learn more about summer financial aid and additional ways to cover summer costs.

In order to complete the requirements of this program, some laboratory courses will be completed in-person at the Tempe Campus.

These laboratory courses will be offered during summer. This may impact your financial aid. Financial aid is available to those who apply and qualify, and students may receive funds to help cover costs for each semester of enrollment. The amount of financial aid that a student is eligible for varies depending on prior education experience and other individual factors. Learn more about summer financial aid and additional ways to cover summer costs.

In order to complete the requirements of this program, some laboratory courses will be completed in-person at the Tempe Campus.

These laboratory courses will be offered during summer. This may impact your financial aid. Financial aid is available to those who apply and qualify, and students may receive funds to help cover costs for each semester of enrollment. The amount of financial aid that a student is eligible for varies depending on prior education experience and other individual factors. Learn more about summer financial aid and additional ways to cover summer costs.

| Upper Division Forensic Science Culminating Experience | 3 | C | • ASU Online Forensic Science BS students will participate in a culminating experience. Barrett Honors students may choose FOR 492 or 493 as their culminating experience. However, it is strongly recommended that all online Forensic Science BS students participate in the forensics residency experience, FOR 494 Fundamental Skills in Forensic Science.<br>• FOR 494 Fundamentals of Forensic Science requires an immersive, 2-week residency in the crime scene lab and other labs at ASU's West campus in Glendale, AZ.<br>• Alternatively, students may seek a local internship (FOR 484). Forensic Science internships are not guaranteed. Forensic science internships are competitive and the application process takes time. All internships require prior faculty approval. Please contact your academic advisor for questions. |
