

**CURRICULUM CHECK SHEET**  
**MINOR IN MATHEMATICS**  
**ARIZONA STATE UNIVERSITY**  
**2003-2004**

A student in the College of Liberal Arts and Sciences, or in another college with that college's approval, may complete a Minor in Mathematics that is formally recognized by the College and by the University Registrar. The minor requires 20 semester hours of courses in Mathematics and Statistics. Required courses are:

MAT 271	Calculus with Analytic Geometry II	(4 credits)
MAT 272	Calculus with Analytic Geometry III	(4 credits)
MAT 342	Linear Algebra	(3 credits)

Three additional upper division courses in Mathematics (MAT) or Statistics and Probability (STP) are required. Students may not apply MAT 362, MAT 485, or a course not offered at ASU's main campus to the math minor, unless otherwise approved by a math department advisor. In addition to the above requirements, the Department of Mathematics recommends CSE 200 and 210.

NOTE: Majors in the College of Engineering and Applied Sciences may not count an upper-division course in Mathematics and Statistics both toward a minor in Mathematics and a technical elective in the CEAS major. Otherwise the credit-hour requirements are the same for CEAS majors as for other students.
