PURPOSE

East College offers undergraduate and graduate degree programs in a variety of popular majors. The programs in East College prepare students for exciting professional careers by providing a practical set of skills and a solid foundation in the arts and sciences. Students learn critical thinking and problem solving, and gain a global perspective on work and life. Graduates become business leaders, educators, technical writers and editors, psychologists, ecologists, horticulturists, nutritionists, and health and wellness professionals.

East College also offers General Studies and general interest courses in such areas as anthropology, art, communication, economics, English, history, mathematics, music, philosophy, political science, psychology, religious studies, science, sociology, and women’s studies.

ORGANIZATION

East College consists of the following program areas:

- Applied Biological Sciences
- Applied Psychology
- Business Administration
- Educational Innovation and Teacher Preparation
  - Physical Education
  - Teacher Education and Administration
- Exercise and Wellness
- Human Health Studies
- Humanities and Arts
- Multimedia Writing and Technical Communication
- Nutrition
- Social and Behavioral Sciences

GRADUATE PROGRAMS

Graduate degree programs, as shown in the “East College Graduate Degrees and Majors” table, page 137, are offered by the faculty within the college.

ADMISSION REQUIREMENTS

Applicants to East College graduate degree programs must meet the minimum Division of Graduate Studies academic requirements. Individual programs may require additional supporting materials. Applicants should refer to requirements specified by each graduate degree program.

COLLEGE FACILITIES

East College is located at the Polytechnic campus. The easily accessible campus offers students modern mediated classrooms, state-of-the-art computer facilities, electronic access to library resources, and a range of on-campus housing options. Students also have access to Tempe campus resources and research facilities. A shuttle runs regularly between the two campuses.

ADVISING

Career advising is available on campus and through Career Services at Tempe campus. Academic advising is provided by the department offering the degree program.

Applied Biological Sciences

Master’s Program

WANER Third Floor

Ward W. Brady, Chair

Professors: Brady, Brock, Mushkatel, Sommerfeld, Stutz
Associate Professors: Green, Martin, Miller, Steele, Whysong
Assistant Professors: Hu, Marcum
Lecturer: Huffman

The faculty of the Department of Applied Biological Sciences at the Polytechnic campus offer a program leading to the MS degree in Applied Biological Sciences. Selected
The MS degree in Applied Biological Sciences is supported by faculty with backgrounds in botany, ecology, rangeland resources, urban horticulture, wildlife biology, and a wealth of field experiences. Research projects in wildlife inventory, habitat restoration, GIS and remote sensing, and urban horticulture, among others, help support the applied nature of the program. The MS degree in Applied Biological Sciences is designed to train students who are scientifically competent, aware of the necessity of communicating the importance of sound ecosystem management, and able to work with numerous groups interested in biological resources. Students have the opportunity to study in the areas of applied biotechnology, plant systematics, urban horticulture, and wildlife and restoration ecology. All students are required to complete a core of graduate courses, conduct a research project under the direction of a faculty member, and prepare and defend a research thesis.

**MASTER OF SCIENCE**

**Admission.** Applicants to the program are expected to meet the minimum requirements for admission to the Division of Graduate Studies. In addition, scores from the Graduate Record Examination or Miller Analogies Test are required. Applicants are expected to have completed 18 semester hours in biological sciences or closely related courses. Applicants not meeting these requirements may be considered for admission with deficiencies.

Submit the following separate application materials to

DEPARTMENT OF APPLIED BIOLOGICAL SCIENCES
ARIZONA STATE UNIVERSITY
7001 E WILLIAMS FIELD ROAD
MESA AZ 85212

1. a statement of intent (maximum 600 words) explaining (a) the applicant’s interest in applied biological sciences, (b) the applicant’s academic background, and (c) the applicant’s educational objectives;
2. three letters of recommendation from references who are qualified to comment on the applicant’s potential in the selected area of study; and
3. a résumé.

**Application Deadlines.** For fall enrollment, application materials are due in the Department of Applied Biological Sciences and the Division of Graduate Studies on March 15. For spring enrollment, application materials are due in the Department of Applied Biological Sciences and the Division of Graduate Studies on October 15.

**Selection Procedures and Notifications.** School faculty evaluate the applications and supporting materials and recommend to the Division of Graduate Studies whether the applicant should be granted regular or provisional admission or if admission should be denied. If admission is

¹ If a major offers concentrations, one must be selected unless noted as optional.

² Doctoral courses for this interdisciplinary program administered by the Tempe campus are offered at the Polytechnic campus.
provisional, the Division of Graduate Studies specifies in its letter of admission the provisions to be met to gain regular status. The school informs successful applicants of the procedures for enrollment.

Program of Study. A minimum of 30 semester hours of approved graduate course work is required. All students are required to complete a research methods course. First-year students are expected to complete ABS 591 Seminar. Second-year students are required to complete ABS 691 Seminar in the fall semester. All students are also expected to complete three semester hours of research and three semester hours of thesis. The remaining hours are chosen to support the student’s educational objectives.

Foreign Language Requirements. None.

Comprehensive Examination. None.

Thesis Requirements. A thesis is required.

Final Examination. A final oral examination covering the thesis and related subject matter is required.

RESEARCH ACTIVITY

The faculty of the Department of Applied Biological Sciences are engaged in a number of research projects of global, national, regional, or state importance. Scholarship in service to community is the hallmark of a state-supported university and continues to be in East College.

A few examples of this scholarship are a project involved in “The Adaptation of Sonoran Desert Vegetation to Wildfire on the Tonto National Forest”; a “Wildlife Vegetation Inventory for Northern Phoenix”; “Relationships of Temperate Legumes in North America and Eurasia”; “Flora of the Usery Mountains, Maricopa County”; an extensive program in “Transborder Watershed Resources”; and an investigation into the “Effects of Livestock Use Levels on Riparian Trees on the Verde River.”

APPLIED BIOLOGICAL SCIENCES (ABS)

E ABS 402 Vegetation and Wildlife Measurement. (3)
Spring
Vegetation inventory, sampling, monitoring, and evaluation. Methods of estimating wildlife populations, activity, and home ranges. Lecture, lab. 1 weekend field trip. Prerequisites: ABS 207, 350, 370.

E ABS 425 Soil Classification and Management. (3)
Selected semesters
Principles of soil genesis, morphology, and classification. Presents management and conservation practices. Prerequisite: ABS 225 (or its equivalent).

E ABS 430 Watershed Management. (3)
Selected semesters
Hydrologic, physical, biological, and ecological principles applied to watershed management. Impact of ecosystem manipulations on water yield and quality. Lecture, 1 weekend field trip. Prerequisite: ABS 225.

E ABS 433 Riparian and Wetland Ecology. (3)
Selected semesters
Functions and components of riparian and wetland ecosystems and the management of these systems. Lecture, field trips. Prerequisite: ABS 370.

E ABS 434 Soil Ecology. (3)
Selected semesters
Soils viewed in an ecosystem context, soil-plant relationships, nutrient budgets, and abiotic factors that influence soil processes. Lecture, lab, field trips. Prerequisites: ABS 225, 226, 370.

E ABS 435 Ecological Modeling. (3)
Fall
Simulation modeling as a tool to study ecological processes and human impact on ecosystems and organisms. Lecture, lab. Prerequisites: ABS 350, 370.

E ABS 440 Ecological Restoration Techniques. (3)
Fall
Techniques for ecological restoration, riparian and wetland restoration, and monitoring restoration success. Prerequisites: ABS 370, 380.

E ABS 441 Ecological Restoration Practicum. (1)
Fall
Field experience in the evaluation and monitoring of implemented ecological restoration projects. Lab, field trips. Fee. Pre- or corequisite: ABS 440.

E ABS 460 Organic Gardening. (2)
Fall
Applies principles and practices of organic gardening in the low desert, including environmental impacts of modern food production. 1 hour lecture, 3 hours lab. Fee. Prerequisite: ABS 260.

E ABS 462 Greenhouse/Nursery Management. (4)
Spring
Greenhouse structures, environment, and nursery operations. Includes irrigation, nutrition, and other principles relative to production of nursery crops. 1 hour lecture, 3 hours lab. Fee. Prerequisite: ABS 260.

E ABS 463 Golf and Sports Turf Management. (3)
Fall
Selection, establishment, and maintenance of turf grasses bred specifically for golf and sports facilities. Integrated lecture/lab. Cross-listed as PGM 463. Credit is allowed for only ABS 463 or PGM 463.

E ABS 465 Senior Enterprise Project. (2)
Fall and Spring
Selection and completion of an urban horticulture project with faculty advisor approval related to the field of study. Fee. Prerequisite: senior standing.

E ABS 470 Mammalogy. (3)
Fall
Classification and biology of mammals, emphasizes North America. Pre- or corequisite: ABS 355.

E ABS 471 Ornithology. (3)
Spring
Classification and biology of birds, emphasizing North America. Lecture, lab, field trips. Fee. Prerequisite: ABS 355.

E ABS 475 Habitat Management for Small Wildlife. (4)
Fall
Habitat management considerations and practices for small game and nongame wildlife species in North America. Lecture, lab, field trips. Fee. Prerequisites: ABS 370, 376, 380.

E ABS 476 Big Game Habitat Management. (3)
Spring
Habitat management considerations and practices for big game wildlife species in North America. 2 hours lecture, 3 hours lab. Prerequisites: ABS 370, 376. Pre- or corequisite: ABS 402.

E ABS 480 Ecosystem Management and Planning. (3)
Selected semesters
Principles of ecosystem management, with emphasis on economic and policy constraints on the planning process. Risk assessment and management. Lecture, 1 weekend field trip. Prerequisite: senior standing or instructor approval.

E ABS 481 Riparian and Wetland Restoration. (3)
Fall
Principles and problems in the restoration of degraded riparian and wetland ecosystems. Construction of wetlands. Prerequisites: ABS 433, 440.

E ABS 482 Ecology and Planning for Restoration. (3)
Spring
Ecological principles and resource planning processes applied to the restoration of degraded landscapes. Prerequisites: ABS 225, 372, 440.

E ABS 483 Restoration Planning Practicum. (2)
Spring
Field experience in ecological restoration techniques, selection of mitigation techniques, and implementation planning. Lab, extended field trip over spring break. Fee. Pre- or corequisite: ABS 482.
Applied Psychology

Master’s Program

www.poly.asu.edu/ecollege/appliedpsych

SUTON Third Floor

Roger W. Schvaneveldt, Faculty Head

Professors: Cooke, Schvaneveldt
Assistant Professors: Becker, Gray

The faculty in the Applied Psychology program at the Polytechnic campus offer a graduate program leading to the MS degree in Applied Psychology.

Admission. In addition to the general requirements for admission to the Division of Graduate Studies, the Applied Psychology program requires

1. an undergraduate degree (not necessarily in psychology) from a regionally accredited educational institution (minimum 3.00 GPA);
2. GRE scores on the verbal and quantitative tests;
3. three letters of recommendation;
4. a personal statement that includes background, interests, qualifications, and goals; and
5. TOEFL scores for applicants who are not native English speakers.

Requirements. The MS degree requires the completion of 32 semester hours with grades of “B” (3.00) or higher. The requirements are shown in the following table:

<table>
<thead>
<tr>
<th>Course Code</th>

Thesis or applied project...

* Students writing a thesis may count a maximum of six semester hours of 599 Thesis credit toward the minimum requirements for their degree.

The PSY 594 credits require attending departmental colloquia and special presentations on research, applications, and professional issues. Students have the option of completing a thesis or an applied project to develop and demonstrate professional knowledge and skills.

Students who plan to go on to a doctoral program are encouraged to complete a thesis. Work on the thesis will continue for at least a calendar year under faculty supervision. The first three credits will be devoted to developing an idea and preparing a proposal for approval by a faculty
committee. The next three credits will allow for preparing the details of research design and data collection for the thesis (materials, computer programs, experimental text beds, questionnaires, etc.). The final six credits will be devoted to collecting and analyzing data and writing and revising the thesis under the direction of the advisor. Students will defend the thesis in an oral exam.

Students selecting the applied project option will, under the guidance of an advisor, allocate the 12 semester hours to a combination of research, practicum, project activities, and report writing appropriate to the goals of the student and the program and the availability of practicum or internship opportunities. In all cases, the project will culminate in a substantial written report followed by a comprehensive oral examination covering the project and other materials from required courses.

PSYCHOLOGY (SCIENCE AND MATHEMATICS) (PSY)

For more PSY courses, see the “Course Prefixes” table or access www.asu.edu/aad/catalogs/courses. The campus designation—D (Downtown Phoenix), E (Polytechnic), M (Tempe), or W (West)—may affect how courses may be used to fulfill requirements.

E PSY 438 Human-Computer Interaction. (3) once a year
Theories, methods, and findings concerning the usability of computer systems and the design of effective user interfaces. Lecture, discussion, projects. Prerequisite: PSY 437.

E PSY 439 Training and Skill Acquisition. (3) once a year
Theories, methods, and findings concerning the acquisition of skilled performance and the design of effective training systems. Lecture, discussion, projects. Prerequisite: PSY 437.

E PSY 440 Industrial/Organizational Psychology. (3) once a year
Examines personnel selection, performance assessment, job and workplace design, job satisfaction, organizational behavior, management systems, and industrial safety. Lecture, discussion, projects. Prerequisite: PSY 230 (or an equivalent statistics course).

E PSY 560 Advances in Theoretical Psychology. (3) fall
Covers new empirical and theoretical work in psychology with emphasis on its applicability. May be repeated for credit up to 9 hours. Prerequisites: PSY 323, 324.

E PSY 561 Methods in Applied Psychology. (3) fall
Methods of particular value in applied settings, including usability testing, prototyping, and use of computers in data collection and analysis. May be repeated for credit up to 9 hours. Prerequisites: PSY 290, 330 (or 530).

E PSY 562 Advanced Human Factors. (3) fall
In-depth study of the issues, methods, and findings in industrial and organizational psychology. Prerequisite: PSY 437.

E PSY 563 Advanced Industrial and Organizational Psychology. (3) spring
In-depth study of the issues, methods, and findings in industrial and organizational psychology. Prerequisite: PSY 440.

E PSY 594 Conference and Workshop. (1–12) selected semesters
Omnibus Courses. For an explanation of courses offered but not specifically listed in this catalog, see “Omnibus Courses,” page 63.

School of Educational Innovation and Teacher Preparation

www.poly.asu.edu/ecollege/education

Bette S. Bergeron, Director

The School of Educational Innovation and Teacher Preparation is part of East College and consists of two departments: Teacher Education and Administration and Physical Education. Each department offers an array of master’s degree programs that focus on supporting the professional development and leadership skills of educators and administrators through practice-orientated course work and applied research.

Elementary Education

Postbaccalaureate Program

www.poly.asu.edu/ecollege/elementaryed

480/727-1103
SUTON 240E

Bette S. Bergeron, Director

The School of Educational Innovation and Teacher Preparation offers a postbaccalaureate program leading to certification in Elementary Education (K–8). In this “TEACH ME” program, students also have the option of completing a Master of Education degree in Curriculum and Instruction with a concentration in professional studies, once all requirements of state certification have been met.

TEACH ME is designed to provide students with a fast-track path to initial certification in elementary education, focused field experiences, and the professional knowledge to build a deep understanding of quality instructional practices. The program consists of foundation courses that are offered in an online hybrid format, pedagogical methods courses that are aligned with directed field experiences, and a full semester of student teaching.

The program allows students to use up to 18 semester hours of their initial certification course work toward a master’s degree.

Admission. Students must seek admission to the Polytechnic campus Education program and the Division of Graduate Studies for acceptance into this program. Candidates must have a minimum GPA of 3.00 from previous postsecondary programs. Applicants with grades below minimum levels may be considered for provisional admittance when
evidence exists of the candidate's potential for outstanding performance in a master's program. For more information, call the Education office at 480/727-1103.

Program of Study. The certification phase of the TEACH ME program consists of two distinct blocks of classes: foundational and pedagogical course work (which includes student teaching). All foundation courses must be completed before taking classes in pedagogy. All pedagogy courses must be taken with a field experience practicum. Once all requirements for certification are successfully met, eligible students can complete the MEd with 12 additional semester hours of graduate course work.

A total of 45 hours is required for Arizona certification in elementary education. The program plan of study for the certification course work follows.

Foundations
EDC 480 Theory of Mathematics and Science Instruction ...........3
EDP 313 Childhood and Adolescence...........................................3
SPE 311 Orientation to Education of Exceptional Children............3
Total .................................................................................................9

Pedagogy
EDC 405 Classroom Management K–12.......................................3
EDC 460 Principles of Curriculum and Instruction in the K–8 Classroom .........................................................3
EDC 474 Field Experience ............................................................1
EDC 484 I: Student Teaching in the Elementary School.............10
EDC 485 Science Instruction in the K–8 Classroom.................10
EDC 495 Mathematics Instruction in the K–8 Classroom ..........10
EDC 560 Principles of Instructional Technology* .....................3
EDC 565 Research-Based Phonics for the K–8 Classroom* .......3
EED 538 Teaching Social Studies with Literature* .....................3
ELL 515 Structured English Immersion (SEI) Methods* .........3
RDG 505 Developmental Reading ...........................................3
SPC 598 ST: Inclusionary Practices* ...........................................3
Total ...............................................................................................41

* 500-level courses can be applied to the MEd program.

Elementary Education. The school is currently developing a TEACH ME program for secondary education. For more information about the secondary option, call the Education office at 480/727-1103.
Curriculum

The doctoral curriculum typically requires a minimum of three years of graduate study. The design of the program includes a close apprenticeship under the supervision of a faculty mentor. For this reason, students are required to spend at least one year as full-time students on campus at the Polytechnic campus. The program makes use of one teaching and two research internships to help prepare the candidate for work in the academic field. The curriculum provides students with a core set of courses, seminars, internships, and research experiences. Each student’s program of study builds upon core requirements and is uniquely designed around individual interests, in consultation with the student’s advisor. An important feature of the program in physical education pedagogy is that students are encouraged to draw on the scholarly resources of the entire university and develop a cross-disciplinary program of study that includes courses from several departments.

Requirements

The following domains make up the physical education pedagogy PhD Program:

Area of Concentration. Thirty semester hours pertaining to physical education pedagogy are required. While the majority of these hours must be spent in physical education, these may include course work in closely related fields such as education, exercise and wellness, and kinesiology.

Cognate Study. Twelve semester hours are taken to broaden the student’s understanding of the conceptual base and issues underlying the study of curriculum and instruction. Students take related work outside their declared areas of concentration. Students are expected to choose courses that have a clear link to their dissertation efforts. Cognate courses can be drawn from a broad range of offerings across the university.

Inquiry and Analysis. Fifteen semester hours of empirical analysis and inquiry foundations are required in advanced design and data analysis and/or qualitative research methods.

Core Requirements in Curriculum and Instruction. Six semester hours of the core (interdisciplinary research seminar in curriculum and instruction and curriculum theory and practice) are required as the Curriculum and Instruction core.

Practicum and Integrative/Professional Development Seminars. Four semester hours of research and two semester hours of teaching internships are required to broaden the training and experience of students.

Dissertation and Independent Research. Twenty-four semester hours of independent research and dissertation leading to completion of an approved dissertation are required.

Admission

See “Doctor of Philosophy,” page 79, for general requirements.

In addition to meeting minimum Division of Graduate Studies admission requirements, each applicant must provide the following:

1. a letter of career goals and statement of reasons for seeking the interdisciplinary PhD in Curriculum and Instruction,
2. Graduate Record Examination (GRE) verbal and quantitative test scores,
3. a sample of written work, and
4. three academic letters of recommendation.

One year of full-time teaching experience at the appropriate level, or its equivalent, is strongly recommended. In the absence of prior teaching experience, a teaching internship is required but may not be counted toward the PhD degree.

Admission decisions are based upon the compatibility of the applicant’s career goals with the purpose of the degree program, previous academic training and performance, GRE scores, letters of recommendation, and the availability of a potential mentor in the candidate’s concentration area. It should be noted that, because of enrollment limits, applicants who meet minimum requirements are not automatically admitted.

For more information, see “Interdisciplinary Doctoral Program,” page 224, or access the Web site at coe.asu.edu/programs.

PHYSICAL EDUCATION—MPE

The focus of the Master’s of Physical Education (MPE) degree is to provide teachers with access to their expertise in areas of academic specialization. The profession of teaching demands that educators stay abreast of new developments in their content area. The MPE degree gives teachers the flexibility to design a program of study that enhances their interests and professional specialization.

The purpose of the MPE program is to produce graduates who have current knowledge of curriculum, instructional practices, administrative procedures, and research in physical education and sport environments. Emphasis is placed on improving instructional effectiveness and developing quality sport and physical education programs in the school setting. Two areas of focus are K–12 physical education, including elementary, secondary, and adapted physical education experiences, and physical education pedagogy with a research focus.

Degree Requirements

Applicants admitted to the MPE program must hold a valid teaching certificate or have previous teaching or coaching experience for entry into the MPE degree program. Students are required to have a BS, BA, or BAE degree with emphasis in physical education, or fulfill undergraduate deficiencies. In addition, applicants must meet the Division of Graduate Studies academic standards.

A minimum of 33 semester hours of course work and a final written comprehensive examination is required to complete the degree. The MPE is a nonthesis degree program. Course work includes a required core (21 semester hours), cognate (six semester hours), and recommended electives (six semester hours).
The Application Process
See “Department of Teacher Education and Administration,” page 144.

Admission Requirements
See “Department of Teacher Education and Administration,” page 144.

Information
For more information about the MPE degree, visit SUTON 201G, call 480/727-1768, send e-mail to darst@asu.edu, or write

PHYSICAL EDUCATION EAST (PPE)

PPE 494 Special Topics. (1–4) selected semesters
Topics may include the following:
• Motor Development

PPE 550 Physical Education for the Elementary School. (3) fall, spring, summer
Scope and values of physical education in elementary schools. Methods, materials, and practices in teaching for primary through upper grades. Integrated lecture/lab. Fee. Prerequisite: field experience or instructor approval.

PPE 555 Physical Education in the Secondary School. (3) fall and spring
Current trends and theories such as elective programs, coed classes, legal issues, contract teaching, curriculum, and administration. Integrated lecture/lab. Fee. Credit is allowed for only PPE 555 or 355. Prerequisite: field experience or instructor approval.

PPE 560 Adapted and Inclusive Physical Education. (3) fall, spring, summer
Teaching individuals with disabilities physical skills and activities. Integrated lecture/lab. Credit is allowed for only PPE 560 or 360.

PPE 565 Teaching Physical Activity Concepts. (3) fall, spring, summer
Teaching physical activity concepts in PE settings. Analyzes and critiques state and national physical education standards. Integrated lecture/lab. Credit is allowed for only PPE 565 or 365. Prerequisites: ENG 101, 102; EXW 300 (or its equivalent).

PPE 570 Research on Teacher Education in Physical Education. (3) fall, spring, summer
Discusses current research on teacher education across fields, with an emphasis on physical education pedagogy. Integrated lecture/lab. Credit is allowed for only PPE 570 or 370. Prerequisite: EXW 300 (or its equivalent).

PPE 575 Coaching Methods for Youth Sports. (3) fall, spring, summer
Scope and values of coaching K–12. Methods, materials, and practice in coaching philosophy. Best practices and activities for grades K–12. Integrated lecture/lab. Credit is allowed for only PPE 575 or 375.

PPE 584 Internship. (1–12) selected semesters
Topics may include the following:
• Student Teaching in Physical Education. (6–12)

Fall and spring

143
EAST COLLEGE

**Department of Teacher Education and Administration**

**Master's Programs**

[www.poly.asu.edu/ecollege/education](http://www.poly.asu.edu/ecollege/education)

480/727-1103

SUTON 240E

**Bette S. Bergeron, Interim Chair**

**Professor:** Bergeron

**Assistant Professors:** Marble, Smith

**Clinical Assistant Professors:** Gomez, Molina-Walters, White-Taylor

**Senior Lecturers:** Stever, Wenhart

**Lecturers:** Foley, Oliver, Prest, Rinkol, Rome

The master’s programs offered through the Department of Teacher Education and Administration include the MEd in Curriculum and Instruction, MEd in Educational Administration and Supervision, and MEd in Special Education. Each of these programs prepares scholarly professionals to become educational leaders in their communities and the state. The programs embed the mission of the Polytechnic campus to prepare individuals through applied and practical experiences. Included within these programs are options for a variety of state endorsements; these options are planned in conjunction with the graduate advisor.

**Admission.** Candidates must be admitted to the Division of Graduate Studies and to the Polytechnic campus Education program. Admission does require that candidates have a minimum 3.00 GPA from previous postsecondary programs. Applicants with grades below minimum levels may be considered for provisional admittance when evidence exists of the candidate’s potential for outstanding performance in a master’s program. Additional requirements include submitting a résumé and three letters of recommendation. For complete application information, call the Education office at 480/727-1103, or see the Web site at [www.poly.asu.edu/ecollege/education](http://www.poly.asu.edu/ecollege/education).

**Examinations.** All MEd programs require successful completion of a written comprehensive examination or applied project. This requirement must be fulfilled in conjunction with the Education programs at the Polytechnic campus (i.e., applied project courses cannot be transferred). Written examinations focus on the specialized content of the specific MEd program of study and are administered and evaluated by program faculty. Applied projects are approved by and developed under the guidance of program faculty. If the student should fail the written examination or applied project, the student must seek approval for reexamination or resubmission of the project from the supervisory committee and the Division of Graduate Studies.

**MASTER OF EDUCATION IN CURRICULUM AND INSTRUCTION**

The MEd in Curriculum and Instruction is designed specifically for practicing educators. This degree includes three areas of concentration: English as a second language (ESL), instructional media in K–12 schools, and professional studies. The ESL concentration includes the course work and practicum experiences required for the state of Arizona’s full ESL endorsement. The concentration in instructional media provides educators with the opportunity to develop skills in a variety of areas, including instructional technology, video editing, and school resource media. The professional studies concentration is highly flexible, and affords students the opportunity to focus on an academic content area that best suits their professional needs. For example, with this concentration students can pursue endorsements in reading, gifted education, and early childhood education. There is also a new area of emphasis on science education; the course work is designed to prepare students to become highly qualified in this critical content area.

**Program of Study.** The MEd degree in Curriculum and Instruction requires 30 semester hours of course work, including the following:

- Foundations ................................................................. 6
- Concentration .............................................................. 15
- Research .......................................................................... 6
- Electives .......................................................................... 3
- Total .............................................................................. 30

Students are encouraged to plan their program of study in consultation with the graduate advisor, particularly when they are pursuing one of the state’s endorsements as part of the degree program. The program of study is approved by the student’s supervisory committee and the Division of Graduate Studies, and should be filed as early as possible.

---

**E PPE 595 Research on Teaching in Physical Education. (3)**

*fall, spring, summer*

Contemporary research and theory on teaching across fields, with an emphasis on physical education pedagogy; provides a practical research experience. Integrated lecture/lab. Prerequisite: EXW 300 (or its equivalent).

**E PPE 593 Applied Project. (1–12)**

selected semesters

**E PPE 594 Conference and Workshop. (1–12)**

selected semesters

**E PPE 598 Special Topics. (1–4)**

Topics may include the following:

- Adventure Programming in K–12 Physical Education. (3)
- Coaching Foundations. (3)
- Innovative Curriculum and Instruction in K–12 Physical Education. (3)
- Teaching Health Concepts. (3)

**Omnibus Courses.** For an explanation of courses offered but not specifically listed in this catalog, see “Omnibus Courses,” page 63.
MASTER OF EDUCATION IN EDUCATIONAL ADMINISTRATION AND SUPERVISION

The focus of the MEd in Educational Administration and Supervision is to prepare educators for administrative roles in pre-K–12 schools, specifically as principals. The degree requires 36 semester hours of course work, including the practicum and experiences required by the state for administrative certification. The program is aligned with the national ISSLC standards for school leaders.

Program of Study. The MEd degree in Educational Administration and Supervision requires 36 semester hours of course work, including the following:

Foundational core................................................................. 6
Administrative core............................................................. 27
Internship ............................................................................. 3
Total ..................................................................................... 36

In this program, students have the option of seeking state certification as a pre-K–12 school administrator; this is not a requirement of the program, however. Students who are seeking the state’s administrative credential must work closely with their graduate advisor to ensure that all required course work and experiences for certification are met within their program of study. Students must also meet additional state requirements for certification, including (but not limited to) three years of classroom teaching and successful completion of the state’s administrative exam, before becoming certified as a school administrator. As these requirements do change, students are responsible for remaining in contact with the Department of Education’s certification office to ensure that all current requirements are being met.

MASTER OF EDUCATION IN SPECIAL EDUCATION

The MEd in Special Education is currently in development and will be offered beginning in the spring semester of 2007. This degree will include an option for state certification in pre-K–12 cross-categorical special education. Students interested in the MEd in Special Education should call the school at 480/727-1103 for updates on its implementation.

EARLY CHILDHOOD EAST (EAC)

E EAC 494 Special Topics. (1–4)
selected semesters

E EAC 594 Conference and Workshop. (1–12)
selected semesters

E EAC 596 Special Topics. (1–4)
selected semesters

Omnibus Courses. For an explanation of courses offered but not specifically listed in this catalog, see "Omnibus Courses," page 63.

EDUCATION EAST (EDC)

E EDC 494 Special Topics. (1–4)
selected semesters

Topics may include the following:
- Classroom Management. (3)
- Professional Knowledge

E EDC 501 Multicultural Education. (3)
fall, spring, summer

Examines the multicultural debate as a profound ideological struggle over the values of American culture.

E ELL 484 Internship. (1–12)
selected semesters

E ELL 494 Special Topics. (1–4)
selected semesters

E ELL 501 Multicultural Education. (3)
fall, spring, summer

Examines the multicultural debate as a profound ideological struggle over the values of American culture.

E ELL 505 Language Minority Education. (3)
fall, spring, summer

Historical, philosophical, theoretical, pedagogical, and legal foundations of language minority education in the United States. Credit is allowed for only ELL 505 or 405.

E ELL 510 Linguistics: First- and Second-Language Acquisition and Use. (3)
fall, spring, summer

Examines current theories of first- and second-language acquisition and their application to ELL pedagogical contexts. Credit is allowed for only ELL 510 or 410.

E ELL 515 Structured English Immersion (SEI) Methods. (3)
fall, spring, summer

Addresses the role of language and culture in teaching, program types, and specific SEI strategies for teaching English Language Learners (ELLs). Credit is allowed for only ELL 515 or 415.

E ELL 516 Advanced SEI Methods for ELLs. (3)
fall, spring, summer

More fully prepares teachers for linguistically diverse classrooms in which there are students learning through SEI methodology. Credit is allowed for only ELL 516 or 416. Prerequisite with a grade of “C” or higher: ELL 515 (or its equivalent).

E ELL 520 Literacy Methods for English Language Learners (ELLs), (3)
fall, spring, summer

Teaching reading and writing to English Language Learners (ELLs) with emphasis on integrated curriculum and literature-based instruction. Credit is allowed for only ELL 520 or 420.
E ELL 525 Assessment and Evaluation for English Language Learners (ELLs). (3) 
fall, spring, summer
Discusses assessment methods for English Language Learners (ELLs) in the K–12 classroom through psychometric and sociocultural models of assessment. Credit is allowed for only ELL 525 or 425.

E ELL 530 Community and Parental Involvement in Language Minority Education. (3) 
fall, spring, summer
Analyzes home-school collaboration using historical, educational, psychological, ethnic-social diversity, and sociological perspectives.

E ELL 535 Computer-assisted Language Learning (CALL) for English Language Learners (ELLs). (3) 
fall, spring, summer
Examines current theories and practices surrounding the feasibility and efficacy of employing computer technology in ELL instruction.

E ELL 584 Internship. (1–12) 
selected semesters
E ELL 594 Conference and Workshop. (1–12) 
selected semesters
E ELL 598 Special Topics. (1–4) 
selected semesters

Omnibus Courses. For an explanation of courses offered but not specifically listed in this catalog, see “Omnibus Courses,” page 63.

INSTRUCTIONAL MEDIA (IMD)

E IMD 494 Special Topics. (1–4) 
selected semesters
E IMD 564 Multimedia Applications in Instruction. (3) 
fall, spring, summer
Utilizes various forms of multimedia and authoring software to create materials and instruction. Integrated lecture/lab. Fee.

E IMD 566 Assessment and Evaluation of Media Applications. (3) 
fall, spring, summer
Examines a variety of strategies in assessing learning, collecting and evaluating data, and evaluating technology resources for classroom integration.

E IMD 572 Media Collection and Development. (3) 
fall, spring, summer
Explores the identification, selection, acquisition, and evaluation of a collection of library resources for a specific community of users. Integrated lecture/lab.

E IMD 574 Organization and Administration of School Library Media. (3) 
fall, spring, summer
Explores the role of the school library media specialist and program as it relates to the educational community. Integrated lecture/lab. Prerequisite: EDC 560.

E IMD 576 Social and Ethical Issues in Educational Media. (3) 
fall, spring, summer
Examines the social, ethical, legal, and human issues surrounding the use of technology in K–12 schools. Integrated lecture/lab. Prerequisite: EDC 560.

E IMD 594 Conference and Workshop. (1–12) 
selected semesters
E IMD 598 Special Topics. (1–4)

Exercise and Wellness

Master’s Program
www.poly.asu.edu/ecollege/wellness
480/727-1945
EAW 109

William J. Stone, Chair
Professor: Stone
Associate Professors: Swan, Tudor-Locke
Assistant Professor: Adams
Senior Lecturer: Woodruff
Lecturer: Sebren

The faculty of Exercise and Wellness at the East College offer a graduate program leading to the MS degree in Exercise and Wellness. Faculty also participate in an interdisciplinary PhD program in Physical Activity, Nutrition, and Wellness with concentrations in exercise and wellness, and
MASTER OF SCIENCE

All applicants for the MS degree program in Exercise and Wellness are required to submit scores from the Graduate Record Examination (GRE). Admission decisions are based upon previous academic training and performance, GRE scores, recommendations, and the availability and compatibility of research interests with a potential mentor. International applicants whose native language is not English must also submit a Test of English as a Foreign Language score. Applications are reviewed by faculty only once a year. Priority is given to applications completed by January 15. The program requires a minimum of 30 semester hours, including 12 semester hours of research course work (EXW 500, 501, 599), and 18 semester hours of EXW graduate concentration courses. Note that students writing a thesis may count a maximum of six semester hours of 599 Thesis credit toward the minimum requirements for their degree; for more information, see “Thesis or Equivalent Requirements,” page 76. Course work is selected by the student in consultation with an advisor and supervisory committee.

Deficiencies. Applicant transcripts are evaluated to assure competency in the following areas: health behavior change (health psychology), use of computers, basic nutrition, basic wellness, exercise prescription, and exercise testing. Competency in areas considered to be prerequisite to each of the listed competencies are also evaluated. Deficiencies are noted at the time of admission and may be satisfied by completing undergraduate or graduate courses or by a competency examination.

Foreign Language Requirements. None.

Thesis Requirements. A thesis is required.

Final Examination. A final oral examination in defense of the thesis is required.

RESEARCH ACTIVITY

Research in Exercise and Wellness is enhanced by the existence of research laboratories. Extensive research is also conducted in the field (work site, community, school). The research of Exercise and Wellness faculty and graduate students focuses on the fitness, health, and wellness benefits of healthy lifestyles, such as regular physical activity, sound nutrition, and effective stress management. The focus is also on physical activity and disease prevention. All groups in the developmental spectrum (children to senior adults) are studied. Among the areas of current interest to faculty and graduate students are physical activity and fitness program effectiveness (strength, cardiovascular fitness, flexibility, and body composition), obesity, women’s health issues, motivation to adhere to healthy lifestyles, physical activity and fitness assessment, and environmental health and wellness issues.

EXERCISE AND WELLNESS (EXW)

E EXW 420 Exercise Testing. (3)
fall and spring
Theoretical basis and practical application of pre-exercise screening, exercise testing, estimates of energy expenditure, and interpretation of results. Lecture, lab. Fee. Prerequisites: EXW 315; current CPR certification.

E EXW 425 Exercise Prescription. (3)
fall and spring
Theoretical basis for and application of general principles of exercise prescription to various ages, fitness levels, and health states. Prerequisites: EXW 320, 330. Pre- or corequisite: EXW 420.

E EXW 442 Physical Activity in Health and Disease. (3)
spring
Examines the role of physical activity and fitness in the development of morbidity and mortality throughout the human life span. Prerequisite: EXW 315

E EXW 444 Epidemiology. (3)
fall
Introduces epidemiological concepts and research literature, including physical activity, nutrition, tobacco, alcohol, injury prevention, and safe sex. Prerequisites: EXW 300, 310, 320. Pre- or corequisites: EXW 325, 350.

E EXW 450 Cultural and Social Issues in Exercise and Wellness. (3)
fall and spring
Examines contemporary sociocultural issues and social determinants of health and physical activity. Focuses on health disparities, obesity, and social stressors. Prerequisites: EXW 300; PGS 101.

E EXW 460 Resistance Training Application and Theory. (3)
fall
Fosters critical thinking as it applies to resistance training theory. Pre- or corequisite: EXW 315.

E EXW 500 Research Methods. (1–12)
fall
Introduces the basic aspects of research, including problem selection, literature review, instrumentation, data handling, methodology, and writing the report.

E EXW 501 Research Statistics. (3)
spring
Statistical procedures; sampling techniques, hypothesis testing, and experimental designs as they relate to research publications.

E EXW 505 Applied Exercise and Wellness Laboratory Techniques. (3)
spring
Investigative techniques used in the applied exercise testing/prescription laboratory. Emphasizes cardiorespiratory assessment, energy balance, body composition, and electrocardiography. Integrated lecture/lab. Fee.

E EXW 534 Sports and Fitness Conditioning. (3)
fall
Bases of sports and fitness conditioning, including aerobic and anaerobic power, strength, flexibility, and analysis of conditioning components for sports and fitness.

E EXW 536 Physiological Aspects of Physical Activity and Chronic Disease. (3)
fall
Role of physiological mechanisms associated with acute and long-term physical activity and its influence on chronic disease and wellness.

E EXW 538 Obesity, Exercise, and Health. (3)
spring
Critically examines scientific and medical evidence concerning obesity, exercise, and health across the life span.

E EXW 540 Psychosocial Issues in Exercise and Wellness: Stress, Coping, and Resilience. (3)
fall
Critically explores the impact of psychological and social factors on human wellness. Lecture, seminar, group discussion.
E EFW 542 Health Promotion. (3)  
spring  
Theory and research concerning fitness and wellness programs in nutrition, physical activity, smoking cessation, and stress management.
E EFW 544 Fitness/Wellness Management. (3)  
fall and spring  
Development of the fitness/wellness industry. Planning, organizing, promoting, and managing fitness/wellness programs.
E EFW 591 Seminar. (1–12)  
selected semesters  
E EFW 599 Thesis. (1–12)  
selected semesters  
E EFW 635 Aging and Physical Activity. (3)  
spring  
Examines and discusses the theoretical and applied health-related research on physical activity and aging.
E EFW 640 Analysis of Variance for Exercise and Wellness. (3)  
fall  
Analysis of variance methods with an emphasis on research measures of human performance. Prerequisite: graduate introduction to statistics.
E EFW 642 Exercise Epidemiology. (3)  
spring  
Physical activity, exercise, and physical fitness and the development of chronic disease.
E EFW 643 Correlation/Regression/Multivariate Statistics. (3)  
spring  
Graduate-level statistics course for PhD/master's students who will be doing research in the area of exercise and wellness. Prerequisite: graduate ANOVA course.
Omnibus Courses. For an explanation of courses offered but not specifically listed in this catalog, see “Omnibus Courses,” page 63.

### Multimedia Writing and Technical Communication

#### Certificate Program

[www.poly.asu.edu/ecollege/multimedia](http://www.poly.asu.edu/ecollege/multimedia)  
480/727-1190  
SUTON Third Floor

Barry M. Maid, Faculty Head  
Professor: Maid  
Associate Professor: Stone  
Lecturer: D’Angelo

East College offers a postbaccalaureate certificate in Multimedia Writing and Technical Communication. For more information, call 480/727-1515, or access the Web site at [www.poly.asu.edu/ecollege/multimedia](http://www.poly.asu.edu/ecollege/multimedia).

##### MULTIMEDIA WRITING AND TECHNICAL COMMUNICATION (TWC)

E TWC 401 Principles of Technical Communication. (3)  
fall and spring  
Basic information design principles to produce effective written, oral, and electronic technical communication. Understanding of rhetorical and audience analysis. Pre- or corequisite: TWC 301.

E TWC 403 Writing for Professional Publication. (3)  
selected semesters  
Analyzes the market and examines the publication process, including the roles of the author, editor, and reviewer. Pre- or corequisite: TWC 401.

E TWC 411 Principles of Visual Communication. (3)  
fall and spring  
Basic principles of visual communication in print and electronic media. Understanding graphic and document design, including typography and color. Pre- or corequisite: TWC 401.

E TWC 421 Principles of Writing with Technology. (3)  
fall and spring  
Understanding historical and social impact of technology on writing, with emphasis on multimedia design, computer-mediated communication, and hypertext. Pre- or corequisite: TWC 401.

E TWC 431 Principles of Technical Editing. (3)  
fall and spring  
Basic principles of technical editing (for print and electronic media), including copyediting, reviews, standards, style, and project management. Pre- or corequisite: TWC 401.

E TWC 441 Proposal Writing. (3)  
once a year  
Develops persuasive strategies and themes for researching and writing professional proposals. Pre- or corequisite: TWC 401.

E TWC 444 Manual and Instructional Writing. (3)  
once a year  
Design and development of a user manual, writing instructions, improving graphics and page design, and usability testing. Pre- or corequisite: TWC 401.

E TWC 445 Computer Documentation. (3)  
once a year  
Introduces writing documentation for the computer industry. Pre- or corequisite: TWC 401.

E TWC 446 Technical and Scientific Reports. (3)  
once a year  
Introduces strategies, formats, and techniques of presenting information to technical and scientific audiences. Pre- or corequisite: TWC 401.

E TWC 447 Business Reports. (3)  
once a year  
Introduces strategies, formats, and techniques of presenting information to business and other workplace audiences. Pre- or corequisite: TWC 401.

E TWC 451 Copyright and Intellectual Property in the Electronic Age. (3)  
fall  
Explores issues related to copyright and intellectual property laws, with emphasis on electronic environment. Credit is allowed for only TWC 451 or 551. Prerequisite: TWC 301 or instructor approval.

E TWC 452 Information in the Digital Age. (3)  
spring  
Explores the creation, organization, dissemination, and use of information; the impact of technologies; and surrounding economic, legal, and social issues. Prerequisite: TWC 301 or instructor approval.

E TWC 453 Information and Communications Technology in American History. (3)  
selected semesters  
Explores the historical development of information and related technologies in the United States from colonial times to the present. Credit is allowed for only TWC 453 or 553. Lecture, Internet.

E TWC 454 Information Technology and Culture. (3)  
fall, spring, selected summers  
Explores the historical impact and intersection of communications technology and culture in America. Credit is allowed for only TWC 454 or 554. Lecture, Internet.

E TWC 484 Internship. (1–12)  
fall and spring  
Applies classroom work in a supervised workplace environment. Pre- or corequisite: TWC 411 or 421 or 431.

E TWC 490 Capstone. (3)  
fall and spring  
Development of a professional portfolio, creation of a “culminating document,” and synthesis of undergraduate experience. Prerequisite: instructor approval.
E TWC 501 Principles of Technical Communication. (3)
fall and spring
Basic information design principles to produce effective written, oral, and electronic technical communication. Understanding of rhetorical and audience analysis. Pre- or corequisite: TWC 501.

E TWC 502 Information in the Digital Age. (3)
fall and spring
Introduces writing documentation for the computer industry. Pre- or corequisite: TWC 501.

E TWC 503 Principles of Technical Editing. (3)
fall and spring
Basic principles of technical editing for print and electronic media, including copyediting, reviews, standards, style, and project management. Pre- or corequisite: TWC 501.

E TWC 504 Manual and Instructional Writing. (3)
fall and spring
Design and development of a user manual, writing instructions, improving graphics and page design, and usability testing. Pre- or corequisite: TWC 501.

E TWC 505 Computer Documentation. (3)
fall and spring
Introduces writing documentation for the computer industry. Pre- or corequisite: TWC 501.

E TWC 543 Proposal Writing. (3)
once a year
Develops persuasive strategies and themes for researching and writing professional proposals. Pre- or corequisite: TWC 501.

E TWC 544 Writing for Professional Publication. (3)
fall and spring
Analyzes the market and examines the publication process, including typography and color. Pre- or corequisite: TWC 501.

E TWC 545 Technical and Scientific Reports. (3)
fall and spring
Introduces strategies, formats, and techniques of presenting information to technical and scientific audiences. Pre- or corequisite: TWC 501.

E TWC 546 Business Reports. (3)
fall and spring
Introduces strategies, formats, and techniques of presenting information to business and other workplace audiences. Pre- or corequisite: TWC 501.

E TWC 547 Internship. (1–12)
fall and spring
Applies classroom work in a supervised workplace environment. Pre- or corequisites: TWC 511, 521, 531.

E TWC 548 Special Topics. (1–4)
selected semesters
Omnibus Courses. For an explanation of courses offered but not specifically listed in this catalog, see “Omnibus Courses,” page 63.

Nutrition

Master’s Program

www.poly.asu.edu/ecollege/nutrition
480/727-1728
HSC 1386

Linda A. Vaughan, Chair

Professors: Johnston, Vaughan

Associate Professor: Hampl

Assistant Professors: Winham, Woolf

Lecturers: Dixon, Hall, Shepard

The faculty in the Department of Nutrition, at the Polytechnic campus, offer a graduate program leading to a MS degree in Nutrition. The department also offers a Dietetic Internship program, limited to current MS in Nutrition students, which is accredited by the

COMMISSION ON ACCREDITATION FOR DIETETICS EDUCATION OF THE AMERICAN DIETETIC ASSOCIATION

For an explanation of courses offered but not specifically listed in this catalog, see “Omnibus Courses,” page 63.

Admission. Applications for admission and graduate assistantships are accepted until February 1 preceding the fall semester to which the applicant is seeking admission. In addition to meeting Division of Graduate Studies requirements, students must submit an official record of their scores on the Graduate Record Examination, three letters of recommendation, a résumé of employment and academic experiences, and the completed departmental Supplementary Information Form. Students wishing to be considered for graduate assistantships must also complete the Division of Graduate Studies and departmental forms. The prerequisites for graduate work in Nutrition are as follows: anatomy and physiology with laboratory, biochemistry with
laboratory, general chemistry with laboratory, general nutrition, introductory statistics, microbiology with laboratory, and organic chemistry with laboratory. For admission procedures for the optional Dietetic Internship, see “Dietetic Internship,” on this page.

Program of Study. The program of study consists of a minimum of 30 semester hours. Required courses are NTR 500 RM; Research Methods in Nutrition and NTR 501 Research Methods in Nutrition II (or equivalent courses, with advisor approval), three to six semester hours of 500-level statistics courses approved by an advisor, six semester hours of thesis/research credit, and six semester hours of nutrition seminars selected from NTR 521, 523, 525, 527, 529, 531, 532, and/or 598. Students completing the Dietetic Internship must also complete six semester hours of NTR 580 P: Dietetics Practicum; only three semester hours of NTR 580 may be applied toward the MS degree. Additional courses may be selected upon consultation with an advisor.

Foreign Language Requirements. None.

Thesis Requirements. A thesis is required.

Final Examination. A final oral examination in defense of the thesis is required.

RESEARCH ACTIVITY

The faculty in the Department of Nutrition are engaged in a broad range of research activities. Undergraduate students are encouraged to collaborate with faculty and graduate students in the research process. Department faculty are well recognized for their research in the areas of Vitamin C and phytochemical metabolism, nutrition and exercise, the nutrient intake and status of children and young adults, and the nutritional status of free-living and homebound elderly. Nutrition faculty conduct controlled metabolic feeding studies, analyze national food and nutrient data sets, and assess the nutritional status of children and adults. Interdisciplinary research is conducted in conjunction with agribusiness, anthropology, exercise and wellness, immunology, nursing, and other faculty. For more information, access the Department of Nutrition Web site at www.poly.asu.edu/ecollege/nutrition.

Dietetic Internship. Admission to the Dietetic Internship is limited to the following students with regular or unconditional admission to the Department of Nutrition’s graduate program: (1) graduate students who are currently in good academic standing in the MS degree program in Nutrition at ASU and who have completed at least six graduate semester hours from the ASU Department of Nutrition; and (2) students who have already completed the MS degree in Nutrition from ASU in the past and meet all other admission requirements. Admission to the Dietetic Internship also requires submission of an official Verification Statement documenting successful completion of a Didactic Program in Dietetics (DPD). If DPD requirements have not been met at the time application to the Dietetic Internship is made, students must submit an Intent to Complete form; all DPD courses must be completed before entering the internship. Students must provide documentation that a minimum of 150 hours of clinical experience has been completed within the past five years. Students must complete both the MS degree requirements and the internship practicum requirements to satisfy the Dietetic Internship requirements and establish eligibility to sit for the Registration Examination for Dietitians.

NUTRITION (NTR)

E NTR 441 Advanced Human Nutrition II. (3) spring Metabolic reactions and interrelationships of carbohydrate, lipid, and protein. Prerequisites: BCH 361 and BIO 202 and NTR 241 (or their equivalents).

E NTR 442 Experimental Foods. (3) selected semesters Food product development techniques, food evaluation and testing, and investigation of current research into food composition. 2 hours lecture, 3 hours lab. Fee. Prerequisites: CHM 231; NTR 142.

E NTR 444 Medical Nutrition Therapy. (3) spring and summer Principles of medical nutrition therapy for prevention and treatment of disease and promotion of health. Prerequisites: BIO 201 and 202 and NTR 241 (or their equivalents). CHM 231 is strongly recommended.

E NTR 445 Management of Food Service Systems. (3) fall and spring Standardized methods of quantity food preparation, operation of institutional equipment, institutional menu planning, quantity food experiences. Integrated lecture/lab. Fee. Prerequisites: NTR 142 and 344 (or their equivalents).

E NTR 446 Human Nutrition Assessment Lecture/Laboratory. (3) fall and spring Clinical and biochemical evaluation of nutritional status. 2 hours lecture, 3 hours lab. Fee. Prerequisites: BCH 361, 367; NTR 440 (or 441).

E NTR 448 Community Nutrition. (3) fall and spring Food-related behaviors; organization and delivery of nutrition services; program design, implementation, and evaluation strategies; nutrition assessment of populations. Prerequisite: NTR 241 (or its equivalent).

E NTR 450 Nutrition in the Life Cycle I. (3) fall Emphasizes nutritional needs and problems during pregnancy, lactation, infancy, and childhood. Prerequisite: NTR 100 or 241 (or its equivalent).

E NTR 451 Nutrition in the Life Cycle II. (3) spring Nutritional needs and problems of adults, particularly the elderly. Prerequisite: NTR 100 or 241 (or its equivalent).

E NTR 500 Research Methods. (1–12) selected semesters

Topics may include the following:

- Research Methods in Nutrition I. (3) fall
  Experimental design; overview of data collection techniques; laboratory analyses; statistical methods; development of thesis proposal. Integrated lecture/lab. Fee. Prerequisites: 1 course each in advanced nutrition, biochemistry, and statistics.

E NTR 501 Research Methods in Nutrition II. (3) spring

Reviews survey, focus group, and epidemiologic research; developing questionnaires; analyzing large data sets. Prerequisite: NTR 500. Prerequisite: NTR 501. Corequisite: graduate-level statistics course.

E NTR 521 Nutrition and Immunology. (3) selected semesters

Critical review of current research on nutrient metabolism, immune function. Prerequisites: 1 course each in advanced nutrition and biochemistry.
E NTR 523 Vegetarian Nutrition. (3)  
selected semesters  
Health benefits, nutritional characteristics, potential risks of vegetarian diets. Prerequisites: 1 course each in advanced nutrition and biochemistry.

E NTR 525 Complementary Nutrition. (3)  
selected semesters  
Critical review of functional foods, phytochemicals, nutrient supplements in health promotion. Prerequisites: 1 course each in advanced nutrition and biochemistry.

E NTR 527 Energy Balance and Weight Management. (3)  
selected semesters  
Reviews energy regulation, eating disorders, obesity, weight control methodologies. Prerequisites: 1 course each in advanced nutrition and biochemistry.

E NTR 529 Pediatric Nutrition. (3)  
selected semesters  
Critical review of pediatric disease states and current nutritional therapies. Prerequisites: 1 course each in advanced nutrition and biochemistry.

E NTR 531 Recent Developments in Nutrition. (1)  
fall and spring  
Selected topics addressing current issues in nutrition research. Prerequisites: 1 course each in advanced nutrition and biochemistry.

E NTR 540 Advanced Micronutrient Metabolism. (3)  
fall  
Metabolism of vitamins and minerals, primarily as applied to humans, with research literature emphasized. Prerequisites: 1 course each in basic nutrition and biochemistry.

E NTR 541 Advanced Macronutrient Metabolism. (3)  
spring  
Metabolism of protein, fat, and carbohydrate, primarily as applied to humans, with research literature emphasized. Prerequisites: 1 course each in basic nutrition and biochemistry.

E NTR 544 Therapeutic Nutrition. (3)  
spring and summer  
Current theories of the nutritional prevention or treatment of various diseases. Prerequisites: 1 course each in basic nutrition, introduction to diet therapy, and physiology.

E NTR 545 Management of Institutional Food Service Systems. (3)  
fall and spring  
Standardizes methods of quantity food preparation, operation of institutional equipment, institutional menu planning, quantity food experiences. May require field trips. Integrated lecture/lab. Fee. Prerequisites: NTR 142 and 344 (or their equivalents).

E NTR 546 Assessment Techniques in Nutrition. (3)  
fall and spring  
Clinical and biochemical evaluation of nutritional status. 2 hours lecture, 3 hours lab. Fee. Prerequisites: 1 course each in advanced nutrition, biochemistry, and physiology.

E NTR 548 Nutrition Program Development. (3)  
fall and spring  
Planning, development, implementation, and evaluation of community nutrition programs, including the process of grant applications. Prerequisites: 1 course each in basic nutrition and sociology.

E NTR 550 Advanced Maternal and Child Nutrition. (3)  
fall  
In-depth review of metabolic characteristics and nutritional needs of the pregnant woman, lactating woman, infant, and child. Prerequisites: 1 course each in basic nutrition, biochemistry, and physiology.

E NTR 551 Advanced Geriatric Nutrition. (3)  
spring  
In-depth review of metabolic characteristics and nutritional requirements of the elderly. Prerequisites: 1 course each in basic nutrition, biochemistry, and physiology.

E NTR 580 Practicum. (1–12)  
selected semesters  
Topics may include the following:  
• Dietetics Practicum. (3–9)  
fall, spring, summer  
Structured practical experience in the Dietetic Internship, supervised by practitioners with whom the student works closely. Practicum Fee. Prerequisite: acceptance into the Dietetic Internship.
