| LAS | 340 | Latin American Women Writers | In the 20th and 21st centuries, Latin America has seen a proliferation of literature published by women authors. Examines the concepts of feminism through a Mexican framework, starting from the point of view of Mexican women theorizing about their own. This is not a history of feminism, but it does aim to highlight certain fundamental texts and key concepts of Mexico's history from the position of women writers, including feminism's critique of social structures beyond the bounds of gender relations. | N | LEC | N | OPT | New College of Interdisciplinary Arts and Sciences | School of Humanities, Arts, and Cultural Studies | 3 | HU & G | Prerequisite(s): ENG 102, 105, or 108 with C or better; Credit is allowed for only LAS 340 or WST 341 |

| LAS | 404 | Conquest and Encounters in Colonial Latin America | How did Hernan Cortés and Francisco Pizarro defeat the Aztec and Inca Empires? Despite numeric inferiority, limited provisions, and little knowledge about the Americas, Cortés and Pizarro defeated advanced civilizations that had experienced warriors and millions of inhabitants. Possible explanations include the conquistador's valor, advanced weaponry, superior military strategy, Indian allies, and biological attacks. In their encounters with native peoples of the Americas, Europeans were not always conquerors. Álvar Núñez Cabeza de Vaca and Lope de Aguirre failed both in their attempt to conquer a large Indian civilization and in their effort to find mineral wealth. A few Europeans such as Bartolomé de Las Casas spoke out against the abuses committed against the Indians during the conquest. Explores these issues from the perspective of both Europeans and native peoples and looks at the long-term impact for Latin America and its peoples. | N | LEC | N | OPT | New College of Interdisciplinary Arts and Sciences | School of Humanities, Arts, and Cultural Studies | 3 | L & G | Prerequisite(s): ENG 102, 105, or 108 with C or better; minimum 55 hours; Credit is allowed for only HST 404 or LAS 404 OR Visiting University Student |

| LAT | 358 | Saving the Roman Empire | In his autobiographical epitaph, the Res Gestae, Augustus, founder of the Roman Empire, claimed to have restored Rome to her former glory. His moral, social and political reforms solidified Roman control of the world and the imperial family's hold on ruling her. Through the next five hundred years, as the power of the empire waned and waxed, Augustus's successors turned time and again to reforming the empire and restoring her to her former glory - to saving the Roman Empire. In doing so they had to deal with problems both external and internal; sometimes their ideas worked, often they did not. Ultimately they failed, and Rome and the western empire fell in CE 476. Examines the rise, decline and fall of the Roman Empire from the perspective of internal and external problems the Empire faced, and asks which reforms worked, which did not work, and why. What could have been done differently? Should anything have been done differently, or was the western Roman Empire always doomed? | N | LEC | N | OPT | The College of Liberal Arts and Sciences | School of International Letters and Cultures | 3 | (L or HU) & H | Prerequisite(s): ENG 102, 105, or 108 with C or better; Credit is allowed for only GRK 294/HST 294/LAT 294/SLC 294 (Saving the Roman Empire) or LAT 358 or LAT 394/SLC 394 (Saving the Roman Empire) or SLC 358 OR Visiting University Student |

| LAW | 717 | Reproduction, Reproductive Technologies and the Law | When it comes to the creation of human life, yesterday's science fiction has become today's reality. | LDE | 621 | Advanced Landscape Architectural Studio III | Structured around the Design School's "traveling studio" model and provides an opportunity for graduate-level students to refine their talents while also contributing to a better future. Challenges students to work in a multidisciplinary environment to identify new design concepts that improve society and the natural environment. For approximately one week during the semester, students travel to an off-campus location (either in the U.S. or abroad) to examine a local condition there for which new design solutions are needed. Students return to ASU and continue working on the project for the semester. | MCO | 425 | Digital Media Literacy I | Helps students begin to navigate the 21st-century media, starting by becoming active users of media, not just passive consumers. The Internet-fueled democratization of media creation has enabled anyone to be a publisher, and given audiences' almost infinite choices, with both great and questionable effects. In a world of information abundance, it can be difficult to discern fact from opinion and truth from fiction. We need to know how to wade through this barrage of information with a critical eye, to be better informed, and ultimately become creators of media ourselves. | N | LEC | N | GNA | Walter Cronkite School of Journalism and Mass Communication | Walter Cronkite School of Journalism and Mass Communication | 3 | | Prerequisite(s): minimum 2.00 GPA; Credit is allowed for only MCO 425 or MCO 494 (Digital Media Literacy) OR Visiting University Student |

Misinformation in our context is false information purposefully created to deceive and cause harm. It runs rampant in today's digital information ecosystem, and is becoming more and more sophisticated and difficult to spot. Bad actors are using powerful tools and techniques to infect our information supply, sowing confusion and discord. While there are laudable efforts to staunch the flow of misinformation, media users need help in deciding what information to trust. Examines the evolution of misinformation and the range of content types that fall under its umbrella. Explores tools, techniques and tactics that individuals can employ to identify misinformation, and gives them a head start on making informed decisions on what, and whom, they can trust. | N | LEC | N | GNA | Walter Cronkite School of Journalism and Mass Communication | Walter Cronkite School of Journalism and Mass Communication | 3 | | Prerequisite(s): minimum 2.00 GPA |

Also explores how the ability to exercise freedom of expression became radically easier in the early days of the Internet, but how that freedom, among others, may be in jeopardy--and, if so, what can be done about that, as individuals and members of communities. | N | LEC | N | GNA | Walter Cronkite School of Journalism and Mass Communication | Walter Cronkite School of Journalism and Mass Communication | 3 | | Prerequisite(s): minimum 2.00 GPA; Credit is allowed for only MCO 428 or MCO 494 (Media and Free Expression in the 21st Century) or MCO 598 (Media and Free Expression in the 21st Century) |

| OGL | 550 | Leading Organizational Change | Organizations are a combination of structures, processes and relationships that bring people together to achieve a common goal. However, organizations do not operate in isolation--they are embedded in complex social, political and financial contexts. Leadership requires individuals to discern and balance competing demands and tensions inherent in organizations. Provides an overview of organizational theories to help leaders understand and be effective in these contexts. By looking at organizations through metaphorical lenses such as machines, brains and organisms, students learn how to create new options for organizational success in ever-changing operating environments. Applies theories to case studies to develop insights and innovative approaches to organizational change. A student deliverable is the creation of a plan to map out the student's capstone project in preparation for the applied project. | N | LEC | N | GNA | College of Integrative Sciences and Arts | College of Integrative Sciences and Arts | 3 | | Prerequisite(s): Organizational Leadership MS student; OGL 520; OGL 530; OGL 540 |

Shapes the leader within so that students are best positioned to lead in all areas of life. Over the next few weeks, explores the essential knowledge, abilities and values relevant to effective leadership. By the end of this course students have a greater understanding of their own leadership style and developmental plan for acquiring new leadership-related knowledge and abilities throughout their careers. | N | LEC | N | GNA | College of Integrative Sciences and Arts | College of Integrative Sciences and Arts | 3 | | Prerequisite(s): Organizational Leadership MS student |

| OGL | 552 | Leading Diverse Teams | Helps students build more effective working relationships and improve their ability to lead, influence, cooperate and work effectively with others in today's increasingly team-oriented organizations. This course may differ from previous courses taken. At the center of the course is an intensive, unstructured learning group experience. The primary educational tool in this class is experience in a group (in this class referred to as a T-Group or Training Group). Other educational resources are readings, brief theory discussions, personal journals and a personal reflection paper after the class sessions conclude. These are fundamental for helping students to frame learning group experience and for facilitating learning. Emphasizes learning about oneself in the context of others based on the here-and-now experience of the group. | N | LEC | N | GNA | College of Integrative Sciences and Arts | College of Integrative Sciences and Arts | 3 | | Prerequisite(s): Organizational Leadership MS student |
| OGL | 553 | Intercultural Leadership | In today's increasingly global and interconnected world it is important for leaders to understand the role that culture plays in one's leadership and communication style. Students obtain the knowledge and skills necessary to lead in culturally diverse environments. Through readings, discussions, video and interactive simulations, students gain a concrete understanding of a variety of leadership and communication styles that are found throughout the world. Students also increase their intercultural competencies and global awareness. | N | LEC | N | GNA | College of Integrative Sciences and Arts | College of Integrative Sciences and Arts | 3 | | Prerequisite(s): Organizational Leadership MS student |
| OGL | 554 | Learning and Development in Organizations | Focuses on adult learning interventions and professional development within the context of a learning organizational setting. | OGL | 555 | Leading Beyond Conflict | Today's leaders are increasingly confronted with conflicts that escalate into issues that could result in costly litigation. Comprises a review and analysis of contemporary methods of alternative dispute resolution, including arbitration, negotiation and mediation, with a strong focus on mediation. Students learn about the alternatives to costly litigation and develop working strategies to take advantage of these alternatives. | N | LEC | N | GNA | College of Integrative Sciences and Arts | College of Integrative Sciences and Arts | 3 | | Prerequisite(s): Organizational Leadership MS student |
| OGL | 556 | Leadership for Wicked Environmental Problems | Environmental leadership promotes a societal change such that we move away from the perspective where economic growth is valued and takes precedence above all to one that both recognizes the limits and value of natural resources in our environment and embraces just conservation practice. The environmental challenges we are faced with today (e.g., climate change, renewable energy) are described as "wicked." Wicked problems are difficult to explain, plainly define, have no one solution, and are often the result of other indefinable problems. Environmental leadership focuses on engaging followers to jointly and creatively confront wicked challenges and promotes environmental justice addressing the relationship between social inequality and environmental quality among various stakeholders. Course critically evaluates these leadership dimensions. This examination is not limited to Western ideals found in corporate organizations but also extends to conservation practice in the developing world. | N | LEC | N | GNA | College of Integrative Sciences and Arts | College of Integrative Sciences and Arts | 3 | | Prerequisite(s): Organizational Leadership MS student |
| OGL | 558 | Leading Organizational Innovation | Every modern organization, regardless of sector or mission, needs leaders who understand the impacts of continuing innovation on organizational success and sustainability. Examines how leadership can facilitate innovative activities within every level of an organization. Students conduct independent research for integration into a collaborative team project in the development of a graphical conceptual model that includes factors such as culture, structure and collaborative activities that enhance organizational innovation. | N | LEC | N | GNA | College of Integrative Sciences and Arts | College of Integrative Sciences and Arts | 3 | | Prerequisite(s): Master of Project Management student or Organizational Leadership MS student |
| OGL | 559 | Modeling Systems and Stakeholders | Studies how leaders can use systems theory and stakeholder theory to assess the inputs from external stakeholders and their impacts on internal organizational systems. Using current literature, students work independently and in teams to build and apply a conceptual model of the significant relationships among organizational systems and stakeholders. Results highlight relationships among variables that can be tested using quantitative and/or qualitative research methods. | N | LEC | N | GNA | College of Integrative Sciences and Arts | College of Integrative Sciences and Arts | 3 | | Prerequisite(s): Organizational Leadership MS student |

| OGL | 561 | Collaborative Governance: NGOs and Private-Public Partnerships | Exposes students to the opportunities and challenges of the non-market, non-state realm of nongovernmental organizations and how they facilitate private-public partnerships. Assesses the realm of action, appropriateness of their missions and where they find their limitations. Requires students to think globally and consider the roles of various actors of civil society with a critical eye. | N | LEC | N | GNA | College of Integrative Sciences and Arts | College of Integrative Sciences and Arts | 3 | | Prerequisite(s): Organizational Leadership MS student |
| OGL | 562 | Resource Development in Organizations: A Multiple Capitals Approach | Many types of resources are needed for organizations to achieve long-term sustainability. Surveys various capital resources firms need to succeed. Covers tools such as the International Integrated Reporting Council's six capitals framework (financial, manufactured, intellectual, human, social, natural) and theories that undergird these models. Through readings, case studies, and assignments, students learn about the process of value creation; the relationship between resources and an organization's business model; how the various forms of capital can be measured and reported; and what leaders can do to intentionally develop multiple forms of capital in a way that creates financial returns for the organization. | N | LEC | N | GNA | College of Integrative Sciences and Arts | College of Integrative Sciences and Arts | 3 | | Prerequisite(s): Master of Project Management student or Organizational Leadership MS student |
| OGL | 563 | Leading Social Change: Community Activism | Focuses on methods used to reform social, cultural or political norms, beginning at the local level and connecting with movements for broader social change. Grassroots movements arise on all sides of the political spectrum, and local movements can unite activists around common goals despite larger ideological differences. The term "grassroots" is a misnomer, however, in that it implies the lack of leaders or of institutional support, whereas in reality, leaders attempting to change society must learn to network with a variety of stakeholders, from the level of individual neighbors to political leaders and large institutions. Students look critically and creatively at the ways local leaders have worked on a daily basis to promote community-based causes, in order to become more effective local activists, organizers, and civic and community leaders. | N | LEC | N | GNA | College of Integrative Sciences and Arts | College of Integrative Sciences and Arts | 3 | | Prerequisite(s): Organizational Leadership MS student |
| OGL | 565 | The Future of Work and Organizations | Focuses on the dynamic nature of work, labor and occupations related to social and technological change; the impacts on workers, management and society. Also addresses new and changing occupations and leadership roles related to new economies of scale. | N | LEC | N | GNA | College of Integrative Sciences and Arts | College of Integrative Sciences and Arts | 3 | | Prerequisite(s): Master of Project Management student or Organizational Leadership MS student |
| OGL | 568 | Women and Leadership | Investigates how gender is produced, operationalized and reified in the workplace. Course content is specific to the role of women at work and in leadership. Emphasizes understanding the reproduction of gender inequality with a focus on how commonly shared beliefs about gender and other social categories operate through interaction to differentially affect the experiences of men and women in ways that often disadvantage women. Despite majority representation across a range of public and private sectors, women continue to be visibly absent from leadership roles. Although, some purport that progress has been made to narrow the existing leadership gap for women, more men than women achieve leadership roles and assume these positions at a faster pace than their female counterparts. What contributes to this ongoing phenomenon? What are the results of the underrepresentation of women in leadership? How might organizations intervene and cultivate equity in the workplace? | N | LEC | N | GNA | College of Integrative Sciences and Arts | College of Integrative Sciences and Arts | 3 | | Prerequisite(s): Organizational Leadership MS student |
| OGL | 569 | Indigenous Leadership and Diplomacy | Offers critical insights into how indigenous peoples around the world have responded to challenging issues in both historical and contemporary contexts by drawing from case studies, primary source materials, and emerging scholarship on indigenous leadership and diplomacy. | N | LEC | N | GNA | College of Integrative Sciences and Arts | College of Integrative Sciences and Arts | 3 | | Prerequisite(s): Organizational Leadership MS student |
| OGL | 570 | Analyzing Organizations | Focuses on the qualitative and quantitative research methods that are commonly used to assess organizations. Explores how best to frame organizational assessments and explore possible methodological choices for assessment design. Discusses both quantitative designs and qualitative approaches to organizational assessment. Focuses on planning assessments, making informed research decisions, understanding the ethical implications of organizational assessment, carrying out research and reporting finding. | N | LEC | N | GNA | College of Integrative Sciences and Arts | College of Integrative Sciences and Arts | 3 | | Prerequisite(s): Organizational Leadership MS student; OGL 550 |

| PAF | 570 | Microeconomics of Public Policy II | Provides the policy tools to solve economic problems such as market concentrations, market failures and externalities, and asymmetric information. Increasingly, government interventions are moving away from a command-and-control-style of direct provision of goods and services and toward a large menu of indirect approaches implemented through a complex system of third-party actors. Government intervention in private markets now entails loans and loan guarantees, grants-in-aid, contracts, vouchers, social and economic regulation, and many other policy tools. Each of these instruments involves vastly different behavioral distortions, policy technologies, political considerations and technical sophistication. Analyzes the economics of four policy interventions: grants, tax expenditures, social regulation and vouchers. Provides an overview of each tool (including its key design features) and combines economic theory with background information on how public policies actually operate. | N | LEC | N | OPT | Watts College of Public Service and Community Solutions | School of Public Affairs | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student; PAF 504 with C or better |

By the end of the course, managers have experience with tools (including Wikis, Blogs, search engines, collaboration tools, reputation systems, social networks, virtual worlds); are familiar with current information issues (transparency, privacy, equal access, governance); and explore how they are relevant to a variety of contexts (local government, non-profits, public service). | N | SEM | N | GNA | Watts College of Public Service and Community Solutions | School of Public Affairs | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |

| PBH | 455 | Public Health Program Evaluation | Federal, state and local policies shape the nature of the public health programs implemented in communities. Public health professionals are often responsible for evaluating, at multiple levels, the programs that result from such policies. Provides public health students with the analytical tools necessary to manage the implementation and evaluation of public health programs. Program evaluation serves many important functions. It supplies information to managers who are charged with implementing public health programs and to policymakers who face decisions about which programs to fund, scale back, expand, modify or eliminate. Evaluation is an accountability tool: when a public health agency decides to finance a program, they have a right to ask what their funds bought. Evaluation is also a vehicle for improving public health programs. By identifying what works and what does not--and how new programs fare relative to existing practice--policymakers and managers can improve program designs. | N | LEC | N | GNA | College of Health Solutions | College of Health Solutions | 3 | | Prerequisite(s): PBH 355 |

| PHI | 450 | Philosophical and Spiritual Issues in Death and Dying | From Plato to Maimonides to Heidegger to Kubler-Ross, scholars, clinicians and spiritual writers have recognized that attitudes about death and dying contribute to understandings of human existence. Recalling the ancient Socratic, biblical and other spiritual traditions of the cura animarum (care for and cure of the soul) and joining contemporary post/secular conversations relevant to integration of body-mind-spirit, this course introduces basic concepts and practices of care ethics and spirituality. Focuses on relations among existential (ontological), therapeutic (psychosomatic), and spiritual (religious) dimensions of care. Theoretically, the course is inter-faith in approach, holistic in scope, and specialized in content. Practically, students examine real-life issues in care ethics and spirituality from multiple perspectives. | N | LEC | N | OPT | New College of Interdisciplinary Arts and Sciences | School of Humanities, Arts, and Cultural Studies | 3 | | Prerequisite(s): ENG 101, 105, or 107 with C or better; Credit is allowed for only IAS 450 or MAS 550 or PHI 450 or PHI 494 (Issues in Death & Dying) or REL 450 or REL 494 (Issues in Death & Dying) OR Visiting University Student |

| PHI | 538 | Human Well-Being and Sustainability | Many of us take it for granted that human well-being is the ultimate end of sustainability or sustainable development. But what is a well-being, really? Social scientists collect empirical data and develop indices, indicators and other proxies to represent and measure well-being; but is it the kind of phenomenon that can be explained? In other words, is there a correct theory of human well-being? How does one measure well-being? Moreover, what are we to make of the relationship between well-being and sustainability? Where do these two concepts coincide? Where do they come apart? Does human well-being presuppose a commitment to sustainability? If the ultimate end of sustainability is human well-being, then is sustainability a redundant concept? This interdisciplinary course tackles such questions by critically examining the most prominent philosophical theories of well-being and by considering how they might be reconciled with relevant empirical evidence. Also spends considerable time reflecting on the problems that arise with respect to measuring well-being, particularly in the context of public policy. | N | LEC | N | OPT | The College of Liberal Arts and Sciences | School of Historical, Philosophical and Religious Studies | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student; Credit is allowed for only HPS/PHI/SOS 591 (Human Well-Being and Sustainability) or PHI 538 or SOS 494 (Human Well-Being and Sustainability) or SOS 539 |

| PMG | 533 | Stakeholder Engagement | No project exists in a vacuum--projects of all sizes and degrees of complexity are imagined, executed and ultimately evaluated by stakeholders, and stakeholders are often the key to project success or failure. While stakeholder theory is incorporated, the aim is for students to develop this key soft skill for interacting with and managing the interests of diverse stakeholders in real-world project situations. | N | LEC | N | GNA | College of Integrative Sciences and Arts | College of Integrative Sciences and Arts | 3 | | Prerequisite(s): Master of Project Management student |

| PSY | 340 | Psychology of Academic Motivation and Growth | There is a large self-help market claiming to harbor psychological secrets of success, but how do these claims and theories hold up to the science? Is it true that you just need to "believe it to achieve it"? Can you really engage in simple "brain exercises" to become a smarter person overall? This course critically reviews the behavioral science literature on psychological strategies of success, and explores the role of social cognitive influences that help form our academic self-concepts and beliefs and how they influence behaviors and performance. Contains a review of the literature examining the significance of short cognitive and psycho-educational interventions that can increase achievement motivation and improve academic performance. Finally, reflects on the role of society in applying this psychological literature toward improving educational systems and social policies. Students become familiar with the works of psychologists such as Albert Bandura, Carol Dweck, Allan Wigfield, Jacquelynne Eccles, Claude Steele, Joshua Aronson, Geoffrey Cohen, Paul Sackett and Arthur Jensen. | REL | 338 | Daode Jing: Way to the West | At 5,000 words, the Daode Jing [Tao-te ching, "the Scripture of the Way and its Powers," attributed to the Sage Laozi] is perhaps the shortest religious book in the world. It is also the most widely misinterpreted. In China, Daoists, Buddhists and Confucians have each taken its short, pithy statements as warrant for their very different belief systems. In the West, missionaries, new-age pundits, hippies, rock-stars, mystics and LSD advocates each claim to understand the "true meaning" of Laozi's mystical words. But "the farther one travels, the less one knows..." Students read representative samples of these explanations to understand why this brief book of wisdom has endured for over 2000 years. Requires no knowledge of Chinese. Presents all Chinese texts in the translations of the instructor. | N | LEC | N | OPT | The College of Liberal Arts and Sciences | School of Historical, Philosophical and Religious Studies | 3 | L or HU | Prerequisite(s): ENG 101, 105 or 107 with C or better; Credit is allowed for only CHI 338 or REL 338 OR Visiting University Student |

| ROM | 442 | Dracula and Vampire Lore | Vampire stories are not only local phenomena placed in Transylvania, as the common stereotype is incessantly spread. Legends about Dracula and the Count himself may be "untrue," but events that took place during the life and reign of the Wallachian Voevode Vlad Tepes, better known as Vlad the Impaler, are nonfictional. He ruled during the time of the Ottoman Empire extension to Europe and his fight against the Turks give us thought on the altered understanding of Vlad as a vampire figure. Occurring and recurring in continuously changed environments, Count Dracula affects everyone to the same degree, but still remains as secret and elusive as before, pitted against a vision of mysterious spaces that evoke the faraway castles from Whitby, UK (the origin of Stoker's Dracula), from Bran and Poenari Castles in Transylvania as well as the visions of Jules Verne's Castle of the Carpathians. | N | LEC | N | OPT | The College of Liberal Arts and Sciences | School of International Letters and Cultures | 3 | (L or HU) & G & H | Prereq(s): ENG 101, 105 or 107 w/C or better; Credit for only ROM 442 or SLC 442 or SLC 494 (Drac&Vamp Belief in the Wrl'd) or SLC 494 (Drac&Vamp Castles) or SLC 494 (Drac&Vamp Lore) or SLC 494 (Drac:Between Myth&Hist) OR Visiting University Student |

| RUS | 439 | Art in Exile: Vladimir Vladimirovich Nabokov | In English. The scandalous success of Lolita (1955) allowed Vladimir Nabokov to retire from teaching at Cornell University and move to Switzerland to devote himself to fiction, translation, criticism and lepidoptery. This was only one of the many metamorphoses that Nabokov, a Russian noble, underwent while in exile, moving from Russia to the Crimea, Cambridge UK, Berlin, Paris, Cambridge MA, Ithaca, Hollywood and finally Montreux. Examines the Russian roots of Nabokov's Russian (in translation) and American novels about exile: his first novel, Mary (1926), The Defense (1929), Glory (1932), and his tribute to 19th-century Russian literature, The Gift (1938), which he considered his greatest Russian novel. These are followed by Lolita (1955), Pnin (1957) and Pale Fire (1962), his memoirs, Speak, Memory (1966), and some essays and short stories. Films include Lolita by Stanley Kubrick (1962) and Adrian Lyne (1997). | N | LEC | N | OPT | The College of Liberal Arts and Sciences | School of International Letters and Cultures | 3 | L or HU | Prerequisite(s): ENG 102 or 105 or 108 with C or better; Credit is allowed for only RUS 439 or SLC 439 or ENG/RUS/SLC 494 (Art in Exile: Vladimir Vladimirovich Nabokov) |

| SBS | 460 | Global Cities | This close look at megacities in the global south decisively challenges the outdated impression that the rest of the world's cities still lag way behind the U.S. and Europe. The social sciences' debate over "global cities" anchors our examination of the reorganization of metropolitan social space under impact of neoliberal globalization since the 1970s. Explores urban inequalities of slums and dreamworlds; compares vernacular and transnational styles of urbanism (in architecture, design, markets, consumerism, jobs, ads, ways of living); and asks how transnational flows of people, capital and culture have reconfigured ethnic relations and national identities rooted in global cities. Students become virtual transnational flâneurs, tacking between the slums and skyscrapers of global cities, and conduct guided research on a global megacity to investigate how the production of the global city changes the lived space and urban culture of local residents, and how they respond. We ask, whose city is it? | N | LEL | N | OPT | New College of Interdisciplinary Arts and Sciences | School of Social and Behavioral Sciences | 3 | SB & G | Prerequisite(s): minimum junior standing; Credit is allowed for only ASB 442 or SBS 460 |

| SES | 106 | Habitable Worlds | Are we alone in the Universe? If so, why? If not, where are our cosmic cousins? Such questions, once the domain of science fiction, are on the verge of being answered with science facts. Astronomers are discovering planets around other stars. Planetary scientists are exploring the worlds in our solar system. Biologists are unlocking the secrets of metabolism and evolution. Geoscientists are determining how the Earth supports life. And as we struggle to build a sustainable future for ourselves, all of us are finding out how technologically advanced civilizations rise and how they might fall. This course surveys these topics. In the process, students master basic concepts from across the major areas of science and learn what makes the Earth a habitable world. | N | LEC | N | OPT | The College of Liberal Arts and Sciences | School of Earth and Space Exploration | 4 | SQ | |
| SES | 107 | A Solar System Journey | Introduces modern planetary science--the exploration of our solar system by astronomers, geologists, chemists, physicists, engineers, astronauts and even biologists. Studies the historical and modern science of the Sun, planets, moons, rings, asteroids and comets in our solar system, and about new planets being found in other solar systems. Covers the scientific method as well as the specific techniques used in modern planetary science and space exploration that enable us to apply what we learn about our solar system neighbors to the study of our home planet, and vice versa. | N | LEL | N | GNA | The College of Liberal Arts and Sciences | School of Earth and Space Exploration | 4 | SG | Credit is allowed for only SES 107 or SES 194 (A Solar System Journey) |
| SES | 121 | Earth, Solar System and Universe | The Earth, solar system and universe are diverse and dynamic, featuring galaxies, solar systems, suns, planets and moons. Each type of feature is characterized by a suite of processes and features, such as volcanoes, landslides and climate. As scientists and engineers, we want to understand what is going on in our world. Understanding past events helps begin to predict future events. With the Earth, we examine past events and current natural processes to understand how this past and these processes affect humans. Accordingly, this course examines the processes, materials and features observed and inferred on the Earth, in the Solar System, and in the Universe. The course is purposely designed to be rather holistic, exploring concepts from stellar evolution, atmosphere and oceans on Earth and in extraterrestrial objects, plate tectonics, volcanoes and mountain building. Both SES 121 and SES 123 must be taken together to secure SQ General Studies credit. | N | LEC | N | OPT | The College of Liberal Arts and Sciences | School of Earth and Space Exploration | 3 | SQ | |
| SES | 122 | History of the Earth and Solar System | The Earth and solar system have a long and interesting history, spanning nearly five billion years. Earth and other objects in the solar system have evolved over time, punctuated by a series of events, such as mountain building, volcanic eruptions, impacts and extinctions. As scientists and engineers, we want to understand what events have occurred in our world and which aspects directly affect us or are most interesting. Understanding past events helps us comprehend what has happened and begin to predict future events. With the Earth, examines past events and current natural processes to understand how this past and these processes affect humans. Accordingly, examines the history of the Earth and solar system in the context of the processes, materials and features that can be observed and inferred. Explores the history of the Earth and solar system from a broad, interdisciplinary, perspective. | N | LEC | N | OPT | The College of Liberal Arts and Sciences | School of Earth and Space Exploration | 3 | | Prerequisite(s): SES 121 with C or better |

| SES | 126 | Exploration of the Universe | Introduces the basic principles of modern astronomy, with a focus on "Exploration Science," or the methods by which we explore our planet, our solar system, other stars, and even other galaxies. How do we explore? What is the "scientific method"? How is modern science carried out? Study of such questions helps form a solid foundational core for a major in the science of astrophysics--a major that spans many aspects of the universe as a whole. Don't be surprised if class includes stories about how ASU research is proceeding, or how a lesson in class is relevant to some research experience. A key goal is for you to be excited and informed about the incredible era of Earth and space exploration that we're all a part of! | N | LEC | N | OPT | The College of Liberal Arts and Sciences | School of Earth and Space Exploration | 3 | | Prerequisite(s): SES 121 with C or better; Pre- or corequisite(s): MAT 170, 171, 210, 251, 265, or 270 with C or better if completed |

| SGS | 370 | Geopolitics | Geopolitics is a field that deals with war, conflict and the politics of animosity and violence. It calls special attention to the distribution of power on a global scale, and to the spatial scales at which power, authority and control operate. At one time, this involved studying how various "great powers" and "wise men" carved up the world according to their goals and interests. But power is everywhere! To name only a few examples, it is present in the ways that NGOs operate in conflict zones, in global health advocacy and awareness, in media coverage of distant catastrophes and seemingly immanent risks, and in disaster management and emergency response plans. Scholars in this field study topics such as war, diplomacy, conflict, migration, religious strife, terrorism and similar fields. | N | LEC | N | GNA | The College of Liberal Arts and Sciences | School of Politics and Global Studies | 3 | | Prerequisite(s): minimum 45 hours or minimum junior standing; Credit is allowed for only SGS 370 or SGS 394 (Global Geopolitics) OR Visiting University Student |

| SLC | 358 | Saving the Roman Empire | In his autobiographical epitaph, the Res Gestae, Augustus, founder of the Roman Empire, claimed to have restored Rome to her former glory. His moral, social and political reforms solidified Roman control of the world and the imperial family's hold on ruling her. Through the next five hundred years, as the power of the empire waned and waxed, Augustus's successors turned time and again to reforming the empire and restoring her to her former glory - to saving the Roman Empire. In doing so they had to deal with problems both external and internal; sometimes their ideas worked, often they did not. Ultimately they failed, and Rome and the western empire fell in CE 476. Examines the rise, decline and fall of the Roman Empire from the perspective of internal and external problems the Empire faced, and asks which reforms worked, which did not work, and why. What could have been done differently? Should anything have been done differently, or was the western Roman Empire always doomed? | N | LEC | N | OPT | The College of Liberal Arts and Sciences | School of International Letters and Cultures | 3 | (L or HU) & H | Prerequisite(s): ENG 102, 105, or 108 with C or better; Credit is allowed for only GRK 294/HST 294/LAT 294/SLC 294 (Saving the Roman Empire) or LAT 358 or LAT 394/SLC 394 (Saving the Roman Empire) or SLC 358 OR Visiting University Student |
