| EMS | 514 | Sustainability Leadership III | Focuses on transformational leadership for global success, which requires students to identify and apply pathways to inspire, persuade and influence others to act toward a shared global vision. Some of the challenges that all future sustainability leaders face are future orientation; reframing organizations to be globally scalable yet locally focused; and redefining success and growth using sustainability as a success lens. These are just a few of the challenging tasks that sustainability leaders face. Importantly, sustainable leadership involves being an effective change leader, and this course provides the tools and learning needed to initiate and sustain change. | N | LEC | N | OPT | College of Global Futures | School of Sustainability | 2 | | Prerequisite(s): EMS 510 |

Builds on the capstone proposal previously developed to implement a sustainability leadership project in a specific organization. Thus, students actually initiate that project, track and report its progress, and reflect on the experience going from plan to implementation. | N | SEM | N | OPT | College of Global Futures | School of Sustainability | 3 | | Prerequisite(s): EMS 508 or EMS 515 |
| EMS | 522 | Mastering the Global Sustainability Context | Leaders in any organizational context face an increasingly connected and transparent world where social and environmental issues must be weighed in everyday decisions, requiring increasingly more proactive response strategies to meet stakeholder expectations and adapt to market and policy dynamics. | ENG | 205 | Introduction to Writing, Rhetorics and Literacies | How do we understand the ways in which people in systems--both small and large--social, political, and economic, throughout the world use language and other symbolic resources to carry out work? Three fields of study take this kind of questioning especially seriously: studies in writing, studies in rhetoric, and studies in literacy. Inquiry--that persistent, deliberate commitment to question and to build methods sufficient to that questioning--is a generative force in each of these fields of study. Familiarizes students with such questioning traditions and to help them judge for themselves what each is good for. The goal is to strengthen your own repertoire and decision-making power for producing and circulating work (widely defined across material, print, and digital media) that matters in our risk-ridden world. Quite simply, then, this is a course in asking good questions and in evaluating responses to situations that spur questioning. | N | LEC | N | GNA | The College of Liberal Arts and Sciences | Department of English | 3 | L | Prerequisite(s): ENG 102, 105, or 108 with C or better OR Visiting University Student |

| ENG | 229 | Love and Lust in Medieval Literature | The medieval period, roughly 600-1500, cannot reasonably be called the "dark ages." Indeed, the Middle Ages provides us with a corpus of literature replete with complex characters struggling to live and love, dealing with sin and lust, unity and diversity, faith and reason within a tumultuous cultural milieu and religious rigor, all of which are feeling the winds of changes. Explores medieval literature, noting the astonishing differences from our own time, as well as surprising similarities. Western civilization, our own 21st century, for better or for worse, is indebted to the love and lust of the medievals. | N | LEC | N | GNA | New College of Interdisciplinary Arts and Sciences | School of Humanities, Arts, and Cultural Studies | 3 | | Prerequisite(s): ENG 102, 105 or 108 with C or better; Credit is allowed for only ENG 229 or 294 (Love and Lust in Medieval Lit) |

And then there's the "trans" domains--transnationalism, transgender studies and transhumanism--which, like so many contemporary theoretical formations opens up new perspectives on where and how we live, who we are and even what we are. The contemporary theories studied in this course provide the tools for understanding 21st-century life and the limits and enjoyments of our humanity. | N | LEC | N | GNA | The College of Liberal Arts and Sciences | Department of English | 3 | | Prerequisite(s): ENG 102, 105, or 108 with C or better; Credit is allowed for only ENG 235 or ENG 294 (Literary Theory & Interdisciplinary Studies) or ENG 294 (Introduction to Contemporary Theory) |

| ENG | 393 | Theories of Literacy | While theories of literacy have, for the most part, been determined by the primacy of reading and writing script, more recent scholarship in literacy theory and history has served to challenge such limitations. Many contemporary perspectives on literacy view scripted text as one component of complex acts and practices of written communication that occur in social contexts. Studies that examine such communicative acts in their local contexts reveal that literate practices and the texts that are produced are imbued with social and cultural values and traditions and the needs and desires of individuals. As the statements above illustrate, theories of literacy themselves are embedded within the values and assumptions of individuals, institutions, and academic specialization. Examines some of these theories, their influences on academic scholarship and pedagogy, the ideological assumptions that inform them, and how we might view these theories within broader social-cultural landscapes. | N | LEC | N | GNA | The College of Liberal Arts and Sciences | Department of English | 3 | | Prerequisite(s): ENG 102, 105, or 108 with C or better OR Visiting University Student |

Takes its theoretical framework from a radical 1960s manifesto called SCUM Manifesto by Valerie Solanas and from the French feminist philosophies of Julia Kristeva, who theorized the abject as a relationship with the grotesque that reveals the deep-seated fear of death. Uses these theoretical positions to examine trash, both abstractly and literally. Works through a variety of concepts ranging from actual trash, garbage, waste, toxic sludge, pollution and dirt, and tackles more abstract notions of trash such as the knowledge produced on the fringe in circuses, amusement parks, "trailer trash" zones, freak shows and the bodies of those marked as "Other" or different. | N | LEC | N | OPT | New College of Interdisciplinary Arts and Sciences | School of Humanities, Arts, and Cultural Studies | 3 | SB & C | Prerequisite(s): ENG 102, 105, or 108 with C or better; minimum 36 hours; Credit is allowed for only AMS 469 or ETH 469 or JHR/MAS 598 (Abject Bodies and the Politics of Trash) or WST 469 OR Visiting University Student |

| FIS | 201 | Innovation in Society | Examines the vast implications of innovation, why it is so powerful, and why it really matters. Introduces the theories and processes of innovation as they relate to socio-political change. Students gain knowledge about the history and future of innovation and explore how innovation is entangled with social, political and ethical issues. By identifying and applying analytical tools, students learn to account for the diverse workings and effects of innovation. This course strives to debunk the myth that innovation happens automatically. Rather, different actors rally to create innovations that shape our society, economy and cultures--and that those innovations are not inevitable and could be otherwise. | N | LEC | N | GNA | College of Global Futures | School for the Future of Innovation in Society | 3 | H | |

| FIS | 305 | Ways of Knowing | Students research, beginning with the concept of research itself and its various purposes, highlighting knowledge and how it is created in different disciplinary approaches. Exposes historical and philosophical underpinnings of how research is conceptualized, presented and implemented, including what constitutes information, knowledge and evidence. Introduces material that is in a traditional research design and methodology course; however, the emphasis uniquely focuses on knowledge creation, innovation, the nature of disciplinary knowledge and its impact on society. Explores the epistemological differences in problem identification and approaches to inquiry in the disciplinary perspectives of engineering, the sciences and in the social sciences. | N | LEC | N | GNA | College of Global Futures | School for the Future of Innovation in Society | 3 | L | Prerequisite(s): ENG 101, 105, or 107 with C or better; minimum 45 hours OR Visiting University Student |
| FIS | 307 | Navigating Futures | Foresight methods and their potentials as entry-points into public discussions about near- and mid-range technoscientific developments. Four elements constitute the organizing axis of the course: (1) the history of foresight exercises in government agencies and business organizations; (2) the methods of four forms of foresight exercises (technology foresight, science and technology studies, anticipatory governance and scenario development); (3) a comparative assessment of these dominant forms; and (4) a group-based application exercise using one of the foresight methods. | N | LEC | N | GNA | College of Global Futures | School for the Future of Innovation in Society | 3 | SB | Prerequisite(s): minimum 45 hours OR Visiting University Student |
| FIS | 308 | Politics, Markets and Innovation | Studies the roles that governments, markets and other factors play in promoting, disseminating and regulating science-based technological innovation. Includes examining the theoretical literature on factors that structure markets and shape diffusion, as well as case studies that illustrate the processes and mechanisms that govern innovations in society. In addition to studying the role of governments, firms and universities, also considers the role of publics as consumers who adopt innovations but also as citizens who may be skeptical of them. Includes case studies in agriculture, health care, biotechnology and digital rights. | N | LEC | N | GNA | College of Global Futures | School for the Future of Innovation in Society | 3 | SB | Prerequisite(s): minimum 45 hours OR Visiting University Student |
| FIS | 331 | Technology and the Modern World | Explores how technological systems are developed and embedded in the modern world with an eye to playing a role in creating better futures. Examines how machines and techniques can shape institutions, relationships and values. Challenges students to envision futures that they want and work to develop strategies for moving us (and our systems) toward those futures. Analyzes technologies past, present and imagined, and describes the ways in which technologies shape our world and the ways in which we shape those technologies. Through repeated practice in class students play a productive role in and even facilitate conversations that tease out the relationships between values and technological systems. | N | LEC | N | GNA | College of Global Futures | School for the Future of Innovation in Society | 3 | | Prerequisite(s): minimum 45 hours |
| FIS | 332 | Risk and the Future | Examines the evolving global risk landscape that is resulting from rapidly increasing global connectivity, tight coupling and massive complexity. Develops an understanding of how innovation in society is changing the risk landscape and considers how innovation in approaches to risk can help navigate this emerging landscape. Topics include technological risk, sociopolitical risk, catastrophic risk, existential risk, converging technologies, perception and uncertainty, anticipation, precaution, uncertainty and risk innovation. | N | LEC | N | GNA | College of Global Futures | School for the Future of Innovation in Society | 3 | L | Prerequisite(s): ENG 101, 105, or 107 with C or better; minimum 45 hours OR Visiting University Student |

| FIS | 334 | Science, Technology and Inequality | Conceptual and theoretical frameworks; provides empirical case studies that contribute to understandings of science and technology as they are used in society. The applications of science and technology in society need to be understood as instrumental to the creation and maintenance of inequality within and between societies. Science and technology does not merely cause or alleviate inequality, but are more profoundly implicated in social relations regarding distribution and access to the benefits of different technologies as well as exposure to risks from science and technology projects in society. The more pervasive and obdurate sources of social distribution are enshrined and entrenched in these scientific and technological systems. | N | LEC | N | GNA | College of Global Futures | School for the Future of Innovation in Society | 3 | C | Prerequisite(s): minimum 45 hours; Credit is allowed for only FIS 334 or JUS 334 |
| FIS | 335 | Designing Knowledge | Provides a foundational understanding of how social organizations make and use knowledge. From research laboratories to biotechnology companies to statistical agencies, many organizations are specifically designed to be knowledge enterprises, enterprises whose primary purpose is to produce knowledge. All organizations in modern societies also operate knowledge systems: systems whose purpose is to create, validate, circulate, communicate and apply knowledge in the making of decisions. Examines how these forms of organization work and contribute to modern societies. | N | LEC | N | GNA | College of Global Futures | School for the Future of Innovation in Society | 3 | SB | Prerequisite(s): minimum 45 hours OR Visiting University Student |
| FIS | 336 | Science and Technology Policy | Science and technology are powerful forces in the modern world. They have been hailed as a way to address everything from world hunger to old age. This does not, however, happen automatically, nor does it always work out the way one presumes. Governments make numerous decisions that affect the direction and application of science and technology, and government policies are affected by a myriad of social, political, and cultural factors. This class will explore the variety of ways in which governments make these policies, how the policies shape the development of science and technology and their applications, and how policy may be shaped to create better futures. Governments around the world have coalesced around the idea that science and technology are necessary for the promotion of the good life. We will examine how they put this idea into action by looking at five interrelated topics: Food, Security/Military, Health, Economy, and Sustainability. | N | LEC | N | GNA | College of Global Futures | School for the Future of Innovation in Society | 3 | | |
| FIS | 337 | Innovation and Global Development | Persistent inequality and poverty continue to plague nations including the USA even in the 21st century. Global development is a complex idea that attempts to address interrelated paradigms of culture, economy, equity, governance, history, societal dynamics, as well as technological issues. Using the framework of the Sustainable Development Goals 2030 (SDGs) this course examines, analyzes and critiques indicators of SDGs as well as explores innovative measures of development that nations around the world are planning and implementing in order to improve the lives of their citizens now and for the future. | N | LEC | N | GNA | College of Global Futures | School for the Future of Innovation in Society | 3 | G | Prerequisite(s): minimum 45 hours OR Visiting University Student |

| FIS | 403 | Governing Emerging Technologies | Examines the variety of ways in which societies make collective decisions or govern science and technology. Focuses on a particular category of science and technology: the set of emerging technologies like nanotechnology, artificial intelligence and robotics, genetic modification and synthetic biology, cognitive science and neurotechnology, geoengineering, and others that pose particular problems of high stakes, high uncertainty and ambiguous novelty. Closely allied with the research agenda of numerous faculty in the School for the Future of Innovation in Society, especially those in the Center for Nanotechnology in Society, the Risk Innovation Lab, and others; exposes students to inquiry and skills directly from the research front. Students perform numerous research tasks. | N | LEC | N | GNA | College of Global Futures | School for the Future of Innovation in Society | 3 | SB | Prerequisite(s): minimum 45 hours OR Visiting University Student |
| FIS | 431 | Technology, Security and Insecurity in Global Politics | Focuses on the international political aspects of technological change; examines the impact of technological innovation and political change on the international political system. The overall goal is to create an awareness of and ability to analyze and synthesize world events, the particular role of technology, and consider the myriad ways that globalization and technology as a main driver could be changing the international system of nation-states. Technological innovation often takes place within a political context, including international politics, as nation-states and other entities develop technologies within the context of competition and power. There are several issues that run throughout the course as major themes. One is the role of technology in political and social change, and the impact of the latter on the former. | N | LEC | N | GNA | College of Global Futures | School for the Future of Innovation in Society | 3 | | Prerequisite(s): minimum 45 hours |
| FIS | 432 | Problem Solving Through Strategic Thinking | Students learn how to ask questions, brainstorm and communicate ideas, while dealing with uncertain outcomes and unpredictable risks caused by the ideas and solutions they propose. In understanding which ideas and solutions stick and which don't, students learn how different factors influence the birth, life and death of ideas and the socio-technical systems in which ideation exists. Does it matter who asks the questions and proposes the ideas, who is trying to participate, who was there first, if there is a profit or other conflicting motive and the context and the interests that result in certain solutions being picked over others? This course uses exploration learning approaches, where students follow a progression through what they discover, from understanding who they are as individuals, to how ideas are formed and hypothesis made about proposed solutions. | N | LEC | N | GNA | College of Global Futures | School for the Future of Innovation in Society | 3 | | Prerequisite(s): minimum 45 hours |

| FMS | 349 | Israeli Wars in Israeli Movies | From its first day, the State of Israel has been in a state of war with the Arab countries. Every few years, the fighting erupted into an open war. At the beginning of the country, there was a consensus that the wars were forced on the Israelis, and therefore, the heavy toll on human life was unavoidable. Since the Six Day War, 1967, and the political change in 1977, Israeli society is split in attitude toward war. The absolute belief in the political and military leaders was shaken, and new political agendas entered the political arena. To this divided society, the Intifadas occurred with the waves of terrorism. These events added fire to the heated debates in Israel. One means of expression is through the cinema. In this course, students watch, analyze, and discuss selected movies on the Israeli wars and terrorism in the streets of Israel. | FSH | 331 | 18th- and 19th-Century European Jewelry Design | The 18th century was defined by stylish sociability that included beautiful dress, sumptuous interiors and exquisite, fashionable jewelry. Who were the influencers for jewelry design during this period? How was society defined by these ornaments? What were the rules of engagement? Did these opulent ornaments affect social strategies? How did jewelry materials evolve into more modern and recognizable forms? All of these questions are answered in this course. The cultural history of jewelry design mirrors the historical and collective customs of society from the established aristocracy, to the rising middle classes, to the expansion of cultural awareness among every world citizen when travel became widely available. So much so, that upon the turn of the 19th century, jewelry design shifted from appearing as solely a status of power and wealth to an eloquent symbol of worldly knowledge and cultural awareness. | N | LEC | N | GNA | Herberger Institute for Design and the Arts | School of Art | 3 | | Prerequisite(s): minimum 45 hours; Credit is allowed for only ARS 331 or FSH 331 or ARS 394 (18th & 19th Century European Jewelry Design) OR Visiting University Student |

| GLG | 327 | Earth's Critical Zone | The Earth's near surface environment (the "critical zone") supports most life and is the dynamic interface between the solid Earth and its fluid envelopes where much of the geologic record is produced. We now know that we face rapid climate change and the consequences of changes in land use, water resources, and ecosystems. Critical to planning a response to, or mitigation of, environmental change is understanding how the Earth surface works. Focuses on how changes to the environment manifest themselves in the critical zone-- in the form and function of the Earth's surface (landforms, water resources, soils, ecosystems). Offers a quantitative introduction to the form and function of the processes impacting the Earth's critical zone to build an understanding of the interactions of physical, chemical and biotic processes in shaping the surface and determining fluid, solute and sediment fluxes. | N | LEC | N | OPT | The College of Liberal Arts and Sciences | School of Earth and Space Exploration | 3 | | Prerequisite(s) with C or better: CHM 101 or higher or PHY 101 or higher; both GLG 101 and 103, or both SES 121 and 123, or SES 225; MAT 170, 171, 210, 251, 265, or 270; Credit is allowed for only GLG 327 or SOS 374 OR Visiting University Student |

There is direct instruction and practice of pronunciation (e.g., sound, stress, rhythm, intonation). By participating in and leading class discussions, by working in small groups or pairs and by preparing for videotaped presentations, students improve English fluency. | N | LEC | Y | YGB | Office of the Provost | Global Launch | 3 | | |

Covers key principles within the law of war, including distinction, proportionality and necessity as well as reviewing the differences between international and noninternational armed conflicts and other key ideas. Reviews the systems through which the law of war is enforced and also considers basic theoretical and practical issues regarding compliance. | GSC | 507 | Global Politics of Security | Offers several approaches to understanding the global politics of security, including: the structure of international and multinational security institutions and actors including nongovernmental organizations (NGOs), the United Nations' Security Council, peacekeeping missions, regional organizations (NATO, EU, Inter-American System, ASEAN) and others. Also considers the roles of private military and intelligence contractors and corporations working on issues of direct and indirect relation to security issues. Through specific case studies and examples, reviews the operation of these bodies and their complex relationships. | N | LEC | N | OPT | The College of Liberal Arts and Sciences | School of Politics and Global Studies | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |
| GSC | 508 | Comparative Studies of Conflict | Provides a critical overview of key theories on the causes, justifications and structures of political conflict and the use of violence. Begins by outlining core issues within the problem of social order, that is, how to think about managing governance and power. Reviews the idea of "collective action" and its link with force and violence, ideas that are contrasted with nonviolence as a political strategy. Then considers civil wars and interstate wars, comparing these forms of organized violence, as well as the current challenges of armed nonstate actors (within an international system premised on states) and an overview of the meaning of peace. Links the issues and theories reviewed in this class with case studies and concrete examples as a means of linking key ideas with their practical and policy implications. | N | LEC | N | OPT | The College of Liberal Arts and Sciences | School of Politics and Global Studies | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |
| GSC | 509 | Emerging Technologies and Global Security | Provides an introduction to the implications of accelerating changes in military and security technologies, fueled by rapid developments in five core technology systems: nanotechnology, biotechnology, information and communications technology (ICT), robotics and applied cognitive science. Also introduces the idea of revolutions in military affairs, a concept that has been used to frame discussions about the strategic implications of new technologies from drones to cyber. | N | LEC | N | OPT | The College of Liberal Arts and Sciences | School of Politics and Global Studies | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |
| GSC | 510 | Governance in Post-Conflict and Transitional Contexts | One of the most pressing current global security policy issues involves understanding and implementing strategies, mechanisms and processes to address post-conflict and transitional contexts. How do societies create and manage representational governance after the fall of authoritarian regimes? How can institutions be rebuilt and reconstituted? How can a social order address the justice demands of victims of brutal political violence whose suffering was often a key element of prior systems of rule? Provides a critical introduction to the field of post-conflict reconstruction and transitional justice. Reviews the tense and uncertain nature of post-conflict environments and their challenges, engages the security questions raised by peacekeeping and stability operations. Also considers the difficulties of governance and reconstruction in the aftermath of conflict. | N | LEC | N | OPT | The College of Liberal Arts and Sciences | School of Politics and Global Studies | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |
| GSC | 511 | Terrorism and Insurgency | Provides a critical overview of the use of terror by governments, insurgents and other nonstate actors. Engages the definition of terrorism and provides an overview of key practices and strategies. Reviews key theories as to the causes, meaning and impact of the deployment of terror as a strategy by distinct groups. This involves a consideration of state terror, insurgencies and global terror networks. Links many of the core ideas reviewed in this class with a set of case studies designed to ground the broader discussion of terror within specific situations and contexts. | N | LEC | N | GNA | The College of Liberal Arts and Sciences | School of Politics and Global Studies | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |
| GSC | 512 | Global Trends | Takes a broad look at emerging global patterns as they relate to governance, security and social order. Examines a number of interrelated topics, including: globalization and various forms of backlash; populist movements; socioeconomic inequality both within and between societies; the shifting of economic power from the global west to the global east; demographic changes and the resource strain that results; democratic backsliding, protests and social unrest; and the weakening of state-society relations. Situates these conflicting trends within a bigger question: What does it all mean for global stability? Do these new challenges signify the erosion of an aging order, and if so, what emerges from the upheaval? | N | LEC | N | OPT | The College of Liberal Arts and Sciences | School of Politics and Global Studies | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |

Many believe that broad-based, flexible strategies are necessary to enable key actors and institutions to engage in adequate policies to ensure general cybersecurity preparedness. Class themes include: an overview of key institutions and actors, central concepts of threat analysis, public and private cyberpolicy, and elements of international regulation. Also engages issues of cybersecurity strategy, the special challenges of non-state actors and ways to conceptualize and engage the future of cybersecurity. Reviews essential ideas and concepts, gains familiarity with key actors and institutions, and engages the complex interplay of governmental, intergovernmental, commercial and non-state actors engaged in cyber threats and protective action. | N | LEC | N | GNA | The College of Liberal Arts and Sciences | School of Politics and Global Studies | 3 | | Prerequisite(s): GSC 560 |

| GTD | 511 | Development Policy and Practices | Since the Bretton Woods Agreements in 1944, enormous energy has been devoted to generating the right tools for global development policy. Yet, little attention is given to the relationship between these tools, the practice of development and actual outcomes. At best, it is understood as a "gap" between the theory of development policy and practices. There is no reflection on what the good development policy looks like or what collective learning we have thus far. Informs students on the complexity of policy making and its relationship to development practices through time. Creates an intellectual space to discuss the practices of global development; uses case studies to enhance students' creativity and skill needed in managing and negotiating critical development challenges. Approaches development policy (models, strategies and project design) primarily as a tool to legitimize power relation rather than to orient practice for desired development outcomes. | N | LEC | N | GNA | College of Global Futures | School for the Future of Innovation in Society | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |

| HCD | 577 | Infection Prevention Control in the Health Care Setting | Antimicrobial resistance is an urgent global health priority. In the near future common treatable infections may become untreatable. Currently 1 out of 20 hospitalised patients contracts a health care associated infection, of which around 50% are preventable. These infections add to the functional disability and emotional stress of the patient and in some cases, lead to disabling conditions that reduce their quality of life. In addition, they contribute to increased hospital stays and added expense to the health care system. Infection prevention and control in health care settings is now of national priority endorsed by the Australian Government, Ministries of Health, the Australian Commission of Quality and Safety in Health Care, health care facility accreditation organisations, as well as internationally by the World Health Organization. | N | LEC | Y | NSW | College of Health Solutions | College of Health Solutions | 1-3 | | Prerequisite(s): International Health Management MIHM student |

| HEB | 349 | Israeli Wars in Israeli Movies | From its first day, the State of Israel has been in a state of war with the Arab countries. Every few years, the fighting erupted into an open war. At the beginning of the country, there was a consensus that the wars were forced on the Israelis, and therefore, the heavy toll on human life was unavoidable. Since the Six Day War, 1967, and the political change in 1977, Israeli society is split in attitude toward war. The absolute belief in the political and military leaders was shaken, and new political agendas entered the political arena. To this divided society, the Intifadas occurred with the waves of terrorism. These events added fire to the heated debates in Israel. One means of expression is through the cinema. In this course, students watch, analyze, and discuss selected movies on the Israeli wars and terrorism in the streets of Israel. Through these movies, produced by Israelis, we'll try to understand the mood and attitude of the Israelis toward war, enemies, and political and military leaders. | N | LEC | N | OPT | The College of Liberal Arts and Sciences | School of International Letters and Cultures | 3 | HU & G | Prerequisite(s): ENG 101, 105, or 107 with C or better; Credit is allowed for only FMS 349 or HEB 349 or JST 346 or HEB 394 (Israeli Wars in Israeli Movies) OR Visiting University Student |

| HSD | 521 | Writing True Stories that Matter | Researchers, policy wonks, grant writers, program managers, aspiring politicians, decision makers and writers of all ages: Everyone needs to know how to find and write a strong, effective, true story. This course helps students and professionals transform research, experiences and ideas into compelling nonfiction narratives so that readers are both educated and entertained. In this semester-long workshop, the instructor proceeds, step-by-step, through the entire writing true stories process, from finding the story to recreating scenes and building a scene-by-scene structure that is informative and cogent. Participants learn how to read with a writer's eye and recognize and utilize structural patterns. Explains, illustrates and practices literary techniques like dialogue, flash descriptions, inner point of view, and the art of imbedding information in story. | N | SEM | Y | OPT | College of Global Futures | School for the Future of Innovation in Society | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student; Credit is allowed for only HSD 521 or COM 598 (Writing True Stories That Matter: Creative Nonfict) or HSD 598 (Writing True Stories That Matter: Creative Nonfict) |
| HSD | 540 | Responsible Innovation and Research | Responsible Innovation (RI) and Research is a vision of how values can best be incorporated into the practice of science, technology and innovation (STI). It touches on a host of other similar concepts like Public Interest Technology, Tech for Good, Just Tech and others. At their core, RI and its cognates understand that STI is not a value-free endeavor, and thus it is better to recognize those values and work with them to help assure that our investments in STI are attuned to the goals of science policy as well as to broader public values and the pursuit of a more just, democratic society. Emphasize bringing students to the forefront of the emerging scholarship around RI and related concepts, including perspectives grounded in justice, equity, diversity and inclusion; communicating with colleagues and publics about values and RI in the practice of STI; and performing a real-world project, inquiry or intervention around RI. | N | SEM | N | OPT | College of Global Futures | School for the Future of Innovation in Society | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |
| HSD | 550 | Prototyping Futures | In this project-based course, students work in interdisciplinary teams to explore and envision the future of communities, industries, technologies and other elements of our society. In this process, students develop their understanding of the application of extended reality technologies, practices and methodologies for design, and tools for applying research to constructing prototypical scenarios for the future, in addition to gaining experience in effective collaboration. This course is about critical, methodological and narrative skills--the ability to move fluidly through domains, create low-fidelity prototypes, and devise creative solutions to complex problems by envisioning new realities. The development of deep technical skills in a chosen field follows in each program. | N | LEL | N | OPT | College of Global Futures | School for the Future of Innovation in Society | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student; Credit is allowed for only AME 550 or DSC 550 or HSD 550 |
| HSD | 551 | Future-Focused Research Methods | In times of discontinuous change, deep ambiguity and high levels of novelty, the future is characterized by radical uncertainty. Making decisions, choosing policies or organizing community action is complicated by the range of complex potential futures in play. As researchers and practitioners concerned with socio-technical change, what are the tools and methods to grapple with and make sense of uncertainty? This class surveys the field of foresight, drawing from a broad array of scholarly traditions, to catalogue the different methodological approaches to navigate change. Looks to scholars who approach the sociology of time, the dynamics of socio-technical systems, innovation studies, social psychology and futures studies to explore the concept of the future with an eye toward the implications for research methods. Utilizes different ways of thinking about the future to support and develop cognitive, social and organizational capacities to imagine and enact different futures. In doing so, the epistemology of the future is foregrounded, probing the nature and consequences of anticipatory knowledge production. | N | SEM | N | GNA | College of Global Futures | School for the Future of Innovation in Society | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |

| HSD | 552 | Worldbuilding and Imagination | To make a convincing future, you need to create a convincing world. Storytellers, artists, game designers, politicians and scientists all engage in the practice of building worlds in order to inspire, to question, and sometimes to terrify us. They create narratives, experiences and simulations of places, real and imagined, that combine scientific, cultural and aesthetic forms of knowledge. Why? This course explores the theory and practice of worldbuilding as a way to time travel to the future and the past, as well as to other configurations of the present. It also allows us to better understand the systems we live in and define plans of action to change them for the better. In this way, worldbuilding is a way to create collective visions for the future that inspire change today. Students study a variety of future worlds and build their own through collaborative projects that involve writing, making and public engagement. | N | SEM | N | GNA | College of Global Futures | School for the Future of Innovation in Society | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |
| HSD | 555 | Strategic Design Futures | Designers are increasingly addressing more strategic and long-term situations, while non-designers are increasingly interested in using design approaches to address diverse challenges. Strategic design is a practice that focuses on formulating strategies (problem setting) rather than only implementing strategies (problem solving). Strategic design is closely related to contemporary and emergent design practices such as user experience design, design thinking, service design, speculative design, behavioral design, and co-design, which are increasingly explored, adopted and adapted in projects and organizations. Students understand and practice a variety of strategic design methods and mindsets with the aim of changing and envisioning futures. With hands-on activities and real-world context, students use and develop core strategic design skills such as visualization, sensemaking, synthesis, speculation and facilitation. Some design tools that may be used include storyboards, user flows, journey mapping, participatory ideation, visioning, service blueprints, prototyping-testing. Includes seminar discussions and hands-on activities with a "live project." | N | PRO | N | Z1 | College of Global Futures | School for the Future of Innovation in Society | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student; Credit is allowed for only DSC 555 or DSC 598 (Strategic Design Futures) or HSD 555 |

| HST | 377 | Sports in United States History | Focuses on major themes in American sports history, organized topically around fall sports. Themes encourage students to think critically about relationships among sport and society, identity, community, media, capitalism and education. Lectures, discussions, readings and films explore race, gender, class and sexuality as categories of analysis, and the role of sport in constructing ideas about the body along gender and racial lines. Also highlights social justice issues in sport as well as athlete activism throughout the twentieth century. Explores the ways in which the participation of Black, Latino/a and Native American athletes has both mirrored and diverged from Black, Latino/a and Native American citizens' participation in society throughout United States history. Also studies the process through which the equal opportunity to participate in school sports became defined as a civil right and, more recently, a human right. | N | LEC | N | GNA | The College of Liberal Arts and Sciences | School of Historical, Philosophical and Religious Studies | 3 | (HU or SB) & H | Prerequisite(s): ENG 102, 105, or 108 with C or better; minimum 30 hours OR Visiting University Student |
| HST | 378 | Poverty, Inequality and Social Justice in Latin America | With persistently high levels of poverty and inequality, Latin America is often considered the most unequal region in the world. Explores these themes in more detail through a case study of one Latin American country and a global intensive experience at the end of the course. By reflecting on the Latin American experience, students gain insights for wealthy countries like the United States where inequality is on the rise. | N | LEC | N | Z1 | New College of Interdisciplinary Arts and Sciences | School of Humanities, Arts, and Cultural Studies | 3 | | Prerequisite(s): minimum 45 hours; Credit is allowed for only HST 378 or JHR 378 or JUS 378 or LAS 378 OR Visiting University Student |
| HST | 379 | History of College Sports | Student-controlled intercollegiate contests quickly transformed into big-time college sports by the early twentieth century, revolutionizing the sports industry in the United States as well as the landscape of higher education. The American college sports enterprise is unique; nowhere else in the world does a large, amateur, revenue-generating system of school sports exist. After an exploration of the origins of intercollegiate athletics and the creation of the modern National Collegiate Athletic Association, topics include integration, women's intercollegiate athletics, the big business of amateurism, and scandal. Video lectures, readings and films introduce students to these often controversial topics, grounding them in the historical record. Many of the current debates concerning college sports have been taking place for more than a century. | N | LEC | N | GNA | The College of Liberal Arts and Sciences | School of Historical, Philosophical and Religious Studies | 3 | | Prerequisite(s): ENG 102, 105, or 108 with C or better; minimum 30 hours; Credit is allowed for only HST 379 or HST 306 (History of College Sports) |

| HST | 404 | Conquest and Encounters in Colonial Latin America | How did Hernan Cortés and Francisco Pizarro defeat the Aztec and Inca Empires? Despite numeric inferiority, limited provisions, and little knowledge about the Americas, Cortés and Pizarro defeated advanced civilizations that had experienced warriors and millions of inhabitants. Possible explanations include the conquistador's valor, advanced weaponry, superior military strategy, Indian allies, and biological attacks. In their encounters with native peoples of the Americas, Europeans were not always conquerors. Álvaro Núñez Cabeza de Vaca and Lope de Aguirre failed both in their attempt to conquer a large Indian civilization and in their effort to find mineral wealth. A few Europeans such as Bartolomé de Las Casas spoke out against the abuses committed against the Indians during the conquest. Explores these issues from the perspective of both Europeans and native peoples and looks at the long-term impact for Latin America and its peoples. | N | LEC | N | OPT | New College of Interdisciplinary Arts and Sciences | School of Humanities, Arts, and Cultural Studies | 3 | L & G | Prerequisite(s): ENG 102, 105, or 108 with C or better; minimum 55 hours; Credit is allowed for only HST 404 or LAS 404 OR Visiting University Student |

| HST | 460 | World War II | Explores the causes, conduct and consequences of World War II. When did World War II start? How was it fought, and what did that mean for soldiers, the homefront and millions of civilians in Japanese or German occupied regions? What did the world that emerged in its wake look like? The course explores these fundamental questions with an emphasis on multiple explanations of the causes of the war in Asia and Europe and the contingency of Allied victory. Explores the war as both a total and a global war in which perceptions of race, class and gender shaped the experience of combatants and noncombatants, many of whom died in indiscriminate bombing campaigns. Racial ideologies also led to the brutalization of soldiers, which in turn fueled the violence against civilians, as exemplified by the Holocaust and Japanese war crimes. Finally, the course turns to the global order emerging after the war and the different narratives that emerged from it. | N | LEC | N | OPT | The College of Liberal Arts and Sciences | School of Historical, Philosophical and Religious Studies | 3 | HU & H & G | Prerequisite(s): minimum 45 hours; Credit is allowed for only HST 460 or HST 494 (Introduction to World War II Studies) or HST 494 (World War II Studies) or JST 460 or WWS 460 OR Visiting University Student |

| IPI | 196 | Fundamentals of Inquiry | Introduces the fundamentals of using inquiry methods for knowledge creation and extension in the fields of science and technology. Students work together to reach understanding on a large goal question associated with human society and space exploration. As a class, uses a weekly inquiry cycle to step toward the goal: read some content, ask a 'Natural Next Question' (NNQ) that takes us one step further toward the goal, seek content to help answer that question, report on what was learned, and after a few times, summarize the new knowledge with a distillation exercise, and then repeat this inquiry cycle. Strongly focuses on teaching students how to guide their learning by asking productive questions to drive their research, how to find content to answer their questions, how to approach challenging primary content, how to work well in teams, and how to distill and share their learning. | N | LEL | N | GNA | The College of Liberal Arts and Sciences | Dean, The College of Liberal Arts and Sciences | 3 | | Prerequisite(s): Technological Leadership BS major OR Visiting University Student |
| IPI | 241 | Designing and Making for an Interplanetary Future | Humanity's future as an interplanetary species is only made possible through the continued development of new technologies able to provide solutions to difficult problems. Facilitates students developing proficiency in both "making" and "designing." While not an engineering course, seeks to support students in gaining basic technical "makerspace" abilities. More important than the hard skills, students grow in their capacity for technical design thinking--the process by which modern technologies are imagined and developed. Hands-on and project-based. Students learn tools and processes for solving global and interplanetary problems, with special consideration given to the ways that technologies impact society. Students gain basic proficiency in the mechanical, electrical, computer programming and design aspects of technology development in makerspaces, through supervised research and design of creative projects that relate to aerospace engineering, space exploration, and/or an inclusive, interplanetary future. As a part of this course, students gain basic knowledge of CAD modeling and 3D printing, circuits and soldering, Arduino programming, tinkering and debugging methods, creative problem solving, team-based project management, the relationship between technology and society, and basic technological design methods. | N | LEL | Y | GNA | The College of Liberal Arts and Sciences | Dean, The College of Liberal Arts and Sciences | 3 | | |

| IPI | 296 | Inquiry | To be most effective in work and life, we need to learn how to recognize and solve problems, and to work in teams. Students work together to reach understanding on a large goal associated with human society and space exploration. An example from a previous class is, "What will the Moon be like after human settlement?" As a class, uses a weekly inquiry cycle to step toward the goal: read some content, ask a "natural next question" that takes us one step further toward the goal, seek content to help answer that question, and repeat. Students learn how to understand a complex problem through multiple steps, to approach challenging primary content, to productively critique each other's work, and to think critically. Students meet for 2 hours per week but work extensively outside of class. | Y | LEL | Y | GNA | The College of Liberal Arts and Sciences | Dean, The College of Liberal Arts and Sciences | 3 | L | Prerequisite(s): ENG 101, 105, or 107 with C or better OR Visiting University Student |

Finally, Italian food cannot be studied without preparing it! As UNESCO points out, the sharing of food is an important part of the Mediterranean lifestyle. | N | LEC | N | OPT | The College of Liberal Arts and Sciences | School of International Letters and Cultures | 3 | | Prerequisite(s): ENG 102, 105, or 108 with C or better; Credit allowed for only ITA 350 or ITA 394 (Food & Culture: Mediterranean Lifestyle in Italy) or SLC 350 or SLC 394 (Food & Culture: Mediterranean Lifestyle in Italy) OR Visiting University Student |
| ITA | 380 | Natural Disasters: Environmental and Cultural Resilience in Italy | The Italian peninsula is home to some of the most diverse physical and geological landscapes on earth. Over time, natural disasters such as earthquakes, volcanic eruptions and landslides have transformed Italian culture, creating a distinct, reciprocal and enduring relationship between nature and Italian society. Studies pivotal natural disasters that have occurred throughout Italian history, including the Mt. Vesuvius, Pompeii and Etna volcanic eruptions; the Messina, Belice Valley, Campania, Friuli and L'Aquila earthquakes; and the Vajont landslide. Identifies and measures the physical and geological features of Italy that make it susceptible to natural disasters. | ITA | 414 | French and Italian Popular Culture | Popular culture no longer holds the ancillary role traditionally reserved for whatever does not carry the definition of high culture. That popular culture is instead able to provide us with very relevant insights on the identity of a nation and a people is now widely accepted. As a consequence, this class aims at examining popular culture-related artifacts in Italy and France in order to shed a light on crucial issues such as the culture of food and its historical and social significance; the meaning of fashion and design within an urban context, with a special attention to gender roles; the importance of the comics, given in particular the exceptional success the bande dessinée genre is currently enjoying in France throughout the whole age range of the population; the show business with a particular attention to music; and the social function and role of sport with respect to the two dominant sports in both countries (soccer and cycling). | N | LEC | N | OPT | The College of Liberal Arts and Sciences | School of International Letters and Cultures | 3 | (L or HU) & G | Prerequisite(s): ENG 102, 105, or 108 with C or better OR min 45 hours; Credit is allowed for only FRE 414 or FRE 494 (French & Italian Pop Culture) or ITA 414 or ITA 494 (French & Italian Pop Culture) or SLC 414 or SLC 494 (French & Italian Pop Culture) |

| ITA | 423 | Italian Organized Crime in Films and History | Through an analysis of historical, anthropological, literary, political and cinematic texts, explores representations of the Italian organized crime in Italian and American films from the early 20th century to today. Discovers different "Mafias" originating in Italy, but whose reach extends much further, such as the Cosa Nostra in Sicily, the Camorra in Naples, and the 'Ndrangheta in Calabria. Examines the fiction, stereotypes, myths and legends surrounding the mafia through a scrupulous analysis of some of the most important American and Italian films portraying mafia culture. Italians have used the medium of film to address the issue of the mafia, raising awareness about the harsh reality of life in the mafia and the ways in which it reaches into every aspect of Italian politics and society. Explores how Italian mafia films subvert international fascination with the mafioso by disrupting the glamorized myths that are mainly perpetuated by American popular cinema. | N | LEC | N | OPT | The College of Liberal Arts and Sciences | School of International Letters and Cultures | 3 | (L or HU) & G | Prerequisite(s): ENG 102, 105, or 108 with C or better or min 45 hours; Credit for only FMS 423 or ITA 423 or SLC 423 or ITA 494/SLC 494 (Italian Organized Crime in Films & History) or FMS 494/ITA 494/SLC 494 (Mafia & Film) OR Visiting University Student |

| IVD | 525 | Fundamentals of Entrepreneurial Leadership | "Experiential" course for students to practice "being" a leader at the personal, interpersonal and community levels. While typical leadership classes leave one knowing about leaders and leadership, this class leaves students being leaders as part of their natural self-expression. The program follows an ontological pedagogy, rather than epistemological one. Ontology is the study of the nature and function of being "as lived" in real time. Epistemology by contrast deals with the varieties, grounds, and validity of knowledge. Leadership skills include mastery of communication at each of the three levels, from personal relationships to large-scale messaging for media and branding; and looking beyond the personal and interpersonal sociological level of analysis to incorporate principles of social and environmental justice into their relationships and the enterprises they lead. | N | LEC | N | GNA | Herberger Institute for Design and the Arts | The Design School | 3 | | Prerequisite(s): Innovation and Venture Development MS student; Corequisite(s): IVD 560 |
| IVD | 560 | Innovation Studio I: Discovery and Insight | A prerequisite for successful innovation and venture development is a deep understanding of the multidimensional context in which the innovation will be situated, and in which the venture will compete, whether a commercial enterprise or nonprofit. This course gives students the design, business and engineering research and evaluation tools and experience to investigate and immerse themselves in industry or sector customer needs, the competitive landscape and cultural context, as well as ways to predict and mitigate the unintended consequences of their innovation on society and the environment. Teaches students where to begin, how to inquire, how to evaluate information they uncover, and how to use critical thinking and analysis to develop the insights that become the foundation of their venture-development journey. | N | STO | N | GNA | Herberger Institute for Design and the Arts | The Design School | 3 | | Prerequisite(s): Innovation and Venture Development MS student |
| IVD | 561 | Innovation Studio II: Problem Reframing | Problem reframing is essential to the innovation process, and to properly diagnosing problems so they can be investigated from multiple perspectives. It entails pushing past conventional assumptions about barriers to success, to find root causes--sometimes different problems altogether--that inspire novel, diverse approaches. Problem reframing is a powerful tool that increases the options and resources available in addressing any challenge. Students learn the difference between root causes and symptoms, understand the systems affected by and affecting their challenge, and learn to see and act on problems as opportunities for breakthrough solutions. | N | STO | N | GNA | Herberger Institute for Design and the Arts | The Design School | 3 | | Prerequisite(s): Innovation and Venture Development MS student; IVD 560; Corequisite(s): IVD 525 |
| IVD | 562 | Innovation Studio III: Explore, Fail, Solve | In this iterative, creative "make-to-learn" phase of venture development, students explore prototyping and testing with audiences or end-users to develop feedback loops for real-time evaluation of their ideas, then synthesize learning from both successes and failures to progress toward a solution. Key components include mastery of ideation and creative development, framing strategic questions and success indicators for prototyping of services or products, evaluation of feedback and iteration of progressively more promising ideas, and evaluation of their innovations measured against the success indicators they developed. Students learn and practice prototyping service interactions as well as product innovations. | N | STO | N | GNA | Herberger Institute for Design and the Arts | The Design School | 3 | | Prerequisite(s): Innovation and Venture Development MS student; IVD 525; IVD 561. |

| IVD | 630 | Scaling Entrepreneurial Leadership | The personal skills required to succeed in a small start-up environment are different from those required to run a successful enterprise or nonprofit. Many entrepreneurs do not have access to the learning that prepares them to both launch and successfully scale their venture. Complexities of board management, fostering a creative culture, codifying a communication system that becomes a source of energy and a north star for the organization, inculcating values of social and environmental justice into a culture and translating them into daily behavior are required capacities which cannot be learned in theory, only in practice. Students master the skills to lead an enterprise through the challenges of the 21st century. | N | LEC | N | GNA | Herberger Institute for Design and the Arts | The Design School | 3 | | Prerequisite(s): Innovation and Venture Development MS student; Corequisite(s): IVD 562 |

| IVD | 660 | Innovation Studio IV: Business Model | Faced with the challenge of business model generation and prototyping, students need to define the starting points of value proposition, supply chain and customer segments. Later in the process, a clear description of the revenue model, customer relationship, key resources, key activities, key partners and cost structure complement the original value proposition design. The refinement of the newly created business model is made through a process of iteration. Students have an overall comprehension of the strategic innovation process made of (a) strategy, (b) execution, (c) tools and (d) metrics before moving to the stages of scaling and growth of the business. In order to develop a viable business model, students need to understand the costs of development, manufacturing and getting their goods or services to customers. | N | STO | N | GNA | Herberger Institute for Design and the Arts | The Design School | 3 | | Prerequisite(s): Innovation and Venture Development MS student; IVD 525; IVD 560; IVD 561; IVD 562; Corequisite(s): IVD 630 |
| IVD | 661 | Innovation Studio V: Scale | SCALE is translated as proportional growth of production and profit aiming at a larger market position. Understanding the timing to scale a business model is crucial to its success and scaling can be discussed in terms of market, process and team. Faced with scaling issues of their business models, students need to build their own framework--or tools--in order to make decisions concerning the whens (time) and hows (market, process, tools) of scaling. Topics covered also include, but not limited to, venture funding strategies, budgeting capital needs, developing e-commerce, CRM analytics, supply chain and operations. At the end of this semester, students present a fully developed venture, with clearly articulated market need, viable innovation based on end-user feedback, business model and plan for scale. | JHR | 425 | The Politics of Immigration | Examines immigration and citizenship in the United States, with a focus on changes in policy, politics and incorporation trends. While a primary focus is on contemporary politics and policies, also spends much time on immigration and citizenship's legal history and on how scholars use history to reveal new, important insights for our understanding of debates today. Starts with a discussion of migration to the U.S. today and considers theories about international migration. Then moves to the history of immigration and citizenship policies and politics in the U.S. and continues up to present day political and national debates and initiatives. Contains a particular focus on the history, politics and debates around "undocumented"/"illegal"/unauthorized populations, on related citizenship and membership politics. With the continuing national debates, also spends additional time throughout the semester analyzing current reform politics and prospects, along with the different interests and constituencies battling for reform. Readings and assignments feature some of the different disciplinary approaches used in the study of immigration, drawing primarily from political science, history, sociology and anthropology. Aims to gain a better understanding of the different approaches and implications for using different types of methodologies. | N | LEC | N | GNA | New College of Interdisciplinary Arts and Sciences | School of Social and Behavioral Sciences | 3 | | Prerequisite(s): minimum 45 hours; Credit is allowed for only JHR 425 or JUS 426 OR Visiting University Student |

| JHR | 441 | Latin America and the World Economy | Globalization did not begin in the late twentieth century, but rather global trade has linked Latin America with the rest of the world for over five hundred years. The region has been an active and important participant in the world economy since Columbus's first voyage in 1492. This course explores the social, cultural, economic, and environmental impact of such participation on both Latin America and the rest of the world. It is organized both chronologically and thematically. We will study both colonial and post-colonial trade. The commodities studied include sugar, rubber, bananas, and cocaine. | N | LEC | N | OPT | New College of Interdisciplinary Arts and Sciences | School of Social and Behavioral Sciences | 3 | L & G & H | Prerequisite(s): ENG 101, 105, or 107 with C or better; minimum 45 hours; Credit is allowed for only HST 441 or JHR 441 or LAS 441 OR Visiting University Student |

| JHR | 485 | Social Justice and Human Rights Capstone | Senior-level culminating course helps students consolidate their capstone assignments into an intellectual portfolio of written work. Although writing is a critical skillset for academic success, learning how to write is often treated as a secondary pursuit acquired "on the job." Assignments once submitted to fulfill course requirements are soon forgotten, and the labor spent on them is forever lost. This course offers a rare and invaluable opportunity to revisit the writing students have produced in their studies, thinking in highly focused ways about what ideas interest them and why. Students grapple with conventions of social scientific writing, understand how to formulate rigorous research questions and practice drafting structured arguments around key concepts. Additionally, students revise and refine existing papers, trace intersections between them and integrate them into a body of work. Students critically engage with others' work, offering constructive annotated feedback on others' papers while applying the same insights to their own writing. By the end of the course, students create a portfolio representing their best and most promising work. They are able to thoughtfully articulate the knowledge they have acquired over the years, as well as point toward possible trajectories for future research. This culminating experience not only equips students for graduate school, but enhances their skills for a range of professional fields--including law, journalism, policy-making, social work and beyond--where rigorous thinking and writing are essential. | N | PRO | N | GNA | New College of Interdisciplinary Arts and Sciences | School of Social and Behavioral Sciences | 3 | | Prerequisite(s): Social Justice and Human Rights BA major; JHR 305 with C or better; senior standing |

| JHR | 503 | Gender Based Violence and Sex Trafficking | Following passage of the Palermo Protocol, the first modern global treaty on trafficking in the year 2000, sex trafficking has received enormous global attention. Focuses on the period following the passage of this treaty to understand both the causes and consequences of sex trafficking around the world. Are there patterns associated with victimization? Do traffickers use similar tactics for recruitment? What are countries doing to prosecute traffickers and protect victims? Students conduct guided research developing their expertise on trafficking in one country of their choosing, applying the tools and theories from class to evaluate their chosen case. Course adopts an interdisciplinary perspective drawing on work from political science, sociology, anthropology, counseling, psychology and law. Often draws on literature from feminist criminology studies to account for a more nuanced perspective. | N | LEC | N | GNA | New College of Interdisciplinary Arts and Sciences | School of Social and Behavioral Sciences | 3 | | Prerequisite(s): Social Justice and Human Rights MA student; Credit is allowed for only JHR 503 or JHR 598 (Gender-based Violence and Sex Trafficking) |

Also looks at the role of international nongovernmental organizations (INGOs) such as Amnesty International, Greenpeace, International Red Cross and Red Crescent Movement, and The Global Fund to Fight AIDS, Tuberculosis and Malaria (The Global Fund), and assess their importance as active actors in the area of global governance. Focuses on examining sets of carefully selected case illustrations (current and past) from around the world, along with practical learning activities regarding topical issues, helping students gain deeper and functional knowledge about the various topics discussed and issues examined. Cases and instances explored cut across areas like global peace and security, human rights and social justice, environment, public health and economic development. | N | LEC | N | GNA | New College of Interdisciplinary Arts and Sciences | School of Social and Behavioral Sciences | 3 | | Prerequisite(s): Social Justice and Human Rights MA student; Credit is allowed for only JHR 504 or JHR 598 (International Law and Organizations) |

| JHR | 505 | Migration, Asylum and Refugees | Interdisciplinary course that introduces students to social scientific debates on migration and displacement in the contemporary world. Over the past decade, recurring wars and natural disasters have driven millions to flee from their homes. According to the United Nations High Commissioner for Refugees (UNHCR), the global number of displaced people is over 70 million, the highest ever recorded since World War II. Now more than ever, it is important to critically examine the social, political and legal processes by which people are displaced and disenfranchised. Delves into social scientific perspectives on forced migration, drawing on essential concepts and theories in anthropology, political theory and international relations. Students question the taken-for-granted distinctions between refugees and "economic migrants," and investigate the historical contexts and institutional structures shaping global displacement that have brought us to our present moment. What does the figure of the refugee reveal about modern conceptualizations of citizenship and the nation-state? How do we think about the violence and precarity of displacement beyond metaphors of "exception," and is it possible to protect the rights of asylum-seekers in conjunction with those of vulnerable citizens? How is the suffering of distant others rendered legible to Western audiences, and how do the conditions of humanitarian work serve to further amplify inequalities between the givers and receivers of aid? The purpose is not to provide an exhaustive summary of various disciplinary approaches to migration, asylum and refugees, but rather, to develop some keen insights into the foundational forces shaping migrant lives and the power relations underpinning our endeavor to alleviate displacement. | N | LEC | N | GNA | New College of Interdisciplinary Arts and Sciences | School of Social and Behavioral Sciences | 3 | | Prerequisite(s): Social Justice and Human Rights MA student; Credit is allowed for only JHR 505 or JHR 598 (Migration, Asylum, and Refugees) |

| JHR | 540 | Critical Humanitarianism | Interdisciplinary lecture course introduces students to social scientific debates on humanitarianism, international aid and the ethics of alleviating suffering in the contemporary world. Since its birth in the 19th century, modern humanitarianism has emerged as a powerful actor in world affairs, not only assisting the vulnerable during moments of crisis but shaping politics and governance in its own right. Critically investigates the historical, cultural, institutional and technological contexts of humanitarian action. Rather than taking the morality of "saving lives" as self-evident, this course explores how moral judgements about life are formed, transformed, appropriated and sometimes ignored in the pursuit of humanitarian interests. How does one situate the emergence of humanitarianism in histories of capitalism and abolitionist movements? What definitions of the human are evoked in calls for humanitarian intervention, and how are these definitions sutured by notions of race? Why does the suffering of others evoke humanitarian sympathies and what are the ethical motivations that guide aid workers? How do we hold these ethical callings in tension with various forms of institutional violence perpetrated in humanitarian contexts? How does race shape the construction of both the subjects and objects of humanitarian aid, and what would it mean to decolonize the world of humanitarianism? The purpose is not to provide an exhaustive summary of all the theoretical approaches and empirical issues in humanitarian studies, but to develop some specific insights into what it means to "do good" and how goodness is invariably entangled in contemporary questions of power, politics, violence and history. | N | LEC | N | GNA | New College of Interdisciplinary Arts and Sciences | School of Social and Behavioral Sciences | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student; Credit is allowed for only ASB/JHR/POS/SBS/SOC 494 (Critical Humanitarianism) or JHR 540 or JHR 598 (Critical Humanitarianism) |

| JST | 346 | Israeli Wars in Israeli Movies | From its first day, the State of Israel has been in a state of war with the Arab countries. Every few years, the fighting erupted into an open war. At the beginning of the country, there was a consensus that the wars were forced on the Israelis, and therefore, the heavy toll on human life was unavoidable. Since the Six Day War, 1967, and the political change in 1977, Israeli society is split in attitude toward war. The absolute belief in the political and military leaders was shaken, and new political agendas entered the political arena. To this divided society, the Intifadas occurred with the waves of terrorism. These events added fire to the heated debates in Israel. One means of expression is through the cinema. In this course, students watch, analyze, and discuss selected movies on the Israeli wars and terrorism in the streets of Israel. Through these movies, produced by Israelis, we'll try to understand the mood and attitude of the Israelis toward war, enemies, and political and military leaders. | N | LEC | N | OPT | The College of Liberal Arts and Sciences | School of Historical, Philosophical and Religious Studies | 3 | HU & G | Prerequisite(s): ENG 101, 105, or 107 with C or better; Credit is allowed for only FMS 349 or HEB 349 or JST 346 or HEB 394 (Israeli Wars in Israeli Movies) OR Visiting University Student |

| JST | 459 | Latin American Jewish Culture | Focuses on forms of cultural production in Latin America marked by or under the aegis of Jewish diasporic identity from the late nineteenth century to the present. | JST | 460 | World War II | Explores the causes, conduct and consequences of World War II. When did World War II start? How was it fought, and what did that mean for soldiers, the homefront and millions of civilians in Japanese or German occupied regions? What did the world that emerged in its wake look like? The course explores these fundamental questions with an emphasis on multiple explanations of the causes of the war in Asia and Europe and the contingency of Allied victory. Explores the war as both a total and a global war in which perceptions of race, class and gender shaped the experience of combatants and noncombatants, many of whom died in indiscriminate bombing campaigns. Racial ideologies also led to the brutalization of soldiers, which in turn fueled the violence against civilians, as exemplified by the Holocaust and Japanese war crimes. Finally, the course turns to the global order emerging after the war and the different narratives that emerged from it. | N | LEC | N | OPT | The College of Liberal Arts and Sciences | School of Historical, Philosophical and Religious Studies | 3 | HU & H & G | Prerequisite(s): minimum 45 hours; Credit is allowed for only HST 460 or HST 494 (Introduction to World War II Studies) or HST 494 (World War II Studies) or JST 460 or WWS 460 OR Visiting University Student |

Starts with a discussion of migration to the U.S. today and considers theories about international migration. Then moves to the history of immigration and citizenship policies and politics in the U.S. and continues up to present day political and national debates and initiatives. Contains a particular focus on the history, politics and debates around "undocumented"/"illegal"/unauthorized populations, on related citizenship and membership politics. With the continuing national debates, also spends additional time throughout the semester analyzing current reform politics and prospects, along with the different interests and constituencies battling for reform. Readings and assignments feature some of the different disciplinary approaches used in the study of immigration, drawing primarily from political science, history, sociology and anthropology. Aims to gain a better understanding of the different approaches and implications for using different types of methodologies. | N | LEC | N | GNA | The College of Liberal Arts and Sciences | School of Social Transformation | 3 | | Prerequisite(s): minimum 45 hours; Credit is allowed for only JHR 425 or JUS 426 OR Visiting University Student |
