| SLC | 414 | French and Italian Popular Culture | Popular culture no longer holds the ancillary role traditionally reserved for whatever does not carry the definition of high culture. That popular culture is instead able to provide us with very relevant insights on the identity of a nation and a people is now widely accepted. | SLC | 439 | Art in Exile: Vladimir Vladimirovich Nabokov | In English. The scandalous success of Lolita (1955) allowed Vladimir Nabokov to retire from teaching at Cornell University and move to Switzerland to devote himself to fiction, translation, criticism and lepidoptery. Examines the Russian roots of Nabokov's Russian (in translation) and American novels about exile: his first novel, Mary (1926), The Defense (1929), Glory (1932), and his tribute to 19th-century Russian literature, The Gift (1938), which he considered his greatest Russian novel. These are followed by Lolita (1955), Pnin (1957) and Pale Fire (1962), his memoirs, Speak, Memory (1966), and some essays and short stories. | SLC | 442 | Dracula and Vampire Lore | Vampire stories are not only local phenomena placed in Transylvania, as the common stereotype is incessantly spread. Legends about Dracula and the Count himself may be "untrue," but events that took place during the life and reign of the Wallachian Voevode Vlad Tepes, better known as Vlad the Impaler, are nonfictional. He ruled during the time of the Ottoman Empire extension to Europe and his fight against the Turks give us thought on the altered understanding of Vlad as a vampire figure. Occurring and recurring in continuously changed environments, Count Dracula affects everyone to the same degree, but still remains as secret and elusive as before, pitted against a vision of mysterious spaces that evoke the faraway castles from Whitby, UK (the origin of Stoker's Dracula), from Bran and Poenari Castles in Transylvania as well as the visions of Jules Verne's Castle of the Carpathians. | N | LEC | N | OPT | The College of Liberal Arts and Sciences | School of International Letters and Cultures | 3 | (L or HU) & G & H | Prereq(s): ENG 101, 105 or 107 w/C or better; Credit for only ROM 442 or SLC 442 or SLC 494 (Drac&Vamp Belief in the Wrl'd) or SLC 494 (Drac&Vamp Castles) or SLC 494 (Drac&Vamp Lore) or SLC 494 (Drac:Between Myth&Hist) OR Visiting University Student |

| SOS | 363 | From Cells to Society: Understanding Complexity | Equips students with concepts and empirical examples they need to understand the role of complexity in the world around them. Complexity science is based on the fundamental principle that entities and phenomena in the world around us are systems composed of many parts that interact to produce their global characteristics. For example, cells interact to produce organs and tissues, which in turn interact to produce physiological processes (i.e., the capacity to metabolize food to produce new compounds and energy) and physical infrastructure (skeletal and muscular structure) which produce organisms. Organisms, (e.g., humans) interact to form groups, villages, cities, nations. | N | LEC | N | OPT | College of Global Futures | School of Sustainability | 3 | | Prerequisite(s): minimum 45 hours; Credit is allowed for only AML/ASB/BIO/SOS 394 (From Cells to Societies) or ASB 363 or BIO 363 or CAS 363 or SOS 363 OR Visiting University Student |

| SOS | 374 | Earth's Critical Zone | The Earth's near surface environment (the "critical zone") supports most life and is the dynamic interface between the solid Earth and its fluid envelopes where much of the geologic record is produced. We now know that we face rapid climate change and the consequences of changes in land use, water resources, and ecosystems. Critical to planning a response to, or mitigation of, environmental change is understanding how the Earth surface works. Focuses on how changes to the environment manifest themselves in the critical zone-- in the form and function of the Earth's surface (landforms, water resources, soils, ecosystems). Offers a quantitative introduction to the form and function of the processes impacting the Earth's critical zone to build an understanding of the interactions of physical, chemical and biotic processes in shaping the surface and determining fluid, solute and sediment fluxes. | N | LEC | N | OPT | College of Global Futures | School of Sustainability | 3 | | Prerequisite(s) with C or better: CHM 101 or higher or PHY 101 or higher; both GLG 101 and 103, or both SES 121 and 123, or SES 225; MAT 170, 171, 210, 251, 265, or 270; Credit is allowed for only GLG 327 or SOS 374 OR Visiting University Student |

Cultures situated in landscapes are the basis for an incredible global diversity of worldviews and behaviors that in turn affect how humans experience and "use" their environments. This course will provide an introduction to current and benchmark literature and methods in environmental and ecological anthropology that address people-environment interactions. | N | LEC | N | OPT | College of Global Futures | School of Sustainability | 3 | (L or SB) & G | Prerequisite(s): ENG 101, 105, or 107 with C or better; minimum 45 hours; Credit is allowed for only ASB 375 or SOS 375 OR Visiting University Student |

| SOS | 537 | Disasters as Opportunity for Sustainability | Explores how disasters can give rise to sustainability transitions and sustainability solutions. Disasters are revealing crisis. As hazards roll into disasters they lay bare the underlying conditions of socio-ecological vulnerability and inequities that affect almost all aspects of daily life. They also affect the infrastructures and institutions supporting daily life. This realization stimulates improvisation and ideas for just, green, inclusive and resilient futures. Investigates case studies to reconstruct how people, affected by and surviving a disaster, advanced sustainability transitions and reduced disaster risk. Uses an interdisciplinary perspective to analyze these transitions, drawing on theories of change from sustainability transitions and transformation as well as disaster management research. Moreover, students ground the literature in concrete experiences as shared through guest speakers, professional experiences, documentaries and an applied project. | N | LEC | N | GNA | College of Global Futures | School of Sustainability | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student; Credit is allowed for only CPP 537 or SOS 494 (Disasters as Opportunities for Change Towards Sust) or SOS 537 or SOS 598 (Disasters as Opportunities for Change Towards Sust) |
| SOS | 539 | Human Well-Being and Sustainability | Many of us take it for granted that human well-being is the ultimate end of sustainability or sustainable development. But what is a well-being, really? Social scientists collect empirical data and develop indices, indicators and other proxies to represent and measure well-being; but is it the kind of phenomenon that can be explained? In other words, is there a correct theory of human well-being? How does one measure well-being? Moreover, what are we to make of the relationship between well-being and sustainability? Where do these two concepts coincide? Where do they come apart? Does human well-being presuppose a commitment to sustainability? If the ultimate end of sustainability is human well-being, then is sustainability a redundant concept? This interdisciplinary course tackles such questions by critically examining the most prominent philosophical theories of well-being and by considering how they might be reconciled with relevant empirical evidence. Also spends considerable time reflecting on the problems that arise with respect to measuring well-being, particularly in the context of public policy. | N | LEC | N | OPT | College of Global Futures | School of Sustainability | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student; Credit is allowed for only HPS/PHI/SOS 591 (Human Well-Being and Sustainability) or PHI 538 or SOS 494 (Human Well-Being and Sustainability) or SOS 539 |

| SOS | 656 | Human Rights and Sustainability | Addresses the connections between human rights and environmental sustainability. Legal and scholarly approaches linking these areas present new perspectives for addressing some of the greatest challenges of our time, given the important resource dimensions of economic and social rights and the human dimensions of sustainability. Explores these tensions and opportunities by examining three substantive areas: urban ecology and human rights, the human right to food, and the human rights implications of extractive industries such as oil and mining. Following an introduction to the key concepts of human rights and sustainability, explores the substantive areas through theoretical and empirical readings on each; grassroots accounts of struggles over environment-related human rights; and selections from literature and film that illustrate the environmental justice issues at stake. | N | SEM | N | GNA | College of Global Futures | School of Sustainability | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate. Equips students with a comprehensive understanding of how and why consumers make decisions the way they do in the market (B2C). Better pricing knowledge usually converts to better bottom-line results. Students learn pricing theory and tactics as well as develop hands-on pricing skills, all aimed at improving profitability. These skills can be applied across the full range of professional contexts--as entrepreneurs, brand managers, business unit managers, management and M&A consultants. | N | LEC | N | GNA | Thunderbird School of Global Management | Thunderbird School of Global Management | 3 | | Prerequisite(s): TGM 557 |
| TGM | 556 | Global Strategic Services Marketing | Services have come to dominate our economy. Yet there remains a naïve belief that services marketing and management is a simple adaptation of goods marketing and management. Unlike physical goods, services are co-produced with customers at a time, and in a place, of the customer's choosing. This co-production directly involves an organization's front-line employees. As a result, it is more difficult for services to be inventoried and checked for quality assurance. Provides a thorough understanding of the management and continuous improvement of service operations, including a thorough understanding of the role of customers in service operations such that service firms can design effective service experience so as to minimize service failure. Provides students with an end-to-end hands-on customer experience management (e.g., customer satisfaction and loyalty), project that involves survey design, customer experience model development, data collection, data analysis, and recommendations. | N | LEC | N | GNA | Thunderbird School of Global Management | Thunderbird School of Global Management | 3 | | Prerequisite(s): TGM 557 |

Course complements other quantitative courses by adopting a hands-on and software- (SPSS) based approach to strategic decision making. A combination of lectures and discussions, analyses of data-based cases and software usage facilitate understanding of the material. | N | LEC | N | GNA | Thunderbird School of Global Management | Thunderbird School of Global Management | 3 | | Prerequisite(s): TGM 557 |

| TGM | 730 | Systems Change and Transformation in the Anthropocene | Transnational hyper-connectivity is an essential feature of our time. Yet in government, business and civil society, our approaches to power, leadership and organization remain locked in the competition-based frameworks of the 20th century. To understand these all too common problems, we need to move beyond linear models--based on a fairly detailed knowledge of the present situation and supposed to be able to make reasonable forecasts of the future--which underlie much formal policy analysis and design. Understanding the implications of strategic behavior, nonlinear feedbacks and heterogeneous actors on policies is needed. Equally we need to understand the impact of policies at multiple scales and across a wide range of stakeholders. Assesses these topics through systems change and how this has led to transformation in the Anthropocene. The foundational premise of this course is that the traditional discipline for achieving objectives in global affairs--statecraft--is necessary but not sufficient for the networked age. New tools and strategies are needed to understand and influence a world based on connectivity. Network theory provides a starting point. Covers basic principles of network theory and helps understand their relevance to the design, development and management of fit-for-purpose networks involving business, civic organizations and nonprofits, and government. Examines case studies of different global problems--from health to human rights, war to economic renewal, the environment to terrorism. Much progress has been made in the scientific understanding of the kinds of systems--under the name of complexity. Explores the consequence of these new insights for policy. Discusses salient policy and management implications of a complex adaptive system frame. | N | LEC | N | GNA | Thunderbird School of Global Management | Thunderbird School of Global Management | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |
| TGM | 740 | Leading and Managing Global Organizations: Advanced Topics | Organizations, private (business) and public (government, nonprofit and hybrid), all face chronic management and leadership problems that pose significant challenges to them. Organizations are complex and problematic entities, which is especially true for government organizations. These problems include the difficulty of designing organizations capable of coping with highly dynamic and rapidly changing environments, the challenge of developing strategies and structures for hypercompetitive conditions, and the greater complexity of managing global enterprises. Further issues addressed are the difficult task of shaping a corporate culture, managing politics and conflict between individuals and organizational units, and motivating employees who are more mobile than ever. Students learn to design incentive systems, as well as lead teams effectively. Covers how leaders of these organizations deal with these challenges. Helps students gain a deeper understanding of the nature of organizational change and the complexities that underlie them (through conceptual frameworks, organizational structure and design, the interaction of organizations with their environments and the behavior of individuals and groups within organizations; readings; and; discussions). Illuminates skills needed for managing change. Enhances sensitivity to the contribution and consequences of the human element as related to change. Helps students think about how to "thrive on and in change." | N | LEC | N | GNA | Thunderbird School of Global Management | Thunderbird School of Global Management | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |

Takes its theoretical framework from a radical 1960s manifesto called SCUM Manifesto by Valerie Solanas and from the French feminist philosophies of Julia Kristeva, who theorized the abject as a relationship with the grotesque that reveals the deep-seated fear of death. Uses these theoretical positions to examine trash, both abstractly and literally. Works through a variety of concepts ranging from actual trash, garbage, waste, toxic sludge, pollution and dirt, and tackles more abstract notions of trash such as the knowledge produced on the fringe in circuses, amusement parks, "trailer trash" zones, freak shows and the bodies of those marked as "Other" or different. | N | LEC | N | OPT | New College of Interdisciplinary Arts and Sciences | School of Humanities, Arts, and Cultural Studies | 3 | SB & C | Prerequisite(s): ENG 102, 105, or 108 with C or better; minimum 36 hours; Credit is allowed for only AMS 469 or ETH 469 or JHR/MAS 598 (Abject Bodies and the Politics of Trash) or WST 469 OR Visiting University Student |

| WST | 620 | Advanced Feminist Theory in a Transnational Context | Concentrates on transnational feminist theory and its intersections with queer theory, postcolonial theory, and critical race theory. Also looks at the ways in which (or indeed, whether) academic discourses have anything useful to say about the worlds in which we live. Among the questions we'll need to have constantly in our minds are: In what ways has feminist theorizing changed over time? Does transnational feminist theory challenge or even undermine previous feminist theoretical discussions or the perspectives you might be familiar with from your undergraduate days? What kinds of engagements do our authors have with theorists in other areas (queer studies, postcolonial studies, critical race theory)? Can you discern any sort of new feminist grand narrative emerging from these works? In what ways might our authors' perspectives help you conceptualize and contextualize your own work? | N | SEM | N | OPT | The College of Liberal Arts and Sciences | School of Social Transformation | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student; Credit is allowed for only WST 620 or WST 691 (Feminist Theory) or WST 791 (Feminist Theory) |

| WWS | 460 | World War II | Explores the causes, conduct and consequences of World War II. When did World War II start? How was it fought, and what did that mean for soldiers, the homefront and millions of civilians in Japanese or German occupied regions? What did the world that emerged in its wake look like? The course explores these fundamental questions with an emphasis on multiple explanations of the causes of the war in Asia and Europe and the contingency of Allied victory. Explores the war as both a total and a global war in which perceptions of race, class and gender shaped the experience of combatants and noncombatants, many of whom died in indiscriminate bombing campaigns. Racial ideologies also led to the brutalization of soldiers, which in turn fueled the violence against civilians, as exemplified by the Holocaust and Japanese war crimes. Finally, the course turns to the global order emerging after the war and the different narratives that emerged from it. | N | LEC | N | OPT | The College of Liberal Arts and Sciences | School of Historical, Philosophical and Religious Studies | 3 | HU & H & G | Prerequisite(s): minimum 45 hours; Credit is allowed for only HST 460 or HST 494 (Introduction to World War II Studies) or HST 494 (World War II Studies) or JST 460 or WWS 460 OR Visiting University Student |

A number of factors shaped how people experienced the war--whether one was a soldier, non-combatant, resistor or collaborator. Focuses on how ordinary people made sense of their experiences during the war. In addition, students explore the theory and practice of collecting and using oral histories. | N | LEC | N | OPT | The College of Liberal Arts and Sciences | School of Historical, Philosophical and Religious Studies | 3 | | Prerequisite(s): WWS 561; WWS 562 |

| AIS | 512 | Historical Trauma, Healing, and Decolonization | In recent years, scholars have begun to explore the prevalence of historical trauma among American Indian communities. This research argues that the genocide, violence, breakdown of customary cultures through external coercion; and oppression that Indians continue to face at the hands of foreign colonizers has left Indians with harmed with intergenerational self-destructive behavior, domestic violence, suicide, anxiety, depression, low self-esteem, and anger. As a result of this violence and oppression, they have developed models of recovering healthy nations while challenging violations of their human rights in the domestic and international arenas. This history has given rise to a widespread cultural revitalization movement often referred to as decolonization. Scholars from an array of academic disciplines are producing a growing body of literature about decolonization. | N | SEM | N | GNA | College of Liberal Arts and Sciences | American Indian Studies Program | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |
| AIS | 513 | Urban Indian Issues | According to the 2010 Census, 64.1% of the American Indian/Alaskan Native population resides in a place outside of tribal areas. What are the social, political, and economic implications for a family who lives off the reservation and away from tribal homeland? Course explores these issues and dynamics and challenges the student to examine the unique identity and contributions of urban Indians. Students learn the history of Indigenous migrations to the city and assess current needs and concerns through consultation work coordinated with Phoenix area Indian Centers and nonprofit organizations. | N | SEM | N | GNA | College of Liberal Arts and Sciences | American Indian Studies Program | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |

Takes its theoretical framework from a radical 1960s manifesto called SCUM Manifesto by Valerie Solanas and from the French feminist philosophies of Julia Kristeva, who theorized the abject as a relationship with the grotesque that reveals the deep-seated fear of death. Uses these theoretical positions to examine trash, both abstractly and literally. Works through a variety of concepts ranging from actual trash, garbage, waste, toxic sludge, pollution and dirt, and tackles more abstract notions of trash such as the knowledge produced on the fringe in circuses, amusement parks, "trailer trash" zones, freak shows and the bodies of those marked as "Other" or different. | N | LEC | N | OPT | New College of Interdisciplinary Arts and Sciences | School of Humanities, Arts, and Cultural Studies | 3 | SB & C | Prerequisite(s): ENG 102, 105, or 108 with C or better; minimum 36 hours; Credit is allowed for only AMS 469 or ETH 469 or JHR/MAS 598 (Abject Bodies and the Politics of Trash) or WST 469 OR Visiting University Student |

| ARS | 323 | Curatorial Activism | Current art world statistics demonstrate that the fight for gender and race equality in the art world is far from over: only 14% of the work displayed at MoMA in 2016 was by non-white artists; only a third of artists represented by U.S. galleries are female, but over two-thirds of students enrolled in art and art-history programs are young women. However, there are many curators working worldwide to offset these racial and gender disparities. Arranged in thematic sections focusing on feminism, race and sexuality, this course examines and illustrates pioneering examples of exhibitions that have broken down boundaries and demonstrated that new approaches to curating are possible, from Linda Nochlin's "Women Artists" at LACMA in the mid-1970s to the Whitney Biennial of 2019. This course profiles key exhibitions by pioneering curators, including Okwui Enwezor, Nan Goldin, Marcia Tucker, Catherine de Zegher, Fred Wilson, Jonathan Katz, and other curators who understand that institutions must be a driving force in this area and a vital source of inspiration for today's expanding new generation of curators. | N | LEC | N | Z1 | Herberger Institute for Design and the Arts | School of Art | 3 | | Prerequisite(s): minimum 45 hours; Credit is allowed for only ARS 323 or ARS 494 (Curatorial Activism) OR Visiting University Student |

| ARS | 331 | 18th- and 19th-Century European Jewelry Design | The 18th century was defined by stylish sociability that included beautiful dress, sumptuous interiors and exquisite, fashionable jewelry. Who were the influencers for jewelry design during this period? How was society defined by these ornaments? What were the rules of engagement? Did these opulent ornaments affect social strategies? How did jewelry materials evolve into more modern and recognizable forms? All of these questions are answered in this course. The cultural history of jewelry design mirrors the historical and collective customs of society from the established aristocracy, to the rising middle classes, to the expansion of cultural awareness among every world citizen when travel became widely available. So much so, that upon the turn of the 19th century, jewelry design shifted from appearing as solely a status of power and wealth to an eloquent symbol of worldly knowledge and cultural awareness. | N | LEC | N | GNA | Herberger Institute for Design and the Arts | School of Art | 3 | | Prerequisite(s): minimum 45 hours; Credit is allowed for only ARS 331 or FSH 331 or ARS 394 (18th & 19th Century European Jewelry Design) OR Visiting University Student |

Considers issues of style; changes in clothing production (such as brocades, cotton, silk, furs); and the function of accessories in defining identities in art. Examines fashion magazines, historical events and social change and dress as distinct from fashion. Finally, seeks to understand how art serves to heighten the meaning, display and performance of fashion in terms of the portrait subjects and the intended spectators. | N | LEC | N | GNA | Herberger Institute for Design and the Arts | School of Art | 3 | | Prerequisite(s): minimum 45 hours; Credit is allowed for only ARS 335 or ARS 394 (Fashion and Dress in Art, Ren. to 20th Century) or FSH 335 or FSH 394 (Fashion and Dress in Art, Ren. to 20th Century) OR Visiting University Student |

| ARS | 555 | Museums and Social Justice | A recent spate of scandals, protests and a global pandemic have forced museums and heritage institutions to face up to some difficult ethical and financial issues. In the wake of the Black Lives Matter protests, these include reassessments of staffing demographics, salary differentials, and discussions of how best to address racial and gender diversity in acquisition policies, permanent collection displays and exhibition schedules. The #MeToo movement has resulted in difficult conversations about sexual harassment and gender discrimination in museums as well. Other recent public controversies have demanded reevaluations of board vetting procedures to avoid reputational controversies, a more thorough review of corporate sponsors vis-a-vis a museum's mission, and the development of action plans to address the legacy of colonial theft and Nazi looting. Covid-19 has also greatly affected museums--attendance, annual budgets--and has resulted in mass layoffs and organizational restructurings, as museums are left to wonder about their financial viability moving forward. Also discusses whether museums have a moral responsibility to respond to and become engaged with compelling social justice issues like race, immigration, health care, climate change--or whether they should remain neutral. Indeed, the question of museums and social justice has plagued the museum world's preeminent professional organization, the International Council of Museums (ICOM), which, since 2017, has been attempting to redefine the museum as a site for public discourse on urgent topics; amidst debate and turmoil, a possible redefinition of museums of the 21st century as sites for social justice. Examines these current controversies and events. Although there is often a sense of confusion about art forms that do not reflect the classic notions of art, such as painting and sculpture, it is important to note that contemporary art is largely defined by emerging mediums and forms of expression that cannot always be framed as pictures or mounted to a plinth. By taking an "always emerging" approach to art, this seminar and studio course will not attempt to define expanded arts, but will instead provide foundational knowledge for further pushing the boundaries of what art can be and do in the world. | N | STO | N | GNA | Herberger Institute for Design and the Arts | School of Art | 3 | | Credit is allowed for only ART 114 or ART 194 (Expanded Arts Studio) |

| ART | 443 | Performance Art: Actions, Gestures, Journeys | Performance art is the act of doing. It is not about representing, recounting, re-enacting or acting. It is an art form of direct action. Students create performances and context-specific projects by making connections between art, life and public space. Since performance art and live art cannot be separated from the body who makes it, this course continually investigates the meaning and significance of performance art. For instance, what distinguishes an action as art? Is it different from an everyday action like brushing your teeth? What makes it different? When is a job or labor a performance? How does a person (artist or audience) know when the art begins or when it ends? All performances are documented and presented in video or still photography examples online. Select works are posted on the Live Art Platform website at the end of the semester. | N | STO | Y | OPT | Herberger Institute for Design and the Arts | School of Art | 3 | | Prerequisite(s): Studio Art minor or BIS Studio Art emphasis; ART 110 with C or better; ART 116 with C or better OR Art major OR Performance and Movement BA major; Credit is allowed for only ART 443 or ART 543 OR Visiting University Student |

Students create performances and context-specific projects by making connections between art, life and public space. Since performance art/live art cannot be separated from the body who makes it, this course continually investigates the meaning and significance of performance art. For instance, what distinguishes an action as art? Is it different from an every day action like brushing your teeth? What makes it different? When is a job or labor a performance? How does a person (artist or audience) know when the art begins or when it ends? All performances are documented and presented in video or still photography examples online. Select works are posted on the Live Art Platform website at the end of the semester. | N | STO | Y | GNA | Herberger Institute for Design and the Arts | School of Art | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student; Credit is allowed for only ART 443 or ART 543 |

| ASB | 357 | Society, Drugs and Health | Analyzes how humans use exogenous chemicals to change psychology, biology and behavior, and what positive and negative consequences this has for human health. Explores how such chemical technologies arise through cultural evolution, how societies decide what are appropriate and inappropriate uses of such technologies, how these technologies change what is considered normal biological functioning and behavior, and how these technologies shape human health. Through this substantive topic, introduces basic concepts and tools in two related fields--medical anthropology and epidemiology. Allows students to trace the experiences of one African cultural group throughout the cycle of the slave experience in the Americas. | ASB | 442 | Global Cities | This close look at megacities in the global south decisively challenges the outdated impression that the rest of the world's cities still lag way behind the U.S. and Europe. The social sciences' debate over "global cities" anchors our examination of the reorganization of metropolitan social space under impact of neoliberal globalization since the 1970s. Explores urban inequalities of slums and dreamworlds; compares vernacular and transnational styles of urbanism (in architecture, design, markets, consumerism, jobs, ads, ways of living); and asks how transnational flows of people, capital and culture have reconfigured ethnic relations and national identities rooted in global cities. Students become virtual transnational flâneurs, tacking between the slums and skyscrapers of global cities, and conduct guided research on a global megacity to investigate how the production of the global city changes the lived space and urban culture of local residents, and how they respond. We ask, whose city is it? | N | LEL | N | OPT | New College of Interdisciplinary Arts and Sciences | School of Social and Behavioral Sciences | 3 | SB & G | Prerequisite(s): minimum junior standing; Credit is allowed for only ASB 442 or SBS 460 |

| ASU | 230 | Life by Design | Living a meaningful life that is true to you is one of life's greatest endeavors. And, it's a process that can seem overwhelming and difficult to figure out. College offers the opportunity to explore interests and find career paths that align to your genuine interests and personal goals. But where do you start on this journey of self-discovery? Start with this course; it introduces the design thinking process--a strategy used by the world's top designers to launch products and services--and applies that process to your individualized career and life plans. You'll learn how aspects of your life that may feel disconnected (e.g., skills, ambition, interests, relationships, family needs, lifestyle) can and should work together in helping you discover careers that fit you. You'll explore how the college experience--through majors, classes, experiential learning, networking and other student services--can support your journey. And you'll develop a growth mindset that helps you. | N | LEC | N | GNA | University College | Dean, University College | 3 | | Credit is allowed for only ASU 230 or ASU 294 (Life by Design) |

| BIO | 112 | Discovery: Why Sex? | "Why?" is a question that animates the youngest of children to the most seasoned of scientists. The acts of asking and answering "Why?" highlight the integrated nature of scientific knowledge and discovery. Demonstrates scientific disciplines are not walled cities in which knowledge is neatly segregated from lines of inquiry and knowledge in other disciplines. Instead, scientific concepts weave throughout and between disciplines and scientists increasingly rely on colleagues from different scientific fields to find answers to scientific questions. So our journey to find responses to the question "Why Sex?" takes us not just to biology, but also to earth science and to physics. Along the way, scientists are linked together not only through concepts that crosscut the disciplines, but also in their reliance upon key scientific skills such as the ability to observe, think critically, measure, gather data and communicate their findings. | N | LEL | N | GNA | College of Liberal Arts and Sciences | School of Life Sciences | 4 | SG | Credit is allowed for only BIO 112 or BIO 194 (Discovery: Why Sex?) | BIO | 528 | Human Impacts on Ecosystem Functioning | Explores our current understanding of how humans are impacting the functioning of ecosystems and how changes in ecosystems would affect provisioning of ecosystem services and ultimately human well-being. The two primary drivers of ecosystem change are growth of the human population and increased consumption per capita. These drivers affect the Earth's cycles of carbon, nitrogen and water, as well as regional and global-scale changes in biodiversity and climate. Includes an in-depth discussion of scenarios for the next 50 and 100 years, which articulate costs and benefits of alternative development pathways in terms of climate change, food production, clean water and biodiversity. Scenarios of change in biodiversity lead to the topic of the consequences of biodiversity change for the functioning of ecosystems from the point of view of their productivity and stability. Human activities have disrupted several biogeochemical cycles including nitrogen and carbon cycles. | N | LEC | N | GNA | College of Liberal Arts and Sciences | School of Life Sciences | 3 | | Prerequisite(s): Degree- or Nondegree-seeking graduate; Credit is allowed for only BIO 429, BIO 528, SOS 429, SOS 528, or SOS 494/598 (Human Impacts on Ecosystem Functioning), or BIO 494/598 (Human Impacts on Ecosystem Functioning) |

The stress response is highly conserved and allows organisms to respond and adapt to their environment. A highly effective and robust stress response facilitates adaptation and behavioral flexibility. However, a maladaptive stress response can produce detrimental outcomes. The ultimate goal is to understand the dynamic and reciprocal processes by which the stress response and brain interact to produce behavioral flexibility and resilience or detrimental outcomes. | N | LEC | N | OPT | College of Liberal Arts and Sciences | School of Life Sciences | 3 | | Prerequisite(s) degree- or nondegree-seeking graduate student; Credit is allowed for either BIO 568 or PSY 568 |
