| GSC | 509 | Emerging Technologies and Global Security | Provides an introduction to the implications of accelerating changes in military and security technologies, fueled by rapid developments in five core technology systems: nanotechnology, biotechnology, information and communications technology (ICT), robotics and applied cognitive science. Also introduces the idea of revolutions in military affairs, a concept that has been used to frame discussions about the strategic implications of new technologies from drones to cyber. | N | LEC | N | OPT | College of Liberal Arts and Sciences | School of Politics and Global Studies | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |
| GSC | 510 | Governance in Post-Conflict and Transitional Contexts | One of the most pressing current global security policy issues involves understanding and implementing strategies, mechanisms and processes to address post-conflict and transitional contexts. How do societies create and manage representational governance after the fall of authoritarian regimes? How can institutions be rebuilt and reconstituted? How can a social order address the justice demands of victims of brutal political violence whose suffering was often a key element of prior systems of rule? Provides a critical introduction to the field of post-conflict reconstruction and transitional justice. Reviews the tense and uncertain nature of post-conflict environments and their challenges, engages the security questions raised by peacekeeping and stability operations. Also considers the difficulties of governance and reconstruction in the aftermath of conflict. | N | LEC | N | OPT | College of Liberal Arts and Sciences | School of Politics and Global Studies | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |
| GSC | 511 | Terrorism and Insurgency | Provides a critical overview of the use of terror by governments, insurgents and other nonstate actors. Engages the definition of terrorism and provides an overview of key practices and strategies. Reviews key theories as to the causes, meaning and impact of the deployment of terror as a strategy by distinct groups. This involves a consideration of state terror, insurgencies and global terror networks. Links many of the core ideas reviewed in this class with a set of case studies designed to ground the broader discussion of terror within specific situations and contexts. | N | LEC | N | GNA | College of Liberal Arts and Sciences | School of Politics and Global Studies | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |
| GSC | 512 | Global Trends | Takes a broad look at emerging global patterns as they relate to governance, security and social order. Examines a number of interrelated topics, including: globalization and various forms of backlash; populist movements; socioeconomic inequality both within and between societies; the shifting of economic power from the global west to the global east; demographic changes and the resource strain that results; democratic backsliding, protests and social unrest; and the weakening of state-society relations. Situates these conflicting trends within a bigger question: What does it all mean for global stability? Do these new challenges signify the erosion of an aging order, and if so, what emerges from the upheaval? | N | LEC | N | OPT | College of Liberal Arts and Sciences | School of Politics and Global Studies | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |

| GSC | 562 | Cybersecurity, Global Politics and Resiliency | Provides an overview of global cybersecurity preparation and resiliency. Because international cybersecurity threats change rapidly and because complete protection for most systems is impossible in an interconnected world, a significant amount of cyber policy focuses on improving mechanisms of preparation and enabling multiple forms of resiliency. The general idea is that attacks cannot be prevented or fully anticipated so creating more flexible, redundant and multi-faceted systems is a useful policy. Each week's readings are related to themes including: understanding core vulnerabilities, types of attackers and targets, modes of deterrence and encryption systems and tools. Engages the special challenges raised by attribution and outlines how to conceptualize and ensure system resiliency. Provides a critical overview of central ideas, concepts and terminology for better engaging of cybersecurity preparation and resiliency as a key element of global security. | N | LEC | N | GNA | College of Liberal Arts and Sciences | School of Politics and Global Studies | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |

Since cybersecurity is a constantly evolving field, many aspects of planning are in a state of continual evolution. Many believe that broad-based, flexible strategies are necessary to enable key actors and institutions to engage in adequate policies to ensure general cybersecurity preparedness. Class themes include: an overview of key institutions and actors, central concepts of threat analysis, public and private cyberpolicy, and elements of international regulation. Also engages issues of cybersecurity strategy, the special challenges of non-state actors and ways to conceptualize and engage the future of cybersecurity. Reviews essential ideas and concepts, gains familiarity with key actors and institutions, and engages the complex interplay of governmental, intergovernmental, commercial and non-state actors engaged in cyber threats and protective action. | N | LEC | N | GNA | College of Liberal Arts and Sciences | School of Politics and Global Studies | 3 | | Prerequisite(s): GSC 560 |

| GTD | 511 | Development Policy and Practices | Since the Bretton Woods Agreements in 1944, enormous energy has been devoted to generating the right tools for global development policy. Yet, little attention is given to the relationship between these tools, the practice of development and actual outcomes. At best, it is understood as a "gap" between the theory of development policy and practices. There is no reflection on what the good development policy looks like or what collective learning we have thus far. Informs students on the complexity of policy making and its relationship to development practices through time. Creates an intellectual space to discuss the practices of global development; uses case studies to enhance students' creativity and skill needed in managing and negotiating critical development challenges. Approaches development policy (models, strategies and project design) primarily as a tool to legitimize power relation rather than to orient practice for desired development outcomes. | N | LEC | N | GNA | College of Global Futures | School for the Future of Innovation in Society | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |

| HCD | 577 | Infection Prevention Control in the Health Care Setting | Antimicrobial resistance is an urgent global health priority. In the near future common treatable infections may become untreatable. Currently 1 out of 20 hospitalised patients contracts a health care associated infection, of which around 50% are preventable. These infections add to the functional disability and emotional stress of the patient and in some cases, lead to disabling conditions that reduce their quality of life. In addition, they contribute to increased hospital stays and added expense to the health care system. Infection prevention and control in health care settings is now of national priority endorsed by the Australian Government, Ministries of Health, the Australian Commission of Quality and Safety in Health Care, health care facility accreditation organisations, as well as internationally by the World Health Organization. | N | LEC | Y | NSW | College of Health Solutions | College of Health Solutions | 1-3 | | Prerequisite(s): International Health Management MIHM student |

| HEB | 349 | Israeli Wars in Israeli Movies | From its first day, the State of Israel has been in a state of war with the Arab countries. Every few years, the fighting erupted into an open war. At the beginning of the country, there was a consensus that the wars were forced on the Israelis, and therefore, the heavy toll on human life was unavoidable. Since the Six Day War, 1967, and the political change in 1977, Israeli society is split in attitude toward war. The absolute belief in the political and military leaders was shaken, and new political agendas entered the political arena. To this divided society, the Intifadas occurred with the waves of terrorism. These events added fire to the heated debates in Israel. One means of expression is through the cinema. In this course, students watch, analyze, and discuss selected movies on the Israeli wars and terrorism in the streets of Israel. Through these movies, produced by Israelis, we'll try to understand the mood and attitude of the Israelis toward war, enemies, and political and military leaders. | N | LEC | N | OPT | College of Liberal Arts and Sciences | School of International Letters and Cultures | 3 | HU & G | Prerequisite(s): ENG 101, 105, or 107 with C or better; Credit is allowed for only FMS 349 or HEB 349 or JST 346 or HEB 394 (Israeli Wars in Israeli Movies) OR Visiting University Student |

This course helps students and professionals transform research, experiences and ideas into compelling nonfiction narratives so that readers are both educated and entertained. In this semester-long workshop, the instructor proceeds, step-by-step, through the entire writing true stories process, from finding the story to recreating scenes and building a scene-by-scene structure that is informative and cogent. Participants learn how to read with a writer's eye and recognize and utilize structural patterns. Explains, illustrates and practices literary techniques like dialogue, flash descriptions, inner point of view, and the art of imbedding information in story. | N | SEM | Y | OPT | College of Global Futures | School for the Future of Innovation in Society | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student; Credit is allowed for only HSD 521 or COM 598 (Writing True Stories That Matter: Creative Nonfiction) or HSD 598 (Writing True Stories That Matter: Creative Nonfiction) |
| HSD | 540 | Responsible Innovation and Research | Responsible Innovation (RI) and Research is a vision of how values can best be incorporated into the practice of science, technology and innovation (STI). It touches on a host of other similar concepts like Public Interest Technology, Tech for Good, Just Tech and others. At their core, RI and its cognates understand that STI is not a value-free endeavor, and thus it is better to recognize those values and work with them to help assure that our investments in STI are attuned to the goals of science policy as well as to broader public values and the pursuit of a more just, democratic society. Emphasize bringing students to the forefront of the emerging scholarship around RI and related concepts, including perspectives grounded in justice, equity, diversity and inclusion; communicating with colleagues and publics about values and RI in the practice of STI; and performing a real-world project, inquiry or intervention around RI. | N | SEM | N | OPT | College of Global Futures | School for the Future of Innovation in Society | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |
| HSD | 550 | Prototyping Futures | In this project-based course, students work in interdisciplinary teams to explore and envision the future of communities, industries, technologies and other elements of our society. In this process, students develop their understanding of the application of extended reality technologies, practices and methodologies for design, and tools for applying research to constructing prototypical scenarios for the future, in addition to gaining experience in effective collaboration. This course is about critical, methodological and narrative skills--the ability to move fluidly through domains, create low-fidelity prototypes, and devise creative solutions to complex problems by envisioning new realities. The development of deep technical skills in a chosen field follows in each program. | N | LEL | N | OPT | College of Global Futures | School for the Future of Innovation in Society | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student; Credit is allowed for only AME 550 or DSC 550 or HSD 550 |

| HSD | 551 | Future-Focused Research Methods | In times of discontinuous change, deep ambiguity and high levels of novelty, the future is characterized by radical uncertainty. Making decisions, choosing policies or organizing community action is complicated by the range of complex potential futures in play. As researchers and practitioners concerned with socio-technical change, what are the tools and methods to grapple with and make sense of uncertainty? This class surveys the field of foresight, drawing from a broad array of scholarly traditions, to catalogue the different methodological approaches to navigate change. Looks to scholars who approach the sociology of time, the dynamics of socio-technical systems, innovation studies, social psychology and futures studies to explore the concept of the future with an eye toward the implications for research methods. Utilizes different ways of thinking about the future to support and develop cognitive, social and organizational capacities to imagine and enact different futures. In doing so, the epistemology of the future is foregrounded, probing the nature and consequences of anticipatory knowledge production. | N | SEM | N | GNA | College of Global Futures | School for the Future of Innovation in Society | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |
| HSD | 552 | Worldbuilding and Imagination | To make a convincing future, you need to create a convincing world. Storytellers, artists, game designers, politicians and scientists all engage in the practice of building worlds in order to inspire, to question, and sometimes to terrify us. They create narratives, experiences and simulations of places, real and imagined, that combine scientific, cultural and aesthetic forms of knowledge. Why? This course explores the theory and practice of worldbuilding as a way to time travel to the future and the past, as well as to other configurations of the present. It also allows us to better understand the systems we live in and define plans of action to change them for the better. In this way, worldbuilding is a way to create collective visions for the future that inspire change today. Students study a variety of future worlds and build their own through collaborative projects that involve writing, making and public engagement. | N | SEM | N | GNA | College of Global Futures | School for the Future of Innovation in Society | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |
| HSD | 555 | Strategic Design Futures | Designers are increasingly addressing more strategic and long-term situations, while non-designers are increasingly interested in using design approaches to address diverse challenges. Strategic design is a practice that focuses on formulating strategies (problem setting) rather than only implementing strategies (problem solving). Strategic design is closely related to contemporary and emergent design practices such as user experience design, design thinking, service design, speculative design, behavioral design, and co-design, which are increasingly explored, adopted and adapted in projects and organizations. Students understand and practice a variety of strategic design methods and mindsets with the aim of changing and envisioning futures. With hands-on activities and real-world context, students use and develop core strategic design skills such as visualization, sensemaking, synthesis, speculation and facilitation. Some design tools that may be used include storyboards, user flows, journey mapping, participatory ideation, visioning, service blueprints, prototyping-testing. Includes seminar discussions and hands-on activities with a "live project." | N | PRO | N | Z1 | College of Global Futures | School for the Future of Innovation in Society | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student; Credit is allowed for only DSC 555 or DSC 598 (Strategic Design Futures) or HSD 555 |

| HST | 378 | Poverty, Inequality and Social Justice in Latin America | With persistently high levels of poverty and inequality, Latin America is often considered the most unequal region in the world. This course explores the economic, political, social and geographic origins of poverty and inequality in Latin American countries since independence. It also studies efforts to address the problem by governments, non-governmental organizations, the international community, religious groups and activists. Explores these themes in more detail through a case study of one Latin American country and a global intensive experience at the end of the course. By reflecting on the Latin American experience, students gain insights for wealthy countries like the United States where inequality is on the rise. | N | LEC | N | Z1 | New College of Interdisciplinary Arts and Sciences | School of Humanities, Arts, and Cultural Studies | 3 | | Prerequisite(s): minimum 45 hours; Credit is allowed for only HST 378 or JHR 378 or JUS 378 or LAS 378 OR Visiting University Student |
| HST | 379 | History of College Sports | Student-controlled intercollegiate contests quickly transformed into big-time college sports by the early twentieth century, revolutionizing the sports industry in the United States as well as the landscape of higher education. The American college sports enterprise is unique; nowhere else in the world does a large, amateur, revenue-generating system of school sports exist. After an exploration of the origins of intercollegiate athletics and the creation of the modern National Collegiate Athletic Association, topics include integration, women's intercollegiate athletics, the big business of amateurism, and scandal. Video lectures, readings and films introduce students to these often controversial topics, grounding them in the historical record. Many of the current debates concerning college sports have been taking place for more than a century. | N | LEC | N | GNA | College of Liberal Arts and Sciences | School of Historical, Philosophical and Religious Studies | 3 | | Prerequisite(s): ENG 102, 105, or 108 with C or better; minimum 30 hours; Credit is allowed for only HST 379 or HST 306 (History of College Sports) |

| HST | 404 | Conquest and Encounters in Colonial Latin America | How did Hernan Cortés and Francisco Pizarro defeat the Aztec and Inca Empires? Despite numeric inferiority, limited provisions, and little knowledge about the Americas, Cortés and Pizarro defeated advanced civilizations that had experienced warriors and millions of inhabitants. Possible explanations include the conquistador's valor, advanced weaponry, superior military strategy, Indian allies, and biological attacks. In their encounters with native peoples of the Americas, Europeans were not always conquerors. Álvaro Núñez Cabeza de Vaca and Lope de Aguirre failed both in their attempt to conquer a large Indian civilization and in their effort to find mineral wealth. A few Europeans such as Bartolomé de Las Casas spoke out against the abuses committed against the Indians during the conquest. Explores these issues from the perspective of both Europeans and native peoples and looks at the long-term impact for Latin America and its peoples. | N | LEC | N | OPT | New College of Interdisciplinary Arts and Sciences | School of Humanities, Arts, and Cultural Studies | 3 | L & G | Prerequisite(s): ENG 102, 105, or 108 with C or better; minimum 55 hours; Credit is allowed for only HST 404 or LAS 404 OR Visiting University Student |

| HST | 460 | World War II | Explores the causes, conduct and consequences of World War II. When did World War II start? How was it fought, and what did that mean for soldiers, the homefront and millions of civilians in Japanese or German occupied regions? What did the world that emerged in its wake look like? The course explores these fundamental questions with an emphasis on multiple explanations of the causes of the war in Asia and Europe and the contingency of Allied victory. Explores the war as both a total and a global war in which perceptions of race, class and gender shaped the experience of combatants and noncombatants, many of whom died in indiscriminate bombing campaigns. Racial ideologies also led to the brutalization of soldiers, which in turn fueled the violence against civilians, as exemplified by the Holocaust and Japanese war crimes. Finally, the course turns to the global order emerging after the war and the different narratives that emerged from it. | N | LEC | N | OPT | College of Liberal Arts and Sciences | School of Historical, Philosophical and Religious Studies | 3 | HU & H & G | Prerequisite(s): minimum 45 hours; Credit is allowed for only HST 460 or HST 494 (Introduction to World War II Studies) or HST 494 (World War II Studies) or JST 460 or WWS 460 OR Visiting University Student |

Strongly focuses on teaching students how to guide their learning by asking productive questions to drive their research, how to find content to answer their questions, how to approach challenging primary content, how to work well in teams, and how to distill and share their learning. | N | LEL | N | GNA | College of Liberal Arts and Sciences | Dean, College of Liberal Arts and Sciences | 3 | | Prerequisite(s): Technological Leadership BS major OR Visiting University Student |

| IPI | 241 | Designing and Making (Electronics and Programming) | Humanity's future as an interplanetary species is only made possible through the continued development of new technologies able to provide solutions to difficult problems. Facilitates students developing proficiency in both "making" and "designing." While not an engineering course, seeks to support students in gaining basic technical "makerspace" abilities. More important than the hard skills, students grow in their capacity for technical design thinking--the process by which modern technologies are imagined and developed. Hands-on and project-based. Students learn tools and processes for solving global and interplanetary problems, with special consideration given to the ways that technologies impact society. Students gain basic proficiency in the mechanical, electrical, computer programming and design aspects of technology development in makerspaces, through supervised research and design of creative projects that relate to aerospace engineering, space exploration, and/or an inclusive, interplanetary future. As a part of this course, students gain basic knowledge of CAD modeling and 3D printing, circuits and soldering, Arduino programming, tinkering and debugging methods, creative problem solving, team-based project management, the relationship between technology and society, and basic technological design methods. | N | LEL | N | GNA | College of Liberal Arts and Sciences | Dean, College of Liberal Arts and Sciences | 3 | | Credit is allowed for only IPI 241 or IPI 294 (Designing and Making for an Interplanetary Future) |

| IPI | 296 | Inquiry | To be most effective in work and life, we need to learn how to recognize and solve problems, and to work in teams. Students work together to reach understanding on a large goal associated with human society and space exploration. An example from a previous class is, "What will the Moon be like after human settlement?" As a class, uses a weekly inquiry cycle to step toward the goal: read some content, ask a "natural next question" that takes us one step further toward the goal, seek content to help answer that question, and repeat. Students learn how to understand a complex problem through multiple steps, to approach challenging primary content, to productively critique each other's work, and to think critically. Students meet for 2 hours per week but work extensively outside of class. | Y | LEL | Y | GNA | College of Liberal Arts and Sciences | Dean, College of Liberal Arts and Sciences | 3 | L | Prerequisite(s): ENG 101, 105, or 107 with C or better OR Visiting University Student |

| ITA | 350 | Food and Culture: The Mediterranean Lifestyle in Italy | Analyzes the Mediterranean lifestyle (food and eating practices) in Italy from a historical/cultural, scientific and sociological perspective. Students first examine the history and regional cultures of the Mediterranean diet in Italy as they analyze its rich biological diversity and history of cultural exchange. Students then gain an understanding of the critical nutrients of the Mediterranean diet and of the scientific evidence for its health benefits, especially how it can help prevent chronic diseases like obesity and type 2 diabetes, which affect more than half of all adults in the U.S. In addition, students keep a food log for one week, which they then analyze in terms of the critical nutrients of the Mediterranean diet. Finally, Italian food cannot be studied without preparing it! As UNESCO points out, the sharing of food is an important part of the Mediterranean lifestyle. | N | LEC | N | OPT | College of Liberal Arts and Sciences | School of International Letters and Cultures | 3 | | Prerequisite(s): ENG 102, 105, or 108 with C or better; Credit allowed for only ITA 350 or ITA 394 (Food & Culture: Mediterranean Lifestyle in Italy) or SLC 350 or SLC 394 (Food & Culture: Mediterranean Lifestyle in Italy) OR Visiting University Student |
| ITA | 380 | Natural Disasters: Environmental and Cultural Resilience in Italy | The Italian peninsula is home to some of the most diverse physical and geological landscapes on earth. Over time, natural disasters such as earthquakes, volcanic eruptions and landslides have transformed Italian culture, creating a distinct, reciprocal and enduring relationship between nature and Italian society. Studies pivotal natural disasters that have occurred throughout Italian history, including the Mt. Vesuvius, Pompeii and Etna volcanic eruptions; the Messina, Belice Valley, Campania, Friuli and L'Aquila earthquakes; and the Vajont landslide. Identifies and measures the physical and geological features of Italy that make it susceptible to natural disasters. Incorporates a variety of sources designed to give students both a theoretical and practical understanding of Italian culture and natural disasters. Uses class discussions, collaborative projects, creative writing, academic texts, personal narratives, films, videos, guest lectures and current articles. | N | LEC | N | OPT | College of Liberal Arts and Sciences | School of International Letters and Cultures | 3 | | Prerequisite(s): ENG 101, 105, or 107 with C or better; Credit is allowed for only ITA 380 or SLC 380 or HON/ITA/SLC 394 (Natural Disasters: Environmental & Cultural Resilience) OR Visiting University Student |

| ITA | 414 | French and Italian Popular Culture | Popular culture no longer holds the ancillary role traditionally reserved for whatever does not carry the definition of high culture. That popular culture is instead able to provide us with very relevant insights on the identity of a nation and a people is now widely accepted. As a consequence, this class aims at examining popular culture-related artifacts in Italy and France in order to shed a light on crucial issues such as the culture of food and its historical and social significance; the meaning of fashion and design within an urban context, with a special attention to gender roles; the importance of the comics, given in particular the exceptional success the bande dessinée genre is currently enjoying in France throughout the whole age range of the population; the show business with a particular attention to music; and the social function and role of sport with respect to the two dominant sports in both countries (soccer and cycling). | N | LEC | N | OPT | College of Liberal Arts and Sciences | School of International Letters and Cultures | 3 | (L or HU) & G | Prerequisite(s): ENG 102, 105, or 108 with C or better OR minimum 45 hours; Credit is allowed for only FRE 414 or ITA 414 or SLC 414 OR Visiting University Student |

| ITA | 423 | Italian Organized Crime in Films and History | Through an analysis of historical, anthropological, literary, political and cinematic texts, explores representations of the Italian organized crime in Italian and American films from the early 20th century to today. Discovers different "Mafias" originating in Italy, but whose reach extends much further, such as the Cosa Nostra in Sicily, the Camorra in Naples, and the 'Ndrangheta in Calabria. Examines the fiction, stereotypes, myths and legends surrounding the mafia through a scrupulous analysis of some of the most important American and Italian films portraying mafia culture. Italians have used the medium of film to address the issue of the mafia, raising awareness about the harsh reality of life in the mafia and the ways in which it reaches into every aspect of Italian politics and society. Explores how Italian mafia films subvert international fascination with the mafioso by disrupting the glamorized myths that are mainly perpetuated by American popular cinema. | N | LEC | N | OPT | College of Liberal Arts and Sciences | School of International Letters and Cultures | 3 | (L or HU) & G | Prerequisite(s): ENG 102, 105, or 108 with C or better or min 45 hours; Credit for only FMS 423 or ITA 423 or SLC 423 or ITA 494/SLC 494 (Italian Organized Crime in Films & History) or FMS 494/ITA 494/SLC 494 (Mafia & Film) OR Visiting University Student |

| IVD | 525 | Fundamentals of Entrepreneurial Leadership | "Experiential" course for students to practice "being" a leader at the personal, interpersonal and community levels. While typical leadership classes leave one knowing about leaders and leadership, this class leaves students being leaders as part of their natural self-expression. The program follows an ontological pedagogy, rather than epistemological one. Ontology is the study of the nature and function of being "as lived" in real time. Epistemology by contrast deals with the varieties, grounds, and validity of knowledge. Leadership skills include mastery of communication at each of the three levels, from personal relationships to large-scale messaging for media and branding; and looking beyond the personal and interpersonal sociological level of analysis to incorporate principles of social and environmental justice into their relationships and the enterprises they lead. | N | LEC | N | GNA | Herberger Institute for Design and the Arts | The Design School | 3 | | Prerequisite(s): Innovation and Venture Development MS student; Corequisite(s): IVD 560 |
| IVD | 560 | Innovation Studio I: Discovery and Insight | A prerequisite for successful innovation and venture development is a deep understanding of the multidimensional context in which the innovation will be situated, and in which the venture will compete, whether a commercial enterprise or nonprofit. This course gives students the design, business and engineering research and evaluation tools and experience to investigate and immerse themselves in industry or sector customer needs, the competitive landscape and cultural context, as well as ways to predict and mitigate the unintended consequences of their innovation on society and the environment. Teaches students where to begin, how to inquire, how to evaluate information they uncover, and how to use critical thinking and analysis to develop the insights that become the foundation of their venture-development journey. | N | STO | N | GNA | Herberger Institute for Design and the Arts | The Design School | 3 | | Prerequisite(s): Innovation and Venture Development MS student |
| IVD | 561 | Innovation Studio II: Problem Reframing | Problem reframing is essential to the innovation process, and to properly diagnosing problems so they can be investigated from multiple perspectives. It entails pushing past conventional assumptions about barriers to success, to find root causes--sometimes different problems altogether--that inspire novel, diverse approaches. Problem reframing is a powerful tool that increases the options and resources available in addressing any challenge. Students learn the difference between root causes and symptoms, understand the systems affected by and affecting their challenge, and learn to see and act on problems as opportunities for breakthrough solutions. | N | STO | N | GNA | Herberger Institute for Design and the Arts | The Design School | 3 | | Prerequisite(s): Innovation and Venture Development MS student; IVD 560; Corequisite(s): IVD 525 |

| IVD | 562 | Innovation Studio III: Explore, Fail, Solve | In this iterative, creative "make-to-learn" phase of venture development, students explore prototyping and testing with audiences or end-users to develop feedback loops for real-time evaluation of their ideas, then synthesize learning from both successes and failures to progress toward a solution. Key components include mastery of ideation and creative development, framing strategic questions and success indicators for prototyping of services or products, evaluation of feedback and iteration of progressively more promising ideas, and evaluation of their innovations measured against the success indicators they developed. Students learn and practice prototyping service interactions as well as product innovations. | N | STO | N | GNA | Herberger Institute for Design and the Arts | The Design School | 3 | | Prerequisite(s): Innovation and Venture Development MS student; IVD 525; IVD 561. |
| IVD | 598 | Special Topics | Topical courses not offered in regular course rotation (e.g., new courses not in the catalog, courses by visiting faculty, courses on timely topics and highly specialized courses responding to unique student demand). | Y | LEC | Y | OPT | Herberger Institute for Design and the Arts | The Design School | 1-4 | | Prerequisite(s): degree- or nondegree-seeking graduate student |
| IVD | 630 | Scaling Entrepreneurial Leadership | The personal skills required to succeed in a small start-up environment are different from those required to run a successful enterprise or nonprofit. Many entrepreneurs do not have access to the learning that prepares them to both launch and successfully scale their venture. Complexities of board management, fostering a creative culture, codifying a communication system that becomes a source of energy and a north star for the organization, inculcating values of social and environmental justice into a culture and translating them into daily behavior are required capacities which cannot be learned in theory, only in practice. Students master the skills to lead an enterprise through the challenges of the 21st century. | N | LEC | N | GNA | Herberger Institute for Design and the Arts | The Design School | 3 | | Prerequisite(s): Innovation and Venture Development MS student; Corequisite(s): IVD 562 |
| IVD | 660 | Innovation Studio IV: Business Model | Faced with the challenge of business model generation and prototyping, students need to define the starting points of value proposition, supply chain and customer segments. Later in the process, a clear description of the revenue model, customer relationship, key resources, key activities, key partners and cost structure complement the original value proposition design. The refinement of the newly created business model is made through a process of iteration. Students have an overall comprehension of the strategic innovation process made of (a) strategy, (b) execution, (c) tools and (d) metrics before moving to the stages of scaling and growth of the business. In order to develop a viable business model, students need to understand the costs of development, manufacturing and getting their goods or services to customers. | N | STO | N | GNA | Herberger Institute for Design and the Arts | The Design School | 3 | | Prerequisite(s): Innovation and Venture Development MS student; IVD 525; IVD 560; IVD 561; IVD 562; Corequisite(s): IVD 630 |
| IVD | 661 | Innovation Studio V: Scale | SCALE is translated as proportional growth of production and profit aiming at a larger market position. Understanding the timing to scale a business model is crucial to its success and scaling can be discussed in terms of market, process and team. Faced with scaling issues of their business models, students need to build their own framework--or tools--in order to make decisions concerning the whens (time) and hows (market, process, tools) of scaling. Topics covered also include, but not limited to, venture funding strategies, budgeting capital needs, developing e-commerce, CRM analytics, supply chain and operations. At the end of this semester, students present a fully developed venture, with clearly articulated market need, viable innovation based on end-user feedback, business model and plan for scale. Where relevant, students register their intellectual property through ASU, using the university's published guidelines and procedures. | N | STO | N | GNA | Herberger Institute for Design and the Arts | The Design School | 6 | | Prerequisite(s): IVD 525; IVD 560; IVD 561; IVD 562; IVD 630; IVD 660 |

Assignments might include data collection, experimental work, data analysis or preparation of a manuscript. | Y | RSC | Y | Z1 | Herberger Institute for Design and the Arts | The Design School | 1-15 | | Prerequisite(s): degree- or nondegree-seeking graduate student |

| JHR | 378 | Poverty, Inequality and Social Justice in Latin America | With persistently high levels of poverty and inequality, Latin America is often considered the most unequal region in the world. This course explores the economic, political, social and geographic origins of poverty and inequality in Latin American countries since independence. It also studies efforts to address the problem by governments, non-governmental organizations, the international community, religious groups and activists. Explores these themes in more detail through a case study of one Latin American country and a global intensive experience at the end of the course. By reflecting on the Latin American experience, students gain insights for wealthy countries like the United States where inequality is on the rise. | N | LEC | N | Z1 | New College of Interdisciplinary Arts and Sciences | School of Social and Behavioral Sciences | 3 | | Prerequisite(s): minimum 45 hours; Credit is allowed for only HST 378 or JHR 378 or JUS 378 or LAS 378 OR Visiting University Student |

| JHR | 425 | The Politics of Immigration | Examines immigration and citizenship in the United States, with a focus on changes in policy, politics and incorporation trends. While a primary focus is on contemporary politics and policies, also spends much time on immigration and citizenship's legal history and on how scholars use history to reveal new, important insights for our understanding of debates today. Starts with a discussion of migration to the U.S. today and considers theories about international migration. Then moves to the history of immigration and citizenship policies and politics in the U.S. and continues up to present day political and national debates and initiatives. Contains a particular focus on the history, politics and debates around "undocumented"/"illegal"/unauthorized populations, on related citizenship and membership politics. With the continuing national debates, also spends additional time throughout the semester analyzing current reform politics and prospects, along with the different interests and constituencies battling for reform. Readings and assignments feature some of the different disciplinary approaches used in the study of immigration, drawing primarily from political science, history, sociology and anthropology. Aims to gain a better understanding of the different approaches and implications for using different types of methodologies. | N | LEC | N | GNA | New College of Interdisciplinary Arts and Sciences | School of Social and Behavioral Sciences | 3 | | Prerequisite(s): minimum 45 hours; Credit is allowed for only JHR 425 or JUS 426 OR Visiting University Student |

| JHR | 441 | Latin America and the World Economy | Globalization did not begin in the late twentieth century, but rather global trade has linked Latin America with the rest of the world for over five hundred years. The region has been an active and important participant in the world economy since Columbus's first voyage in 1492. This course explores the social, cultural, economic, and environmental impact of such participation on both Latin America and the rest of the world. It is organized both chronologically and thematically. We will study both colonial and post-colonial trade. The commodities studied include sugar, rubber, bananas, and cocaine. | N | LEC | N | OPT | New College of Interdisciplinary Arts and Sciences | School of Social and Behavioral Sciences | 3 | L & G & H | Prerequisite(s): ENG 101, 105, or 107 with C or better; minimum 45 hours; Credit is allowed for only HST 441 or JHR 441 or LAS 441 OR Visiting University Student |

| JHR | 485 | Social Justice and Human Rights Capstone | Senior-level culminating course helps students consolidate their capstone assignments into an intellectual portfolio of written work. Although writing is a critical skillset for academic success, learning how to write is often treated as a secondary pursuit acquired "on the job." Assignments once submitted to fulfill course requirements are soon forgotten, and the labor spent on them is forever lost. This course offers a rare and invaluable opportunity to revisit the writing students have produced in their studies, thinking in highly focused ways about what ideas interest them and why. Students grapple with conventions of social scientific writing, understand how to formulate rigorous research questions and practice drafting structured arguments around key concepts. Additionally, students revise and refine existing papers, trace intersections between them and integrate them into a body of work. Students critically engage with others' work, offering constructive annotated feedback on others' papers while applying the same insights to their own writing. By the end of the course, students create a portfolio representing their best and most promising work. They are able to thoughtfully articulate the knowledge they have acquired over the years, as well as point toward possible trajectories for future research. This culminating experience not only equips students for graduate school, but enhances their skills for a range of professional fields--including law, journalism, policy-making, social work and beyond--where rigorous thinking and writing are essential. | N | PRO | N | GNA | New College of Interdisciplinary Arts and Sciences | School of Social and Behavioral Sciences | 3 | | Prerequisite(s): Social Justice and Human Rights BA major; JHR 305 with C or better; senior standing |

| JHR | 502 | Foundations of Social Justice and Human Rights | Provides students with foundational knowledge in the theory, method and practice of social justice and human rights. Defines the meaning and scope of both "human rights" and "social justice" and focuses explicitly on the relationship between them. Students learn about the historical, political and legal foundations of international human rights concepts, laws and institutions and how to apply a social justice perspective to understand the differential distribution of access to human rights according to inequalities of nationality, race, class, gender and more. Drawing on major disciplinary perspectives in anthropology, sociology, political science and law, provides the core knowledge and skills that students need to succeed in the program as a whole. | N | SEM | N | GNA | New College of Interdisciplinary Arts and Sciences | School of Social and Behavioral Sciences | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |
| JHR | 503 | Gender Based Violence and Sex Trafficking | Following passage of the Palermo Protocol, the first modern global treaty on trafficking in the year 2000, sex trafficking has received enormous global attention. Focuses on the period following the passage of this treaty to understand both the causes and consequences of sex trafficking around the world. Are there patterns associated with victimization? Do traffickers use similar tactics for recruitment? What are countries doing to prosecute traffickers and protect victims? Students conduct guided research developing their expertise on trafficking in one country of their choosing, applying the tools and theories from class to evaluate their chosen case. Course adopts an interdisciplinary perspective drawing on work from political science, sociology, anthropology, counseling, psychology and law. Often draws on literature from feminist criminology studies to account for a more nuanced perspective. | N | LEC | N | GNA | New College of Interdisciplinary Arts and Sciences | School of Social and Behavioral Sciences | 3 | | Prerequisite(s): Social Justice and Human Rights MA student; Credit is allowed for only JHR 503 or JHR 598 (Gender-based Violence and Sex Trafficking) |

| JHR | 504 | International Law and Organizations | <p>Focuses on the fundamentals of international legal order, global governance structures and the influence of several key actors within this field, which include State actors as well as international organizations. Provides students with a good understanding and interesting insights about the nature, sources and scope of international law; types of international regulatory instruments such as treaties, conventions and other agreements, and their influence within the international arena. Students learn about the roles of international adjudicative bodies like the International Court of Justice (ICJ) and other judicial tribunals in managing global affairs. Focuses on international legal order and global institutional structures; also examines key global political and economic governance organizations and their relationship with States. Specifically, examines international inter-governmental organizations (IGOs) like the United Nations (UN), and its specialized agencies including International Monetary Fund (IMF), World Bank, World Health Organization (WHO), World Intellectual Property Organization (WIPO), and the UN Educational, Scientific and Cultural Organization (UNESCO). Also looks at the role of international nongovernmental organizations (INGOs) such as Amnesty International, Greenpeace, International Red Cross and Red Crescent Movement, and The Global Fund to Fight AIDS, Tuberculosis and Malaria (The Global Fund), and assess their importance as active actors in the area of global governance. Focuses on examining sets of carefully selected case illustrations (current and past) from around the world, along with practical learning activities regarding topical issues, helping students gain deeper and functional knowledge about the various topics discussed and issues examined. Cases and instances explored cut across areas like global peace and security, human rights and social justice, environment, public health and economic development.</p> | N | LEC | N | GNA | New College of Interdisciplinary Arts and Sciences | School of Social and Behavioral Sciences | 3 | | Prerequisite(s): Social Justice and Human Rights MA student; Credit is allowed for only JHR 504 or JHR 598 (International Law and Organizations) |
| JHR | 505 | Migration, Asylum and Refugees | <p>Interdisciplinary course that introduces students to social scientific debates on migration and displacement in the contemporary world. Over the past decade, recurring wars and natural disasters have driven millions to flee from their homes. According to the United Nations High Commissioner for Refugees (UNHCR), the global number of displaced people is over 70 million, the highest ever recorded since World War II. Now more than ever, it is important to critically examine the social, political and legal processes by which people are displaced and disenfranchised. Delves into social scientific perspectives on forced migration, drawing on essential concepts and theories in anthropology, political theory and international relations. Students question the taken-for-granted distinctions between refugees and "economic migrants," and investigate the historical contexts and institutional structures shaping global displacement that have brought us to our present moment. What does the figure of the refugee reveal about modern conceptualizations of citizenship and the nation-state? How do we think about the violence and precarity of displacement beyond metaphors of "exception," and is it possible to protect the rights of asylum-seekers in conjunction with those of vulnerable citizens? How is the suffering of distant others rendered legible to Western audiences, and how do the conditions of humanitarian work serve to further amplify inequalities between the givers and receivers of aid? The purpose is not to provide an exhaustive summary of various disciplinary approaches to migration, asylum and refugees, but rather, to develop some keen insights into the foundational forces shaping migrant lives and the power relations underpinning our endeavor to alleviate displacement.</p> | N | LEC | N | GNA | New College of Interdisciplinary Arts and Sciences | School of Social and Behavioral Sciences | 3 | | Prerequisite(s): Social Justice and Human Rights MA student; Credit is allowed for only JHR 505 or JHR 598 (Migration, Asylum, and Refugees) |

| JHR | 515 | Power and Inequality in Academia and Activism | Centers the perspective of racialized and gendered minorities in academia and in activism in an effort to achieve racial and gender justice in academia and beyond. Covers research, teaching and mentorship in academia and inclusive solidarity and egalitarian political imaginaries in activism. Students read empirical research that helps them navigate racial, gendered and epistemic oppression in research, teaching and mentorship. Students also read empirical research that helps them navigate intersecting forms of oppression within and outside of social justice movements. They then apply these skills to their own thesis, applied projects or capstone projects in collaboration with their peer writing groups, which also function as peer accountability and mentoring groups. The goal is to challenge hierarchical power dynamics in academia and in activism by developing an alternative model of mentorship and an egalitarian way of relating rooted in mutual respect, trust and solidarity. | N | SEM | N | GNA | New College of Interdisciplinary Arts and Sciences | School of Social and Behavioral Sciences | 3 | | Prerequisite(s): Social Justice and Human Rights MA student; Credit is allowed for only JHR 494 (Navigating academia: Racialized & gendered lenses) or JHR 515 or JHR 591 (Navigating academia: Racialized & gendered lenses) |

| JHR | 540 | Critical Humanitarianism | Interdisciplinary lecture course introduces students to social scientific debates on humanitarianism, international aid and the ethics of alleviating suffering in the contemporary world. Since its birth in the 19th century, modern humanitarianism has emerged as a powerful actor in world affairs, not only assisting the vulnerable during moments of crisis but shaping politics and governance in its own right. Critically investigates the historical, cultural, institutional and technological contexts of humanitarian action. Rather than taking the morality of "saving lives" as self-evident, this course explores how moral judgements about life are formed, transformed, appropriated and sometimes ignored in the pursuit of humanitarian interests. How does one situate the emergence of humanitarianism in histories of capitalism and abolitionist movements? What definitions of the human are evoked in calls for humanitarian intervention, and how are these definitions sutured by notions of race? Why does the suffering of others evoke humanitarian sympathies and what are the ethical motivations that guide aid workers? How do we hold these ethical callings in tension with various forms of institutional violence perpetrated in humanitarian contexts? How does race shape the construction of both the subjects and objects of humanitarian aid, and what would it mean to decolonize the world of humanitarianism? The purpose is not to provide an exhaustive summary of all the theoretical approaches and empirical issues in humanitarian studies, but to develop some specific insights into what it means to "do good" and how goodness is invariably entangled in contemporary questions of power, politics, violence and history. | N | LEC | N | GNA | New College of Interdisciplinary Arts and Sciences | School of Social and Behavioral Sciences | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student; Credit is allowed for only ASB/JHR/POS/SBS/SOC 494 (Critical Humanitarianism) or JHR 540 or JHR 598 (Critical Humanitarianism) |

| JST | 346 | Israeli Wars in Israeli Movies | From its first day, the State of Israel has been in a state of war with the Arab countries. Every few years, the fighting erupted into an open war. At the beginning of the country, there was a consensus that the wars were forced on the Israelis, and therefore, the heavy toll on human life was unavoidable. Since the Six Day War, 1967, and the political change in 1977, Israeli society is split in attitude toward war. The absolute belief in the political and military leaders was shaken, and new political agendas entered the political arena. To this divided society, the Intifadas occurred with the waves of terrorism. These events added fire to the heated debates in Israel. One means of expression is through the cinema. In this course, students watch, analyze, and discuss selected movies on the Israeli wars and terrorism in the streets of Israel. Through these movies, produced by Israelis, we'll try to understand the mood and attitude of the Israelis toward war, enemies, and political and military leaders. | N | LEC | N | OPT | College of Liberal Arts and Sciences | School of Historical, Philosophical and Religious Studies | 3 | HU & G | Prerequisite(s): ENG 101, 105, or 107 with C or better; Credit is allowed for only FMS 349 or HEB 349 or JST 346 or HEB 394 (Israeli Wars in Israeli Movies) OR Visiting University Student |

| JST | 459 | Latin American Jewish Culture | Focuses on forms of cultural production in Latin America marked by or under the aegis of Jewish diasporic identity from the late nineteenth century to the present. | JST | 460 | World War II | Explores the causes, conduct and consequences of World War II. When did World War II start? How was it fought, and what did that mean for soldiers, the homefront and millions of civilians in Japanese or German occupied regions? What did the world that emerged in its wake look like? The course explores these fundamental questions with an emphasis on multiple explanations of the causes of the war in Asia and Europe and the contingency of Allied victory. Explores the war as both a total and a global war in which perceptions of race, class and gender shaped the experience of combatants and noncombatants, many of whom died in indiscriminate bombing campaigns. Racial ideologies also led to the brutalization of soldiers, which in turn fueled the violence against civilians, as exemplified by the Holocaust and Japanese war crimes. Finally, the course turns to the global order emerging after the war and the different narratives that emerged from it. | N | LEC | N | OPT | College of Liberal Arts and Sciences | School of Historical, Philosophical and Religious Studies | 3 | HU & H & G | Prerequisite(s): minimum 45 hours; Credit is allowed for only HST 460 or HST 494 (Introduction to World War II Studies) or HST 494 (World War II Studies) or JST 460 or WWS 460 OR Visiting University Student |

| LAS | 404 | Conquest and Encounters in Colonial Latin America | How did Hernan Cortés and Francisco Pizarro defeat the Aztec and Inca Empires? Despite numeric inferiority, limited provisions, and little knowledge about the Americas, Cortés and Pizarro defeated advanced civilizations that had experienced warriors and millions of inhabitants. Possible explanations include the conquistador's valor, advanced weaponry, superior military strategy, Indian allies, and biological attacks. In their encounters with native peoples of the Americas, Europeans were not always conquerors. Álvaro Núñez Cabeza de Vaca and Lope de Aguirre failed both in their attempt to conquer a large Indian civilization and in their effort to find mineral wealth. A few Europeans such as Bartolomé de Las Casas spoke out against the abuses committed against the Indians during the conquest. Explores these issues from the perspective of both Europeans and native peoples and looks at the long-term impact for Latin America and its peoples. | N | LEC | N | OPT | New College of Interdisciplinary Arts and Sciences | School of Humanities, Arts, and Cultural Studies | 3 | L & G | Prerequisite(s): ENG 102, 105, or 108 with C or better; minimum 55 hours; Credit is allowed for only HST 404 or LAS 404 OR Visiting University Student |

| LAT | 358 | Saving the Roman Empire | In his autobiographical epitaph, the Res Gestae, Augustus, founder of the Roman Empire, claimed to have restored Rome to her former glory. His moral, social and political reforms solidified Roman control of the world and the imperial family's hold on ruling her. Through the next five hundred years, as the power of the empire waned and waxed, Augustus's successors turned time and again to reforming the empire and restoring her to her former glory - to saving the Roman Empire. In doing so they had to deal with problems both external and internal; sometimes their ideas worked, often they did not. Ultimately they failed, and Rome and the western empire fell in CE 476. Examines the rise, decline and fall of the Roman Empire from the perspective of internal and external problems the Empire faced, and asks which reforms worked, which did not work, and why. What could have been done differently? Should anything have been done differently, or was the western Roman Empire always doomed? | N | LEC | N | OPT | College of Liberal Arts and Sciences | School of International Letters and Cultures | 3 | (L or HU) & H | Prerequisite(s): ENG 102, 105, or 108 with C or better; Credit is allowed for only GRK 294/HST 294/LAT 294/SLC 294 (Saving the Roman Empire) or LAT 358 or LAT 394/SLC 394 (Saving the Roman Empire) or SLC 358 OR Visiting University Student |

| MCO | 425 | Digital Media Literacy I | Helps students begin to navigate the 21st-century media, starting by becoming active users of media, not just passive consumers. The Internet-fueled democratization of media creation has enabled anyone to be a publisher, and given audiences' almost infinite choices, with both great and questionable effects. In a world of information abundance, it can be difficult to discern fact from opinion and truth from fiction. We need to know how to wade through this barrage of information with a critical eye, to be better informed, and ultimately become creators of media ourselves. | N | LEC | N | GNA | Walter Cronkite School of Journalism and Mass Communication | Walter Cronkite School of Journalism and Mass Communication | 3 | | Prerequisite(s): minimum 2.00 GPA; Credit is allowed for only MCO 425 or MCO 494 (Digital Media Literacy) OR Visiting University Student |

| MCO | 427 | Misinformation and Society | Develops strategies and tactics to recognize misinformation, and inoculates students--and helps them join the battle--against it. Misinformation in our context is false information purposefully created to deceive and cause harm. It runs rampant in today's digital information ecosystem, and is becoming more and more sophisticated and difficult to spot. Bad actors are using powerful tools and techniques to infect our information supply, sowing confusion and discord. While there are laudable efforts to staunch the flow of misinformation, media users need help in deciding what information to trust. Examines the evolution of misinformation and the range of content types that fall under its umbrella. Explores tools, techniques and tactics that individuals can employ to identify misinformation, and gives them a head start on making informed decisions on what, and whom, they can trust. | N | LEC | N | GNA | Walter Cronkite School of Journalism and Mass Communication | Walter Cronkite School of Journalism and Mass Communication | 3 | | Prerequisite(s): minimum 2.00 GPA |

Includes (1) common data types in manufacturing, e.g., images, time series; (2) fundamental data processing and analytical techniques; (3) machine-learning models applicable to the data types; and (4) decision-making activities in manufacturing applications that those data, techniques and model support. Incorporates programming as a critical part of the course to give students hands-on experience to implement these methods on real data. | N | LEC | N | GNA | Ira A. Fulton Schools of Engineering | School of Manufacturing Systems and Networks | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |
| MFG | 545 | Modern Manufacturing Methods | Investigates the capabilities and equipment of both conventional manufacturing processes and modern manufacturing processes. Emphasizes the fundamental, development and application of casting, forming and sintering processes for conventional manufacturing processes. Emphasizes the emerging topics related to additive manufacturing, field-assisted manufacturing and nanomanufacturing for modern manufacturing processes. Also introduces engineering materials, structure of materials, property of materials and material characterizations in the manufacturing processes. Complements theoretical concepts presented in lectures with the presentation of relevant research topics and/or industrial applications. Develops an understanding of manufacturing process evolution and the capabilities of modern manufacturing processes and equipment. | N | LEC | N | OPT | Ira A. | MFG | 574 | Polymer Science and Additive Manufacturing | Presents the mechanical, thermal and electrical properties of polymers concerning the underlying physics and physical chemistry of polymers in the melt, solution and solid-state used in traditional processing or additive manufacturing. Topics include conformation and molecular dimensions of polymer chains in solutions, melts, blends and block copolymers; an examination of the structure of glassy, crystalline and rubbery elastic states of polymers; thermodynamics of polymer solutions, blends, crystallization; nanocomposites; mechanical, thermal and electrical properties in polymeric materials; lab or simulation sessions in 3d printing. | N | LEC | N | GNA | Ira A. Fulton Schools of Engineering | School of Manufacturing Systems and Networks | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student; Credit is allowed for only MFG 574 or MFG 598 (Polymer Science & Additive Manufacturing) |
| MFG | 575 | Design for Additive Manufacturing | Focuses on the design aspects of Additive Manufacturing (AM), or 3D printing. Contrary to popular opinion, AM processes do have their constraints and limitations--not everything can be manufactured with AM, and even when it is feasible, not everything should. Even if a part can and should be manufactured with AM, it is important to truly appreciate the design possibilities enabled by AM to maximize the performance, life-cycle cost and sustainability benefits the technology has to offer. Examines these possibilities in the context of three key design capabilities: topology optimization, architected cellular materials and bio-inspired design. Combines fundamental understanding of the relevant design principles with hands-on time through projects that leverage commercial design for AM tools. | N | LEL | N | GNA | Ira A. Fulton Schools of Engineering | School of Manufacturing Systems and Networks | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student; Credit is allowed for only MFG 575 or MFG 598 (Design for Additive Manufacturing) |
| MFG | 581 | Simulating Manufacturing Systems | Specific modeling and simulation tools used to understand and optimize manufacturing systems operations, with an emphasis on both model building and statistical interpretation of model output. | N | LEC | N | GNA | Ira A. Fulton Schools of Engineering | School of Manufacturing Systems and Networks | 3 | | Prerequisite(s): Fulton Engineering graduate student; Credit is allowed for only EGR 581 or EGR 598 (Simulating Manufacturing Systems) or MFG 581 |

| MFG | 582 | Metal Additive Manufacturing | Within the rapidly growing field of Additive Manufacturing (AM), the ability to print fully dense metal parts has had a significant impact on the aerospace and biomedical industries, with growing influence in the automotive and other industry sectors. Provides an overview of different metal 3D printing processes, and an in-depth look at the most widely used one: the laser powder bed fusion process. For this process, the course is divided into 4 main modules: process development (hands-on metal 3D printing); properties (characterization and testing); design for metal AM (use of design and build preparation software); and process simulation (use of simulation software). Familiarity with ANSYS is preferred, but due to the very specific and applied nature of this class, it is not required. Students need access to ANSYS either from their own laptops or by using shared computing resources in labs, and they also need to spend time in the Innovation Hub on the Polytechnic campus building and characterizing 3D printed parts. | N | LEC | N | GNA | Ira A. | NEM | 510 | Narrative Development and Pre-Production | Why are some stories more engaging than others? What are the narrative tools that pull in audiences--to touch, teach and inspire? What are the kinds of stories that move you? Students learn the foundations of good storytelling and pre-production, particularly for short form and emerging media. Assesses the potential interest and impact of different storylines; conducts background research and interviews; develops compelling story arcs and characters; writes voiceover and narrative scripts; explores multiple emerging storytelling modes, including animation and immersive; and applies best practices for pitching and accepting/implementing critique. While primarily focused on nonfiction storytelling, also considers fiction. | N | LEL | N | Z1 | Herberger Institute for Design and the Arts | The Sidney Poitier New American Film School | 3 | | Prerequisite(s): Cronkite School of Journalism and Mass Communication graduate student or Herberger Institute for Design and the Arts graduate student |
