Career Opportunities: Dance artists, educators and media specialists who complete the Master of Fine Arts program in dance with an emphasis in interdisciplinary digital media and performance are prepared for work in a variety of settings and industries, including higher education dance, digital media and arts programs, commercial dance venues, media production companies, community arts organizations and dance production and performance settings.

Dance interdisciplinary media artists have a wide range of international opportunities for work as independent multimedia artists and performers, digital media consultants and specialists. In addition to working in traditional performance spaces and venues, dance media artists are finding employment opportunities in rapidly evolving global digital performance and entertainment spaces.

Career examples include:

- choreographer
- community engagement and social activist artist
- dance filmmaker
- dance lighting and sound designer
- dance technology specialist
- interactive performance artist
- intermedia specialist
- performing artist
- stage production and design specialist
- teaching artist

Dance Teaching Artist Praxis (Certificate), Certificate (HIDTAPGRCT)

Online Degree Search Title: Dance Teaching Artist Praxis (Graduate Certificate)

Campus: Tempe

Program Description: This program equips students with practical and theoretical knowledge, skills and credentials that deepen their understanding of dance pedagogy. Students engage in a mix of studio-based courses, seminars and experiential learning to fully explore and scaffold appropriate teaching practices for dancers of any age and skill level.

Students who complete the dance teaching artist praxis certificate fulfill the coursework requirements they need to obtain a Provisional Arts Education preK-12 certificate in dance from the Arizona Department of Education. They also gain the qualifications and credentials required for developing and teaching university teacher preparation courses and training programs, as well as the skills and perspectives necessary to work effectively as a teaching artist in diverse sociocultural and learning contexts.

Degree Requirements:

- 28 credit hours and a portfolio.
- Required Core (28 credit hours)
- DCE 530 Somatic Movement Inquiry I (3)
- DCE 531 Somatic Movement Inquiry II (3)
- DCE 554 Teaching Praxis I: Postsecondary Teaching Philosophies, Foundations and Practices (3)
- DCE 654 Teaching Praxis II: Theories, Contexts, Populations, Psychomotor Development and Curriculum Design (3)
- DCE 656 Teaching Praxis III: Secondary Practices and Teacher Preparation Course Development/Implementation (4)
- SED 578 Residency/Student Teaching in Secondary Education (12)

Additional Curriculum Information

Students must submit the written portfolio culminating experience in the last semester of enrollment in the certificate program.

Additional information on degree requirements for this degree is available on the curriculum check sheet located at the bottom of the school's degree page (<https://musicdancetheatre.asu.edu/masters-degrees-phds/majorinfo/HIDTAPGRCT/graduate/false/3>).

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a minimum of a master's degree in dance or a related field from a regionally accredited college or university, or have successfully completed their first semester of the ASU MFA degree program in dance.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the applicable master's degree program or in the ASU Master of Fine Arts program in dance at the time of their application submission.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- letters of recommendation
- School of Music, Dance and Theatre Application (<https://apply.mdt.asu.edu/>)
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

International students who need an F1 or J1 visa first need to apply to and be accepted into a graduate degree program prior to being considered for the certificate program. International students residing in the United States on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for admission to this certificate program.

Applicants who are currently enrolled ASU students are not required to submit letters of recommendation.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Students will be able to design pedagogical approaches and curricular content for university or professional teacher preparation courses.
- Students will be able to implement pedagogical approaches and curricular content for preK-12 dance education courses.

Global Opportunities:

Global Experience: Dance teaching artists are successful in securing employment in diverse international venues and events, working abroad as resident dance teaching artists and as dance educators and performers. A number of employment opportunities for teaching artists exist all over the world.

Career Opportunities: Dance artists and educators who complete a dance teaching praxis graduate certificate are prepared for, and credentialed to, work as dance teaching artists, K-12 dance educators, higher education dance professors specializing in teacher preparation, and dance pedagogy scholars. Graduates can work across a number of sectors, including public and private K-12 schools; higher education institutions; and local, national and international dance communities and organizations, as well as in dance studio settings.

Career examples include:

- community arts facilitator
- community engagement and social activist artist
- dance education researcher or scholar
- dance studio owner
- K-12 dance educator
- K-12 performing arts administrator
- performing arts curriculum and program developer
- social engagement practitioner
- somatics educator
- teaching artist
- university dance professor and teacher preparation specialist
- wellness instructor

Professional Licensure: ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (<https://admission.asu.edu/academics/licensure>) webpage.

Design (Design of Healthcare and Healing Environments), MSD (ARHHEMSD)

Online Degree Search Title: Healthcare and Healing Environments, MSD

Campus: Tempe

ASU is not currently accepting applications for this program.

Program Description: The MSD program with a concentration in design of health care and healing environments is focused on the science and experiences behind the built environment's real and perceived impacts on health and wellness. To this end, the program emphasizes the intersection and integration of evidence-based research and practice, transdisciplinary studies, best practices, and innovation in supporting and advancing the design of healthy environments, products and processes. Students explore and synthesize principles from a variety of disciplines that include innovation, architecture, design, communication, human behavior, policy, quality and performance improvement, among others, to arrive at a thorough understanding of the critical issues facing the health care industry.

Students in this concentration have opportunities to:

- be mentored by local health care design consultants
- communicate with forward-thinking health care research centers
- engage directly with real clients
- interact with prominent health care organizations
- participate in industry conferences
- team with nursing and health innovation faculty and students

Degree Requirements:

36 credit hours and a thesis, or 36 credit hours including the required applied project course (DSC 593).

Students may choose to complete the graduate work by way of a thesis or an applied project. A master's degree thesis is a scholarly endeavor that demonstrates the ability of the author to do supervised research and intellectual writing. The applied project is somewhat different. It includes a project and a written document and is a scholarly endeavor that demonstrates the ability of the designer to do supervised research and present substantial evidence of the ability to apply research creatively to a design situation.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in graphic design, industrial design, interior design or a related design discipline from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or they must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- portfolio
- letter of intent
- contact information for three references
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. The minimum score for admission to the program is 80 on the TOEFL iBT®. Other information for international applicants can be found on the admission services

(<https://admission.asu.edu/apply/international/graduate>) website.

When applying for admission, applicants must declare one of seven focus areas:

- arts, media and engineering
- design of health care and healing environments
- industrial design

- interaction design
- interior design
- new product innovation
- visual communication design

The portfolio, letter of intent and contact information for three references must be submitted to SlideRoom (<https://asuherberger.slideroom.com/#/Login> (<https://asuherberger.slideroom.com/#/Login>)). The Design School requires that these be submitted in addition to application materials required by ASU Admission Services.

Admission to the program is selective. Admission cannot be deferred; students must enroll in the semester for which they are admitted, otherwise they must go through the entire application process again for the year for which they are applying.

A personal interview is not required; however, a candidate wishing to visit the school is welcome and should make arrangements by contacting the department.

Teaching or Research Assistantships

Applicants who wish to be considered for teaching or research assistantships should submit an additional statement outlining areas in which they feel competent to serve as a teaching or research assistant. All interested applicants can apply for a teaching assistantship position online. The link to the application is provided on the MSD website.

All international teaching or graduate assistants whose primary language is not English are required to be certified in their English language abilities. Those individuals whose native language is not English will be required to submit a Speaking Proficiency English Assessment Kit score, which is administered at ASU. Students also have the option of completing the Test of Spoken English, administered directly by the Educational Testing Service. For this group, no personnel action form will be signed until this examination has been successfully completed.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Engage in scholarly field inquiry involving the language and research of healthcare and wellness design.
- Disseminate the results of their thesis or applied research in a public forum.
- Compose a research proposal that embodies methodologies suitable to the research questions identified.

Design (Experience Design), MSD (HIDEDMSD)

Online Degree Search Title: Design (Experience Design), MSD

Campus: ASU at Mesa City Center

Program Description: The MSD program with a concentration in experience design focuses on design practices for virtual experiences in extended reality technologies, including environmental design, programmatic in both real and virtual universes, rapid prototyping, storytelling and world-building. This program is distinct among emerging media programs with its application of these technologies and practices in socially engaged and transdisciplinary modalities. It takes tools that evolved primarily from and for entertainment and applies them to the modeling of authentic challenges and futures.

Students develop human-centered design methods to improve user experience using theories and concepts from cognition and psychology, in addition to developing the ability to manage projects, work effectively in teams, and transform research into creative and technological products.

Degree Requirements:

36 credit hours and a thesis, or 36 credit hours including the required applied project course (DSC 593).

Required Core (3 credit hours)

DSC 501 Qualitative Research in Design (3)

Concentration (9 credit hours)

DSC 550 Prototyping Futures (3)

DSC 551 Immersive Experience Design I (3)

HDA 581 Emerging Media Colloquium (3)

Research Methods (3 credit hours)
DSC 500 Research Methods (3)

Electives (11 credit hours)

Other Requirements (4 credit hours)
DSC 584 Internship (4)
DSC 590 Reading and Conference (4)
DSC 592 Research (4)
HDA 580 Practicum (4)

Culminating Experience (6 credit hours)
DSC 593 Applied Project (6) or
DSC 599 Thesis (6)

Additional Curriculum Information

In the concentration coursework, HDA 581 should be taken three times for one credit hour.

For other requirements, students must complete a minimum of 4 credit hours of faculty-led research (DSC 592), individualized instruction (DSC 590), the design and implementation of public programs (HDA 580) or an internship (DSC 584).

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in design and media arts or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- portfolio
- letter of intent
- resume
- contact information of two references
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

International students are required to submit proof of English proficiency through either the TOEFL or the IELTS if their native language is not English. The minimum score for admission to the program is 80 on the TOEFL iBT[®]; taken in a testing center or an overall band score of 6.5 on the IELTS.

The portfolio, letter of intent, resume and contact information of two references must be submitted via SlideRoom (<https://asudesign.slideroom.com/#/Login> (<https://asudesign.slideroom.com/#/Login>)). The Design School requires that these be submitted in addition to the graduate application requirements.

Admission to the program is selective. Students must enroll in the semester for which they are admitted; otherwise, they will need to go through the entire application process again for the year in which they are applying.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Evaluate human experience needs and wants using immersive concepts and technologies.
- Apply their understanding and practice of design, storytelling, and worldbuilding through a design proposal that utilizes immersive technologies to addressing problems, challenges and obstacles.
- Develop solutions to real-world challenges through collaboration with interdisciplinary, transdisciplinary, and multi-stakeholder partners.

Career Opportunities: Graduates of this program are well prepared for careers in a variety of fields related to the application of immersive
2024-25 Academic Catalog Archive 678

experience design and extended reality technologies and practices.

Virtual and augmented reality have obvious and popular applications in entertainment, gaming, workforce development and research, but alumni of this program also had direct experience with the application of these tools to other areas that can expand their available pathways: architecture, interior design, urban planning, health care and education, among others. They are ideally suited for the rapidly changing climate of this field.

Career opportunities include:

- architects and interior designers
- experience designers
- film and video editors
- graphic designers
- mobile developers
- software developers
- 3D modelers and visualizers
- web developers

Design (Industrial Design), MSD (ARINDDMSD)

Online Degree Search Title: Industrial Design, MSD

Campus: Tempe

Program Description: The MSD program in industrial design at The Design School is meant for individuals interested in advanced studies in:

- criticism and methodology
- design processes
- history
- human factors
- technology
- theory

Students develop an understanding of contemporary design issues and develop skills by conducting specialized research.

This is a research-based program. Students interested in a studio-based program should refer to the Master of Industrial Design (<https://degrees.apps.asu.edu/masters-phd/major/ASU00/HIINDMID/industrial-design-mid>).

Degree Requirements:

36 credit hours and a thesis, or 36 credit hours including the required applied project course (DSC 593).

Students may choose to complete their graduate work by way of a thesis or an applied project. A master's degree thesis is a scholarly endeavor that demonstrates the ability of the author to do supervised research and intellectual writing. The applied project is somewhat different. It includes a project and a written document and is a scholarly endeavor that demonstrates the ability of the designer to do supervised research and present substantial evidence of the ability to apply research creatively to a design situation.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in graphic design, industrial design, interior design or a related design discipline from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- portfolio
- letter of intent

- resume
- contact information of two references
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) through either the TOEFL or the IELTS regardless of their current residency. The minimum score for admission to the program is 80 on the TOEFL iBT® taken in a testing center or an overall band score of 6.5 on the IELTS.

When applying for admission to an MSD program, applicants must declare one of the concentrations, such as this concentration in industrial design.

The portfolio, letter of intent, resume and contact information of two references must be submitted via SlideRoom (<https://asudesign.slideroom.com/#/Login> (<https://asudesign.slideroom.com/#/Login>)). The Design School requires that these be submitted in addition to the graduate application requirements.

Admission to the program is selective. Admission cannot be deferred, and students must enroll in the semester for which they are admitted; otherwise, they will need to go through the entire application process again for the year in which they are applying.

A personal interview is not required; however, a candidate wishing to visit the school is welcome and should make arrangements by contacting the department.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Engage in scholarly field inquiry involving the language and research of industrial design.
- Disseminate the results of their thesis or applied research in a public forum.
- Compose a research proposal that embodies methodologies suitable to the research questions identified.

Career Opportunities: Graduates work for global design consultancies, corporate design teams, universities, research institutes and manufacturing companies.

Graduates are also prepared for a career in industrial design education.

Design (Interior Design), MSD (ARINTDEMSD)

Online Degree Search Title: Interior Design, MSD

Campus: Tempe

ASU is not currently accepting applications for this program.

Program Description: The MSD program in interior design at The Design School is a research program that enables students to deeply investigate how people use and interact with various interior environments. It can be completed in as little as two years.

The program encourages the exploration of creativity, innovation and critical thinking while acknowledging the importance of cultural and historical precedent. This program helps students develop an understanding of contemporary interior design issues through acquisition of specialized research and design skills.

Degree Requirements:

36 credit hours and a thesis, or 36 credit hours including the required applied project course (DSC 593).

Students may choose to complete their graduate work by way of a thesis or an applied project. The thesis is a scholarly endeavor that demonstrates the ability of the author to do supervised research and intellectual writing. The applied project includes a project and a written document. Through this scholarly endeavor, the designer both demonstrates the ability to do supervised research and presents substantial evidence of their ability to creatively apply research to a design situation.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in graphic design, industrial design, interior design or a related design discipline from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or they must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- portfolio
- letter of intent
- resume
- contact information for two references
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) through either the TOEFL or the IELTS, regardless of their current residency. The minimum score for admission to the program is 80 on the TOEFL iBT[®] taken in a testing center, or an overall band score of 6.5 on the IELTS.

When applying for admission, applicants must declare one of the MSD concentrations (such as this concentration in interior design).

The portfolio, letter of intent, resume and contact information for two references must be submitted via SlideRoom (<https://asudesign.slideroom.com> (<https://asudesign.slideroom.com/#/Login>)). The Design School requires that these be submitted in addition to the materials required for the graduate application.

GRE scores are not required.

Admission to the program is selective. Admission cannot be deferred. Students must enroll in the semester for which they are admitted; otherwise, they need to go through the entire application process again for the year for which they are applying.

A personal interview is not required; however, a candidate wishing to visit the school is welcome and should make arrangements by contacting the department.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Engage in scholarly field inquiry involving the language and research of interior design.
- Disseminate the results of their research in a public forum.
- Compose a research proposal that embodies methodologies suitable to the research questions identified.

Career Opportunities: Graduates from this program can expect to go into interior design research or higher education instruction; the program is also good preparation for entry into doctoral programs.

Design (Space Architecture and Extreme Environments), MSD (HIDSCMSD)

Online Degree Search Title: Design (Space Architecture and Extreme Environments), MSD

Campus: Tempe

Program Description: The MSD program with a concentration in space architecture and extreme environments at The Design School is for students passionate about pushing the boundaries of design and engineering to shape the future of human habitation beyond Earth. This interdisciplinary degree program breaks conventional barriers and connects learners to the emerging space sector through innovative partnerships.

Students investigate how to live on another planet while discovering ways to improve lives on Earth. Through a curriculum emphasizing innovation,
2024-25 Academic Catalog Archive 681

research and hands-on projects, students delve into human factors in space, limited resource utilization, microgravity effects and psychological well-being in extreme environments. Students learn in state-of-the-art facilities and have access to pioneering experts in the fields of space architecture and extreme environments.

The program prepares students for a rewarding career in designing alternatives for humanity to live, work and thrive in space. It involves exploring, learning and adapting to extreme environments to design habitats, structures and systems for an interplanetary future. Working collaboratively with people across disciplines and delving into ASU's broader space initiatives, students contribute to designing an inclusive and sustainable pathway to space with humans at the center.

GI Bill® benefits

This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at <https://www.benefits.va.gov/gibill/> (<https://www.benefits.va.gov/gibill/>).

Degree Requirements:

36 credit hours and a thesis, or 36 credit hours including the required applied project course (DSC 593).

Required Core (3 credit hours)

DSC 501 Qualitative Research in Design (3)

Concentration (6 credit hours)

DSC 550 Prototyping Futures (3)

IND 544 Human Factors Systems and Documentation (3)

Research Methods (3 credit hours)

DSC 500 Research Methods (3)

Electives (15 credit hours)

Research (3 credit hours)

DSC 592 Research (3)

Culminating Experience (6 credit hours)

DSC 593 Applied Project (6)

DSC 599 Thesis (6)

Additional Curriculum Information

The program provides a wide array of elective options offered by The Design School and collaborating units so students can tailor their education to align with their research interests and career objectives. Students may also explore other elective courses from affiliated schools with approval.

In alignment with their academic and professional aspirations, the culminating experience provides students with the flexibility to choose between a traditional thesis or an applied project. The applied project is an opportunity for hands-on experience in solving practical challenges within extreme environments.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in architecture, engineering, environmental design, interior design, urban planning or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admissions application and application fee
- official transcripts
- letter of intent
- one letter of recommendation
- personal statement
- professional resume
- design portfolio
- relevant work experience
- evidence of prerequisite coursework

- proof of English proficiency

Additional Admission Information

An applicant whose native language is not English is required to provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of current residency.

The portfolio, letter of intent, resume and contact information of one reference must be submitted via SlideRoom (<https://asudesign.slideroom.com/#/Login> (<https://asudesign.slideroom.com/#/Login>)). The Design School requires that these be submitted in addition to the graduate application requirements.

The design portfolio must be a curated collection of a candidate's design works, projects and creations to visually represent the applicant's skills, creativity, design sensibilities and ability to conceptualize, innovate and effectively communicate design ideas.

In the letter of intent, applicants are required to express their intention to apply to the program by outlining the reasons for their application, their motivation for pursuing the program, and their future goals in the field, briefly touching upon their background, experiences and qualifications that make them a suitable candidate for the program.

In the personal statement, applicants must provide insights into their personal and academic background, experiences, achievements, motivations and aspirations. It should include a narrative highlighting key events or experiences shaping the applicant's interest in the field to showcase their unique qualities, perspective and potential contributions to the program and the space field.

While not always mandatory, having relevant professional experience or research experience in the field of space architecture, extreme environments or a related area can strengthen an applicant's profile. This experience could include internships, research projects or work in industries related to space exploration, architecture, engineering or environmental design.

Prerequisites include coursework in subjects such as mathematics, physics, design fundamentals, computer-aided design or relevant technical skills.

Career Opportunities: Graduates of the space architecture and extreme environments concentration pursue careers as:

- space architects
- space artists
- space eco-tourism consultants
- space industry analysts
- space industry consultants
- space industrial designers
- space interior designers
- space tourism experience designers
- space visual graphic designers

Graduates can specialize for roles specific to the aerospace industry such as:

- aerospace entrepreneur
- environmental control and life support systems designer
- environmental impact assessor
- environmental scientist
- extraterrestrial habitat designer
- planetary designer
- science communicator

They also have the skills to work outside the space industry as:

- educators
- human factors specialists
- materials scientists
- sustainable design consultants
- urban space planners

Design (Visual Communication Design), MSD (ARVCDMSD)

Online Degree Search Title: Design (Visual Communication Design), MSD

Campus: Tempe

Program Description: The MSD degree program with a concentration in visual communication design at The Design School focuses on advanced studies in visual language, history, theory, criticism and methodology, design processes and technology.

Through a specialized research and design skills curriculum, students develop an understanding of contemporary graphic design issues.

Degree Requirements:

36 credit hours and a thesis, or 36 credit hours including the required applied project course (DSC 593).

Students may choose to complete their graduate work by way of a thesis or an applied project.

A master's degree thesis is a scholarly endeavor that demonstrates the author's ability to do supervised research and intellectual writing.

The applied project, which is somewhat different, includes a project and a written document. Through this scholarly endeavor, the designer both demonstrates the ability to do supervised research and presents substantial evidence of their ability to apply research creatively to a design situation.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in graphic design, industrial design, interior design or a related design discipline from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or they must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- portfolio
- letter of intent
- resume
- contact information for two references
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

International students are required to submit proof of English proficiency through either the TOEFL or the IELTS if their native language is not English. The minimum score for admission to the program is 80 on the TOEFL iBT[®]; taken in a testing center or an overall band score of 6.5 on the IELTS.

When applying for admission, applicants must declare an MSD concentration (such as this visual communication design concentration). Students should see the department website for an approved list of graduate programs.

The portfolio, letter of intent, resume and contact information for two references must be submitted via SlideRoom (<https://asudesign.slideroom.com> (<https://asudesign.slideroom.com/#/Login>)). The Design School requires that these be submitted in addition to the graduate application requirements.

Admission to the program is selective. Admission cannot be deferred. Students must enroll in the semester for which they are admitted; otherwise, they will need to go through the entire application process again for the year for which they are applying.

GRE scores are not required.

A personal interview is not required; however, a candidate wishing to visit the school is welcome and should make arrangements by contacting the department.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following

program outcomes:

- Engage in scholarly field inquiry involving the language and research of visual communication design.
- Disseminate the results of their thesis or applied project research in a public forum.
- Compose a research proposal that embodies methodologies suitable to the research questions identified.

Career Opportunities: Graduates are prepared for a career in graphic design education or for advanced design professions.

Design, Environment and the Arts, PHD (HIDEAPHD)

Online Degree Search Title: Design, Environment and the Arts, PhD

Campus: Tempe

ASU is not currently accepting applications for this program.

Program Description: The PhD in design, environment and the arts is an individualized, institute-wide, transdisciplinary degree program that integrates graduate courses and faculty research with expertise in design; health care and healing environments; history, theory and criticism; and digital culture in design.

Broad in scope, the program is at the cutting edge of creating new knowledge in architecture, design and the arts. It complements transdisciplinary research in other disciplines within the university. The program provides research experience for students who wish to pursue careers in industry as members of interdisciplinary design teams on environmental and energy issues as well as for those who wish to teach in the architecture, design or the arts fields.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Up to 30 credit hours from a previously awarded master's degree can count toward the requirements of the doctoral program.

Of the 54 credit hours remaining after the master's degree, 12 must be dissertation credit and 12 may be research. These 24 credit hours plus the remaining 30 credit hours must be completed after admission to the program. No transfer credits are allowed to fulfill the 54 credit hour minimum requirement completed after admission to the program.

The student is required to take 15 credit hours in the concentration and a minimum of nine credit hours of specialized coursework outside the area of focus; a minimum of six credit hours in current research and research methods is required.

Each student entering the program is required to submit a plan of study during the first year.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a master's degree in the field of architecture, graphic design, industrial design, interior design, landscape architecture or fine arts from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- three letters of recommendation
- a statement of purpose summarizing career objectives and the reasons for pursuing doctoral education
- an indication of proposed area of concentration (design; history, theory and criticism; digital culture in design; or health care and healing environments)
- an indication of a potential mentor
- a sample of sole-authored written work in English or any other evidence relevant to admission to the program (i.e., master's degree thesis, research paper or published articles)
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. A TOEFL iBT score of at least 100 or an overall IELTS band score of 7.50, with no individual band below 7.00, is required of all applicants whose native language is not English.

International applicants who are interested in receiving funding as teaching assistants must take the Speaking Proficiency English Assessment Kit, administered at ASU, and become certified. Additional information is available on the department website.

Students are admitted to the program only upon completion of a degree in architecture, graphic design, industrial design, interior design, landscape architecture or fine arts, or upon the demonstration of equivalent standing. Applicants must be familiar with design and the arts and are expected to demonstrate a high level of academic maturity before being admitted to the program.

Applicants must have identified a doctoral program faculty member who has agreed to serve as a mentor. The faculty mentor should be from the Herberger Institute for Design and the Arts. Students should introduce themselves by email to the faculty members who they feel have related research interests and to inquire about their availability to be mentors.

The letters of recommendation preferably would be academic, although they could be professional. Applicants must provide the names and contact information of three recommenders at the time of their online application. Recommenders will receive an email with a link to the online letter of recommendation to complete. Candidates are able to see which recommenders have already completed their recommendation by logging into the My ASU system and viewing their To Do list. Once a recommender has submitted the letter of recommendation, the recommender's name is removed from the To Do list. All letters must be in English.

Applicants should identify a proposed research topic or list of possible topics that aligns with the research mission of the program and the research interests of faculty.

The application is considered incomplete if any of the items is missing.

The doctoral executive committee evaluates the applications and supporting materials. Admission decisions are based on the ability of the potential mentor to devote time to the student; the compatibility of the applicant's career goals with the purpose of the degree program; GRE scores (optional); previous academic training and performance; recommendation letters; and the research mission of the institute and the research interests of faculty. The recommendations of the committee are forwarded to the program director for approval. Upon receipt of the written recommendation from the program director, the dean of the Graduate College notifies all applicants in writing of the admission decision.

ASU does not accept the GRE® General Test at home edition.

Applicants should see the program website for application deadlines.

Design, Environment and the Arts (Design), PHD (HIDEADSPHD)

Online Degree Search Title: Design, Environment and the Arts (Design), PhD

Campus: Tempe

Program Description: The PhD in design, environment and the arts with a concentration in design is a flexible, interdisciplinary program that permits designers to develop the experience, skills and framework they need in order to become competent researchers, scholars, innovators, visionaries and leaders in the various disciplines of design, environment and the arts.

Broad in scope, the program involves interdisciplinary research interests at both the micro- and macro-scales of design, environment and the arts. There are opportunities for research specialization in areas such as:

- global health and human factors
- history, culture, theory and philosophy
- social justice, placemaking and placekeeping
- sustainability and resilience
- technology, innovation and entrepreneurship

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Core (6 credit hours)

EPD 700 Research Methods (3)
EPD 710 Current Research in Design (3)

Concentration (15 credit hours)
DSC 594 Conference and Workshop (3)
EPD 791 Seminar (3)
GRA 501 Creative Environment and Collaborative Leadership (3)
GRA 561 Methods in Visual Communication I (3)
GRA 562 Methods in Visual Communication II (3)
GRA 581 Internship in Teaching Design (3)
GRA 590 Reading and Conference (3)
INT 558 Lighting Design (3)

Other Requirements (12 credit hours)
EPD 590 Reading and Conference (3)
EPD 790 Reading and Conference (9)

Research (12 credit hours)
EPD 792 Research (12)

Electives (27 credit hours)

Culminating Experience (12 credit hours)
EPD 799 Dissertation (12)

Additional Curriculum Information

Students choose five courses from the list of concentration courses above. Other equivalent courses may be used as concentration coursework with approval of the supervisory committee.

When approved by the student's supervisory committee and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this degree.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a master's degree in a closely related field from a regionally accredited institution. Examples of appropriate fields include art history, architectural history and design history. Fields in the humanities such as history, literature, archaeology and anthropology also may be considered. Students without graduate experience in the history of art, history of architecture and history of design may be asked to fulfill deficiencies.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the applicable master's degree.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- GRE scores
- letters of recommendation
- personal statement
- abstract of proposed research
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

ASU does not accept the GRE® General Test at home edition.

Applicants must submit the personal statement, abstract of proposed research and contact information for two references to Slideroom (<https://asudesign.slideroom.com/#/Login> (<https://asudesign.slideroom.com/#/Login>)). It is required that these be submitted in addition to the Graduate College application requirements.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Effectively utilize theories and concepts in design, environment, and the arts for critical analysis of real-world problems in their respective fields.
- Synthesize iterative ideas and design concepts into deliverables that meet the professional standards in design, environment, and the arts sectors.
- Disseminate the results of their design, environment, and the arts research in a public forum.

Career Opportunities: More than 80 people have completed the program, and many are pursuing university teaching and research careers in design, environment and the arts fields. Others have careers leading planning and design firms or are engaged in business, industry, government and advocacy careers.

Design, Environment and the Arts (Digital Culture in Design), PHD (HIENVDGPHD)

Online Degree Search Title: Design, Environment and the Arts (Digital Culture in Design), PhD

Campus: Tempe

ASU is not currently accepting applications to this program.

Program Description: The PhD program in design, environment and the arts with a concentration in digital culture in design focuses on the role of computational systems in enhancing creativity and the quality of human design. Graduates of the program should be thinkers as well as doers; they should learn to question the existing paradigms that govern the digital world as they impact design and the arts; they should be able to analyze systematically how digital tools affect the way designers and artists think, conceptualize, create and evaluate their designs and artwork; and, as a result, they should be able to come to a unique synthesis, leading the way in these fields.

This concentration program primarily explores the impact of digital culture on how built environments, products and visual communications are designed and analyzed by design professionals and are utilized by their intended audience. Students should be able to systematically question existing paradigms and ontologies of digital tools, evaluate the new paradigms that emerge as a result of digital culture, and propose new frameworks for design disciplines. Issues such as user interface design for new products, computer simulation of the performance of buildings and products, the effects of digital tools on architectural form giving, digital design processes, better incorporation of human factors into design tools, usability and interaction design are some examples of faculty expertise and areas of focus.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Core (6 credit hours)

EPD 700 Research Methods (3)

EPD 710 Current Research in Design (3)

Required Concentration (12 credit hours)

Other Requirements (30 credit hours)

a previously awarded master's degree or approved relevant coursework (30)

Research and Approved Electives (24 credit hours)

Culminating Experience (12 credit hours)

EPD 799 Dissertation (12)

Additional Curriculum Information

Students must be thoroughly familiar with design and the arts and are expected to demonstrate a high level of academic maturity before being admitted to the program. Up to 30 credit hours from a previously awarded master's degree can count toward the requirements of the doctoral program.

Of the 54 credit hours remaining after the master's degree, 12 must be dissertation credit and 12 may be research. These 24 credit hours plus the remaining 30 credit hours must be completed after admission to the program. Design, Environment and the Arts (Healthcare and Healing Environments), PHD (ARENHHEPHD)

Online Degree Search Title: Design, Environment and the Arts (Healthcare and Healing Environments), PhD

Campus: Tempe

ASU is not currently accepting applications for this program.

Program Description: The health care and healing environments concentration under the PhD program in design, environment and the arts focuses on the integration of evidence-based design, sustainable science and best practices benchmarks when planning health care facilities. Facility-related responsibilities supported by this area cluster into seven functional work units:

- facilities analysis (physical and environmental)
- human factors and user needs
- interior planning and design
- programming (long-range planning)
- research methodologies
- space management and planning
- strategic planning

This multidisciplinary program integrates the principles of medical and clinical innovations, interior architecture, human health services, communication studies, architecture, and behavioral and engineering sciences. Students in this program are mentored by local health care design consultants, teaming with nursing students and working directly with real clients and corresponding with forward thinking health care research centers.

Graduating students are able to address contemporary issues facing the health care industry, address health care environments on multiple levels, apply evidence based research techniques and effectively communicate with clinicians.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Core (6 credit hours)

EPD 700 Research Methods (3)

EPD 710 Current Research in Design (3)

Concentration (18 credit hours)

Electives or Research (48 credit hours)

EPD 792 Research (12)

other electives or research (36)

Culminating Experience (12 credit hours)

EPD 799 Dissertation (12)

Additional Curriculum Information

Students must be thoroughly familiar with design and the arts and are expected to demonstrate a high level of academic maturity before being admitted to the program.

When approved by the student's supervisory committee and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this degree. If the student has not completed a master's degree, elective courses approved by the supervisory committee may be substituted.

The student is required to take 18 credit hours in the concentration and a minimum of nine credit hours of specialized coursework outside the area of concentration.

Students are not allowed to use transfer credits to fulfill the 54 credit hour minimum requirement for resident credit. Each student entering the program is required to submit a plan of study during the first year.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a master's degree in the field of design, interior design, architecture, nursing or other related fields from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- GRE scores
- three letters of recommendation
- a statement of purpose summarizing career objectives and the reasons for pursuing doctoral education
- an indication of proposed area of concentration (design, history, theory and criticism; digital culture in design; or health care and healing environments)
- an indication of a potential mentor
- a sample of sole-authored written work in English or any other evidence relevant to admission to the program (i.e., master's degree thesis, research paper or published articles)
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. A TOEFL iBT score of at least 100 or an overall International IELTS band score of 7.50, with no individual band below 7.00, is required of all applicants whose native language is not English.

International applicants who are interested in receiving funding as teaching assistants must take the Speaking Proficiency English Assessment Kit, administered at ASU, and become certified. Additional information is available on the department website.

ASU does not accept the GRE® General Test at home edition.

Ideal candidates must already hold a master's degree in design, interior design, architecture, nursing or other related fields. A statement of intent will express interest in the health care research and design concentration. If students enter the program with no design or health care background, they must take certain deficiency courses.

The letters of recommendation preferably would be academic, although they could be professional. Applicants provide the names and contact information of three recommenders at the time of their online application. Recommenders receive an email with a link to the online letter of recommendation to complete. Applicants are able to see which recommenders have already completed their recommendation by logging into the My ASU system and viewing their To Do list. Once a recommender has submitted the letter of recommendation, the recommender's name is removed from the To Do list. All letters must be in English.

Applicants should identify a proposed research topic, or list of possible topics, that aligns with the research mission of the program and the research interests of faculty.

Applicants must have identified a doctoral program faculty member who has agreed to serve as a mentor. The faculty mentor should be from the Herberger Institute for Design and the Arts. Applicants are recommended to introduce themselves by email to the faculty members who they feel have related research interests and to inquire about their availability to be mentors.

The application will be considered incomplete if any of the application items is missing.

The doctoral executive committee evaluates the applications and supporting materials. Admission decisions are based on the ability of the potential mentor to devote time to the student; the compatibility of the applicant's career goals with the purpose of the degree program; GRE scores; previous academic training and performance; recommendation letters; and the research mission of the institute and the research interests of faculty. The recommendations of the committee are forwarded to the program director for approval. Upon the written recommendation from the program director, the dean of the Graduate College notifies all applicants, in writing, of the admission decision.

Career Opportunities: Graduates may pursue advanced positions in the following arenas:

- elite consulting firms as facility programmers
- large health care systems and corporations as strategic planners
- leading manufacturers and vendors as expert representatives
- planning divisions in architectural and planning firms as medical planners
- research centers as decision-makers

Design, Environment and the Arts (History, Theory, and Criticism), PHD (HIDEAHTPHD)

Online Degree Search Title: Design, Environment and the Arts (History, Theory and Criticism), PhD

Campus: Tempe

Program Description: The history, theory and criticism concentration within the PhD program in design, environment and the arts focuses on the theoretical dimensions of architectural, design and art histories including critical discourse in the design or art disciplines. The program offers classes and research across many cultures, geographies and time periods as well as many approaches and methodologies within the art history program. Within this broad-based, on-demand program, students gain an encyclopedic knowledge of basic issues in the areas of architecture, design and art history.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus, a dissertation and two foreign language exams.

Required Core (6 credit hours)

EPD 700 Research Methods (3)

EPD 710 Current Research in Design (3)

Required Concentration (15 credit hours; choose five courses)

APH 515 Current Issues and Topics (3)

APH 590 Reading and Conference (3)

APH 598 Special Topics (3)

ARS 501 Methodologies and Art History (3)

ARS 506 Critical Studies in Roman Art (3)

ARS 514 Monasteries, Madonnas and Manuscripts (3)

ARS 533 The Pre-Raphaelites (3)

ARS 574 Art of Japan (3)

ARS 575 Approaches to Chinese Painting (3)

ARS 584 Internship (3)

ARS 585 Women in the Visual Arts (3)

ARS 591 Seminar (3)

ARS 598 Special Topics (3)

ARS 790 Reading and Conference (3)

EPD 790 Reading and Conference (3)

Research (12 credit hours)

EPD 792 or ARS 792 Research (12)

Electives (39 credit hours)

Culminating Experience (12 credit hours)

EPD 799 or ARS 799 Dissertation (12)

Additional Curricular Requirements

A foreign language exam is required in order to show reading knowledge of two foreign languages as demonstrated by the exam administered by the School of International Letters and Cultures (or equivalent) during the program or by a "B" or better (scale is 4.00 = "A") in a reading course such as a 400- or 500-level special topics course (example: ITA 494 or FRE 598 for reading knowledge). These credits do not count toward the degree total unless taken at the 500 level or above and approved by the faculty mentor as a concentration course.

When approved by the student's supervisory committee, this program allows 30 credit hours from a previously awarded master's degree to be used for this program.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a master's degree in any field from a regionally accredited institution. Examples of appropriate fields include art history, architectural history, design history or fields in the humanities, such as history or literature; archaeology and anthropology may also be considered. Students without graduate experience in the history of art, history of architecture and history of design may be asked to fulfill deficiencies.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- abstract of proposed research
- personal statement
- letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Applicants must submit to Slideroom (<https://asudesign.slideroom.com/#/Login>) the personal statement, abstract of proposed research, and contact information for three references. It is required that these be submitted in addition to the Graduate College application requirements.

Global Opportunities:

Global Experience: Study abroad is possible for graduate students. There are more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find more information on the Global Education Office website (<https://goglobal.asu.edu/>).

Career Opportunities: Knowledge and skills gained in this program make graduates more effective in a variety of locations including authentication agencies, antiques reselling and brokerages, gallery spaces and more. A doctorate degree is necessary for responsible administrative posts in museums and higher education and for employment as a university or college faculty member.

Digital Culture, MA (HIDGCMA)

Online Degree Search Title: Digital Culture, MA

Campus: Tempe

ASU is not currently accepting applications for this program.

Program Description: The MA program in digital culture is geared toward practitioners of design and the arts who have an interest in engaging in scholarly knowledge creation at the intersection of computational arts and sciences and seek to enhance their practice through expanded engagement with interactive and embodied media theory and design. The degree program allows artists and designers to explore new avenues for real-time media creation that seek to go beyond current paradigms.

The School of Arts, Media and Engineering educates the next generation of learners and empowers them with technofluency --- its development, application and implications --- and prepares students to be socially aware, critically thinking global citizens who strive to bring about positive change in a society that will be increasingly shaped by new technologies. Its mission is to improve and facilitate learning, creativity and communication; it does this through the integration of human physical experience and computational and digital media practice-based methods.

Students admitted to the Master of Arts program in digital culture can explore:

- critical media theory --- philosophical technologies, speculative design
- engineering --- social and embedded design, system engineering
- experiential media --- interaction design, responsive environments
- machine learning --- AI, augmented reality, virtual reality
- science --- mediated rehabilitation, public participation in science
- sensory --- food design and sensory science, somatic and movement studies
- sound design --- digital composition and performance, acoustic ecology
- sustainability --- sustainability and critical climate studies, urban climate infrastructure

Degree Requirements:

33 credit hours including the required applied project course (AME 593).

Required Core (12 credit hours)

AME 520 Movement and Computing (3)
AME 530 Philosophy of Media Technology (3)
AME 531 Experiential Media Philosophy (3)
AME 532 Creating Interactive Media (3)

Electives or Research (18 credit hours)

Culminating Experience (3 credit hours)
AME 593 Applied Project (3)

Additional Curriculum Information

Students should check with the academic unit regarding appropriate electives coursework.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in one of the following areas from a regionally accredited institution: arts, humanities, design, media studies, computer science, engineering or a closely related field.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- letters of recommendation
- portfolio
- statement of purpose
- writing sample
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

A portfolio is required; however, submissions will vary depending on the background of each prospective student because of the transdisciplinary nature of the program. Applicants from a wide variety of disciplines are expected to be interested in the master's degree. Key works are requested from applicants to illustrate the types of skills they wish to develop in the program. Examples include games they have designed and programmed, interactive installations and performances (submitted as video), websites they have created or programmed, music they have composed digitally or films they have made.

The statement should explain, in a concise and persuasive manner, how the student's educational, professional and personal experiences inform their research and creative interests, and it should elaborate on any aspect of their background that supports their candidacy for admission to the School of Arts, Media and Engineering.

Career Opportunities: Graduates of the Master of Arts program in digital culture go on to careers in areas such as:

- acoustics research
- communications
- graphic design
- marketing
- mobile development
- sound design
- 3D modeling

Entrepreneurship and Innovation, MS (HIIVDMS)

Online Degree Search Title: Entrepreneurship and Innovation, MS

2024-25 Academic Catalog Archive

Campus: Tempe

This program's name has changed effective Fall 2024. The previous name was Innovation and Venture Development.

Program Description: The MS program in entrepreneurship and innovation integrates the most advanced practices and technologies from business, engineering and design in a transdisciplinary, experience-based program that prepares the next generation of leaders with skills needed for launching successful ventures in any industry or sector, inside existing organizations or as new entities.

Graduates are prepared to lead cross-disciplinary teams in a world of growing uncertainty and ambiguity. They can identify needs and evaluate opportunities, generating insights from real-world problems; innovate solutions; and create and launch scalable business models that provide value to all stakeholders. Founders with this entrepreneurship and innovation degree from ASU can define a new standard for venture development.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

- Business (Sports Business), BA
- Business Entrepreneurship, BS
- Entrepreneurial Leadership, BA

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours including the required capstone course (IVD 661).

Required Core (18 credit hours)

IVD 525 Fundamentals of Entrepreneurial Leadership (3)

IVD 560 Innovation Studio I: Discovery and Insight (3)

IVD 561 Innovation Studio II: Problem Reframing (3)

IVD 562 Innovation Studio III: Explore, Fail, Solve (3)

IVD 630 Scaling Entrepreneurial Leadership (3)

IVD 660 Innovation Studio IV: Business Model (3)

Electives or Research (6 credit hours)

Culminating Experience (6 credit hours)

IVD 661 Innovation Studio V: Scale (6)

Additional Curriculum Information

Students should see the academic unit for a list of approved elective coursework.

Admission Requirements: Applicants must fulfill the requirements of the Graduate College, the Herberger Institute for Design and the Arts, the Ira A. Fulton Schools of Engineering and the W. P. Carey School of Business.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in business, design, engineering or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- professional resume
- written statement
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The applicant's written statement should describe an instance from the professional background outlining the applicant's use of innovation and entrepreneurial experience.

Career Opportunities: Career opportunities include:

- chief innovation officer
- creative developer
- director of engineering
- founder or CEO
- innovation manager
- management consultant
- marketing director
- product developer

Indigenous Placekeeping and Design, MS (HIIPDMS)

Online Degree Search Title: Indigenous Placekeeping and Design, MS

Campus: Tempe

Program Description: The MS program in Indigenous placekeeping and design is a hands-on program that immerses designers, artists, scholars and educators in creative and community-based dialogue to grow capacities, advance culture and equity, and imaginatively address today's most pressing challenges. Participants engage in direct collaborations with Indigenous communities (urban and rural) and work alongside civic and industry partners, enabling students to learn and practice with internal and external guidance. The skills gained enable graduates to specialize in Indigenous placekeeping and design.

The design industry requires constant innovation to keep up with society's changing needs, including research and soft skills. This degree program allows students to develop applied skills and earn credentials across a broad range of competencies while receiving an overview of Indigenous design processes and design thinking. Areas of focus in the program include Indigenous research methods, cultural design, cultural competency, group facilitation, concepts of holistic resiliency, ethics and asset-based community development. These competencies prepare graduates to meet industry needs and for excellence in a range of occupations.

GI Bill® benefits

This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at <https://www.benefits.va.gov/gibill/> (<https://www.benefits.va.gov/gibill/>).

Degree Requirements:

30 credit hours including the required applied project course (DSC 593).

Required Core (12 credit hours)

DSC 517 Indigenous Placekeeping and the Built Environment (3)

DSC 518 Indigenous Architectural History and Contemporary Design (3)

DSC 519 Indigenous Design Data Collection, Analysis, Research and Representation (3)

DSC 525 Contemporary Digital Topics (3)

Electives (15 credit hours)

DSC 521 Futurity of Indigenous Knowledge (3)

DSC 522 Indigenous Design Media and Communication (3)

DSC 523 Resource-driven Construction and Design (3)

DSC 524 The Indigenous Landscape: Place Meaning and Attachment (3)

design elective (3)

Culminating Experience (3 credit hours)

DSC 593 Applied Project (3)

Additional Curriculum Information

The final elective course should be selected in consultation with the program advisor.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in architecture or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admissions application and application fee
- letter of intent
- official transcripts
- three letters of recommendation
- proof of English proficiency

Additional Admission Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of current residency.

The contact information for three references and a statement of purpose are to all be submitted electronically through the Slide-Room system (<https://asudesign.slideroom.com/#/Login>).

In the letter of intent, applicants are required to express their intention to apply to the program by outlining the reasons for their application, their motivation for pursuing the program, and their future goals in the field, briefly touching upon their background, experiences and qualifications that make them a suitable candidate for the program.

The three letters of recommendation can come from community leaders and elders, current and past faculty, and professional mentors and supervisors.

Career Opportunities: Future pathways for graduates of this program include becoming architecture and planning professionals, cultural heritage consultants for municipalities, development team members and other professionals involved in the built environment and employees working directly for tribal communities in the planning and development departments. Graduates often pursue careers as:

- architect
- community planner
- cultural advisor
- cultural heritage consultant
- cultural resource manager
- landscape designer
- urban designer

Industrial Design, MID (HIINDMID)

Online Degree Search Title: Industrial Design, MID

Campus: Tempe

Program Description: The MID program in industrial design is a studio-based program in which students learn to design new products, systems, services, experiences or businesses by envisioning the future.

Students engage in research, brainstorming, idea visualization, prototyping and testing creative solutions that address different stakeholders' challenges while facing a new competitive industry environment. Students are encouraged to work in a transdisciplinary way, harnessing creativity to resolve problems and co-create solutions to improve the user experience, and capturing value for the industry while being responsible for the environment.

The program includes a design trip as a unique guided learning experience. Students visit places such as Tokyo, Milan or San Francisco, engaging at a deeper level with the industries and the industrial design practice; in doing so, they discover a more optimistic way of looking at the future by reframing problems as opportunities.

Graduates of this program are adept in using principles of design innovation, sustainability and systems thinking in problem-solving.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

60 credit hours including the required capstone course (IND 622).

Required Core (40 credit hours)

Electives (12 credit hours)

Other Requirement (3 credit hours)

IND 584 Internship (3)

Culminating Experience (5 credit hours)

IND 622 Advanced Industrial Design Studio IV (5)

Additional Curriculum Information

Students should see the academic unit for an approved course list.

The Master of Industrial Design program includes sequential studio courses. Requirements involve an average of 14 credit hours per semester. An internship is required during the summer prior to the final year.

Additional deficiency coursework is required for students who are in the three-plus-year program; students should see the academic unit.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or they must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- a portfolio
- letter of intent
- contact information for two references
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) through either the TOEFL or the IELTS regardless of their current residency. The minimum score for admission to the program is 80 on the TOEFL iBT[®]; or an overall band score of 6.5 on the IELTS.

The Design School requires that the portfolio, letter of intent and references be submitted via SlideRoom in addition to the Graduate College application requirements. <https://asudesign.slideroom.com/#/Login> (<https://asudesign.slideroom.com/#/Login>)

Admission to the program is selective. Admission cannot be deferred; students must enroll in the semester for which they are admitted, otherwise they need to go through the entire application process again for the year for which they are applying.

A GRE test is not required.

Applicants may be admitted to the two-year program with deficiencies if their previous coursework is not equivalent to the ASU undergraduate requirements and standards. Deficiencies must be completed prior to taking the required courses, if necessary; this may cause the student to take longer than two years to complete the program.

A personal interview is not required; however, a candidate wishing to visit the school is welcome and should make arrangements by contacting the department.

Admission requirements for the two-year program

Applicants must hold a minimum of a bachelor's degree or equivalent or a graduate degree from a regionally accredited college or university of recognized standing in a related field such as industrial design or product design.

Admission requirements for the three-plus-year program

Applicants must hold a bachelor's degree or equivalent from a regionally accredited college or university of recognized standing in a field other than industrial design.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Defend design research findings with a presentation of their unique design concepts
- Develop a new product concept design and present it in written and visual mediums to a committee of faculty and stakeholders.
- Perform professional-level tasks during their internship, including drafting, collaboration, and technical proficiency appropriate for design practice as determined by the National Association of Schools of Art and Design (NASAD).

Career Opportunities: Graduates are able to apply critical thinking and design skills in a variety of settings. They find positions in industry and academia and also develop startup ventures. Some examples include:

- design consultant
- design strategist
- head of innovation
- interaction designer
- product design director
- senior industrial designer
- senior product design manager
- senior UI/UX product designer
- university faculty
- UX strategist

Interior Architecture, MIA (HIAMIA)

Online Degree Search Title: Interior Architecture, MIA

Campus: Tempe

Program Description: The MIA program in The Design School is a studio-based degree program that provides a focused experience for students with an undergraduate degree in interior design or architecture. For students without this background, an additional three semesters of study are available.

Focusing on the development of groundbreaking design solutions to contemporary and emergent societal issues such as sustainability and community engagement, this program draws upon history, theory and criticism to inform a collaborative, evidence-based approach to the design of interior environments. This provides a foundation of transdisciplinary learning to assist in the understanding of integrated practice.

The Master of Interior Architecture degree is accredited by the Council for Interior Design Accreditation.

Degree Requirements:

56 credit hours including the required capstone course (INT 622).

Required Core (39 credit hours)

INT 519 Designing with Materials (3)

INT 520 Professional Practice for Interior Architecture (2)

INT 521 Advanced Interior Architecture Studio I (5)

INT 522 Advanced Interior Architecture Studio II (5)

INT 527 Contemporary Design Theory (3)

INT 529 Design Criticism (3)
INT 541 Codes and Building Regulations (1)
INT 547 Sustainability in Interior Architecture (3)
INT 550 Environmental Systems of Interior Architecture (3)
INT 554 Construction Documents for Interior Architecture (3)
INT 558 Lighting Design (3)
INT 621 Advanced Interior Architecture Studio III (5)

Elective (3 credits)
Design Professional Elective (3)

Other Requirements (9 credits)
DSC 598: Principles of Collaboration in Design (3)
INT 650 Diversity and Design (3)
INT 584: Internship (3) or Professional Design Elective (3)

Culminating Experience (5 credits)
INT 622 Advanced Interior Architecture Studio IV (5)

Additional Curriculum Information

For other requirements, students will take three credit hours each of DSC 598: Principles of Collaboration in Design (3) and INT 598: Diversity and Design (3). Students will complete the three remaining credit hours in the other requirements section by enrolling in an internship through INT 584: Internship, or selecting a professional design elective. Electives should be selected in consultation with the program advisor.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum of a 3.00 cumulative GPA (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum of a 3.00 cumulative GPA (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- a portfolio, letter of intent and contact information of two references submitted via SlideRoom (<https://asudesign.slideroom.com/#/Login>)
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The Design School requires that the portfolio, letter of intent and reference information be submitted in addition to the Graduate College application requirements.

Admission to the program is selective. Admission cannot be deferred, and students must enroll in the semester for which they are admitted; otherwise, they need to go through the entire application process again for the year in which they are applying.

Applicants may be admitted to the two-year program with deficiencies if their previous coursework is not equivalent to the ASU undergraduate requirements and standards. Deficiencies must be completed prior to taking the required courses, if necessary. Student should keep in mind that this may cause the student to take longer than two years to complete the program.

A personal interview is not required; however, a candidate wishing to visit the school is welcome and should make arrangements by contacting the department.

Admission Requirements for the Two-year Program:

All applicants must have completed a minimum of a bachelor's degree or equivalent in interior design or interior architecture from a Council for Interior Design Accreditation-accredited program or a four-year degree in architecture from a National Architectural Accrediting Board-accredited program.

Admission Requirements for the Three-plus-year Program:

All applicants must have completed a minimum of a bachelor's degree or equivalent in a field other than interior design, interior architecture or architecture.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Perform professional-level tasks during their internship, including drafting, collaboration, and technical proficiency appropriate for design practice, as identified by the Council for Interior Design Accreditation.
- Synthesize iterative ideas and design concepts into plans for built works to meet professional standards and The Design School Design Imperatives (History, Context, Program, Technology, Construction, Representation).
- Create collaborative relationships that support dynamic co-creation in design learning and constructive outcomes in design creation.

Career Opportunities: The Master of Interior Architecture is a studio-based, professional degree program that prepares graduates to fill leadership positions in interior architecture, interior design practice and education.

Professional Licensure: ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (<https://admission.asu.edu/academics/licensure>) webpage.

Completion of the degree qualifies a graduate to seek work experience as an interior designer and then sit for the National Council of Interior Design Qualification examination.

Landscape Architecture, MLA (ARLDEMLA)

Online Degree Search Title: Landscape Architecture, MLA

Campus: Tempe

Program Description: The MLA program at The Design School is an accredited graduate professional degree (<https://design.asu.edu/about/accreditation>) that prepares students for professional practice, advanced study and leadership in landscape architecture. The master's degree integrates knowledge from arts, science and technology and trains students to design our built environment through integrated systems thinking and transdisciplinary knowledge and skills, and cultivates capacity in working with communities to address pressing issues such as climate change and environmental justice.

The Master of Landscape Architecture program offers three pathways to accommodate applicants with various backgrounds. Applicants from diverse and non-design backgrounds are encouraged to apply. Students can complete the program in two to three years, depending on the focus of your bachelor's degree. The graduate program also prepares students for advanced research study toward a doctoral degree.

This program values and supports the landscape architecture profession's mission for designing more sustainable, resilient and just neighborhoods, cities and regions.

The Master of Landscape Architecture program is accredited by Landscape Architectural Accreditation Board. www.asla.org/accreditationlaab.aspx (<https://www.asla.org/accreditationlaab.aspx>)

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

56 credit hours and a thesis, or 56 credit hours including the required applied project course (LDE 593), or 56 credit hours including the required capstone course (LDE 622).

Required Core (15 credit hours)

LAP 513 Landscape Architecture Theory and Criticism (3)

LAP 571 Professional Practice I (1)

LAP 572 Professional Practice II (1)

LAP 613 Design Synthesis (3)

LDE 521 Advanced Landscape Architectural Studio I (5)

LDE 522 Advanced Landscape Architectural Studio II (5)

LDE 621 Advanced Landscape Architectural Studio III (5)

Research (9 credit hours)

LAP 514 Research in Landscape Architecture (3)

Research area electives (6)

Electives (18 credit hours)

Design professional elective (18)

Culminating Experience (6 credit hours)

LDE 593 Applied Project (6) or

LDE 599 Thesis (6) or

LDE 622 Advanced Landscape Architectural Studio IV (6)

Additional Curriculum Information

Students complete nine credit hours of research, including three credit hours of LAP 514 and six research area electives. Students should see the academic unit for an approved elective list.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- online graduate admission application and application fee
- official transcripts
- a portfolio, letter of intent and contact information of two references submitted via SlideRoom (<https://asudesign.slideroom.com/#/Login>)
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. The minimum score for admission to the program is 80 on the TOEFL iBT or an overall band score of 6.5 on the IELTS.

The Design School requires that the portfolio, letter of intent and reference information be submitted in addition to the Graduate College application requirements.

Admission to the program is selective. Admission cannot be deferred, and students must enroll in the semester for which they are admitted; otherwise, they need to go through the entire application process again for the year in which they are applying.

A personal interview is not required; however, a candidate wishing to visit the school is welcome and should make arrangements by contacting the department.

Additional Admission Information

Admission Requirements to the 2-Year Pathway

An applicant must have completed a four-year or five-year bachelor's degree with a major in landscape architectural studies or be a licensed landscape architect. The undergraduate degree must be granted by an institution that offers the Landscape Architectural Accreditation Board or equivalent accredited degree program in landscape architecture.

Admission Requirements to the 2-Plus Pathway

Applicants must have earned an undergraduate or graduate degree in architecture, urban design, landscape design, planning, urban design, environmental or a related design field, or a baccalaureate degree with a major or minor in landscape design.

Admission Requirements to the 3-Year Pathway

Applicants must have earned a baccalaureate or graduate degree in any field other than landscape architecture or a design-related field.

Deficiency Coursework

If a student is assigned any deficiency coursework by the academic unit upon admission depending on the undergraduate background, those courses must be completed with a grade of "B" (3.00 on a 4.00 scale) or higher before completing the master's program required coursework. As an

MLA student assigned deficiencies, there are two pathways.

Deficiency courses may include:

LAP 231 Introduction to Digital Applications for Designers

LAP 251 Plant Materials for Sustainable Landscapes

LAP 311 History of Landscape Architecture

LAP 312 20th Century Landscape Architecture

LAP 332 GIS Applications in Environmental Design

LAP 341 Landscape Construction I

LAP 342 Landscape Construction II

LAP 352 Ecosystems and Sustainable Design

LDE 590 Topic: Core Landscape Architectural Studio I

LDE 590 Topic: Core Landscape Architectural Studio II

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Examine design creative process through theory and research articles measured through the final assignment.
- Apply key skills in the field related to the analysis of existing landscape conditions and the design of new proposals.
- Learn how to design a professional level in landscape architecture studio project.

Global Opportunities:

Global Experience: The Design School is committed to the merging of global and local contexts and experiential learning through traveling experiences. Graduate students may incorporate travel as part of their studio design learning experience. The school also offers a number of summer study abroad programs in an effort to extend the learning opportunities through field studies and global engagement.

Career Opportunities: The Master of Landscape Architecture program prepares graduates to work in diverse aspects of the landscape architecture profession, encompassing public and private sectors as well as not-for-profit organizations. Some examples for the type of work include:

- climate change mitigation and adaptation
- community development
- creative placemaking and placekeeping
- ecosystem services and restoration
- environmental and climate justice
- low-impact development
- parks, open space and recreation
- smart cities
- sustainable cities and landscapes
- transportation and infrastructure development

Professional Licensure: ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (<https://admission.asu.edu/academics/licensure>) webpage.

For detailed information on licensure requirements, students should contact the Council of Landscape Architectural Registration Boards, www.clarb.org/ (<https://www.clarb.org/>).

Media Arts and Sciences, MS (HIDGCMS)

Online Degree Search Title: Media Arts and Sciences, MS

Campus: Tempe

Program Description: The MS program in media arts and sciences is designed for practitioners and makers in design and the arts who have an interest in software and system development and seek to enhance their practice through expanded engagement with interactive, embodied media

design in an interdisciplinary environment. The program enables artists and designers to explore new avenues for real-time media creation that seek to go beyond current paradigms.

Through coursework, students also explore current practices in various contexts (performance environments, health and well-being, social media and communication) as well as engineering-based approaches to developing experiential systems with social impact.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

33 credit hours including the required applied project course (AME 593).

Required Core (9 credit hours)

AME 520 Movement and Computing (3)

AME 530 Philosophy of Media and Technology (3)

AME 532 Creating Interactive Media (3)

Other Requirements (9 credit hours)

AME 533 Design for Media Arts (3)

AME 534 Machine Learning for Media Arts (3)

AME 570 Programming for Social and Interactive Media (3)

Electives (12 credit hours)

Culminating Experience (3 credit hours)

AME 593 Applied Project (3)

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a related field, such as arts, humanities, design, media studies, computer science or engineering.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- three letters of recommendation
- letter of intent
- professional resume
- portfolio
- writing sample
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Examples of writing samples include research writing, published articles and other scholarly work.

Because of the transdisciplinary nature of the program, portfolio submissions can vary based on the prospective student's background. Materials may illustrate the types of skills the applicant has. Portfolios can be submitted in the form of a website, photos, video, PDFs and other physical documentation. Examples include games designed and programmed by the applicant, music composed by the applicant, performances (submitted as video), and websites they have created or programmed.

The letter of intent should explain how the applicant's educational, professional and personal experiences inform their research and creative interests, and it should elaborate on any aspect of their background that supports their candidacy for admission to the School of Arts, Media and Engineering.

Career Opportunities: Graduates of the Master of Science program in media arts and sciences go on to careers in areas such as:

- acoustics research

- communications
- graphic design
- marketing
- mobile development
- museum and curatorial work
- sound design
- 3D modeling

Media Arts and Sciences, PHD (FAMASPHD)

Online Degree Search Title: Media Arts and Sciences, PhD

Campus: Tempe

Program Description: Media arts and sciences is a PhD program housed in the transdisciplinary School of Arts, Media and Engineering.

The school educates the next generation of learners and empowers them with technofluency --- its development, application and implications. Students are prepared to be socially aware, critically thinking global citizens who strive to bring about positive change in a society that is increasingly shaped by new technologies.

Doctoral students in this program are provided unique opportunities to engage in knowledge creation at the intersection of computational arts and sciences, using the most advanced practice-based and theoretical methods. The opportunity for active participation in transdisciplinary research teams enables media arts and sciences doctoral students to gain valuable experience as agents of both their own research and their own education; this arrangement also fosters opportunities for collaborative and embedded research.

At the core of this program is a commitment to designing curriculum tailored to each student-researcher in conjunction with the diverse faculty, labs and centers. This allows students to facilitate the development of innovative, experiential media systems that can respond to the world's most pressing challenges. Students admitted to the media arts and sciences doctoral program can pursue research at the intersection of any of these fields, among others:

- AI, system engineering and machine learning
- auditory culture, digital composition and performance
- critical media theory and philosophical technologies
- food design and sensory science
- interaction design, experiential media and responsive environments
- mediated rehabilitation, and somatic and movement studies
- public participation in science
- social and embedded design
- sustainability and critical climate studies
- VR and AR

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, a prospectus and a dissertation.

Required core (18 credits)

- AME 520 Movement and Computing (3)
- AME 530 Philosophy of Media Technology (3)
- AME 531 Experimental Media Philosophy (3)
- AME 532 Creating Interactive Media (3)
- AME 533 Design for Media Arts (3)
- AME 534 Machine Learning for Media Arts (3)

Research (33 credit hours)

AME 792: Research (33)

Restricted Electives (12 credit hours)

Electives (9 credit hours)

Culminating Experience (12 credit hours)

AME 799: Dissertation

Additional Curriculum Information

It is expected that students will be research-active throughout their degree, taking at least three research credit hours per semester.

For restricted electives, students must choose graduate-level AME or MDC courses, with approval from the student's advisor. Electives can be any graduate-level courses offered at ASU. The selection of courses relates to the student's research interests and requires the approval of the student's advisor.

When approved by the student's supervisory committee and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree in a related field to be used for this degree.

A student can register for dissertation credits only after the comprehensive examination has been passed.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in arts, humanities, design, media studies, computer science, engineering or a closely related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- curriculum vitae
- statement of purpose
- three letters of recommendation
- portfolio of supporting material
- writing sample
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The statement of purpose should explain in a concise and persuasive manner how the student's educational, professional and personal experiences inform their research and creative interests, and the student should elaborate on any aspect of their background that supports candidacy to the School of Arts, Media and Engineering program.

Each applicant must demonstrate entry-level competencies. This can be demonstrated primarily through a portfolio. The portfolio may include previously developed media products, projects or publications demonstrating an understanding of and involvement with digital media and computation. Entry-level competency can also be partially demonstrated through coursework and may include such courses as:

- advanced computer programming
- computer graphics and animation
- computer music
- digital design
- film theory
- interactive technologies
- media authoring tools
- media theory
- multimedia systems
- signal processing

Students should see the program website for application deadlines and admission terms.

Career Opportunities: Graduates can go on to careers in areas such as:

- academia
- mobile and web development
- product design
- programming
- research and development across diverse industries
- software engineering
- 3D modeling
- user experience design

Media Arts and Sciences (Extended Reality Technologies), MS (HIDGCERTMS)

Online Degree Search Title: Media Arts and Sciences (Extended Reality Technologies), MS

Campus: ASU at Mesa City Center

Program Description: The MS program in media arts and sciences with a concentration in extended reality technologies focuses on the development of innovative tools and methodologies for extended reality and immersive technologies, including simulation, visualization, interaction, computer vision, human-computer interaction, experience design, artificial intelligence and machine learning.

Students develop a fundamental understanding of how emerging media technologies can be used to create virtual worlds that simulate the existing world alongside entirely new ones. In addition, students develop skills in programming languages and software applications necessary to these production workflows, and they have the ability to manage projects; work effectively in collaborative teams; transform research into creative and technological products; and reflect on the ethical, cultural and social frameworks within which their work occurs.

This program is unique among emerging media programs through the application of these technologies and practices in socially engaged and transdisciplinary modalities, taking tools that evolved primarily from and for entertainment and applying them to the modeling of real-world challenges and futures.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

33 credit hours including the required applied project course (AME 593).

Required Core (9 credit hours)

AME 520 Movement and Computing (3)

AME 530 Philosophy of Media Technology (3)

AME 532 Creating Interactive Media (3)

Concentration (9 credit hours)

AME 550 Prototyping Futures (3)

AME 551 Designing Extended-Reality Experiences (3)

HDA 581 Emerging Media Colloquium (3)

Electives (9 credit hours)

Other Requirements (3 credit hours)

AME 584 Internship (3)

AME 590 Reading and Conference (3)

AME 592 Research (3)

HDA 580 Practicum (3)

Culminating Experience (3 credit hours)

AME 593 Applied Project (3)

Additional Curriculum Information

For other requirements, students must complete a minimum of three credit hours of faculty-led research (AME 592), individualized instruction (AME 590), the design and implementation of public programs (HDA 580), or an internship (AME 584).

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in media arts, engineering, design or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- portfolio
- letter of intent
- resume
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

In the letter of intent, applicants should detail their professional goals and the alignment of those goals with the program.

Because of the transdisciplinary nature of the program, portfolio submissions can vary based on the prospective student's background. Materials may illustrate the types of skills the applicant possess. Portfolios can be submitted in the form of a website, photos, video, PDFs and other physical documentation. Examples include games designed and programmed by the applicant, music composed by the applicant, performances (submitted as video), and websites programmed by the applicant.

Career Opportunities: Graduates of this program are well prepared for careers in a variety of fields related to the application of extended reality technologies and practices. Virtual and augmented reality have obvious and popular applications in entertainment, gaming, workforce development and research, but alumni of this program also have direct experience with the application of these tools to other areas that can expand their available pathways: urban planning, health care and education, among others. They are ideally suited for the rapidly changing climate of this field.

Music (Conducting), DMA (FACONDDMA)

Online Degree Search Title: Conducting, DMA

Campus: Tempe

Program Description: The DMA program in music with a concentration in conducting offers emerging conductors the opportunity to improve their art, craft and scholarship while becoming well-versed in multiple areas of conducting.

Those pursuing this degree take several common courses regardless of emphasis and become acquainted with the repertory and conducting issues for each medium. Coursework emphasizes a thorough knowledge of repertory, historical and analytical issues; an understanding of efficient, effective rehearsal technique; and clear, expressive conducting technique. Doctoral students of conducting receive considerable individual attention and have regular opportunities to rehearse and to conduct a variety of ensembles.

There are three tracks in this degree program:

Choral conducting --- Conductors specializing in choral conducting expand their expertise in global, intercultural approaches to communal vocal musicking and work to integrate this into their pedagogy and rehearsal process. Score study integrates musical, textual and socio-critical analysis, enabling students to gain insights into the unique interpretive demands of each work. Gestural study regards integrated approaches of Western ideals of conducting with Laban movement principles, diverse dance forms and body mapping. Conductors receive a plethora of podium time, both as primary conductors of ASU choral ensembles and as assistant conductors for faculty-led ensembles.

Orchestra and opera conducting --- Conductors specializing in orchestra and opera conducting work closely with the director of orchestras and the artistic director of the music theatre and opera program, and gain a breadth of experience in both orchestral and opera conducting. Time in front of an ensemble is essential; therefore, conductors have significant podium time and twice-weekly studio chamber orchestra classes. Study includes conducting technique, rehearsal technique, leadership, interpretation, score study, audience development and outreach, and career development.

Wind band conducting --- Conductors specializing in wind band conducting study privately with the director of bands and work closely with other members of the conducting faculty, including the director of athletic bands, to develop their conducting and rehearsal skills. If interested, wind band conducting students also have opportunities to enhance their work with athletic bands and, if desired, may elect individual study with the director of athletic bands. Furthermore, many students select integrated conducting as their cognate, allowing for in-depth work in a second conducting area.

The doctoral program lecture recital is a performance with the top pool of wind and percussion players in the School of Music, Dance and Theatre and includes a repertoire chosen from the complete body of wind band and chamber wind literature.

Degree Requirements:

90 credit hours, a written comprehensive exam, an oral comprehensive exam and a research paper.

Conducting Core (18 credit hours)

Specialty Courses (9 credit hours)

Electives (9 credit hours)

Cognate (integrated conducting, instrumental performance or music learning and teaching) (9 credit hours)

Music History and Music Theory (21 credit hours)

Recitals and Research (24 credit hours)

Other Requirement

Completion of diagnostic exams in musicology and music theory is required of all new graduate music students prior to course enrollment in the School of Music, Dance and Theatre.

Additional Curriculum Information

Thirty credit hours from a master's degree may be applied toward the 90 credit hour degree requirement. Once admitted to the program, a student is required to be enrolled continuously, excluding summer sessions, until all requirements for the degree have been fulfilled. In general, the student should expect to spend at least the equivalent of three academic years beyond the bachelor's degree in the program. A minimum of two semesters must be spent in continuous full-time residence at ASU. At least 54 credit hours must be completed in residence at ASU.

Additional information on degree requirements for this degree is available on the curriculum check sheet located at the bottom of the school's degree page (<https://musicdancetheatre.asu.edu/masters-degrees-phds/majorinfo/FACONDDMA/graduate/false/3>).

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution. Students seeking admission typically hold an MM degree. Applicants with other degrees are considered if they have received graduate training similar to that normally expected in a Master of Music program.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application (<https://admission.asu.edu/apply/graduate>) and application fee
- official transcripts
- School of Music, Dance and Theatre Application (<https://musicdancetheatre.asu.edu/admission/graduate-music-admission>), including a resume and personal statement; also, from choral applicants, an uploaded writing sample
- prescreening video
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The School of Music, Dance and Theatre does not offer conditional admission under any circumstances.

Students should see the program website for application deadlines. An applicant may be invited for a live audition after receipt of complete application materials, including recommendation letters, transcripts and English proficiency requirements, and review of prescreening materials. Information on the audition may be found at the School of Music, Dance and Theatre auditions page (<https://musicdancetheatre.asu.edu/admission/graduate-music-admission/audition-interview>).

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Synthesize performance practices in the context of diverse musical settings and genres.
- Evaluate specific conducting repertoire and pedagogy to support a unique and professional musical style.
- Implement an independent research project that makes a unique contribution to the discipline of music performance.

Career Opportunities: School of Music, Dance and Theatre graduate programs inspire and empower students to become creative leaders who transform society through music.

Musicians with expertise in performing, composing, teaching, and researching; in arts advocacy; and in serving as therapists are in high demand across many sectors and industries, including performing arts organizations, educational institutions, entertainment companies, health and wellness industries, and community arts organizations. Skills such as creativity, collaboration, innovation, and entrepreneurship, as well as the focused discipline needed for success as a musician, are all highly valued by a wide range of companies and professions.

Career examples include:

- artistic director
- arts administrator
- community arts advocate
- performing musician
- public or community school teacher
- university professor

Music (Ethnomusicology), MA (FAETHNMA)

Online Degree Search Title: Music (Ethnomusicology), MA

Campus: Tempe

Program Description: The MA program in music with a concentration in ethnomusicology helps students develop skills in scholarship and performance as they focus on aspects of one or more of the world's musical cultures.

Students can learn from traditions outside the Western European canon through participation in ensembles such as Javanese gamelan, Latin marimba, mariachi, steel pan and African drumming.

As a culminating demonstration of professional capability in the major field, students must submit a final project that demonstrates advanced competence in research and writing in musicology or ethnomusicology. The final project may be a thesis, a series of special papers or a written work of equivalent scope and depth.

Degree Requirements:

30 credit hours, a thesis, a written comprehensive exam, an oral comprehensive exam and a foreign language exam.

Required Core (13 credit hours)

MHL 532 Music Bibliography (3)

MHL 668 Introduction to Ethnomusicology (3)

MUP 587 Ethnomusicology Ensembles (2)

music theory (5)

Electives (11 credit hours)

music electives (6--9)

open electives (2--5)

Culminating Experience (6 credit hours)

MHL 599 Thesis (6)

Additional Curriculum Information

At least 20 credit hours for the program must be in the field of ethnomusicology or related fields approved by the student's advisor, complemented by courses in music theory, performance and cultural anthropology, as listed above. Appropriate elective coursework is reviewed and approved by the academic unit prior to inclusion on the student plan of study.

Completion of diagnostic exams in musicology and music theory is required of all new graduate music students before they enroll in courses for these programs through the School of Music, Dance and Theatre. This is tracked internally within the academic unit.

A passing grade on a foreign language exam or a grade of "B" or better in a designated reading course through the School of International Letters and Cultures is required for graduation.

Additional information on degree requirements for this degree is available on the curriculum check sheet located at the bottom of the school's degree page (<https://musicdancetheatre.asu.edu/masters-degrees-phds/majorinfo/FAETHNMA/graduate/false/3>).

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution or from an international institution officially recognized by that country.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00= "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00= "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application (<https://admission.asu.edu/apply/graduate>) and application fee
- School of Music, Dance and Theatre application (<https://musicdancetheatre.asu.edu/admission/graduate-music-admission>), including a resume, personal statement and writing sample
- three letters of recommendation
- official transcripts
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. The School of Music, Dance and Theatre does not offer conditional admission under any circumstances.

A bachelor's degree in music is not required for admission to a master's program. However, all applicants without a bachelor's degree in music should contact MDTAdmissions@asu.edu for information on potential remedial courses. Remedial courses may be taken at ASU, another accredited university or a community college before or after admission to this program, but they must be completed prior to starting graduate-level course requirements in music history and music theory.

Students should see the program website for application deadlines.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Students will be able to write research papers applying the conventions of scholarly discourse in music.
- Students will be able to apply, in written and oral exams, a synthesis of knowledge of a chosen or designated field of inquiry within ethnomusicology.
- Graduates of the MA in music, ethnomusicology concentration, will be able to implement a large-scale independent research project that makes a unique contribution to the discipline of ethnomusicology.

Career Opportunities: Musicians with expertise in performing, composing, teaching and researching; in arts advocacy; and in serving as therapists are in high demand across many sectors and industries, including performing arts organizations, educational institutions, entertainment companies, health and wellness industries, and community arts organizations. Skills such as creativity, collaboration, innovation, and entrepreneurship, as well as the focused discipline needed for success as a musician, are all highly valued by a wide range of companies and professions. School of Music,

Dance and Theatre graduate programs inspire and empower students to become creative leaders who transform society through music.

Music (Interdisciplinary Digital Media), DMA (FAINTDDMA)

Online Degree Search Title: Music (Interdisciplinary Digital Media), DMA

Campus: Tempe

Program Description: The DMA program in music with a concentration in interdisciplinary digital media is a unique collaboration of the School of Music, Dance and Theatre and the School of Arts, Media and Engineering, with extensive faculty interaction from both schools.

The program is designed for students who have interests and the creative skills to work within a cross-section of the arts and sciences. Program offerings extend beyond typical music coursework to allow more opportunities for digital sound and experimental media projects and to enable students to be actively involved in current developments in the field of media and digital culture. Students have access to state-of-the-art media facilities, hybrid arts-engineering faculty, and courses in electronic music, with resources that complement courses in electronic music.

Composers have multiple performance opportunities each year, including collaborations with student performers; readings by the ASU Symphony Orchestra and visiting ensembles; yearlong residencies with the ASU Wind Ensembles and the Philharmonia Orchestra; commissions for the PRISMS contemporary music festival; and collaborations with student animators, filmmakers and dancers.

Students are encouraged to develop their own compositional voices and focus on their area of interest, regardless of style or aesthetics, while gaining extensive knowledge through coursework and private lessons with composition faculty.

Degree Requirements:

90 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Core (25-27 credit hours)

Music Theory Core Area (12-19)

Music History Core Area (6-15)

Concentration (33 credit hours)

MTC 523 Advanced Composition (6)

MTC 723 Advanced Composition (6)

Arts, Media and Engineering coursework (21)

Electives (9-11 credit hours)

Research (9 credit hours)

MTC 792 Research (9)

Culminating Experience (12 credit hours)

MTC 799 Dissertation (12)

Additional Curriculum Information

Completion of diagnostic exams in musicology and music theory is required of all new graduate music students prior to enrollment in the ASU School of Music, Dance and Theatre.

Concentration coursework for the Arts, Media and Engineering area must have the AME prefix.

Up to 30 credit hours from a previously awarded master's degree, with approval from the academic unit and the Graduate College, may be used

toward the hours required for the elective and concentration coursework.

Additional information on degree requirements for this degree is available on the curriculum check sheet located at the bottom of the school's degree page (<https://musicdancetheatre.asu.edu/masters-degrees-phds/majorinfo/FAINTDDMA/graduate/false/3>).

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a U.S. bachelor's degree or higher from a regionally accredited institution or the equivalent of a U.S. bachelor's degree from an institution in another country and officially recognized by that country.

Applicants must have achieved a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 semester hours or 90 quarter-hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application (<https://admission.asu.edu/apply/graduate>) and application fee
- School of Music, Dance and Theatre application (<https://musicdancetheatre.asu.edu/admission/graduate-music-admission>), including a resume and personal statement
- official transcripts
- prescreening portfolio
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. To meet English proficiency requirements, students should have a TOEFL iBT score of at least 80; an IELTS overall band score of at least 6.5; or a Pearson Test of English score of at least 60.

The School of Music, Dance and Theatre does not offer conditional admission under any circumstances.

Students should see the program website for application deadlines.

After all application materials are received and reviewed, including recommendation letters, transcripts and English proficiency requirements, an applicant may be invited for a live interview. Information about the interview may be found at the school's audition page (<https://musicdancetheatre.asu.edu/admission/graduate-music-admission/audition-interview>).

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Apply software engineering skills to music, sound, and video.
- Apply knowledge of music history and music theory to engineering disciplines.
- Design a major independent research project that makes a unique contribution to the discipline of Interdisciplinary Digital Media.

Career Opportunities: The School of Music, Dance and Theatre graduate programs inspire and empower students to become creative leaders who transform society through music.

Musicians with expertise in performing, composing, teaching, researching and arts advocacy are in high demand across many sectors and industries, including performing arts organizations, educational institutions, entertainment companies, health and wellness industries, and community arts organizations. Music (Music Composition), DMA (FACOMPDMA)

Online Degree Search Title: Music Composition, DMA

Campus: Tempe

Program Description: The DMA in music with a concentration in music composition is a comprehensive professional degree program for outstanding students of acoustic, electronic and multimedia composition. Students develop their own compositional voices and focus on their area of interest, regardless of style or aesthetics, while gaining extensive knowledge through coursework and private lessons with faculty.

Composers' performance opportunities include readings by the ASU Symphony Orchestra and visiting ensembles; yearlong residencies with the Wind Ensembles and the Philharmonia; commissions for the PRISMS contemporary music festival; and collaborations with student performers, animators, filmmakers and dancers.

The program provides extensive faculty interaction and opportunities to develop advanced skills in compositional techniques from a wide variety of styles and traditions, with emphasis on fostering students' personal approach to composition. Collaborations with music scholars, theorists, performers, educators and other composers provide students with a broad and well-rounded foundation for advanced careers in music and teaching at the university level.

Degree Requirements:

90 credit hours, a foreign language exam, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

The credit requirements for the degree are distributed as follows:

major area (composition, music technology, electives) (36 credit hours)

music theory and music history (30 credit hours)

research (12 credit hours)

dissertation (12 credit hours)

The music composition concentration requires the creation of a significant original work of music (considered to be a dissertation) and either two article-length research papers or a substantial paper.

Additional Curriculum Requirements

Completion of diagnostic exams in musicology and music theory is required of all new graduate music students prior to enrollment in the School of Music, Dance and Theatre.

Thirty credit hours from a master's degree may be applied toward the 90 credit hour degree requirement. Once admitted to the program, a student is required to be enrolled continuously, excluding summer sessions, until all requirements for the degree have been fulfilled. In general, the student should expect to spend at least the equivalent of three academic years in the program beyond the master's degree. A minimum of two semesters must be spent in continuous full-time residence at ASU. At least 54 credit hours must be completed in residence at ASU.

Additional information on degree requirements for this degree is available on the curriculum check sheet located at the bottom of the school's degree page (<https://musicdancetheatre.asu.edu/masters-degrees-phds/majorinfo/FAICOMPDMA/graduate/false/3>).

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a U.S. bachelor's degree or higher from a regionally accredited institution or the equivalent of a U.S. bachelor's degree from an institution in another country that is officially recognized by that country.

Applicants must have achieved a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 semester hours or 90 quarter hours of a bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application (<https://admission.asu.edu/apply/graduate>) and application fee
- School of Music, Dance and Theatre application (<https://musicdancetheatre.asu.edu/admission/graduate-music-admission>), including a resume and personal statement
- official transcripts
- prescreening portfolio
- three letters of recommendation

- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. The School of Music, Dance and Theatre does not offer conditional admission under any circumstances. To meet English proficiency requirements, students should have a TOEFL iBT score of at least 80; an IELTS overall band score of at least 6.5; or a Pearson Test of English score of at least 60.

Students should see the program website for application deadlines.

After receipt of complete application materials, including recommendation letters, transcripts and English proficiency, and review of prescreening materials, an applicant may be invited for an interview. Information about the interview can be found on the school's admissions website (<https://musicdancetheatre.asu.edu/admission/graduate-music-admission/audition-interview>).

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Compose original works, applying theoretical understanding of musical techniques.
- Create a significant original work that integrates and synthesizes various principles of composition.
- Interpret specific musical products within the context of a specific theoretical, historical, or cultural tradition.

Career Opportunities: The School of Music, Dance and Theatre graduate programs inspire and empower students to become creative leaders who transform society through music.

Musicians with expertise in performing, composing, teaching, and conducting research, and in arts advocacy, are in high demand across many sectors and industries, including performing arts organizations, educational institutions, entertainment companies, health and wellness industries, and community arts organizations. Online Degree Search Title: Music (Music Learning and Teaching), PhD

Campus: Tempe

Program Description: The PhD in music with a concentration in music learning and teaching is a world-class degree for musician-teacher-scholars who seek careers in musical and educational leadership. Students are immersed in an inclusive and multifaceted community of dynamic partnerships and research and teaching collaborations. They work with faculty on creative projects that lead to independent and co-authored research publications, creative projects and professional presentations.

The program includes specialized study in music education, elective studies with scholars and artists in the Herberger Institute, and opportunities for transdisciplinary elective study with faculty and colleges across ASU. A plan of study is designed by the student in consultation with the faculty to support the student's career trajectory. Typical projects interrogate and broaden discourse and practice in music education, and challenge methodological and disciplinary boundaries to imagine what could be. The program concludes with dissertation research that springboards to the next phase of their careers.

Degree Requirements:

90 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Core (10 credit hours)

MSI 601 Contemporary Topics in Music Research (2)

MSI 602 Current Issues in Music Research (2)

MSI 755 Historical Research in Music (3)

MTC 520 Analytical Techniques (3)

Concentration (30 credit hours)

Electives (29 credit hours)

Research (6 credit hours)

Other Requirements (3 credit hours)

MUE 784 Internship (3)

Culminating Experience (12 credit hours)

MUE 799 Dissertation (12)

Additional Curriculum Information

Completion of diagnostic exams in musicology and music theory is required of all new graduate music students prior to enrollment in the ASU School of Music, Dance and Theatre.

Students should see the academic unit for a complete list of approved electives.

When approved by the student's supervisory committee and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this degree. A minimum of two semesters must be spent in continuous full-time residence at ASU.

Additional information on degree requirements for this degree is available on the curriculum check sheet located at the bottom of the school's degree page (<https://musicdancetheatre.asu.edu/masters-degrees-phds/majorinfo/FAMUSEDPHD/graduate/false/3>).

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply if they have earned a U.S. bachelor's degree or higher from a regionally accredited institution or the equivalent of a U.S. bachelor's degree from an institution in another country that is officially recognized by that country.

Applicants must have achieved a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 semester hours or 90 quarter hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application (<https://admission.asu.edu/apply/graduate>) and application fee
- School of Music, Dance and Theatre application (<https://musicdancetheatre.asu.edu/admission/graduate-music-admission>) (including curriculum vitae, personal statement and a writing sample)
- official transcripts
- teaching demonstration video
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. The School of Music, Dance and Theatre does not offer conditional admission under any circumstances. In order to meet English proficiency requirements, students should have a TOEFL iBT score of at least 80, or an IELTS overall band score of at least 6.5, or a Pearson Test of English score of at least 60. More information about English proficiency requirements is available on the Admission Services website (<https://admission.asu.edu/apply/international/graduate/english-proficiency>).

Applications are accepted and reviewed on a rolling basis until all spaces are filled. Applicants are encouraged to apply as early as possible. Students should see the program website for more information on application deadlines. To ensure prompt processing of application, students should email MDTAdmissions@asu.edu (mailto:MDTAdmissions@asu.edu) after submitting an application. An interview with the music learning and teaching doctoral faculty in person or via electronic media is scheduled after review of application materials.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Design individual teaching practices that are appropriate to a beginning faculty position in music education at college level.

- Implement a major independent research project that makes a unique contribution to the field of music learning and teaching.
- Apply research methods to conduct independent research.

Career Opportunities: Graduates have many possible career options and pathways.

Musicians with expertise in performing, composing, teaching, researching and arts advocacy are in high demand across many sectors and industries, including performing arts organizations, educational institutions, entertainment companies, health and wellness industries, and community arts organizations. Skills such as creativity, collaboration, innovation, entrepreneurship and the focused discipline needed for success as musicians are all highly valued by a wide range of companies and professions.

The School of Music, Dance and Theatre graduate programs inspire and empower students to become creative leaders who transform society through music. Graduates become scholars, researchers, music and arts administrators, and public policy advisors to education and arts organizations or civic and governmental groups.

Career examples include:

- arts administrator
- community arts advocate
- community arts educator
- performing musician
- public or community school teacher
- teaching artist
- university professor
- worship music leader
- youth development facilitator

Music (Musicology), MA (FAMHISTMA)

Online Degree Search Title: Music (Musicology), MA

Campus: Tempe

Program Description: In the musicology concentration of the MA program in music, faculty provide and participate in multisensory learning experiences concerning musical genres, styles and forms, performance and listening practices, instruments, spaces, philosophies, musical infrastructures and geographic locations.

Faculty comprises leading scholars specializing in western and non-Western music, particularly traditions in the Americas and Eastern Europe (Russia, Ukraine, USSR), and music of the Middle East, Central Asia, Latin America, and Indonesia. Students can study a variety of topics such as medieval music cultures, the long nineteenth century, jazz, music in popular cultures, musical modernism and experimentalism, intellectual property law, cultural policy, improvisation, sound studies, ecomusicology, dance and embodiment, and music's role in well-being.

Students must submit a final project that demonstrates advanced competence and professional capability in research and writing in musicology or ethnomusicology. The culminating project may be a thesis, a series of special papers, or a written work of equivalent scope and depth.

Degree Requirements:

30 credit hours, a thesis, a written comprehensive exam, an oral comprehensive exam and a foreign language exam.

Required Core (14 credit hours)

MHL 532 Music Bibliography (3)

MHL 691 Seminars (6)

music theory (5)

Electives (8 credit hours)

music electives (5--8)

open electives (0--3)

Other Requirement (2 credit hours)

performance ensembles (2)

Culminating Experience (6 credit hours)

MHL 599 Thesis (6)

Additional Curriculum Information

Completion of diagnostic exams in musicology and music theory is required of all new graduate music students prior to enrollment in courses for these programs through the ASU School of Music, Dance and Theatre. This is tracked internally within the academic unit.

At least 20 credit hours of this program must be in the field of music history and literature.

Appropriate elective coursework is reviewed and approved by the academic unit prior to inclusion on the student's plan of study.

A passing grade on the foreign language exam in French, German, Italian or Spanish or a grade of "B" or better in a designated reading course through the School of International Letters and Cultures is required for graduation.

Additional information on degree requirements for this degree is available on the curriculum check sheet located at the bottom of the school's program page (<https://musicdancetheatre.asu.edu/masters-degrees-phds/majorinfo/FAMHISTMA/graduate/false/3>).

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a U.S. bachelor's degree or higher from a regionally accredited institution or the equivalent of a U.S. bachelor's degree from an institution in another country that is officially recognized by that country.

Applicants must have achieved a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 semester hours or 90 quarter hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application (<https://admission.asu.edu/apply/graduate>) and application fee
- School of Music, Dance and Theatre application (<https://musicdancetheatre.asu.edu/admission/graduate-music-admission>) (including a resume, personal statement and writing sample)
- official transcripts
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. The School of Music, Dance and Theatre does not offer conditional admission under any circumstances. In order to meet English proficiency requirements, students should have a TOEFL iBT score of at least 80, or an IELTS overall band score of at least 6.5, or a Pearson Test of English score of at least 60.

A bachelor's degree in music is not required for admission to a master's program. However, all applicants without a bachelor's degree in music should contact MDTAdmissions@asu.edu (mailto:MDTAdmissions@asu.edu) for information on potential remedial courses. Remedial courses may be taken at ASU, another accredited university or a community college before or after admission to this program, but they must be completed prior to starting graduate-level course requirements in music history and music theory.

Students should see the program website for application deadlines.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Write research papers applying the conventions of scholarly discourse in music.
- Apply a synthesis of knowledge of a chosen/designated field of inquiry within musicology to the articulation and defense of a particular scholarly viewpoint.
- Implement a large-scale independent research project that makes a unique contribution to the discipline of ethnomusicology.

Career Opportunities: The School of Music, Dance and Theatre graduate programs inspire and empower students to become creative leaders who transform society through music.

Musicians with expertise in performing, composing, teaching, researching, arts advocacy and serving as therapists are in high demand across many sectors and industries, including performing arts organizations, educational institutions, entertainment companies, health and wellness industries, and community arts organizations. Skills such as creativity, collaboration, innovation, entrepreneurship and the focused discipline needed for success as musicians are all highly valued by a wide range of companies and professions.

MUSIC E167

mdtadmissions@asu.edu

480-965-5069

Music (Musicology), PHD (HIMUSMPHD)

Online Degree Search Title: Music (Musicology), PhD

Campus: Tempe

Program Description: The PhD program in music with a concentration in musicology focuses on the scholarly study of sound and music in historical contexts, musical traditions as sociocultural artifacts and behaviors, and performance. These areas are approached through the investigation of genres, styles, forms, performance and listening practices, instruments, spaces, philosophies, musical infrastructures and geographic locations.

Faculty members include Sabine Feisst, Dave Fossum, Kay Norton, Catherine Saucier, Peter Schmelz, Ted Solis, Christi Jay Wells, and faculty associate Bliss Little. They are leading scholars specializing in western and non-Western music, particularly traditions in the Americas and Eastern Europe (Russia, Ukraine, USSR), and music of the Middle East, Central Asia, Latin America and Indonesia. Students can study a variety of topics, including medieval music cultures, the long nineteenth century, jazz, music in popular cultures, musical modernism and experimentalism, intellectual property law, cultural policy, improvisation, sound studies, ecomusicology, dance and embodiment, and music's role in well-being.

Coursework includes historiography, applied musicology, methodologies and pedagogy. Transdisciplinary studies are encouraged with scholars and artists in the School of Music, Dance and Theatre (e.g., a studio professor, music theorist, or composer), the Herberger Institute for Design and the Arts (e.g., a design or dance faculty member), and faculty in schools and institutes across the university (e.g., specialists in languages, regions or cultures).

A plan of study is designed by the student with the faculty to support an individualized research trajectory. Research conducted by students in the doctoral program in musicology aims to examine and interrogate the discipline of musicology and to expand the traditional boundaries of music scholarship by challenging methodological and disciplinary boundaries. The program concludes with a dissertation.

Degree Requirements:

90 credit hours, a written comprehensive exam, an oral comprehensive exam, two foreign language exams and a dissertation.

Required Core (10 credit hours)

MSI 601 Contemporary Topics in Music Research (2)

MSI 602 Current Issues in Music Research (2)

MSI 755 Historical Research in Music (3)

MTC 520 Analytical Techniques (3)

Concentration (15 credit hours)

MHL 632 Applied Musicology (3)

MHL 668 Introduction to Ethnomusicology (3)

MHL 691 Seminars (9)

Electives and Research (47 credit hours)

Teaching Experience (6 credit hours)

MHL 684 Internship (3)

MHL 691 Topic: Music History Pedagogy (3)

Culminating Experience (12 credit hours)

MHL 799 Dissertation (12)

Additional Curriculum Information

Completion of diagnostic exams in musicology and music theory is required of all new graduate music students prior to enrollment in the ASU School of Music, Dance and Theatre.

As part of the concentration coursework, students take three seminars for three credit hours each. Equivalent courses may be used with preapproval by the student's faculty advisor. No more than six credit hours outside of the School of Music, Dance and Theatre may apply to this requirement.

Teaching experience requirements consist of MHL 691 Music History Pedagogy, in which students examine multiple facets and modalities of teaching music history, and MHL 684 Internship, in which students teach an appropriate undergraduate musicology course as instructor of record with guidance of the musicology faculty.

Students should see the academic unit for a complete list of approved electives and research courses.

When approved by the student's supervisory committee and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this degree program. Students entering the program without an earned MA degree will complete the requirements for the Master of Arts in music with a concentration in ethnomusicology or musicology.

Additional information on degree requirements for this degree is available on the curriculum check sheet located at the bottom of the school's program page (<https://musicdancetheatre.asu.edu/masters-degrees-phds/majorinfo/HIMUSMPHD/graduate/false/3>).

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a U.S. bachelor's degree in music or a graduate degree from an accredited college or university of recognized standing in music history, musicology, ethnomusicology or music theory.

Applicants must have achieved a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 semester hours or 90 quarter hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application (<https://admission.asu.edu/apply/graduate>) and application fee
- School of Music, Dance and Theatre application
- official transcripts
- GRE scores
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. The School of Music, Dance and Theatre does not offer conditional admission under any circumstances. In order to meet English proficiency requirements, students should have a TOEFL iBT score of at least 80, or an IELTS overall band score of at least 6.5, or a Pearson Test of English score of at least 60.

ASU does not accept the GRE® General Test at home edition.

The School of Music, Dance and Theatre application (<https://musicdancetheatre.asu.edu/admission/graduate-music-admission>) must include a curriculum vitae, a two-page personal statement expressing the goal in pursuing this degree and two writing samples. It's preferable that each of the writing samples be a paper from a course (either an upper-level undergraduate course or a graduate course) or an article or document written by the applicant.

Students should see the program website for application deadlines.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Write research papers applying the conventions of scholarly discourse in music.
- Implement a major independent research project that makes a unique contribution to the discipline of musicology.
- Synthesize knowledge of music history pedagogy in the teaching of an undergraduate course.

Career Opportunities: Musicians with expertise in performing, composing, teaching, researching and arts advocacy are in high demand across many sectors and industries, including performing arts organizations, educational institutions, entertainment companies, health and wellness industries, and community arts organizations. Skills such as creativity, collaboration, innovation, entrepreneurship and the focused discipline needed for success as musicians are all highly valued by a wide range of companies and professions. The School of Music, Dance and Theatre

graduate programs inspire and empower students to become creative leaders who transform society through music.

Career examples include:

- arts administrator
- community arts advocate
- music and sound art curator
- musicologist
- performing musician
- public or community school teacher
- university professor

Music (Performance), DMA (FAPERFDMA)

Online Degree Search Title: Music (Performance), DMA

Campus: Tempe

Program Description: The DMA in music with a concentration in performance is a professional degree program for advanced musicians who desire high levels of performance instruction as well as preparation for teaching positions at the university level.

Students work with faculty mentors to achieve a professional level of performance through individual recitals, chamber music and ensembles, including wind bands and choral, orchestral, brass, jazz, musical theatre and opera ensembles, depending on their area of emphasis.

Performance opportunities on and off campus further develop the knowledge and abilities required to become a leader in a musical community through teaching, performing or arts advocacy. Students work closely with an individual faculty mentor and distinguished guest artists to enhance musical growth. Students serve as leaders, mentors and models for their younger colleagues in performances, pedagogical experiences and community engagement. Collaboration with music scholars, theorists, composers, educators, dancers and theatre artists provides students with the variety of experiences and skills they need for artistic excellence and leadership.

Students learn skills they will need to be a highly successful working musician, including audition preparation, networking, learning organizational strategies, opportunity creation and developing an entrepreneurial mindset.

Degree Requirements:

90 credit hours, a research paper, a written comprehensive exam and an oral comprehensive exam.

Required Core (4 credit hours)

MUP 727 Studio Instruction (4)

Performance Concentration (24 credit hours)

MUP 727 Studio Instruction (12)

MUP 796 Solo Performance: Recital (12)

Emphasis Area Coursework (23 credit hours)

Music History and Music Theory (27 credit hours)

Research (12 credit hours)

MUP 792 Research (12)

Culminating Experience (0)

Research paper in the form of a bound document

Additional Curriculum Information

Students select an area of emphasis from the following: piano pedagogy, collaborative piano, instrumental, keyboard and voice. Emphasis coursework depends on the area selected. Students should work in consultation with their academic advisor in the development of their plan of study.

The performance concentration requires at least three recitals after admission to the program and a research paper. Five recitals are required for
2024-25 Academic Catalog Archive

the collaborative piano emphasis.

Completion of diagnostic exams in musicology and music theory is required of all new graduate music students prior to enrollment in the School of Music, Dance and Theatre.

Thirty credit hours from a previously awarded master's degree may be applied toward the 90 credit hour degree requirement with approval from the academic unit and the Graduate College. A minimum of two semesters must be spent in continuous full-time residence at ASU. At least 54 credit hours must be completed in residence at ASU.

Vocalists: Placement tests in foreign language diction are required upon entry into the program. Students who are judged to be deficient in diction are required to complete and pass a diction review course.

Additional information on degree requirements for this degree is available on the curriculum check sheet located at the bottom of the school's program page (<https://musicdancetheatre.asu.edu/masters-degrees-phds/majorinfo/FAPERFDMA/graduate/false/3>).

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a U.S. bachelor's degree or higher from a regionally accredited institution or the equivalent of a U.S. bachelor's degree from an institution in another country that is officially recognized by that country. Students seeking admission typically hold a Master of Music degree. Applicants with other degrees are considered if they have received graduate training similar to that normally expected in a Master of Music program.

Applicants must have achieved a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 semester hours or 90 quarter hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application (<https://admission.asu.edu/apply/graduate>) and application fee
- School of Music, Dance and Theatre application (<https://musicdancetheatre.asu.edu/admission/graduate-music-admission>), including a resume, personal statement and repertoire list
- official transcripts
- prescreening recording
- three letters of recommendation
- teaching demonstration video (piano pedagogy applicants)
- writing sample (solo piano and piano pedagogy applicants)
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. The School of Music, Dance and Theatre does not offer conditional admission under any circumstances. To meet English proficiency requirements, students should have a TOEFL iBT score of at least 80; an IELTS overall band score of at least 6.5; or a Pearson Test of English score of at least 60.

Students should see the program website for application deadlines.

After the applicant's complete application materials are received, including recommendation letters, transcripts and English proficiency, and a review has been conducted of prescreening materials, an applicant may be invited for a live audition. Information about the audition may be found at the school website (<https://musicdancetheatre.asu.edu/admission/graduate-music-admission/audition-interview>).

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Synthesize performance practices in the context of diverse musical settings and genres, demonstrating mastery with the literature of one's instrument.
- Assess an instrument's repertoire and pedagogy to develop a unique and professional musical style.
- Implement an independent research project that makes a unique contribution to the discipline of music performance.

Career Opportunities: Musicians with expertise in performing, composing, teaching, researching, arts advocacy and serving as therapists are in high demand across many sectors and industries, including performing arts organizations, educational institutions, entertainment companies, health and wellness industries, and community arts organizations. Skills such as creativity, collaboration, innovation, and entrepreneurship, as well as the focused discipline needed for success as a musician, are all highly valued by a wide range of companies and professions. The School of Music, Dance and Theatre graduate programs inspire and empower students to become creative leaders who transform society through music.

Career examples include:

- arts administrator
- community arts advocate
- composer for film, video games and television
- music therapist
- performing musician
- public or community school teacher
- university professor

Music Entrepreneurship (Certificate), Certificate (HIMERTGRCT)

Online Degree Search Title: Music Entrepreneurship (Graduate Certificate)

Campus: Tempe

Program Description: Music entrepreneurship is a discipline that intersects the traditional music disciplines. Music entrepreneurship harnesses the skills and mindset of the entrepreneur to empower musicians to create work that is meaningful, sustainable and oriented to community and market need.

Students in music and students with a background in music benefit from the business, marketing and organizational skills offered by certificate courses as applied specifically to and within the arts.

Degree Requirements:

15 credit hours.

Required Core (3 credit hours)

MUP 538 The Enterprising Artist (3)

Electives (9 credit hours)

Internship (3 credit hours)

MSC 584 Internship (3)

Additional Curriculum Information

In consultation with the faculty coordinator, students select three electives based on their interests and goals for the certificate.

Additional information on degree requirements for this degree is available on the curriculum check sheet located at the bottom of the school's program page (<https://musicdancetheatre.asu.edu/masters-degrees-phds/majorinfo/HIMERTGRCT/graduate/false/3>).

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in music or related field, from a regionally accredited institution, or can demonstrate a background in music.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- written statement
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

International students who need an F1 or J1 visa first need to apply to and be accepted into a graduate degree program prior to being considered for the certificate program. International students residing in the USA on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for admission to this certificate program.

Applicants may be admitted to the certificate by submitting a statement of interest outlining their music background and personal goals.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Apply key concepts of entrepreneurship to critical evaluation of music career paths.
- Synthesize knowledge of music entrepreneurship within the Phoenix area and surrounding communities through music entrepreneurship fieldwork.

Career Opportunities: A certificate in music entrepreneurship can help students enhance the marketable skills they acquire in their major program and help them develop new skills, including marketing, business practices, grant writing, arts administration and fundraising management.

Career examples include:

- arts administrator
- community arts advocate
- performing musician
- public or community school teacher
- university professor

Music Learning and Teaching, MM (FAMUSEDMM)

Online Degree Search Title: Music Learning and Teaching, MM

Campus: Tempe

Program Description: The MM program in music learning and teaching is designed for music educators, teaching artists and music professionals seeking new and expanded opportunities for career development in learning and teaching.

Program flexibility affords students opportunities to customize degree pathways; advance their goals; and develop musical, scholarly and leadership roles in their professional settings. Students develop their capacity to address pressing issues in music learning and teaching and contribute to professional dialogue.

Students may elect courses in each part of the degree program and may design a course of study that meets their specific interests and needs. The program provides opportunities to study full time, part time (through evening courses) or in the summers only, or to combine full-time, part-time and summer study. Full-time students may complete the program in as little as one year. Students can complete courses toward the degree program as digital commuters (off campus) via the ASU Sync platform, which involves attending an in-person course live online.

Individuals interested in teacher certification can pursue those requirements concurrently with or separate from master's degree study.

Degree Requirements:

32 credit hours and a portfolio.

The degree credit requirements are distributed as follows:

music education core (10 credit hours)

musicianship core (10 credit hours)

specialization (12 credit hours)

Additional Curriculum Requirements

Completion of diagnostic exams in musicology and music theory is required of all new graduate music students prior to enrollment in the School of Music, Dance and Theatre.

Six credit hours may be transferred from another regionally accredited graduate institution. Up to nine credit hours may be taken prior to admission.

As part of the portfolio, students also must participate in an oral review that is monitored internally by the academic unit.

Additional information on degree requirements for this degree is available on the curriculum check sheet located at the bottom of the school's program page (<https://musicdancetheatre.asu.edu/masters-degrees-phds/majorinfo/FAMUSEDMM/graduate/false/3>).

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a U.S. bachelor's degree or higher from a regionally accredited institution or the equivalent of a U.S. bachelor's degree from an institution in another country that is officially recognized by that country.

Applicants must have achieved a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 semester hours or 90 quarter hours of their first bachelor's degree program.

All applicants must submit:

- online graduate admission application and application fee
- School of Music, Dance and Theatre application (<https://musicdancetheatre.asu.edu/admission/graduate-music-admission>) (including a resume)
- official transcripts
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. The School of Music, Dance and Theatre does not offer conditional admission under any circumstances. To meet English proficiency requirements, students should have a TOEFL iBT score of at least 80; an IELTS overall band score of at least 6.5; or a Pearson Test of English score of at least 60.

A bachelor's degree in music is not required for admission to a master's program. However, all applicants without a bachelor's degree in music should contact MDTAdmissions@asu.edu (<mailto:MDTAdmissions@asu.edu>) for information on potential remedial courses. Remedial courses may be taken at ASU, another accredited university or a community college before or after admission to this program, but they must be completed before starting graduate-level course requirements in music history and music theory.

Applications are accepted until all spaces are filled and are reviewed on a rolling basis. Applicants are encouraged to apply as early as possible and should see the program website for more information about application deadlines. To ensure prompt processing, applicants should email MDTAdmissions@asu.edu (<mailto:MDTAdmissions@asu.edu>) after submitting an application.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Design appropriate instructional activities for K-12 music programs.
- Develop independent research skills to analyze and interpret music.
- Analyze one's own performance in research and teaching practices.

Career Opportunities: The flexibility of the Master of Music program in music learning and teaching affords students opportunities to customize degree pathways toward multiple kinds of careers while still working as music educators, teaching artists or music professionals.

Career examples include:

- arts administrator
- community arts advocate
- performing musician
- public or community school teacher
- teaching artist
- worship music leader
- youth development facilitator
- university professor

MUSIC E167

Music Theory Pedagogy (Certificate), Certificate (HIMTPGRCT)

Online Degree Search Title: Music Theory Pedagogy (Graduate Certificate)

Campus: Tempe

Program Description: This certificate in music theory pedagogy offers specialized study in music theory to help prepare students to teach undergraduate courses in fundamentals, harmony, musicianship and basic form analysis. Completion of this certificate indicates that the student is prepared to offer instruction in basic music theory at the college level.

The certificate is intended to be pursued concurrently with enrollment in a master's degree program or doctoral degree program in the School of Music, Dance and Theatre.

Degree Requirements:

15 credit hours.

Required Core (3 credit hours)

MTC 525 Pedagogy of Theory (3)

Other Requirement (3 credit hours)

MTC 584 Internship (3)

Electives (9 credit hours)

Additional Curriculum Information

Completion of diagnostic examinations in musicology and music theory administered by the School of Music, Dance and Theatre is required of all new graduate music students before they enroll in any graduate academic courses toward the certificate program.

Electives are selected with advisor approval from MTC courses in analytical topics. Students should see the academic unit for a complete list of approved electives.

Admission Requirements: Students who are interested in this certificate should email the academic unit to express their interest before they submit an official application.

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a U.S. bachelor's degree in music or music education from a regionally accredited institution or the equivalent of a U.S. bachelor's degree from an international institution officially recognized by that country. Other majors may be considered if applicants submit transcripts showing formal study in music theory and musicianship that is at least equivalent to what is required of ASU's undergraduate music majors (MHL 140, MHL 341 and MHL 342, MTC 125, MTC 221, MTC 222, and MTC 223). The music theory faculty review transcripts for equivalency. In some cases, course descriptions or syllabi are required to verify equivalency.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in any applicable graduate work.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- samples of work
- statement of interest
- proof of English language proficiency

Additional Admission Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

International students who need an F1 or J1 visa first need to apply to and be accepted into a graduate degree program before they can be considered for the certificate program. International students residing in the U.S. on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for admission to this certificate program.

Official transcripts must show a completed bachelor's degree from a regionally accredited institution in the U.S. or the equivalent of a U.S. bachelor's degree from an international institution that is officially recognized by that country. Also, if applicable, transcripts showing all coursework in music at the graduate level are required. The committee supervising this certificate program considers an applicant's undergraduate record (and graduate record if appropriate) in music theory, evaluating courses taken and grades received. A minimum GPA of 3.00 in these courses is

required. International students applying to this certificate must also be in a degree program at ASU.

Applicants must submit a statement of interest offering reasons for applying to the certificate program and describing their experience and coursework in music theory. The statement should also indicate the applicant's level of piano proficiency (a necessary classroom skill) through a description of their study and their experience in keyboard performance.

Applicants also are asked to show proficiency in music theory by submitting samples of work, such as analytical papers and examples of music writing (harmonic part-writing or counterpoint exercises).

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Design appropriate instructional activities for basic music theory at the college level.
- Assess one's own pedagogy skills through an internship experience.

Career Opportunities: A certificate in music theory pedagogy can help students enhance the marketable skills they acquire in their major program and help them develop new skills apart from it, though most career areas do require more training than a certificate alone can provide.

Career examples include:

- arts administrator
- performing musician
- public or community school teacher
- university professor

Music Therapy, MM (FAMTHERMM)

Online Degree Search Title: Music Therapy, MM

Campus: Tempe

Program Description: The MM program in music therapy provides students with graduate-level study in the theory, practice and research of music therapy.

There is a two-year track for students who have completed either the undergraduate music therapy degree or its equivalent and who are board-certified or hold a similar international music therapy credential. Additionally, a three-year track is offered for students who have an undergraduate degree in music but not in music therapy.

The master's degree program fosters an expanded research perspective in music therapy, emphasizing community partnerships and program development with a concentration in the student's area of choice, drawing from a number of possible options. Cognate areas include counseling and counseling psychology, education for people with disabilities, gerontology, social work, audiology and speech-language plus other areas.

Degree Requirements:

33 credit hours including the required applied project course (MUE 586) and a written comprehensive exam, or 33 credit hours, a thesis and a written comprehensive exam, or 63 credit hours including the required applied project course (MUE 586) and a written comprehensive exam, or 63 credit hours, a thesis and a written comprehensive exam.

The degree credit requirements for the two-year track are distributed as follows:

music therapy core (16 credit hours)

other studies in music (8 credit hours)

clinical cognate (9 credit hours)

Three-Year Track: In addition to the requirements stated above, the three-year track requires 30 credit hours of deficiency coursework for a total of 63 credit hours, including completion of an internship required for certification.

Additional Curriculum Requirements

Completion of diagnostic exams in musicology and music theory is required of all new graduate-level music students prior to enrollment in the ASU

School of Music, Dance and Theatre.

Additional information on degree requirements for this degree is available on the curriculum check sheet located at the bottom of the school's program page (<https://musicdancetheatre.asu.edu/masters-degrees-phds/majorinfo/FAMTHERMM/graduate/false/3>).

Graduates are eligible to sit for the music therapy certification examination given by the Certification Board for Music Therapists.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a U.S. bachelor's or master's degree in music or music therapy from a regionally accredited institution or the equivalent of a U.S. bachelor's or master's degree from an institution in another country that is officially recognized by that country.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 semester hours or 90 quarter hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application (<https://admission.asu.edu/apply/graduate>) and application fee
- School of Music, Dance and Theatre application (<https://musicdancetheatre.asu.edu/admission>), including a resume and personal statement
- official transcripts
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. The School of Music, Dance and Theatre does not offer conditional admission under any circumstances. In order to meet English proficiency requirements, students should have a TOEFL iBT score of at least 80, or an IELTS overall band score of at least 6.5, or a Pearson Test of English score of at least 60.

All applicants are required to perform a live audition or submit an audition recording (<https://musicdancetheatre.asu.edu/admission/graduate-music-admission/audition-interview>). Auditions are scheduled only after complete application materials have been received.

Applicants to the three-year track must complete the prerequisite courses listed below, which are not a part of the coursework for the MM program in music therapy (three-year track) but are required for eligibility to sit for the board certification exam (www.cbmt.org (<http://www.cbmt.org>)). These prerequisites may be taken during undergraduate study, at a community college or other university before beginning the Master of Music program in music therapy (three-year track), during summer sessions at ASU, or online through an accredited institution recognized by ASU. An applicant is eligible to apply to the Master of Music program in music therapy (three-year track) while completing these prerequisites and may finish these courses during the first year in the music therapy program, although this additional work may present a hardship. The prerequisite courses must be completed before a student begins the internship at the end of their first year of study at ASU, unless prior arrangements have been made. Completing the prerequisite courses prior to beginning the Master of Music program in music therapy (three-year track) is highly recommended.

- Introduction to Psychology
- Abnormal Psychology
- Overview of Exceptional Children/Special Education

Applicants should visit the program website for more information on application deadlines. To ensure prompt processing of application, applicants should email MDTAdmissions@asu.edu (<mailto:MusicAdmissions@asu.edu>) after submitting an application. An in-depth interview emphasizing the applicant's music therapy philosophy, research activities and clinical interests is scheduled after receipt of complete application materials. A phone interview may be arranged.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Students will be able to apply advanced musicianship skills across voice, guitar, piano, percussion and technology related tools and instruments to facilitate therapeutic goals for clients.
- Students will be able to evaluate existing literature for gaps in research and then develop and execute a research process to fill an identified gap.
- Students will be able to critically assess music therapists through clinical supervision.

Career Opportunities: Musicians with expertise in performing, composing, teaching, researching, arts advocacy and serving as therapists are in high demand across many sectors and industries, including performing arts organizations, educational institutions, entertainment companies, health

and wellness industries, and community arts organizations. Skills such as creativity, collaboration, innovation, entrepreneurship and the focused discipline needed for success as musicians are all highly valued by a wide range of companies and professions. The School of Music, Dance and Theatre graduate programs inspire and empower students to become creative leaders who transform society through music.

Career examples include:

- arts administration
- community arts advocate
- music therapist
- performing musician
- public or community school teacher
- university professor

Professional Licensure: ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (<https://admission.asu.edu/academics/licensure>) webpage.

480-965-5069

Narrative and Emerging Media, MA (CSNEMMA)

Online Degree Search Title: Narrative and Emerging Media, MA

Campus: ASU at Los Angeles

Program Description: In the MA program in narrative and emerging media, students learn how to tell stories that aren't just watched or read --- they're experienced. In under one year, students learn innovative storytelling techniques, explore the emerging media marketplace, connect with the field's top professionals and develop critical media project management skills.

Through hands-on learning, students explore the entire landscape of emerging immersive media techniques --- including augmented reality, virtual reality, extended reality, 360 video, animated graphics, short-form digital video and documentary production --- to tell creative fictional stories or create nonfiction journalistic work. Students capture and create content for workflow in multiple industries, and they learn to lead teams of producers, engineers, writers and artists across different technologies. They build business acumen and gain enhanced insight into the research, development, and finance and business models driving the future of emerging media, which are central to the program.

Delivered exclusively at the ASU California Center --- Broadway in downtown Los Angeles, the program immerses students in a state-of-the-art emerging media hub. The building includes a state-of-the-art virtual production stage --- one of only a handful of U.S. universities to provide this incredible studio. In addition, the building has a green screen studio that allows for virtual reality productions and live broadcasts, as well as markerless motion capture. Students learn and work in these spaces to create compelling visual storytelling for client productions and their own passion projects.

Students engage in courses that anchor content creation and project management with communication theory and current case studies, along the way building a cohesive portfolio of professional work aligned with industry standards. Students also network and get critiques from industry professionals whose work may inspire their own. Students who complete the program are well-prepared to leap into creation, production and project management roles across the media industry or to pursue independent work.

This is a joint program offered by The Sidney Poitier New American Film School and the Walter Cronkite School of Journalism and Mass Communication.

Los Angeles location

Students interested in using GI Bill® benefits should consider a program on another ASU campus.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at www.benefits.va.gov/gibill/ (<https://www.benefits.va.gov/gibill/>).

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

30 credit hours including the required applied project course (NEM 693).

Required Core (21 credit hours)

NEM 501 Emerging Media (3)

NEM 510 Narrative Development and Pre-Production (3)

NEM 515 Emerging Media Production (3)

NEM 530 Emerging Media Project Management (3)

NEM 550 Diversity and Ethics in Emerging Media (3)

NEM 585 Portfolio (3)

NEM 630 Emerging Media for Clients (3)

Other Requirements (3 credit hours)

NEM 520 AR/VR/XR for Storytelling (3)

NEM 525 Virtual Production for Storytelling (3)

NEM 601 Short Form and 360 Video Production (3)

Electives (3 credit hours)

Culminating Experience (3 credit hours)

NEM 593 Applied Project (3)

Additional Curriculum Information

NEM 585 is a one credit hour course that must be taken three times, for a total of three credit hours.

Students must complete one course from the Other Requirements list.

Admission Requirements: Applicants must fulfill the requirements of the Graduate College, the Walter Cronkite School of Journalism and Mass Communication and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- professional resume
- two letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Global Opportunities:

Global Experience: Students may use elective slots to participate in applicable study abroad experiences. Students are also encouraged to pursue work globally for their applied projects.

Career Opportunities: This degree prepares students to thrive in a growing, emerging media industry. According to a Burning Glass industry report in tandem with Epic Games, "Demand for 3D technology skills is growing quickly in the job market --- so quickly, in fact, that demand for these skills is outpacing the growth of the labor market overall." And according to EMSI data, postings for jobs that require skills in virtual reality are at an all-time high. More than 13,000 jobs were posted in August alone for roles such as advertising specialist and product developer at firms from Facebook to Deloitte.

Graduates are well-suited to careers in AR, VR, and XR production; immersive storytelling; virtual production; journalism and documentary production; and media project management, or to become entrepreneurial storytellers ready to seek funding for their own projects.

Performance (Collaborative Piano), MM (FACPIANOMM)

Online Degree Search Title: Performance (Collaborative Piano), MM

Campus: Tempe

Program Description: The MM program in performance with a concentration in collaborative piano gives students the opportunity to perform with all instrumental areas and voice, focusing on collaborative endeavors such as song recitals, instrumental duos and chamber music, operatic and musical theatre productions, and participation in large ensembles.

Students refine their pianistic technique while developing the specific knowledge and abilities necessary to be skilled and sensitive musical collaborators. Collaborative piano students have an impact on every area of the School of Music, Dance and Theatre, and their work with opera and musical theatre singers, orchestral instrumentalists, choral and large ensembles, composers, theatre artists and dance colleagues leads them toward advanced careers in music.

Degree Requirements:

32 credit hours and a written comprehensive exam.

Required Core (4 credit hours)

MUP 527 Studio Instruction (4)

Concentration (14 credit hours)

MUP 511 Studio Instruction: Piano (4)

MUP 527 Studio Instruction: Collaborative Piano (4)

MUP 588 Collaborative Piano (2)

MUP 596 Solo Performance (2)

MUP 597 Solo Performance (2)

Electives (2--3 credit hours)

Other Studies in Music (11--12 credit hours)

music history (6)

music theory (5--6)

Culminating Experience (0 credit hours)

written comprehensive exam (0)

Additional Curriculum Requirements

The Other Studies in Music Requirement includes six credit hours of MHL coursework and five to six credit hours of MTC coursework.

All new graduate music students are required to complete diagnostic exams in musicology and music theory prior to enrollment in courses for these programs through the ASU School of Music, Dance and Theatre. This is tracked internally within the academic unit.

Additional information on degree requirements for this degree is available on the curriculum check sheet located at the bottom of the school's program page (<https://musicdancetheatre.asu.edu/masters-degrees-phds/majorinfo/FACPIANOMM/graduate/false/3>).

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 semester hours or 90 quarter hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- School of Music, Dance and Theatre application (<https://musicdancetheatre.asu.edu/admission/graduate-music-admission>) (including a resume, personal statement and repertoire list)
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. The School of Music, Dance and Theatre does not offer conditional admission under any circumstances.

Applicants must perform an audition for admission. Auditions are scheduled following receipt of complete application materials. Information about the audition may be found at the School of Music, Dance and Theatre website (<https://musicdancetheatre.asu.edu/>).

A bachelor's degree in music is not required for admission to a master's program. However, all applicants without a bachelor's degree in music should email MDTAdmissions@asu.edu for information on potential remedial courses. Remedial courses may be taken at ASU, another accredited university or a community college before or after admission to this program, but they must be completed prior to starting graduate-level course requirements in music history and music theory.

Applicants should see the program website for application deadlines. After an applicant's completed application materials have been received, including recommendation letters, transcripts and English proficiency, the applicant is confirmed for an audition.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Develop performance practices in the context of diverse musical settings and genres, demonstrating familiarity with the literature of their instrument.
- Evaluate their instrument's repertoire and pedagogy to develop a unique musical style.
- Produce a research study focusing on musical elements, social uses of music, and interplay among performers, composers, and institutions.

Career Opportunities: Musicians with expertise in performing, composing, teaching, researching and arts advocacy are in high demand across many sectors and industries, including performing arts organizations, educational institutions, entertainment companies, health and wellness industries, and community arts organizations. Skills such as creativity, collaboration, innovation, entrepreneurship and the focused discipline needed for success as musicians are all highly valued by a wide range of companies and professions.

School of Music, Dance and Theatre graduate programs inspire and empower students to become creative leaders who transform society through music. Career examples for collaborative pianists include:

- collaborative work in music-related fields such as media production, music business, publishing and marketing
- performing as a collaborative pianist with singers, instrumentalists, choral ensembles or large instrumental ensembles
- pianist for musical theatre or opera productions
- pianist for music recording and studio work
- teaching in a private studio or community music program
- university professor or staff pianist
- working as a vocal coach

Performance (Conducting), MM (HIPERCOMM)

Online Degree Search Title: Performance (Conducting), MM

Campus: Tempe

Program Description: The MM program in performance with a concentration in conducting presents conductors of orchestras, wind bands and vocal ensembles with the opportunity to improve their art, craft and scholarship in pursuit of both professional and academic career aspirations. This program is also beneficial for public school teachers of choirs, orchestras and wind bands who want to strengthen their skills.

There are four tracks within this concentration.

Wind band track: Conductors specializing in wind band conducting study privately with the director of bands and have the opportunity to work closely with other members of the conducting faculty, including the director of athletic bands. Time in front of an ensemble is essential; therefore, conductors have significant podium time as well as twice-weekly chamber winds classes. Study includes conducting technique, rehearsal technique, leadership, interpretation, score study, audience development and outreach, and career development.

Orchestral track: Required courses are specific to orchestral conducting, and elective courses provide additional opportunities for further orchestral study.

Music direction track: The music direction track is designed to meet the needs of the musical director, focusing on musical theatre and opera conducting. Required courses focus on music theatre and opera rehearsal techniques, technical production and repertoire.

Choral track: The choral track prepares conductors for careers throughout the choral field by helping them develop and refine their individual artistic voice. Students engage in a curriculum that explores culturally responsive applications, decolonial pedagogies, global score study, and interdisciplinary framing of gesture. All students receive substantial podium time and work closely with conducting faculty.

Degree Requirements:

32 credit hours including a written comprehensive exam.

Required Core (4 credit hours)

MUP 527 Studio Instruction (4)

Concentration (7 credit hours)

MUP 596 Solo Performance (1)

MUP 597 Solo Performance (1)

Choose from the following for a total of 5 credit hours:

MUE 564 Instrumental Music, Advanced Rehearsal Techniques (3)

MUP 540 Principles of Integrated Conducting (2)

MUP 551 Repertoire: Music Theatre Repertoire (2)

MUP 571 Music Theatre: Workshops (2)

MUP 573 Music Theatre: Performance (1)

Track (9 or 10 credit hours)

Other Studies in Music (11 or 12 credit hours)

music history (6)

music theory (5--6)

Culminating Experience (0 credit hours)

written comprehensive exam (0)

Additional Curriculum Requirements

Students select a track from the following: choral, wind band, orchestral or music direction. Students should see the academic unit for specific concentration and track course requirements for each track.

The other studies in music requirement includes six credit hours of MHL coursework and five to six credit hours of MTC coursework.

Track credit hours may include electives depending on course selections.

Completion of diagnostic exams in musicology and music theory is required of all new graduate music students prior to enrollment in courses for these programs through the ASU School of Music, Dance and Theatre. This is tracked internally within the academic unit.

Additional information on degree requirements for this degree is available on the curriculum check sheet located at the bottom of the school's program page (<https://musicdancetheatre.asu.edu/masters-degrees-phds/majorinfo/HIPERCOMM/graduate/false/3>).

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a U.S. bachelor's or master's degree from a regionally accredited institution or the equivalent of a U.S. bachelor's degree from an institution in another country that is officially recognized by that country.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 semester hours or 90 quarter hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application (<https://admission.asu.edu/apply/graduate>) and application fee
- School of Music, Dance and Theatre application (<https://musicdancetheatre.asu.edu/admission/graduate-music-admission>) (including a resume, personal statement and repertoire list)
- official transcripts
- prescreening video
- three letters of recommendation

- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. The School of Music, Dance and Theatre does not offer conditional admission under any circumstances.

A bachelor's degree in music is not required for admission to a master's program. However, all applicants without a bachelor's degree in music should contact MDTAdmissions@asu.edu (MDTAdmissions@asu.edu) for information on potential remedial courses. Remedial courses may be taken at ASU, another accredited university, or a community college before or after admission to this program, but they must be completed prior to starting graduate-level course requirements in music history and music theory.

Applicants should see the program website for application deadlines. After an applicant's complete application materials have been received, including recommendation letters, transcripts and English proficiency requirements, and a review has been conducted of prescreening materials, the applicant may be invited for a live audition (<https://musicdancetheatre.asu.edu/admission/graduate-music-admission/audition-interview>).

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Evaluate principles of leadership to prepare musicians for performances.
- Apply advanced skills in score preparation, repertoire selection, and rehearsal techniques for performances.
- Synthesize performance skills to create performances that are believable, specific and impactful.

Career Opportunities: Musicians with expertise in performing, composing, teaching, researching and arts advocacy are in high demand across many sectors and industries, including performing arts organizations, educational institutions, entertainment companies, health and wellness industries, and community arts organizations. Skills such as creativity, collaboration, innovation, entrepreneurship and the focused discipline needed for success as musicians are all highly valued by a wide range of companies and professions. School of Music, Dance and Theatre graduate programs inspire and empower students to become creative leaders who transform society through music.

Career examples include:

- artistic director
- arts administrator
- community arts advocate
- conductor
- performing musician
- public or community school teacher
- university professor

Performance (Performance Pedagogy), MM (FAPPEDMM)

Online Degree Search Title: Performance (Performance Pedagogy), MM

Campus: Tempe

Program Description: The MM program in performance with a concentration in performance pedagogy concentrates on the performance and teaching of music with an emphasis on pedagogy.

Students work on their own performance skills while they develop the knowledge and abilities necessary to be outstanding teachers in their area through pedagogy classes, observation, and teaching in private and group settings.

The opportunity to collaborate with music scholars, theorists, composers, educators, dancers and theatre artists provides students with a foundation for a career as a performer, teacher and musician of the highest level. Students may also engage with local and state professional organizations and have the opportunity to present scholarly research or creative activities through workshops or publications.

Degree Requirements:

32 credit hours and a written comprehensive exam.

Required Core (4 credit hours)
MUP 527 Studio Instruction (4)

Concentration (6 credit hours)
MUP 527 Studio Instruction (4)
MUP 596 Solo Performance (1)
MUP 597 Solo Performance (1)

Additional Curriculum Requirements

Students select an area of emphasis from the following: instrumental pedagogy, piano pedagogy or voice pedagogy. Students should see the academic unit for specific requirements for the selected area of emphasis.

Area of Emphasis credit hours may include electives, depending on course selections.

The Other Studies in Music requirement consists of six credit hours of MHL coursework and five to six credit hours of MTC coursework.

Completion of diagnostic exams in musicology and music theory is required of all new graduate music students before enrollment in courses for these programs through the School of Music, Dance and Theatre. This is tracked internally within the academic unit.

Additional information on degree requirements for this degree is available on the curriculum check sheet located at the bottom of the school's program page (<https://musicdancetheatre.asu.edu/masters-degrees-phds/majorinfo/FAPPEDMM/graduate/false/3>).

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a U.S. bachelor's or master's degree from a regionally accredited institution or the equivalent of a U.S. bachelor's degree from an institution in another country that is officially recognized by that country.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 semester hours or 90 quarter hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application (<https://admission.asu.edu/apply/graduate>) and application fee
- School of Music, Dance and Theatre application (<https://musicdancetheatre.asu.edu/admission/graduate-music-admission>) , including a resume, personal statement and repertoire list
- official transcripts
- three letters of recommendation
- voice applicants: a prescreening video
- piano applicants: a teaching demonstration video
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. The School of Music does not offer conditional admission under any circumstances.

Applicants must perform an audition for admission. Auditions are scheduled following receipt of complete application materials and, when applicable, favorable review of prescreening materials. Information about the audition may be found at the school website (<https://musicdancetheatre.asu.edu/admission/graduate-music-admission/audition-interview>).

A bachelor's degree in music is not required for admission to a master's program. However, all applicants without a bachelor's degree in music should contact MDTAdmissions@asu.edu for information on potential remedial courses. Remedial courses may be taken at ASU, another accredited university or a community college before or after admission to this program, but students must complete these courses before starting graduate-level course requirements in music history and music theory.

Voice applicants: Students should see the program website for application deadlines. After receipt of complete application materials, including recommendation letters, transcripts and proof of English proficiency, and review of prescreening materials, an applicant may be invited for an audition.

Instrumental and keyboard applicants: Students should see the program website for application deadlines. After an applicant's complete application materials have been received, including recommendation letters, transcripts and proof of English proficiency, the applicant will be confirmed for an audition.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Develop performance practices in the context of diverse musical settings and genres, demonstrating familiarity with the literature of one's instrument.
- Think critically and practically about an instrument's repertoire and pedagogy to develop a unique musical style.
- Produce a research study focusing on musical elements, social uses of music, and interplay among performers, composers, and institutions.

Career Opportunities: School of Music, Dance and Theatre graduate programs inspire and empower students to become creative leaders who transform society through music.

Musicians with expertise in performing, composing, teaching, and researching; in arts advocacy; and in serving as therapists are in high demand across many sectors and industries, including performing arts organizations, educational institutions, entertainment companies, health and wellness industries, and community arts organizations. Skills such as creativity, collaboration, innovation, and entrepreneurship, as well as the focused discipline needed for success as a musician, are all highly valued by a wide range of companies and professions.

Career examples include:

- arts administrator
- community arts advocate
- composer for film, video games or television
- music therapist
- performing musician
- public or community school teacher
- university professor

Performance (Performance), MM (FAPERF3MM)

Online Degree Search Title: Music Performance, MM

Campus: Tempe

Program Description: The MM program in performance concentrates on the performance and teaching of music.

Students work with faculty mentors to achieve a professional level of performance through individual recitals; chamber music; and choral, wind band, orchestra, jazz, music theatre and operatic ensembles, depending on their area of emphasis. Performance opportunities both on and off campus further develop the student's knowledge and abilities necessary to become leaders in a musical community through teaching, performing or art advocacy. The opportunity to collaborate with music scholars, theorists, composers, educators, dancers and theatre artists provides students with a broad and well-rounded foundation for advanced careers in music or continued study at the doctoral level.

Additionally, students learn the skills needed to be a highly successful working musician including audition preparation, networking, learning organizational strategies, opportunity creation and developing an entrepreneurial mindset.

Degree Requirements:

32 credit hours and a written comprehensive exam.

Required Core (4 credit hours)

MUP 527 Studio Instruction (4)

Concentration (6 credit hours)

MUP 527 Studio Instruction (4)
MUP 596 Solo Performance (1)
MUP 597 Solo Performance (1)

Area of Emphasis (10--11 credit hours)

Other Studies in Music (11--12 credit hours)

Culminating Experience (0 credit hours)
written comprehensive exam (0)

Additional Curriculum Requirements

Students select an area of emphasis from the following: instrumental performance, jazz performance, keyboard performance or multiple woodwinds performance. Students should see the academic unit for specific requirements for the selected area of emphasis.

The Other Studies in Music requirement includes six credit hours of MHL coursework and five to six credit hours of MTC coursework. Students should see the academic unit for specific requirements.

Area of Emphasis credit hours may include electives depending on course selections.

Completion of diagnostic exams in musicology and music theory is required of all new graduate music students prior to enrollment in courses for these programs through the ASU School of Music, Dance and Theatre. This is tracked internally within the academic unit.

Additional information on degree requirements for this degree is available on the curriculum check sheet located at the bottom of the school's program page (<https://musicdancetheatre.asu.edu/masters-degrees-phds/majorinfo/FAPERF3MM/graduate/false/3>).

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a U.S. bachelor's or master's degree from a regionally accredited institution or the equivalent of a U.S. bachelor's degree from an institution in another country that is officially recognized by that country.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 semester hours or 90 quarter hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application (<https://admission.asu.edu/apply/graduate>) and application fee
- School of Music, Dance and Theatre application (<https://musicdancetheatre.asu.edu/admission/graduate-music-admission>) (including a resume, personal statement and repertoire list)
- official transcripts
- prescreening video (voice applicants)
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. The School of Music, Dance and Theatre does not offer conditional admission under any circumstances.

Theatre, MA (FATHEAMA)

Online Degree Search Title: Theatre, MA

Campus: Tempe

ASU is not currently accepting applications for this program.

Program Description: The MA program in theatre introduces students to graduate study in the field of theatre and performance studies and provides a broad base of knowledge in the areas of history, theory, dramaturgy, research methods and practice.

Students have the opportunity to tailor their plan of study to specific research pathways and artistic subject areas, such as performance studies, history and historiography, theory, dramatic writing, theatre for youth, performance as research, technology in performance, drama for teaching and learning, dramaturgy, devising, directing, civic engagement and performance.

The program is designed for those who wish to ultimately enter a doctoral program, for K-12 educators seeking to expand and amplify their expertise, and for those seeking to advance their knowledge of theatre and performance studies.

Degree Requirements:

30 credit hours, a thesis and a written comprehensive exam.

Required Courses (15 credit hours)

Electives (9 credit hours)

Culminating Experience (6 credit hours)

THE 599 Thesis (6)

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- current curriculum vitae

- sample of scholarly writing
- statement of purpose
- three letters of recommendation from professionals familiar with the applicant's work
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The statement of purpose should address the applicant's background, experiences, research interests, and future career goals as they relate to their reasons for pursuing the degree program.

Applicants should see the program website for application deadlines.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Apply graduate level research methods relevant to one's area of focus in theatre.
- Apply advanced analytical skills in the critical examination of theatre histories, theories, & practices.
- Synthesize advanced graduate research and analytical skills towards a long-range or large-scale project that integrates the customized research plan of study created by each graduate student.

Career Opportunities: Professionals with a Master of Arts degree in theatre have been recruited to doctoral programs in theatre, have obtained jobs as teaching artists, and teach theatre in K-12 settings. Other career examples include:

- creating and forming a theatre company
- creating and producing original devised work
- obtaining highly competitive local and national arts grants and arts residencies
- working within an established arts organization as a teaching artist, program coordinator or event curator

Theatre (Directing), MFA (FADIRMFA)

Online Degree Search Title: Theatre (Directing), MFA

Campus: Tempe

ASU is not currently accepting applications for this program.

Program Description: The MFA in theatre with a concentration in directing is a program for students who demonstrate serious purpose, professional aspirations, theatrical daring, and the desire to explore new work in collaborating with playwrights and in the devising and creation process. Holding respect for fellow artists and having a desire to learn about how all the parts fit together are essential qualities in the successful candidate and the successful director.

Students are introduced to varied critical viewpoints from select artists and scholars. A hands-on, mentor-student approach is emphasized with the intent of developing the skill, artistry and communication abilities required to be an excellent professional director.

Degree Requirements:

60 credit hours including the required applied project course (THP 693).

This is a three-year program culminating in an applied project. Directing classes and mentored directing projects constitute approximately 50% of the coursework. Classes also include:

- acting (viewpoints and composition)
- assistant directing for a professional or faculty director working on the main stage
- design collaboration
- devising methodologies
- directing the new play
- dramatic theory and criticism
- dramaturgy
- performance technology
- projects in community-based drama

- reenvisioning
- research methods
- theatre for social change
- theatre history and literature

MFA directors will direct a new work every year. Major assignments may include:

- creating and directing an adaptation of an existing work
- directing a new play by a Master of Fine Arts playwright
- directing one applied project in the Theatre or Music Theatre season
- guiding an ensemble in the devising process and directing the resulting devised piece

Directing faculty members mentor all student projects. Academic and artistic progress is evaluated at the end of each semester by a faculty committee. Program continuation is contingent upon a successful review. A professional internship is required for each Master of Fine Arts director.

Additional information on degree requirements for this degree is available on the curriculum check sheet located at the bottom of the school's program page (<https://musicdancetheatre.asu.edu/masters-degrees-phds/majorinfo/FADIRMFA/graduate/false/3>).

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- School of Music, Dance and Theatre Application (<https://apply.mdt.asu.edu/>), including statement of purpose, current resume and a written directorial approach to a play selected by the reviewing committee
- three letters of reference from professionals familiar with the student's work
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

A personal interview is required. Interviews via phone, video conference or campus visit are available by appointment.

The Master of Fine Arts in theatre with a concentration in directing recruits every three years. The next round of applications will be accepted in January 2024 for fall 2024. Interested students should check back for updates.

Students should see the program website (<https://musicdancetheatre.asu.edu/admission/graduate-theatre-admission>) for application deadlines and admission terms.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Develop a directing approach suitable to the shepherding of a substantial production process from start to finish.
- Apply understanding of directing methods in assistant directing situations.
- Evaluate one's directing technique, employing reflective practice toward continuous growth.

Career Opportunities: Professionals with a Master of Fine Arts degree in directing have obtained a variety of creative roles within the arts, including directing professionally, starting theatre companies, working within established theatres and arts organizations, and building entrepreneurial ventures that bridge the arts with other sectors.

Career examples include:

- creating and producing original devised theatres for festivals or communities
- directing at theatres
- teaching in a variety of contexts as a visiting faculty member, professor of practice or tenure-track professor

- working as a teaching artist at a public or community school

Theatre (Dramatic Writing), MFA (FADRWRTMFA)

Online Degree Search Title: Theatre (Dramatic Writing), MFA

Campus: Tempe

Program Description: The concentration in dramatic writing under the MFA in theatre includes coursework in playwriting, screenwriting, historical studies in theatre, and dramatic theory. Students direct new work, study dramaturgy and literary management, and pursue related topics such as writing for solo performance, storytelling, devising and collaborative writing in a variety of genres such as comedy, horror, science fiction and fantasy.

The School of Music, Dance and Theatre supports the production of new plays and performance works written by its Master of Fine Arts students. Student-written work is showcased in annual Theatre Labs and is considered for main stage productions.

Degree Requirements:

60 credit hours including the required applied project course (THP 693).

Required Core (27 credit hours)

THE 500 Research Methods (3)

THE 504 Studies in Dramatic Theory and Criticism (3)

THE 520 Theatre History and Literature (3)

THP 560 Dramatic Writer's Workshop (15)

THP 561 Scripts in Progress (3)

Concentration (9 credit hours)

THE 562 Dramaturgy Workshop (3)

THP 520 Directing the New Play (3)

THP 598 Special Topics (3)

Electives (18 credit hours)

Culminating Experience (6 credit hours)

THP 693 Applied Project (6)

Additional Curriculum Information

As part of the electives coursework, students have the option to complete an internship (THP 684) for three credit hours.

Students should see the academic unit for a complete list of approved electives. Additional information on degree requirements for this degree is available on the curriculum check sheet located at the bottom of the school's program page (<https://musicdancetheatre.asu.edu/masters-degrees-phds/majorinfo/FADRWRTMFA/graduate/false/3>).

The applied project is the writing of a thesis play, to be developed as one of the following: a full production on the school's main stage, a staged reading or a workshop production.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in theatre or in creative writing from a regionally accredited institution. An applicant may have an undergraduate degree outside of theatre and may be admitted on the basis of excellent creative writing and academic work. Deficiencies in undergraduate preparation may be removed while pursuing the MFA degree.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts

- three letters of recommendation
- School of Music, Dance and Theatre Application (<https://apply.mdt.asu.edu/>), including a current resume, statement of career goals (including writing endeavors or interests), and a manuscript sample of either a full-length play (60 pages or more) or a series of one-act plays (30 pages minimum)
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Students will create new dramatic works reflecting advanced knowledge of the dramatic writer's art and craft with each new work
- The MFA writer will be able to critique dramatic works, employing knowledge of the history, theory and dramaturgy of the art form.
- The MFA student in dramatic writing will be able to teach in dramatic writing and in other related areas in dramatic analysis, storytelling or theater history.

Global Opportunities:

Global Experience: Students are encouraged to apply to international conferences and fellowships such as the Fulbright Program (<https://onsa.asu.edu/fulbright>).

Career Opportunities: Professionals with a Master of Fine Arts degree in dramatic writing regularly have their work produced at festivals, staged readings and theatres across the country. They have obtained highly competitive artist residencies and awards for their work. Some have had their plays published.

Career examples include:

- presenting readings and full productions of work at theatre conferences and festivals
- publishing plays
- teaching in a variety of contexts: as adjunct faculty, visiting faculty or tenure-track professor
- working at an established arts organization in a variety of roles
- working as a teaching artist

Theatre (Interdisciplinary Digital Media), MFA (FATHEADMFA)

Online Degree Search Title: Theatre (Interdisciplinary Digital Media), MFA

Campus: Tempe

Program Description: Digital media as a way of making and thinking about art and experience is of growing importance in society today. Students are prepared to become sophisticated developers, makers, evaluators and entrepreneurs of digital media through a sequence of courses, including core courses in theatre, combined with research activities.

This graduate program is offered through the School of Music, Dance and Theatre in collaboration with the School of Arts, Media and Engineering.

Degree Requirements:

60 credit hours including the required applied project course (THP 693).

Core School of Arts, Media and Engineering courses, to be selected in consultation with each student's School of Arts, Media and Engineering graduate advisor (minimum of 18 credit hours)

Research and applied project (15 credit hours)

Core courses in theatre theory, history and practice (27 credit hours)

The overall course of study is developed with the advisor to ensure a breadth of transdisciplinary knowledge.

Additional information on degree requirements for this degree is available on the curriculum check sheet located at the bottom of the school's program page (<https://musicdancetheatre.asu.edu/masters-degrees-phds/majorinfo/FATHEADMFA/graduate/false/3>).

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- School of Music, Dance and Theatre Application (<https://apply.mdt.asu.edu/>), including current resume, statement of purpose, portfolio that supports the statement of purpose and an academic writing sample from a previous degree program, independent work or publication.
- three letters of recommendation from professionals familiar with the applicant's work
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The statement of purpose should describe the applicant's background in theatre and interest in and suitability for work at the intersection of theatre and digital media.

Applicants should thoroughly review application deadlines and requirements on the Music, Dance and Theatre department website (<https://musicdancetheatre.asu.edu/admission/graduate-theatre-admission>).

Applicants should see the program website for application deadlines but should also note that for financial aid purposes, the School of Arts, Media and Engineering deadline is February 1.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Create media applications for live performance that reflect advanced competency in media applications.
- Assess media design options for specific live performance projects, reflecting the application of academic rigor and contemporary theoretical knowledge in the fields of media design and engineering.
- Participate in cross-disciplinary collaborative processes at an advanced skill level.

Career Opportunities: Graduates are prepared to work in a variety of settings and industries, including interactive and experience design, themed entertainment, higher education, event design, professional theatre companies and community arts organizations.

Graduates of this program have a very high rate of early career placement. Alumni have gone on to a diverse array of positions, including tenured and tenure-track positions at research universities, and they have become lead technicians for Cirque du Soleil, designers and technicians for Obscura Digital and similar companies, projection department heads at major regional theatres, and freelance designers from Korea to Broadway.

Career examples include:

- AR/VR/XR designer
- digital media artist or designer
- digital media arts educator or professor
- digital media composer

Theatre (Performance Design), MFA (FAPERDMFA)

Online Degree Search Title: Theatre (Performance Design), MFA

Campus: Tempe

ASU is not currently accepting applications for this program.

Program Description: This rigorous and innovative MFA program in theatre with a concentration in performance design focuses on a nontraditional approach to design training in preparation for the theatrical design challenges of the future. The design student works with an ensemble of designers, directors and performers to create new projects that redefine the role of the traditional designer.

Skills for approaching and creating new work include:

- design applications in multimedia
- development of artistic entrepreneurship and integrity
- drafting and computer imaging
- new work development

Performance design students work in multiple venues, including the 481-seat Galvin Playhouse, the 164-seat Lyceum Theatre, two studios and one experimental space. In addition, students work in the shops, a design studio and a computer-imaging lab.

Admission to the directing, performance and performance design concentrations is cohort-based.

Degree Requirements:

60 credit hours including the required applied project course (THP 693).

This is a three-year program culminating in an applied project. Academic and artistic progress is evaluated at the end of each semester by a faculty committee. Program continuation is contingent upon a successful review. A professional internship is required and can be fulfilled anytime after the first year of study. Students conclude with an applied ensemble design project suited to their needs and interests.

The first year is dedicated to creating an ensemble and honing the skills needed to visually communicate ideas to a director and audience. In the second year, students concentrate on new work development that culminates in a tour, and they focus on strengthening their design abilities. The third year serves as a bridge between the educational and professional theatre and the communities they serve.

Admission Requirements: Applicants must fulfill the requirements of the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- academic writing sample
- current resume
- portfolio of 10 samples of visual work to be presented at an interview
- three letters of recommendation from professionals familiar with the student's work
- written statement of purpose
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

An interview is required.

Students are admitted to this program every three years, forming a cohort with their colleagues in the other Master of Fine Arts programs in theatre practice.

Students should see the program website for application deadlines and admission terms.

Theatre (Performance), MFA (FAPERFMFA)

Online Degree Search Title: Theatre (Performance), MFA

Campus: Tempe

ASU is not currently accepting applications for this program.

Program Description: The MFA program in theatre with a concentration in performance focuses on cultivating the actor-creator and fostering the conceptual thinker and collaborator by teaching students to develop and create original devised works and enabling them to develop their skills as artist entrepreneurs. Innovative performance applications in multimedia and transdisciplinary collaboration are informed by artistic integrity and social responsibility.

The school offers multiple approaches to devising and new work development:

- Fitzmaurice voicework
- Lecoq training
- new play development
- performance technology
- rasaboxes
- solo and collaborative performance
- various devising methodologies
- viewpoints

In addition to core physical and vocal training, the program offers undergraduate-level teaching opportunities, funding for national and international conference travel, and career development internship opportunities.

During the third year of study, candidates conduct professional career development internships. In the past, students have completed internships at:

- Childsplay Theatre Company
- Cleveland Playhouse
- Dah Theatre, Belgrade, Serbia
- North Coast Rep
- One Yellow Rabbit
- SITI Company
- Synetic Theatre
- The Actor's Gang (Los Angeles)
- Theatre L'Homme Dieu
- Victory Gardens

Degree Requirements:

60 credit hours including the required applied project course (THP 693).

This is a three-year program culminating in an applied project.

The first year is dedicated to intensive movement; acting and Fitzmaurice voice training; and ensemble-building and devising with a focus on Lecoq, rasaboxes, viewpoints and Meisner.

Second-year training provides opportunities for students to explore their work in a wide range of performance modalities such as community-embedded drama, solo performance, and performance and technology, and to devise original work. Performers collaborate with the Master of Fine Arts designers, directors and playwrights to devise a new scripted performance for the mainstage season.

The third year culminates in an applied performance project, serving as a bridge between the educational and professional worlds and the communities they serve.

Academic and artistic progress is evaluated at the end of each semester by a faculty committee. Program continuation is contingent upon a successful review. A professional career development internship is required.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- current resume
- statement of purpose
- academic writing sample
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The letters of recommendation should be from professionals familiar with the student's work.

Students are admitted to this program every three years, forming a cohort with their colleagues in the other Master of Fine Arts programs in theatre practice.

An interview, either on campus or at one of the university or resident theatre association sites, is required.

Students should see the program website for application deadlines and admission terms.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Apply a variety of acting, movement, and voice methodologies and modalities to performance contexts.
- Apply advanced knowledge of history and theory to collaboration, development, and devising of original work.
- Synthesize one's skills towards substantial performance projects that integrate core specializations.

Career Opportunities: Professionals with a Master of Fine Arts in performance have successfully obtained tenure-track jobs in movement, voice, acting and devising as well as postgraduate fellowships, visiting faculty positions and adjunct faculty positions at prestigious colleges and universities across the country.

The program builds skills for creating one's own theatre and theatre company, and several of the program's graduates have successfully created their own theatre companies. Several graduates have become professional actors working in regional and professional theatres, have joined established theatre companies or are working within an established theatre companies as teaching artists, program coordinators and event curators.

Career examples include:

- creating and forming a theatre company
- creating and producing original devised work
- obtaining highly competitive local and national arts grants and arts residencies
- obtaining tenure-track jobs in acting, voice and movement
- obtaining visiting faculty and adjunct faculty positions
- performing and touring with established theatre companies
- presenting work at national and international conferences
- publishing articles and books that impact the field
- working within an established arts organization as a teaching artist, program coordinator or event curator

Theatre (Theatre and Performance of the Americas), PHD (FAPERAMPHD)

Online Degree Search Title: Theatre (Theatre and Performance of the Americas), PhD

Campus: Tempe

Program Description: Doctoral students in theatre with a concentration in theatre and performance of the Americas examine the canon of theatre from diverse critical perspectives through coursework, seminars, research and study opportunities. They are encouraged to think beyond geographical and disciplinary borders, developing the skills required to challenge traditional narratives and expand the boundaries of theatre studies.

To accomplish this, students use a perspective that intervenes in traditionally narrated histories and theories of theatre. They also use cultural and performance studies methodologies to examine other forms of embodied expression that are related to, but distinct from, formal theatrical expression.

During the first year, students explore the theoretical and practical aspects of performance research in general, with a specific focus on performance modalities in the Americas. In the second year, students build on their research interests from the first year through specialized coursework and practical experiences.

Degree Requirements:

90 credit hours, a foreign language exam, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Core (24 credit hours)

Electives (42 credit hours)

Research (12 credit hours)

THE 792 Research (12)

Culminating Experience (12 credit hours)

THE 799 Dissertation (12)

Additional Curriculum Information

When approved by the student's supervisory committee and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this degree.

Two of the elective courses must come from outside the school, and they must be approved by the supervisory committee.

In meeting these requirements, students, with the advice of the supervisory committee, may select theatre courses in areas such as community-based theatre, dramaturgy, theatre for social change, theatre history, theatre theory and criticism, and related topics seminars.

Students also may take courses outside the School of Music, Dance and Theatre in areas such as critical and cultural studies, area studies, languages and literatures, and aesthetic theory. All activities are selected to help students meet the goals of the program and develop the capability to become leaders in the field.

Preliminary Reviews:

Reviews of the student's performance in courses and development of research skills, artistic skills and teaching competencies are conducted by the supervisory committee at the end of each semester.

Comprehensive Examinations:

Examinations comprise written and oral components centering on theatre history, literature and criticism, theatre and performance of the Americas and the research area.

Dissertation Requirements:

A dissertation based on original high-quality research work demonstrating proficiency in the student's special field is required.

Admission Requirements: Applicants must fulfill the requirements of the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a master's degree in a relevant area from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program and a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee

- official transcripts
- School of Music, Dance and Theatre Application (<https://apply.mdt.asu.edu/>), including curriculum vitae, sample of scholarly writing and a statement of purpose
- three letters of recommendation from professionals familiar with the student's work
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The statement of purpose should address the student's background and experiences as they relate to the student's reasons for pursuing the doctorate, and it should describe the student's research interests and indicate future career goals.

An interview is strongly recommended.

Students should see the program website (<https://musicdancetheatre.asu.edu/admission/graduate-theatre-admission>) for application deadlines.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Apply doctoral level research methods and theory relevant to the student's area of focus in theatre.
- Apply advanced analytical skills in the critical examination of theatre.
- Synthesize research and analytical skills towards an in-depth written dissertation project.

Career Opportunities: Many alums with a doctoral degree in theatre and performance of the Americas go on to teaching and research positions in higher education, while some have chosen careers in arts and culture organizations where their expertise in curation and dramaturgical framing of artistic work finds expression. They may participate in postdoctoral fellowships from prestigious universities. There is also a strong record of article and book publication, representing significant contributions to the field.

Career examples include:

- education director or program manager
- tenure-track faculty member
- visiting faculty member

Theatre (Theatre for Youth and Community), MFA (FAYOUTHMFA)

Online Degree Search Title: Theatre (Theatre for Youth and Community), MFA

Campus: Tempe

Program Description: Students in the MFA program in theatre with a concentration in theatre for youth and community study with distinguished faculty; engage in comprehensive coursework; and participate in hands-on experiences in all areas of theatre-making with, by, and for young people and communities. Students hone their skills and knowledge in artistry, facilitation and pedagogy in a challenging and supportive atmosphere, developing cutting-edge artistry, engagement and teaching.

Degree Requirements:

60 credit hours including the required applied project course (THP 693), a written comprehensive exam and an oral comprehensive exam. This is a three-year program.

Required core courses are supplemented by elective courses in an emphasis area, which are focused on preparation for suitable career paths and options. An internship with a professional theatre company, school or arts organization and a final applied project complete the program.

Additional information on degree requirements for this degree is available on the curriculum check sheet located at the bottom of the school's program page (<https://musicdancetheatre.asu.edu/masters-degrees-phds/majorinfo/FAYOUTHMFA/graduate/false/3>).

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the

Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- School of Music, Dance and Theatre Application (<https://apply.mdt.asu.edu/>), along with a current curriculum vitae, statement of purpose and a work sample
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Applicants should thoroughly review application deadlines and requirements on the department's website (<https://musicdancetheatre.asu.edu/admission/graduate-theatre-admission>).

This highly competitive program accepts only a small number of students each year to provide highly individualized attention.

The statement of purpose should clearly explain the applicant's aesthetic and educational philosophies and future career goals. After reading the statement, the faculty should understand not only the applicant's current passions but also why the theatre for youth and community program at ASU would be an appropriate fit to meet the student's educational, practical and scholarly goals. The program accepts thoughtful, well-informed artists, scholars, educators and citizens.

The three letters of recommendation should be from professionals familiar with the applicant's work.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Students will be able to create new performances, processes and solutions in their core areas of practice (including: theatre for and with youth, education and curriculum design, community-based theatre, civic practice, applied theatre and theatre for social justice).
- Students will be able to apply relevant theoretical and critical frames for the assessment of theatre and drama for and with youth and communities in relevant contexts such as K-12 schools, universities, professional and amateur theatres, community centers and applied theatre contexts.
- Students will be able to apply key skills, discourses and organizational strategies of their chosen area of specialization to the creation of new projects or partnerships with existing organizations, such as schools, arts organizations, government entities or other relevant partners.

Career Opportunities: Graduates are prepared to be engaged and innovative leaders in a variety of careers in diverse settings and industries, including:

- arts entrepreneurship
- community arts
- elementary, secondary and tertiary education systems
- professional theater
- youth theater

Examples of careers include:

- activist
- director
- facilitator
- organizer
- practitioner
- specialist
- teacher

Theatre (Theatre for Youth and Community), PHD (FAYOUTHPHD)

Online Degree Search Title: Theatre (Theatre for Youth and Community), PhD

Campus: Tempe

ASU is not currently accepting applications for this program.

Program Description: Students in this PhD program in theatre with a concentration in theatre for youth and community develop a personalized course of study by participating in comprehensive coursework, developing advanced research skills, and connecting their research interests to contemporary trends and conversations in the field.

Students receive individualized attention and focused mentorship in a challenging and supportive atmosphere designed to educate future leaders and researchers in the field.

Degree Requirements:

90 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Core (30 credit hours)

Research (12 credit hours)

THE 792 Research (12)

Research Methodology (6 credit hours)

Electives (30 credit hours)

Culminating Experience (12 credit hours)

THE 799 Dissertation (12)

Additional Curriculum Information

When approved by the student's supervisory committee and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this degree.

In meeting these requirements, students, with the advice of the supervisory committee, may select theatre courses in areas such as community-based theatre, theatre education, theatre for social change, theatre history, theatre theory and criticism and tutorial courses.

Students also may take courses outside the School of Music, Dance and Theatre in areas such as aesthetic theory, area studies, children's literature, critical and cultural studies, educational theory and methodology, languages and literatures, arts education, policy research and democracy studies.

Research methodology coursework is chosen in consultation with the supervisory committee. Where appropriate, the supervisory committee may approve certification of literacy in a foreign language as meeting the research methodology requirement. This approval is granted only in those circumstances wherein fluency in that language is necessary for the dissertation research.

Additional Curricular Requirements:

- ongoing reviews of a student's performance in courses and development of research skills, artistic skills and teaching competencies conducted by the supervisory committee at the end of each semester
- comprehensive examinations consisting of written and oral components that center on theatre history, literature and criticism, theatre for youth, and theatre education, and the research area
- dissertation developed from an approved prospectus, based on original research work of high quality, demonstrating proficiency in the student's special field and adding new knowledge

All activities are selected to help students meet the goals of the program and develop the capability of becoming leaders in the field.

Additional information on degree requirements for this degree is available on the curriculum check sheet located at the bottom of the school's program page (<https://musicdancetheatre.asu.edu/masters-degrees-phds/majorinfo/FAYOUTHPHD/graduate/false/3>).

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in theatre or education from a regionally

accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- curriculum vitae
- School of Music, Dance and Theatre Application (<https://apply.mdt.asu.edu/>), including a sample of scholarly writing and a statement of purpose
- three letters of recommendation
- proof of English proficiency

An interview is optional.

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

For the statement of purpose, applicants should cogently explain their research, educational philosophies and future career goals. After reading these statements, the doctoral faculty should understand not only their current passions, but also why the theatre for youth and community program at ASU would be an appropriate fit to meet their educational, philosophical and scholarly goals.

Three letters of recommendation from professionals familiar with the applicant's work should address specifically the applicant's potential for success in a doctoral program.

Applicants should thoroughly review application deadlines and requirements on the school's website (<https://musicdancetheatre.asu.edu/admission/graduate-theatre-admission>).

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Students will be able to create works of scholarship with the potential to build new knowledge in their chosen theatre for youth and community subfields (including: theatre for and with youth, education and curriculum design, community-based theatre, civic practice, applied theatre and theatre for social justice).
- Students will be able to make an original contribution to field scholarship and research by implementing a long-form research and writing process (e.g., book-length or multi-year work).
- Students will be able to effectively present research as is pertinent to their chosen subfields and subject areas.

Career Opportunities: Graduates are prepared to be engaged and innovative leaders in a variety of careers in diverse settings and industries, including:

- arts entrepreneurship
- community arts
- elementary, secondary and tertiary education systems
- professional theater
- youth theater

Examples of careers include:

- activist
- director
- facilitator
- organizer
- practitioner
- specialist
- teacher

Urban Design, MUD (ARMUDMUD)

Online Degree Search Title: Urban Design, MUD

Campus: Tempe

Program Description: The Master of Urban Design program at The Design School is a transdisciplinary postprofessional graduate program that provides students with actionable knowledge of urban design and enables them to lead urban transformations for community and urban resilience.

Students study and apply newly emerging design knowledge from architecture, landscape architecture, creative placemaking and placekeeping, urban planning, community development, civil engineering and real estate development. Students also draw from critical works in nondesign disciplines, including climate science, social justice, sustainability science, urban ecology, urban climate, natural resources management, environmental psychology, anthropology, arts, histories, smart cities, laws and systems theory.

The Master of Urban Design program offers a 12-month curriculum built around the analysis and understanding of the dynamic urban systems specific to rapidly urbanizing regions of the world. The program leverages the Phoenix metro area as a learning laboratory through a number of challenges --- the rapidly expanding metropolis, the scarcity of water resources, the extreme heat and climatic conditions, and the area's unique ecological and cultural diversity --- in the development of responsible global initiatives and innovative design strategies for urban environments.

This program addresses the urban design transformations that are needed to build just, sustainable and resilient cities.

Degree Requirements:

36 credit hours including the required applied project course (MUD 593).

Required Core (10 credit hours)

MUD 521 Advanced Urban Design Studio I (5)

MUD 522 Advanced Urban Design Studio II (5)

Electives (9 credit hours)

Other Requirements (12 credit hours)

DSC 598 Topic: Principles of Collaboration in Design (3)

LAP 598 Topic: Smart City Sustainability and the Environment (3)

MUD 598 Topic: Great Cities (3)

MUD 598 Topic: Urban Issues (3)

Culminating Experience (5 credit hours)

MUD 593 Applied Project (5)

Additional Curriculum Information

Students should see the academic unit for an approved design professional elective list.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- portfolio
- letter of intent
- two references
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency through either the TOEFL or the IELTS regardless of their current residency. The minimum score for admission to the program is 80 on the TOEFL iBT or an overall band score of 6.5 on the IELTS.

Other information for international applicants can be found at the English proficiency for international graduate students page (<https://admission.asu.edu/apply/international/graduate/english-proficiency>).

Applicants who hold a studio-based four-year undergraduate design degree are considered for the one-year MUD program. This is a postprofessional program.

Applicants must hold an undergraduate or graduate degree from a college or university recognized by ASU in a studio-based design discipline.

The portfolio, letter of intent and contact information for three references must be submitted to SlideRoom (<https://asudesign.slideroom.com/#/Login>) (<https://asudesign.slideroom.com/#/Login>). The Design School requires that these be submitted in addition to the graduate admission application requirements.

Admission to the program is selective. Admission cannot be deferred; students must enroll in the semester for which they are admitted, otherwise they will need to go through the entire application process again for the year in which they are applying.

Applicants may be admitted to the one-year program with deficiencies if their previous coursework is not equivalent to the ASU undergraduate requirements and standards. Deficiencies must be completed prior to taking the required courses, if necessary. This may cause the student to take longer than one year to complete the program.

A personal interview is not required; however, a candidate wishing to visit the school is welcome and should make arrangements by contacting the department.

Career Opportunities: Graduates are prepared to work across a diverse spectrum of positions in the design field within public and private sectors and not-for-profit organizations. Potential areas of work include:

- climate change mitigation and adaptation
- community development
- creative placemaking and placekeeping
- environmental and climate justice
- low-impact development
- public health and cities
- smart cities
- sustainable cities
- transit-oriented design
- urban and community resilience

Visual Communication Design, MVCD (HIVCDMVCD)

Online Degree Search Title: Visual Communication Design, MVCD

Campus: Tempe

Program Description: The MVCD program at The Design School is a studio-based degree program. Students work on strategic visual communication design projects with a focus on visual design communication proposals, as well as related practices that improve human experiences, enhance interaction with technology, increase business value and involve speculating critically about social issues. Students engage in visual and theoretical research, ideation, visualization, prototyping and testing of creative solutions that address critical problems faced in the contemporary designed world.

Graduates of this program are adept in working with principles of visual communication design, emotional intelligence, and systems thinking in problem identification and its appropriate contextual solutions.

Degree Requirements:

60 credit hours including the required capstone course (GRA 622).

Required Core (43 credit hours)

Electives (6 credit hours)

Other Requirement (6 credit hours)

GRA 581 Internship in Teaching Design (3)

GRA 584 Internship (3)

Culminating Experience (5 credit hours)

GRA 622 Advanced Visual Communication Design Studio IV (5)

Additional Curriculum Information

The Master of Visual Communication Design program includes sequential studio courses. Requirements involve an average of 14 credit hours per semester. A summer internship is required during the summer prior to the final year.

The three-plus-year program adds the following requirement to the plan of study: deficiency courses (42 credit hours).

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution. Students should see below for information on the qualifications for a two-year program of study or a three-plus-year program of study.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- additional required application items submitted to SlideRoom (see below)
- two letters of reference
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) through either the TOEFL or the IELTS regardless of their current residency. The minimum score for admission to the program is 80 on the TOEFL iBT[®] taken in a testing center or an overall band score of 6.5 on the IELTS.

A portfolio, letter of intent, resume, and contact information for three references must be submitted to SlideRoom (<https://asudesign.slideroom.com/#/Login> (<https://asudesign.slideroom.com/#/Login>)). The Design School requires that these be submitted in addition to application materials required by the Graduate College.

Admission to the program is selective. Admission cannot be deferred. Students must enroll in the semester for which they are admitted; otherwise, they will need to go through the entire application process again for the year for which they are applying.

A personal interview is not required; however, a candidate wishing to visit the school is welcome and should make arrangements by contacting the department.

Admission Requirements to the Two-Year Program

All applicants must have earned a bachelor's degree or equivalent or a graduate degree from a regionally accredited college or university of recognized standing in visual communication design, graphic design, or other design discipline, or have significant experience in design as demonstrated with a portfolio in which visualization and visual communication skills are presented.

Admission Requirements to the Three-Plus-Year Program

All applicants must have earned a bachelor's degree or equivalent in a field other than visual communication design or graphic design, or have no significant experience in visual communication or graphic design.

Applicants may be admitted to the two-year program with deficiencies if their previous coursework is not equivalent to the ASU undergraduate requirements and standards. Deficiencies must be completed prior to taking the required courses, if necessary. This may cause the student to take longer than two years to complete the program.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Synthesize iterative ideas and design fundamentals into final projects.
- Investigate methodologies, strategies, and theories through critical thinking in their final design project
- Develop designs for social issues, cultural representation, and sustainability including clear visual and verbal communication techniques.

Career Opportunities: Graduates pursue professional practice in visual communication, experience design and strategic design, as well as positions in academia. Career opportunities include:

- creative lead
- design manager
- design researcher
- experience designer
- interaction designer
- senior visual communication designer
- service designer
- UX designer
- visual design consultant
- visual sense-maker

Engineering, Ira A. Fulton Schools of

Aerospace Engineering, MS (ESAEROSPMS)

Online Degree Search Title: Aerospace Engineering, MS

Campus: Tempe

Program Description: The MS program in aerospace engineering prepares engineers for doctoral study or industrial positions specializing in research, project management and product innovation in aerospace engineering.

The program stresses a sound foundation in technical fundamentals, communication and professionalism. To this end, a broad-based curriculum is offered in design, system dynamics and control; fluid mechanics and aerodynamics; mechanics and dynamics of solids and structures; transport phenomena; thermodynamics; and energy.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Aerospace Engineering (Aeronautics), BSE
- Aerospace Engineering (Astronautics), BSE
- Aerospace Engineering (Autonomous Vehicle Systems), BSE
- Mechanical Engineering, BSE
- Mechanical Engineering (Computational Mechanics), BSE
- Mechanical Engineering (Energy and Environment), BSE

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a portfolio, or 30 credit hours and a thesis, or 30 credit hours including the required applied project course (MAE 593).
Major Area of Emphasis (12 or 15 credit hours)

Technical Electives (6 or 9 credit hours)

Mathematics (6 credit hours)

Culminating Experience (0-6 credit hours)

MAE 593 Applied Project (3) or

MAE 599 Thesis (6) or

portfolio (0)

Additional Curriculum Information

All students are admitted to the nonthesis option unless a faculty thesis advisor is secured, at which time the student can initiate a change to the thesis option.

The plan of study must be in accordance with university and program requirements. A minimum cumulative GPA of 3.00 (scale is 4.00 = "A") is required throughout the program. Candidates for the program must complete a minimum of 30 credit hours of courses at the 500 level and above, with a minimum cumulative GPA of 3.00 or above.

Students completing a portfolio for the culminating experience must complete at least 15 credit hours of graduate MAE coursework (500 level and above) for the major area of emphasis requirement. An additional three credit hours of elective coursework, for a total of nine credit hours, is also required.

Coursework for the major area of emphasis is restricted to MAE coursework.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- resume or curriculum vitae
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency via a minimum score of 80 on the internet-based TOEFL regardless of their current residency.

Admission to the aerospace engineering graduate program is highly competitive.

Admission to the accelerated master's degree program requires an ASU GPA of 3.50 (scale is 4.00 = "A") in degree-applicable courses. All applications are subject to review, and admission is not guaranteed.

Career Opportunities: Professionals with a master's degree in aerospace engineering have strong opportunities at most levels in aerospace engineering in research, design and manufacturing at companies of all sizes as well as national laboratories (DOE, DOD, NASA). Analytical skills learned in aerospace engineering are also valued for other nonengineering positions.

Career examples include:

- engineer
- engineering manager or director
- research engineer

Online Degree Search Title: Aerospace Engineering, PhD

Campus: Tempe

Program Description: The PhD program in aerospace engineering emphasizes original research and provides students with a strong background for employment in academic institutions, government laboratories and industrial research laboratories with a focus on aerospace engineering.

The program stresses a sound foundation in technical fundamentals, communication and professionalism. To this end, a broad-based curriculum is offered in design, system dynamics and control; fluid mechanics and aerodynamics; mechanics and dynamics of solids and structures; transport phenomena; thermodynamics and energy. Modern computational and laboratory facilities are available to support timely research investigations.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

All students pursuing the doctorate are required to pass both a qualifying and a comprehensive examination administered by the program committee. In addition, the following are required:

coursework directly related to the research area (18)

mathematics (9)

graduate courses outside the major research area (9)

MAE 792 Research

MAE 799 Dissertation credit hours (12)

Students in the doctoral program who have not completed an MS degree previously are allowed to apply for a Master of Science in Passing after successfully completing the comprehensive exams.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from an accredited U.S. or international institution.

Applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- GRE scores
- personal statement
- resume or curriculum vitae
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) via a minimum of score of 80 on the internet-based TOEFL regardless of their current residency.

ASU does not accept the GRE® General Test at home edition.

Admission to the aerospace engineering doctoral program is highly competitive, and preferred applicants have an undergraduate or master's degree in aerospace engineering or mechanical engineering. The admission process considers all aspects of the student's application. The typical successful applicant has a cumulative GPA of at least 3.25 (scale is 4.00 = "A") in engineering and science coursework in a bachelor's or master's degree program, and high GRE and TOEFL scores.

Career Opportunities: Professionals with a doctorate in aerospace engineering have strong opportunities at all levels in aerospace engineering in research, design and manufacturing at companies of all sizes, as well as national laboratories (DOE, DOD, NASA). Analytical skills learned in aerospace engineering are also valued for other nonengineering positions.

Career examples include:

- engineer
- engineering manager or director
- engineering professor
- research engineer

Applied Ethics and the Professions (Ethics and Emerging Technologies), MA (LAAEPEETMA)

Online Degree Search Title: Applied Ethics and the Professions (Ethics and Emerging Technologies), MA

Campus: Tempe

ASU is not currently accepting applications for this program.

Program Description: The MA program in applied ethics and the professions with a concentration in ethics and emerging technologies examines ethical challenges posed by emerging technologies, including nanotechnology, neurotechnology, biotechnology, robotics, and advanced information and communication technology. Not only are these technologies being developed at an unprecedented pace, but they also share several unique characteristics, including system complexity, social embeddedness and the potential to converge with one another.

Emerging technologies are changing how humans live and work, and they have the potential to alter the very nature of human existence. Challenges considered by courses in the program include regulation of emerging technologies through public policy, ethical responsibilities of professionals engaged in development of emerging technologies, the promises and perils of emerging technologies, and whether traditional ethical concepts and processes can and should be applied to emerging technologies.

Degree Requirements:

30 credit hours including the required applied project course (AEP 593).

Required Core (6 credit hours)

Concentration (3 credit hours)

Elective (15 credit hours)

Culminating Experience (6 credit hours)

AEP 593 Applied Project (6)

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of interest in applied ethics and career goals
- three letters of recommendation

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) by meeting the Graduate College English proficiency requirements, regardless of their current residency.

Applicants who are required to demonstrate English proficiency and who are seeking a teaching assistantship must demonstrate proficiency in spoken English; a score of 55 or better on the Speaking Proficiency English Assessment Kit or a score of 26 on the speaking portion of the TOEFL is required.

Biological Design, MS (ESBDEMS)

Online Degree Search Title: Biological Design, MS

Campus: Tempe

Program Description: Students pursuing the MS degree in biological design are trained in the continuum between technology and biology by participating in a flexible training program that requires students to take one program core course (Principles of Biological Design), one course from a suite of biotechnology courses, and one from a suite of statistics courses.

The flexibility of this program, while maintaining key instructional structure, allows students from both traditional and nontraditional engineering backgrounds to have simultaneous access to training and mentoring in both engineering and technology with a biological focus. This gives students from diverse backgrounds access to transdisciplinary education and training that they would not have in traditional program settings.

As part of coursework and applied projects or theses, students read literature; identify critical problems related to energy, environment, human health, sustainability and security; and develop solutions to these problems using a synergy of technological and biological solutions, either in teams (course projects) or individually (thesis or applied project). Students are mentored by faculty from different colleges and schools at ASU.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

30 credit hours and a thesis, or 30 credit hours including the required applied project course (BDE 593).

Required Core (3 credit hours)

BDE 502 Research Methods in Biological Design (3)

Statistics (3 credit hours)

CHE 598 Topic: Six Sigma Methodology/Engineering Experimentation (3)

IEE 572 Design Engineering Experiments (3)

IEE 578 Regression Analysis (3)

IEE 670 Mathematical Statistics (3)

Biotechnology (3 credit hours)

BME 598 Topic: Bioenergy and Microbial Biotechnology (3)

BME 598 Topic: Cellular and System Modeling (3)

BME 598 Topic: Chimeras and Recombinant Organisms in Medicine (3)

CEE 565 Advanced Environmental Biotechnology (3)

CEE 567 Environmental Microbiology (3)

CEE 598 Topic: Bio-inspired Design (3)

CHE 579 Microbial Bioprocess Engineering (3)

CHE 598 Topic: Nanobiotechnology (3)

CHE 598 Topic: Synthetic Biology and Metabolic Engineering (3)

Electives (12 or 15 credit hours)

Other Requirements (3 credit hours)

BDE 591 Seminar (3)

Culminating Experience (3 or 6 credit hours)

BDE 593 Applied Project (3)

BDE 599 Thesis (6)

Additional Curriculum Information

BDE 591 Seminar is a one credit hour course to be taken in three semesters. This course may be substituted with the academic unit's approval.

Students select electives in consultation with their advisor. Students who complete the applied project for the culminating experience must complete 15 credit hours of electives, and students completing the thesis option take 12 credit hours of electives.

Students must complete three credit hours for each requirement in statistics and in biotechnology from the courses listed. If approved by the academic unit, courses may be substituted with an appropriate alternative.

Coursework selected as part of the statistics or biotechnology requirements may not be used as elective coursework on the same plan of study. Students should check with their academic advisor to ensure that the total credit hours of their plan of study are equal to 30.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering. Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a related field, including physical sciences, biological sciences, and engineering, from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- three letters of recommendation
- personal statement
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Applicants whose native language is not English are required to achieve a minimum score of 90 on the TOEFL iBT.

The application process is very competitive, and candidates are strongly encouraged to adhere to all priority deadlines.

Career Opportunities: Opportunities for graduates include placement in the broader biotechnology industry, including biopharmaceutical processing, biomanufacturing, sustainable biotechnology, and food and agribusiness industries. Some graduates pursue careers in entrepreneurship (e.g., startup companies), law (e.g., patent law), regulatory affairs and medicine.

Career examples include:

- clinical laboratory technologist
- environmental engineer
- environmental scientist and specialist
- epidemiologist
- health and safety engineer
- microbiologist

Biological Design, PHD (GCBDSPHD)

Online Degree Search Title: Biological Design, PhD

Campus: Tempe

Program Description: The PhD program in biological design seeks to develop a new type of scientist by training students in core disciplines related to biomedicine and biotechnology while simultaneously preparing them to participate successfully in the interdisciplinary research teams of the future.

The research emphasis is on projects that are use-inspired, contributing directly to solutions for important societal challenges. This is a highly mentored program of personalized study that provides significant interaction with the large and vibrant local research community.

The curriculum has four key distinguishing features: a personalized plan of study that enables students to explore the disciplinary and interdisciplinary areas of greatest interest; encouragement to choose dissertation research projects that are use-focused, contribute to solving a large-scale challenge, and promise rich transdisciplinary experiences; opportunities to participate in a proseminar format to encourage broad research interactions and discuss problems and challenges in biological design research; and three 10-week laboratory rotations during the first year of study. Rotations can be in any ASU laboratory that is centered largely on biological research.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Core (3 credit hours)

BDE 702 Fundamentals of Biological Design II (3)

Other Requirements (2 credit hours)

BDE 598 Special Topics: Biological Design Seminar (1)

BDE 791 Seminar: Biological Design Proseminar (1)

Electives and Research (67 credit hours)

Culminating Experience (12 credit hours)

BDE 799 Dissertation (12)

Additional Curriculum Information

Other requirements courses may be substituted with approval of the academic unit.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- three letters of recommendation
- personal statement
- resume
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Three letters of recommendation relative to the candidate's academic career are required. The personal statement should reflect the candidate's career and educational goals, and explain why the candidate is interested in pursuing this degree. The resume should include prior research and employment experience, honors, awards, memberships held, publications, etc.

For additional admission requirements, including transcripts, fees and international application requirements, students should see the admission services website.

Career Opportunities: Graduates are trained at the intersection of biological sciences, physical sciences and technology through innovation, design and production. They find career opportunities in health care, biotechnology, pharmaceutical discovery, biomanufacturing, security, environmental technologies and food agribusinesses.

Career examples include:

- biochemist
- biophysicist
- clinical scientist
- environmental engineer
- health and safety engineer
- medical engineer
- medical scientist
- microbiologist

Biomedical Engineering, MS (ESBIOENMS)

Online Degree Search Title: Biomedical Engineering, MS

Campus: Tempe

Program Description: The School of Biological and Health Systems Engineering faculty offer a graduate program leading to the MS in biomedical engineering.

Areas of study include:

- biomaterials, biosensors, biomarkers and biomimetic materials
- biomedical imaging
- molecular, cellular and tissue engineering
- neural and rehabilitation engineering
- synthetic and systems biology

The biomedical engineering program offers an accelerated BSE/MS degree in biomedical engineering for students in the Bachelor of Science in Engineering program who have maintained a GPA of 3.50 (scale is 4.00 = "A") into their junior year. The program allows up to 12 credit hours of graduate-level coursework taken during the senior year to be applied toward both the undergraduate and graduate degrees.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Biomedical Engineering, BSE
- Biomedical Engineering (Biological Devices), BSE
- Biomedical Engineering (Biomedical Devices), BSE

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a thesis, or 30 credit hours including the required applied project course (BME 593).

All candidates pursuing a master's degree in biomedical engineering are required to complete an approved plan of study. Special course requirements for the different areas of study are established by the faculty.

A candidate whose undergraduate degree is in a field other than biomedical engineering may be required to complete more than the required credit hours of the program of study.

The following are program requirements for the applied project option:

- biomedical engineering coursework (13)
- biomedical engineering seminar (2)
- general electives (6)
- quantitative electives (6)
- applied project (3)

The following are program requirements for the thesis option:

- biomedical engineering coursework (9)
- biomedical engineering seminar (3)
- general electives (6)
- quantitative electives (6)

thesis (6)

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- resume or curriculum vitae
- a statement of purpose
- two letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Ability to develop a research or design project in biomedical engineering for students who will be completing a thesis or an applied project
- Ability to evaluate quantitative problems related to biomedical engineering by applying statistical analysis, mathematical modeling, and image processing methods related to biomedical engineering
- Ability to communicate biomedical concepts to an interdisciplinary audience through data synthesis, interpretation and visualization

Career Opportunities: Professionals who specialize in biomedical engineering research areas are in high demand by local, national and international employers across sectors and industries, including business, academia, health care, government and research.

Career examples include:

- biochemical engineer
- bioinformatics scientist
- biomedical engineer
- geneticist
- health sciences manager
- medical scientist
- molecular biologist
- nanosystems engineer

Biomedical Engineering, PHD (ESBIOENPHD)

Online Degree Search Title: Biomedical Engineering, PhD

Campus: Tempe

Program Description: The School of Biological and Health Systems Engineering faculty offer a graduate program leading to the PhD in biomedical engineering.

Areas of study include:

- biomaterials, biosensors, biomarkers and biomimetic materials
- biomedical imaging

- molecular, cellular and tissue engineering
- neural and rehabilitation engineering
- synthetic and systems biology

The doctoral degree in biomedical engineering is conferred upon evidence of excellence in research resulting in a scholarly dissertation that is a contribution to knowledge.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Bioengineering Courses (18 credit hours)

Doctoral students are required to complete six credit hours from each of the following three areas:

BME graduate courses (BME prefix) (6)

life science or biology graduate courses (6)

quantitative math or engineering (6)

Other Requirement (3 credit hours)

BME 780 Teaching Practicum (3)

Technical Electives (9 credit hours)

Research (37 credit hours)

BME 792 Research (37)

Seminar (5 credit hours)

BME 591 Seminar (5)

Culminating Experience (12 credit hours)

BME 799 Dissertation (12)

Additional Curriculum Information

Up to six credit hours of the required biomedical engineering courses and technical electives combined may be at the 400 level.

Courses used to satisfy the technical electives requirement must be selected from the list of 400- to 700-level courses that are not selected as required BME courses.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- a statement of purpose
- resume or curriculum vitae
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Students should view the School of Biological and Health Systems admission checklist (<https://sbhse.engineering.asu.edu/phd-biomedical-engineering/>) for specific admission procedures and deadlines.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following

program outcomes:

- Ability to independently develop an approach for identifying problems, collecting, analyzing and interpreting data in the area of biomedical engineering
- Develop ability to communicate original biomedical research as scholarly work or publication
- Develop teaching practices under faculty supervision that are appropriate for biomedical engineering education within industry or academia

Career Opportunities: Professionals who specialize in biomedical engineering research areas are in high demand across sectors and industries, including business, academia, hospitals, government agencies and research facilities. The skill sets gained by graduates of the doctorate program in biomedical engineering are sought by local, national and international employers.

Career examples include:

- bioinformatics scientist
- biomedical engineer
- geneticist
- medical scientist
- molecular biologist
- professor

Chemical Engineering, MS (ESCHEMEMS)

Online Degree Search Title: Chemical Engineering, MS

Campus: Tempe

Program Description: The chemical engineering faculty offer a graduate program leading to the MS in chemical engineering.

Areas of research emphasis include atmospheric aerosols, biomolecular engineering, biosensors, chemical therapies for neurodegenerative diseases, electrochemistry, electronic materials processing, engineering education, flexible display technology, fuel cells, inorganic membranes, process design and operations, protein synthesis, transport phenomena in living systems and water purification.

A graduate handbook detailing information on graduate studies in chemical engineering is available on the school's website. For additional details, students should contact the graduate advising office in the School for Engineering of Matter, Transport and Energy.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Chemical Engineering, BSE

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

33 credit hours and a thesis, or 33 credit hours including the required applied project course (CHE 593).

Required Core (9 credit hours)

CHE 533 Transport Processes I (3)

CHE 543 Thermodynamics of Chemical Systems (3)

CHE 544 Chemical Reactor Engineering (3)

Technical Electives (15 or 18 credit hours)

Other Requirement (3 credit hours)

CHE 591 Seminar (3)

Culminating Experience (3 or 6 credit hours)

CHE 593 Applied Project (3)

CHE 599 Thesis (6)

Additional Curriculum Information

This degree has two options: a thesis option and a nonthesis option. The nonthesis option requires an applied project. Both options require a faculty advisor. All students are admitted to the nonthesis option until a faculty advisor has been secured and agrees to allow the student to change to the thesis option.

The composition of technical electives depends on the student's final culminating experience. At least one technical elective course of three credit hours must be taken outside of chemical engineering, and the academic unit must approve all elective coursework for the credits to be used on the plan of study.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- resume or curriculum vitae
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency via a minimum score of 90 on the internet-based TOEFL, regardless of their current residency.

Admission to the accelerated master's degree program requires a 3.50 ASU GPA (scale is 4.00 = "A") in degree-applicable courses. All applications are subject to review, and admission is not guaranteed.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Demonstrate an understanding of key concepts of thermodynamics in the field and how to apply those concepts in their culmination event (Applied project or M.S. thesis).
- Communicate the results of research performed related to chemical engineering concepts through written and oral presentations.
- Demonstrate an understanding of key concepts of kinetics in the field and how to apply those concepts in their culmination event (e.g., Thesis).

Career Opportunities: Professionals with a Master of Science in chemical engineering have strong opportunities at all levels in research, design and manufacturing at companies of all sizes; at national laboratories (DOE, DOD, NASA); and in academia. Analytical skills learned in chemical engineering are also valued in other nonengineering positions.

Career examples include:

- engineer
- engineering manager or director
- engineering professor
- lecturer
- process engineer
- research engineer

Chemical Engineering, PHD (ESCHEMEPHD)

Online Degree Search Title: Chemical Engineering, PhD

Campus: Tempe

Program Description: The chemical engineering faculty offer a graduate program leading to the PhD in chemical engineering.

Areas of research emphasis include atmospheric aerosols, biomolecular engineering, biosensors, chemical therapies for neurodegenerative diseases, electrochemistry, electronic materials processing, engineering education, flexible display technology, fuel cells, inorganic membranes, process design and operations, protein synthesis, transport phenomena in living systems and water purification.

A graduate handbook detailing information on graduate studies in chemical engineering is available on the school's website. For additional details, students should contact the graduate advising office in the School for Engineering of Matter, Transport and Energy.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Core (9 credit hours)

CHE 533 Transport Processes I (3)

CHE 543 Thermodynamics of Chemical Systems (3)

CHE 544 Chemical Reactor Engineering (3)

Technical Electives (18 credit hours)

Other Requirements (5 credit hours)

CHE 591 Seminar (5)

Research (12 credit hours)

CHE 792 Research (12)

Additional Research/Electives (28 credit hours)

Culminating Experience (12 credit hours)

CHE 799 Dissertation (12)

Additional Curriculum Information

Technical electives are selected from within or outside the chemical engineering program.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- resume or curriculum vitae
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English is required to achieve a minimum score of 100 on the internet-based TOEFL, regardless of their

current residency.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Demonstrate an understanding of key concepts of thermodynamics in the field and how to apply those concepts in their Ph.D. research.
- Write creative engineering documents that show an understanding of their experimental research and appropriately records and analyzes their results.
- Construct a research plan that provides detailed experimental procedures and provides a novel research approach.

Career Opportunities: Professionals with a chemical engineering doctoral degree have strong opportunities at all levels in research, design and manufacturing at companies of all sizes; at national laboratories (DOE, DOD, NASA); and in academics. Analytical skills learned in chemical engineering are also valued in other nonengineering positions.

Career examples include:

- engineer
- engineering manager or director
- engineering professor
- lecturer
- process engineer
- research engineer

Civil, Environmental and Sustainable Engineering, MS (ESCIVILMS)

Online Degree Search Title: Civil, Environmental and Sustainable Engineering, MS

Campus: Tempe

Program Description: The faculty in civil, environmental and sustainable engineering offer a graduate program leading to an MS degree in civil, environmental and sustainable engineering. The program is designed to enhance the knowledge gained in the undergraduate program by requiring students to understand and practice fundamental concepts in engineering, mathematics and the basic sciences.

The pattern of coursework applicable to the degree is potentially unique for each student, although it must conform to the general guidelines for subject matter content for the degree, as authorized here and on the program's website.

Students are admitted to one of the following specialty areas in engineering:

- environmental
- geotechnical
- hydrosystems
- structural
- sustainable
- transportation

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Civil Engineering, BSE

Civil Engineering (Sustainable Engineering), BSE

Construction Engineering, BSE

Environmental Engineering, BSE

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a thesis, or 30 credit hours and a written comprehensive exam, or 30 credit hours including the required applied project course (CEE 593).

All candidates for the master's degree thesis option are required to complete 24 credit hours of approved graduate coursework and a minimum of six credit hours of CEE 599 Thesis. The written thesis must be original research in nature. Additional courses may be assigned by the graduate supervisory committee, depending on the candidate's background. A final oral examination in defense of the thesis written work is required.

Candidates in the applied project option must complete 27 credit hours of approved graduate coursework and three credit hours of CEE 593 Applied Project.

Candidates in the comprehensive exam option must complete 30 credit hours of approved graduate coursework and complete a written comprehensive exam.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to this program if they have earned a bachelor's or master's degree with a major in engineering or a closely related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program. Applicants with a lower GPA may be admitted provisionally at the discretion of the admission committee.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Those seeking a teaching assistantship must demonstrate proficiency in spoken English with a score of 55 or better on the Speaking Proficiency English Assessment Kit or a score of 26 on the speaking portion of the TOEFL.

The student's credentials for admission are evaluated by the graduate program chair and a committee chaired by the specialty area coordinator. A student whose undergraduate degree is not in civil engineering is required to take appropriate undergraduate courses as deficiency courses to establish a base of knowledge in the discipline. Deficiencies for admission to the graduate degree program are specified at the time of admission, and details can be obtained from the graduate studies section of the program's website.

Applicants are encouraged to submit a resume and personal statement.

Career Opportunities: This program prepares graduates to be civil engineers who typically focus on large projects such as buildings, roads, bridges, subway systems, dams and water supply networks.

Civil, Environmental and Sustainable Engineering, PHD (ESCIVILPHD)

Online Degree Search Title: Civil, Environmental and Sustainable Engineering, PhD

Campus: Tempe

Program Description: The faculty in civil, environmental and sustainable engineering offer a graduate program leading to the PhD in civil, environmental and sustainable engineering.

A broad range of theoretical and experimental research programs have been established in civil and environmental engineering to prepare graduate students for careers in professional practice and research. These programs are constantly evolving with the changes in society and the profession, and many are transdisciplinary in nature.

The pattern of coursework applicable to the degree is potentially unique for each student, although it must conform to the general guidelines for subject matter content for the degree, as authorized here and in the program's graduate handbook.

Students are admitted to one of the following specialty areas in engineering:

- environmental
- geotechnical
- hydrosystems
- structural
- sustainable
- transportation

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

All candidates for the doctorate are required to complete 84 approved graduate credit hours; of these, 30 credit hours can be from the previously awarded master's degree. Additional graduate credit work may be assigned by the graduate supervisory committee, depending on the background of the candidate.

The graduate credit hours must include a minimum of 12 credit hours of research and 12 credit hours of dissertation work.

This degree program also requires written and oral comprehensive examinations and approval of the dissertation prospectus for the student to be eligible for doctoral candidacy.

After entering candidacy, the student completes the research and writes and successfully defends a dissertation.

A final oral examination in the defense of the dissertation work is required for all students.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a master's degree in engineering or a closely related master's degree program from a regionally accredited institution. Exceptionally qualified students with a bachelor's degree may be admitted to the doctoral program.

Applicants must have a minimum cumulative GPA of 3.20 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.20 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- GRE scores
- three letters of recommendation
- a resume
- a personal statement
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. Those seeking a teaching assistantship must demonstrate proficiency in spoken English with a score of 55 or better on the Speaking Proficiency English Assessment Kit or a score of 26 on the speaking portion of the TOEFL.

A student whose undergraduate or master's degree is not in civil engineering is required to take appropriate undergraduate or graduate courses as deficiency courses in order to establish a base of knowledge in the discipline. Deficiencies for admission to the program are specified at the time of admission, and details can be obtained from the graduate studies section of the program's website.

Prospective students should note that GRE scores are used in the admission decision. The average scores for those admitted to the graduate

programs over the last five years were 732 for MS or MSE and 751 for PhD (GRE General Test) or 157 for MS or MSE and 159 for PhD (GRE revised General Test) in the quantitative section; 1203 for MS or MSE and 1239 for PhD (GRE General Test) or 308 for MS or MSE and 311 for PhD (GRE revised General Test) as combined quantitative and verbal scores. More information regarding how to send official GRE scores to Graduate Admission Services can be found on the FAQ page (<https://admission.asu.edu/contact/faqs#graduate>). ASU does not accept the GRE® General Test at home edition.

Students' credentials for admission are evaluated by the graduate program chair and a committee chaired by the specialty area coordinator.

Career Opportunities: Graduates in professional practice become civil engineers who typically focus on large projects such as buildings, bridges, subway systems, dams and water supply networks. Graduates also go into research and higher education.

Clean Energy Systems, MS (ESCESMS)

Online Degree Search Title: Clean Energy Systems, MS

Campus: Polytechnic

Program Description: In the MS program in clean energy systems, students not only develop sophisticated engineering technical skills in clean energy systems; they also exercise the professional competencies of collaboration, communication, teamwork and adaptability. Students study a variety of energy sources, including fuel cells, power electronics, batteries, automotive systems and renewable energy systems. The applied courses within the program provide exposure to different disciplines, including electrical and electronics engineering, mechanical engineering, chemical engineering, chemistry and physics.

GI Bill® benefits

This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at <https://www.benefits.va.gov/gibill/> (<https://www.benefits.va.gov/gibill/>).

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Engineering (Automotive Systems), BSE
- Engineering (Electrical Systems), BSE
- Engineering (Mechanical Engineering Systems), BSE
- Engineering (Robotics), BSE

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a portfolio, or 30 credit hours and a thesis, or 30 credit hours including the required applied project course (EGR 593).

Required Core (9 credit hours)

EGR 520 Engineering Analysis I (3)

EGR 522 Statistics for Quality Control in Manufacturing (3)

EGR 530 Principles of Systems Engineering (3)

Electives (15--21 credit hours)

Culminating Experience (0--6 credit hours)

EGR 593 Applied Project (3)

EGR 599 Thesis (6)

portfolio (0)

Additional Curriculum Information

Students can complete six credit hours of a thesis, three credit hours of an applied project or a portfolio. The portfolio option is a collection of accomplishments and reflective learning over time. The portfolio is a place to record, explore and reflect on the academic-professional journey, and it can serve many different audiences.

Elective coursework credit hours will vary depending on the student's culminating experience. Students should contact the department for an approved list of elective coursework.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in clean energy systems, engineering or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admissions application and application fee
- official transcripts
- professional resume
- two letters of recommendation
- written statement
- proof of English proficiency

Additional Application Information:

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

In the written statement, the applicant must include an introduction, share goals and explain why they decided to pursue graduate education.

Letters of recommendation should come from professors, managers, supervisors or professional associates.

Career Opportunities: Graduates are prepared for opportunities in the diverse industries of alternative and renewable energy systems, power electronics and automotive technologies. They can work in large corporations and small businesses, research at government agencies such as Oak Ridge National Laboratory or the National Renewable Energy Laboratory, or go on to graduate school to pursue advanced degrees.

Graduates are prepared to go into the fields of:

- battery and fuel cell system design and integration
- electric and autonomous vehicle design
- renewable systems engineering --- design, integration
- renewable systems or technologies engineering --- validation, operation and maintenance, evaluation, quality, testing
- solar microinverter manufacturing engineering

With the emphasis on design and project-based learning of various clean energy systems, the program supports an entrepreneurial spirit, and some graduates start companies of their own.

Computer Engineering (Computer Systems), MS (ESCENCMS)

Online Degree Search Title: Computer Engineering (Computer Systems), MS

Campus: Tempe

Program Description: The MS in computer engineering is a transdisciplinary program that builds on the fundamentals of computer science,
2024-25 Academic Catalog Archive

electrical engineering, applied mathematics and physical sciences. Students can take courses and participate in projects across two schools and among the core areas.

The program is intended for students who want to gain knowledge deeper than that provided at the bachelor's degree level, and sufficient for designing and implementing state-of-the-art systems in industrial research and development positions. The program is also appropriate for students contemplating future doctoral study and those who wish to gain experience in research.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

Computer Systems Engineering, BSE

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a portfolio, or 30 credit hours and a thesis.

Required Core (6 credit hours)

CSE 551 Foundations of Algorithms (3)

EEE 554 Probability and Random Processes (3)

Electives (18-24 credit hours)

Culminating Experience (0-6 credit hours)

CEN 599 Thesis (6) or

portfolio (0)

Additional Curriculum Information

This program has a thesis and a nonthesis option for the culminating experience. Students in the nonthesis option take 24 credit hours of electives, and students in the thesis option take only 18 credit hours to reach the 30 credit hour requirement. Electives are selected in consultation with the academic unit.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's degree or equivalent or a master's degree from a regionally accredited college or university of recognized standing in a related field such as computer engineering, computer science, computer systems engineering or electrical engineering.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency via a TOEFL score regardless of their current residency. Students should visit the Admission Services website (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) for more information.

Letters of recommendation are optional.

The personal statement should indicate professional goals and reasons for desiring to enroll in the program.

Depending on an applicant's prior academic preparation and accomplishments, it is recommended that students consider taking the following

courses to ensure adequate background preparation:

CSE 230 Computer Organization and Assembly Language Programming
CSE 310 Data Structures and Algorithms
EEE 203 Signals and Systems I
EEE 335 Analog and Digital Circuits
MAT 243 Discrete Mathematical Structures

A reading list of the topics covered in the placement exam is provided in advance of the exam.

Students should see the program website for application deadlines.

Career Opportunities: Graduates of the Master of Science program in computer engineering are able to analyze and synthesize key theories and methods used in the field of computer engineering. These graduates can apply new theories, methods and designs that can advance the field of computer engineering. More specifically, computer engineering program graduates have the skills to advance the design, system integration, testing, evaluation and deployment of state-of-the-art hardware and software for systems that include computing, communications and networking (wired and wireless), control functions, sensing, signal processing and actuation.

These skills can be applied in high-demand growth areas such as autonomous systems and robotics; distributed, dependable and secure systems; and embedded systems for media processing and communications.

Master's degree program graduates may work under the direction of scientists and engineers who hold doctorates in high-tech lab settings, assisting in developing innovative products and systems that require strong foundational knowledge in the underlying sciences and the ability to synthesize and analyze engineering principles as they relate to the development of new computer engineering technology.

Career examples include:

- computer hardware engineer
- computer systems engineer
- systems software engineer

Computer Engineering (Computer Systems), PHD (ESCENCPHD)

Online Degree Search Title: Computer Engineering (Computer Systems), PhD

Campus: Tempe

Program Description: The PhD program in computer engineering is a transdisciplinary program that builds on the fundamentals of computer science, electrical engineering, applied mathematics and physical sciences. Students can take courses and participate in projects across two schools and among the core areas.

The program in computer engineering with a concentration in computer systems is intended for students with excellent ability in mathematics and physical science who are interested in gaining an in-depth knowledge of the foundational principles of engineering and wish to pursue a career in academia, research or highly technical entrepreneurial innovation.

This doctoral program provides broader and more in-depth preparation than the MS programs, in anticipation of a demonstrated ability to independently pursue more creative and substantive innovation with higher impact.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.
Required Core (6 credit hours)
CSE 551 Foundations of Algorithms (3)
EEE 554 Probability and Random Processes (3)

Concentration (9 credit hours)

Focus Area Electives (3 credit hours)

Technical Electives (30 credit hours)

Research (24 credit hours)

CEN 792 Research (24)

Culminating Experience (12 credit hours)

CEN 799 Dissertation (12)

Additional Curriculum Information

Concentration, focus area and technical elective courses are selected in consultation with the academic unit.

The concentration and focus area course lists are located on the computer engineering website, and students need to meet the following requirements: at least nine credit hours of graduate-level coursework in computer engineering (CEN) or computer science (CSE), and at least three credit hours of graduate-level coursework in electrical engineering (EEE) or computer engineering.

This program requires a qualifying exam. Students should see the academic unit for information on timeline and satisfactory progress standards.

Students may apply up to 30 credit hours from a previously awarded master's degree toward their doctoral interactive plan of study with approval of the program and supervisory committee and the dean of the Graduate College.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's degree (or equivalent) or a graduate degree from a regionally accredited institution of recognized standing in a related field such as computer engineering, computer science, computer systems engineering or electrical engineering.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- personal statement
- three letters of recommendation
- official transcripts
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. The TOEFL is required for an applicant whose native language is not English. Further details are available on the admission services website (<https://admission.asu.edu/apply/international/graduate/english-proficiency>).

The personal statement should explain the applicant's professional goals and reasons for desiring to enroll in the doctoral program, describe any research experiences and indicate personal research interests.

Depending on prior academic preparation and accomplishments, it is recommended that the student consider taking the following courses to ensure adequate background preparation:

CSE 230 Computer Organization and Assembly Language Programming

CSE 310 Data Structures and Algorithms

EEE 203 Signals and Systems I

EEE 335 Analog and Digital Circuits

MAT 243 Discrete Mathematical Structures

Career Opportunities: Graduates from the doctoral program in computer engineering are able to analyze and synthesize key theories and methods used in the field of computer engineering. These graduates can generate and evaluate new theories, methods and designs that can advance the field of computer engineering. More specifically, computer engineering program graduates have the skills to advance the design, system integration, testing, evaluation and deployment of the state-of-the-art hardware and software for systems that include computing, communications and networking (wired and wireless), control functions, sensing, signal processing and actuation.

These skills can be applied in high-demand growth areas, such as autonomous systems and robotics; distributed, dependable and secure systems; and embedded systems for media processing and communications. Career examples include:

- computer engineering professor
- computer engineering researcher
- computer hardware engineer
- computer systems engineer
- systems software engineer

Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a portfolio, or 30 credit hours and a thesis.

Required Core (6 credit hours)

CSE 551 Foundations of Algorithms (3)

EEE 554 Probability and Random Processes (3)

Electives (18--24 credit hours)

Culminating Experience (0--6 credit hours)

CEN 599 Thesis (6) or

Portfolio (0)

Additional Curriculum Information

This program has a thesis and a nonthesis option for the culminating experience. Students in the nonthesis option take 24 credit hours of electives, and students in the thesis option take only 18 credit hours to reach the 30 credit hour requirement. Electives are selected in consultation with the academic unit.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.
2024-25 Academic Catalog Archive

Applicants are eligible to apply to the program if they have earned a bachelor's degree (or equivalent) or a master's degree from a regionally accredited college or university of recognized standing in a related field such as computer engineering, computer science, computer systems engineering or electrical engineering.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- three letters of recommendation (optional)
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency via a TOEFL score regardless of their current residency. More information can be found on the admission services English proficiency website (<https://admission.asu.edu/apply/international/graduate/english-proficiency>).

The personal statement should indicate professional goals and reasons for applying to the program.

Career Opportunities: Graduates from the Master of Science program in computer engineering are able to apply new theories, methods and designs that can advance the field of computer engineering. More specifically, program graduates have the skills to advance the design, system integration, testing, evaluation and deployment of state-of-the-art hardware and software for systems that include computing, communications and networking (wired and wireless), control functions, sensing, signal processing and actuation.

These skills can be applied in high-demand growth areas, such as autonomous systems and robotics; distributed, dependable and secure systems; as well as in embedded systems for media processing and communications.

Career examples include:

- computer engineering professor
- computer engineering researcher
- computer hardware engineer
- computer systems engineer
- systems software engineer

Graduates may work under the direction of scientists and engineers who hold doctorates in high-tech lab settings, assisting in developing innovative products and systems that require strong foundational knowledge in the underlying sciences and the ability to synthesize and analyze engineering principles as they relate to the development of new computer engineering technology.

Computer Engineering (Electrical Engineering), PHD (ESCENEPHD)

Online Degree Search Title: Computer Engineering (Electrical Engineering), PhD

Campus: Tempe

Program Description: The PhD program in computer engineering is a transdisciplinary program that builds on the fundamentals of electrical engineering, computer science, applied mathematics and physical sciences. Students can take courses and participate in projects across two schools and among the core areas.

The program in computer engineering with a concentration in electrical engineering is intended for students with excellent ability in mathematics and physical science who are interested in gaining an in-depth knowledge of the foundational principles of engineering and wish to pursue a career in academia, research or highly technical entrepreneurial innovation.

This doctoral program provides broader and more in-depth preparation than the MS programs in anticipation of a demonstrated ability to independently pursue more creative and substantive innovation with higher impact.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Core (6 credit hours)

CSE 551 Foundations of Algorithms (3)

EEE 554 Probability and Random Processes (3)

Concentration (9 credit hours)

Focus Area Electives (3 credit hours)

Technical Electives (30 credit hours)

Research (24 credit hours)

CEN 792 Research (24)

Culminating Experience (12 credit hours)

CEN 799 Dissertation (12)

Additional Curriculum Information

Concentration, focus area and technical elective courses are selected in consultation with the academic unit.

The concentration and focus area course lists are located on the computer engineering website and need to meet the following requirements: at least nine credit hours of graduate-level coursework in electrical engineering (EEE XXX) or computer engineering (CEN XXX); and at least three credit hours of graduate-level coursework in computer engineering or computer science (CSE XXX).

This program requires a qualifying exam. Students should see the academic unit for information on timeline and satisfactory progress standards.

Students may apply up to 30 credit hours from a previously awarded master's degree toward their doctoral Interactive Plan of Study with approval of the program and supervisory committee and the dean of the Graduate College.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's degree (or equivalent) or a graduate degree from a regionally accredited institution of recognized standing in a related field such as computer engineering, computer science, computer systems engineering or electrical engineering.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum GPA of 3.50 (scale is 4.00 = "A") in the MS or MSE coursework for acceptance into the doctoral program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Career Opportunities: Graduates from the doctoral program in computer engineering are able to analyze and synthesize key theories and methods used in the field of computer engineering. They can generate and evaluate new theories, methods and designs that can advance the field of computer engineering. More specifically, program graduates have the knowledge and skills they need to fundamentally advance and develop new paradigms for the design, system integration, testing, evaluation and deployment of the state-of-the-art hardware and software for systems that include computing, communications and networking (wired and wireless), control functions, sensing, signal processing and actuation.

These skills can be applied in high-demand growth areas, such as autonomous systems and robotics; distributed, dependable and secure systems; as well as in embedded systems for media processing and communications. Career examples include:

- computer engineering professor

- computer engineering researcher
- computer hardware engineer
- computer systems engineer
- systems software engineer

Computer Science, MCS (ESCOMSCMCS)

Online Degree Search Title: Computer Science, MCS

Campus: Online

Program Description: The MCS program affords students employed in industry the opportunity to seek a breadth of advanced education in computer science.

The program reflects the dual nature of computer science as a scientific and engineering discipline by allowing emphasis on theory as well as practical applications. Students can study topics such as:

- artificial intelligence
- big data and data mining
- cloud and distributed computing
- computer system security, cybersecurity and cryptography
- cyber-physical system and IoT
- imaging, graphics and visualization
- machine learning
- operating systems
- theory and algorithms
- simulation modeling and systems

Students build a project portfolio through the program to demonstrate the knowledge gained.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Computer Science, BS
- Computer Science (Cybersecurity), BS
- Computer Science (Software Engineering), BS
- Computer Systems Engineering, BSE
- Computer Systems Engineering (Cybersecurity), BSE
- Software Engineering, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a portfolio.

Required Core Areas (9 credit hours)

applications (3)

foundations (3)

systems (3)

Electives (21 credit hours)

Culminating Experience (0 credit hours)

portfolio (0)

Additional Curriculum Information

Students should see the academic unit for the list of courses approved for each core area in applications, foundations and systems.

Students choose 21 credit hours of elective coursework approved by their academic advisor. Coursework selected as part of the area core may not be used as elective coursework on the same plan of study.

At least 24 of these hours must be CSE 500-level credits at ASU. Up to six credit hours of 400-level courses may be applied to the plan of study. All 30 credit hours must be from formal coursework. CSE 590 is not allowed as part of the MCS program plan of study.

All MCS program students must complete a project portfolio from two courses in which the student received a "B" (3.00) grade or higher.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computer science, computer engineering or a closely related area from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or they must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of purpose or a curriculum vitae
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Students can find more information on the Admission Services (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) website.

Students assigned any deficiency coursework upon admission must complete those classes with a grade of "C" (scale is 4.00= "A") or higher within two semesters of admission to the program. Deficiency courses include:

CSE 230 Computer Organization and Assembly Language Programming
CSE 310 Data Structures and Algorithms
CSE 330 Operating Systems
CSE 340 Principles of Programming Languages or CSE 355 Introduction to Theoretical Computer Science

The applicant's undergraduate GPA and depth of preparation in computer science and engineering are the primary factors affecting admission.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/computer-science-mcs/>) for program descriptions and to request more information.

Career Opportunities: Graduates are able to analyze key theories, algorithms and software modules used in the field of computer science.

Career examples include:

- computer network architect
- computer system analyst
- computer systems engineer
- data scientist or engineer
- machine learning, AI or computer vision engineer
- software engineer
- software developer

Online Degree Search Title: Computer Science, MS

Campus: Tempe

Program Description: The MS program in computer science prepares students to undertake fundamental and applied research in computing.

The program welcomes motivated and dedicated students to work with world-class faculty on projects across the field of computing and augmented intelligence. Students may choose a thesis or nonthesis option as their culminating event. Students can study topics such as:

- artificial intelligence, machine learning and statistical modeling
- big data and data mining
- computational biology
- computer design and architecture, including nonvolatile memory computing
- computer system security, cybersecurity and cryptography
- cyber-physical systems, IoT and robotics
- distributed computing and consensus protocols
- networking and computer systems
- novel computing paradigms (e.g., biocomputing, quantum computation)
- social computing
- theory, algorithms and optimization
- visualization and graphics

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Computer Science, BS
- Computer Science (Cybersecurity), BS
- Computer Science (Software Engineering), BS
- Computer Systems Engineering, BSE
- Computer Systems Engineering (Cybersecurity), BSE
- Software Engineering, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a portfolio, or 30 credit hours and a thesis, or 30 credit hours and the required applied project course (CSE 593).

Required Core Areas (9 credit hours)

applications (3)

foundations (3)

systems (3)

Electives (15 or 18 or 21 credit hours)

Culminating Experience (0 or 3 or 6 credit hours)

CSE 593 Applied Project (3) or

CSE 599 Thesis (6) or

portfolio (0)

Additional Curriculum Information

Students should see the academic unit for the list of courses approved for each core area in applications, foundations and systems. Courses selected as part of the core may not be used as other elective coursework on the same plan of study.

Students complete a thesis, applied project or portfolio for the culminating experience. Students in the thesis option take 15 credit hours of electives, students in the applied project take 18 credit hours of electives and students in the portfolio option take 21 credit hours of electives. MS program students who select project portfolio as their culminating event must complete a project portfolio from two courses in which the student received a "B" grade (3.00 on a 4.00 scale) or higher. Students should see the academic unit for additional information and requirements.

For thesis students, nine of the 15 credit hours of electives must be courses in a chosen research area and approved by the student's academic advisor. Up to six credit hours can be independent study in CSE 590 Reading and Conference.

Students complete a minimum of 30 credit hours for the program. At least 24 of these credit hours must be 500-level CSE courses at ASU. Up to six credit hours of 400-level courses may be applied to the plan of study.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computer science, computer engineering or a closely related area from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- GRE scores
- a statement of purpose
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

If the student has graduated with an undergraduate degree in computer science or computer systems engineering from ASU, GRE scores are not required. ASU does not accept the GRE® General Test at home edition.

Students assigned any deficiency coursework upon admission must complete those classes with a grade of "C" (scale is 4.00 = "A") or higher within two semesters of admission to the program. Deficiency courses include:

CSE 230 Computer Organization and Assembly Language Programming
CSE 310 Data Structures and Algorithms
CSE 330 Operating Systems
CSE 340 Principles of Programming Languages or CSE 355 Introduction to Theoretical Computer Science

The applicant's undergraduate GPA and depth of preparation in computer science and engineering are the primary factors affecting admission.

Career Opportunities: Students who complete the Master of Science program in computer science are able to analyze key theories, algorithms and software modules used in the field of computer science. The program prepares them to pursue careers in research and education, including academia, government and industry.

Career examples include:

- computer network architect
- computer system analyst
- computer systems engineer
- data scientist or engineer
- machine learning, AI or computer vision engineer
- software developer
- software engineer

Computer Science, PHD (ESCOMSCPHD)

Online Degree Search Title: Computer Science, PhD

Campus: Tempe

Program Description: The PhD program in computer science prepares students to undertake fundamental and applied research in computer science. The program is available for those of high ability who seek to develop and implement their own research studies.

Students pursuing the doctorate in computer science learn to analyze, understand and apply key theories and algorithms used in the field and to generate and evaluate new theories, algorithms and software modules that can advance the field of computer science.

The program provides students with research opportunities in a wide variety of areas, including:

- artificial intelligence, machine learning and statistical modeling
- big data and data mining
- computational biology
- computer design and architecture, including nonvolatile memory computing
- computer system security, cybersecurity and cryptography
- cyber-physical systems and Internet of Things (commonly abbreviated as IoT), and robotics
- distributed computing and consensus protocols
- networking and computer systems
- novel computing paradigms (e.g., biocomputing, quantum computation)
- social computing
- theory, algorithms and optimization
- visualization and graphics

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Core Areas (9 credit hours)

applications (3)

foundations (3)

systems (3)

Depth (3 credit hours)

three additional credit hours in one core area (3)

Research (18 credit hours)

CSE 792 Research (18)

Electives and Additional Research (42 credit hours)

Culminating Experience (12 credit hours)

CSE 799 Dissertation (12)

Additional Curriculum Information

Courses that are used to satisfy the core area requirement cannot be used to satisfy electives or other requirements. A grade of "B" or better is required for core courses.

Eighteen credit hours of CSE 792 Research are required, and up to 54 credit hours are allowed on the plan of study. Students with research credit hours in excess of 18 add these credit hours to their electives and additional research.

Electives include:

- additional CSE 792 Research credit hours (up to 36 credit hours allowed beyond the required 18)
- computer science courses, of which up to 18 credit hours of CSE 590 and CSE 790: Reading and Conference are allowed
- up to six credit hours of interdisciplinary electives in other academic units that are subject to program chair approval

When approved by the academic unit and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this degree.

A maximum of three credit hours of 400-level coursework may be applied to the plan of study.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computer science, computer engineering or a closely related area. Most applicants should have earned a master's degree, but exceptional undergraduate applicants may be admitted directly into the doctoral program.

Applicants must have a minimum cumulative GPA of 3.50 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or they must have a minimum cumulative GPA of 3.50 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts from every university attended
- three letters of recommendation
- a statement of purpose
- curriculum vitae or resume
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Submission of GRE scores is optional.

Students assigned any deficiency coursework upon admission must complete those classes with a grade of "C" or higher (scale is 4.00 = "A") within two semesters of admission to the program. Deficiency courses commonly taken include:

CSE 230 Computer Organization and Assembly Language Programming

CSE 310 Data Structures and Algorithms

CSE 330 Operating Systems

CSE 340 Principles of Programming Languages or CSE 355 Introduction to Theoretical Computer Science

The applicant's undergraduate GPA and depth of preparation in computer science and engineering are the primary factors affecting admission.

Career Opportunities: Graduates are prepared to pursue careers in research and education, including academia, government and industry.

Career examples include:

- computer science professor or researcher
- data scientist or engineer
- machine learning, AI or computer vision scientist or engineer

Computer Science (Big Data Systems), MCS (ESCSEBDMCS)

Online Degree Search Title: Computer Science (Big Data Systems), MCS

Campus: Online

Program Description: This concentration within the MCS degree program is designed for graduate students who want to pursue a thorough education in the area of big data systems.

Students acquire the knowledge, skills and expertise needed to design scalable systems (parallel, distributed and real time) that acquire, store, process and access large-scale heterogeneous multisource data, and they learn to use analytical tools to mine information from the data.

Graduates are able to choose and deploy the appropriate data management processing and analysis systems with a suitable structured or unstructured data model that a particular task and domain application needs.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Computer Science, BS
Computer Science (Cybersecurity), BS
Computer Science (Software Engineering), BS
Computer Systems Engineering, BSE
Computer Systems Engineering (Cybersecurity), BSE
Software Engineering, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a portfolio.

Required Core Areas (9 credit hours)

applications (3)

foundations (3)

systems (3)

Concentration (9 credit hours)

CSE 511 Data Processing at Scale (3)

CSE 575 Statistical Machine Learning (3)

CSE 578 Data Visualization (3)

Restricted Electives (6 credit hours)

Electives (6 credit hours)

Culminating Experience (0 credit hours)

portfolio (0)

Additional Curriculum Information

Students should see the academic unit for the list of courses approved for electives and each core area in applications, foundations and systems.

Coursework selected as part of the area core may not be used as elective coursework on the same plan of study. Students should check with their academic advisor to ensure that the total number of credit hours of their plan of study is equal to 30. The concentration coursework cannot be used as part of the area core on the same plan of study. Students must complete concentration course requirements as listed and complete different coursework for each of the core areas in applications, foundations and systems.

At least 24 of these hours must be CSE 5XX credits at ASU. A maximum of four CSE 598 courses may be allowed as elective coursework. Up to six credit hours of 400-level courses may be applied to the plan of study. All 30 credit hours must be from formal coursework. CSE 590 is not allowed as part of the MCS program plan of study.

All Master of Computer Science program students must complete a project portfolio based on two courses in which the student received a grade of "B" (scale is 4.00 = "A") or higher.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computer science, computer engineering or a closely related area from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or they must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of purpose or curriculum vitae
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Students assigned any deficiency coursework upon admission must complete those classes with a grade of "C" (scale is 4.00 = "A") or higher within

two semesters of admission to the program. Deficiency courses include:

CSE 230 Computer Organization and Assembly Language Programming
CSE 310 Data Structures and Algorithms
CSE 330 Operating Systems
CSE 340 Principles of Programming Languages or CSE 355 Introduction to Theoretical Computer Science

The applicant's undergraduate GPA and depth of preparation in computer science and engineering are the primary factors affecting admission.

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a portfolio, or 30 credit hours and a thesis, or 30 credit hours including the required applied project course (CSE 593).

Required Core Areas (9 credit hours)

Applications (3)

Foundations (3)

Systems (3)

Concentration (9 credit hours)

CSE 510 Database Management System Implementation (3)

CSE 512 Distributed Database Systems (3)

CSE 572 Data Mining (3) or IEE 520 Statistical Learning for Data Mining (3)

Restricted Electives (6 credit hours)

CSE 515 Multimedia and Web Databases (3)

CSE 546 Cloud Computing (3)

CSE 573 Semantic Web Mining (3)

CSE 575 Statistical Machine Learning (3)

CSE 578 Data Visualization (3)

Electives (0 or 3 or 6 credit hours)

Culminating Experience (0 or 3 or 6 credit hours)

CSE 593 Applied Project (3) or

CSE 599 Thesis (6) or

portfolio (0)

Additional Curriculum Information

Students should see the academic unit for the list of courses approved for each core area in applications, foundations and systems.

Courses that are used to satisfy the concentration requirement on the plan of study cannot be used to satisfy the core requirement. Additionally, courses selected as part of the core or concentration may not be used as other elective coursework on the same plan of study.

Students complete a thesis or portfolio for the culminating experience. Regardless of the culminating experience chosen, all students in the program must complete six credit hours from the restricted electives list. Students in the portfolio culminating experience option must also take six credit hours of electives. Students in the applied project experience must also take three credit hours of electives.

Portfolio: The project portfolio is developed from two courses in which the student received a "B" grade (3.00) or higher and should have significant content in big data systems. Students should see the academic unit for additional information and requirements. Students who select the applied project as their culminating experience must complete their project at the direction of an approved computer science graduate faculty member and complete the project course with a "B" grade (3.00) or higher.

Students complete a minimum of 30 credit hours for the program. At least 24 of these credit hours must be 500-level CSE courses at ASU. Up to six credit hours of 400-level courses may be applied to the plan of study for the nonthesis track.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- official GRE test scores
- statement of purpose
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. Official TOEFL scores should be submitted from tests that must have been taken within the last two years (only required for those who did not graduate with a baccalaureate degree from an accredited U.S. institution). The TOEFL score must be valid on the first day of class for the term the student is applying for. The department requires a TOEFL iBT score above 90 or a minimum overall IELTS band score of 7.0.

International students must have taken the official GRE General Test within the previous five years and submit those test scores. ASU does not accept the GRE® General Test at home edition.

All international records must be submitted in the original language, accompanied by an official English translation. If the student has attended a U.S. institution, one set of official transcripts from every college and university attended, except ASU, is required.

Students assigned any deficiency coursework upon admission must complete those classes with a grade of "C" or higher (scale is 4.00 = "A") within two semesters of admission to the program. Deficiency courses commonly taken include:

CSE 230 Computer Organization and Assembly Language Programming
CSE 310 Data Structures and Algorithms
CSE 330 Operating Systems
CSE 340 Principles of Programming Languages or CSE 355 Introduction to Theoretical Computer Science

Career Opportunities: Graduates are able to analyze and apply key theories, algorithms and software modules used in the field of computer science.

Career examples include:

- computer network architect
- computer system analyst
- computer systems engineer
- data scientist or engineer
- machine learning, AI computer vision engineer
- software developer
- software engineer

Computer Science (Biomedical Informatics), MS (ESCSBIOIMS)

Online Degree Search Title: Computer Science (Biomedical Informatics), MS

Campus: Tempe

Program Description: The MS program in computer science with a concentration in biomedical informatics is designed for graduate students who wish to perform research in such topics as genomics and computational systems biology.

The concentration is transdisciplinary in nature, providing preparation that integrates technological expertise in the information sciences, computer science, biosciences and statistics with an understanding of the clinical environment of the health care professional. The curriculum exposes computer science students to current issues in clinical practice as well as the use of information systems in health care settings.

Biomedical informatics has a key role to play in the transition to more effective and efficient health care through the use of knowledge and computer science principles.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Computer Science, BS
Computer Science (Cybersecurity), BS
Computer Science (Software Engineering), BS
Computer Systems Engineering, BSE
Computer Systems Engineering (Cybersecurity), BSE
Software Engineering, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a thesis, or 30 credit hours including the required applied project course (CSE 593).

Required Core Areas (9 credit hours)

applications (3)

foundations (3)

systems (3)

Concentration (9 credit hours)

BMI 502 Foundations of Biomedical Informatics Methods I (3)

BMI 601 Fundamentals of Health Informatics (3)

Select one course from the following:

BMI 505 Foundations of Biomedical Informatics Methods II (3)

BMI/CSE 507 Image Processing and Analysis (3)

BMI 517 Advanced Biostatistics for Biomedical Research and Health Care (3)

BMI 550 Translational Bioinformatics (3)

BMI 598 Topic: Knowledge Management and Engineering (3)

BMI 615 Human Factors Engineering for Biomedical Applications (3)

BMI 616 Clinical Decision Support and Evidence-based Medicine (3)

Electives or Research (6 or 9 credit hours)

Culminating Experience (3 or 6 credit hours)

CSE 593 Applied Project (3)

CSE 599 Thesis (6)

Additional Curriculum Information

Students focus their research in one of the following areas: bioinformatics, biomedical informatics, clinical informatics, imaging informatics or public health informatics. Students complete nine credit hours of BMI concentration courses selected in consultation with the student's graduate advisor.

Students should see the academic unit for the list of courses approved for each core area in applications, foundations and systems. Courses that are used to satisfy the concentration requirement on the plan of study cannot be used to satisfy the core requirement. Additionally, courses selected as part of the core or concentration may not be used as other elective coursework on the same plan of study.

Students who select the applied project as their culminating experience must complete their project at the direction of an approved computer science faculty member and complete the project course with a "B" grade (scale is 4.00 = "A") or higher.

Students complete a minimum of 30 credit hours for the program. At least 21 of these credit hours must be 500-level CSE courses at ASU.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computer science, computer engineering or a closely related area.

Applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- GRE scores
- statement of purpose
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency via a TOEFL score regardless of their current residency.

The student must submit verbal, quantitative and analytical GRE scores (optional: subject test in computer science) unless the student has graduated with an undergraduate degree in computer science or computer systems engineering from ASU. ASU does not accept the GRE® General Test at home edition.

Students assigned any deficiency coursework upon admission must complete those classes with a grade of "C" or higher (scale is 4.00 = "A") within two semesters of admission to the program. Deficiency courses are:

CSE 230 Computer Organization and Assembly Language Programming
CSE 310 Data Structures and Algorithms
CSE 330 Operating Systems
CSE 340 Principles of Programming Languages or CSE 355 Introduction to Theoretical Computer Science

The applicant's undergraduate GPA and depth of preparation in computer science and engineering are the primary factors affecting admission.

Career Opportunities: Graduates of the Master of Science program in computer science with a concentration in biomedical informatics are able to analyze and apply key theories, algorithms and software modules used in the field of computer science.

Career examples include:

- biomedical researcher
- computer network architect
- computer systems analyst
- computer systems engineer
- data scientist or engineer
- machine learning, AI computer vision engineer
- software developer
- software engineer

Computer Science (Cybersecurity), MCS (ESCSEIMCS)

Online Degree Search Title: Computer Science (Cybersecurity), MCS

Campus: Online

Program Description: The MCS with a concentration in cybersecurity is an advanced degree program designed for graduate students who want to pursue a thorough education in the area of cybersecurity and information assurance; students with an undergraduate education in computing and related disciplines; and students employed in industry who can best profit from further breadth and background in computer science and information assurance.

This concentration program provides students with the knowledge and skills in science and engineering pertaining to cybersecurity, including computer and network security, software security, data and information security, applied cryptography and computer forensics.

According to the National Security Agency, information assurance is defined as the set of measures intended to protect and defend information and information systems by ensuring their availability, integrity, authentication, confidentiality and nonrepudiation. This includes providing restoration of information systems by incorporating protection, detection and reaction capabilities.

Cybersecurity courseware at ASU has been certified by the Information Assurance Courseware Evaluation Program to satisfy the standards for Information Systems Security Professionals (NSTISSI 4011) and Senior Systems Managers (CNSSI 4012).

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Computer Science (Cybersecurity), BS
Computer Science (Software Engineering), BS
Computer Systems Engineering, BSE
Computer Systems Engineering (Cybersecurity), BSE
Software Engineering, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a portfolio.

Required Core Areas (9 credit hours)

applications (3)

foundations (3)

systems (3)

Concentration (9 credit hours)

CSE 543 Information Assurance and Security (3)

Choose two:

CSE 539 Applied Cryptography (3)

CSE 545 Software Security (3)

CSE 548 Advanced Computer Network Security (3)

Electives (12 credit hours)

Culminating Experience (0 credit hours)

portfolio (0)

Additional Curriculum Information

Students should see the academic unit for the list of courses approved for each core area in applications, foundations and systems.

Coursework selected as part of the area core may not be used as elective coursework on the same plan of study. Students should check with their academic advisor to ensure that the total credit hours of their plan of study are equal to 30.

The concentration coursework cannot be used as part of the area core on the same plan of study. Students must complete concentration course requirements as listed and complete different coursework for each of the core areas in applications, foundation and systems.

The interactive plan of study must contain a minimum of 30 credit hours of approved graduate-level work. At least 24 of these hours must be CSE 500-level credits at ASU. Up to six credit hours of 400-level courses may be applied to the plan of study. All 30 credit hours must be from formal coursework (including CSE 591). CSE 590 is not allowed as part of the MCS program plan of study.

All Master of Computer Science students must complete a project portfolio from two courses in which the student received a "B" grade (3.00) or higher.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computer science, computer engineering or a closely related area from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of purpose or curriculum vitae
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Students assigned any deficiency coursework upon admission must complete those classes with a grade of "C" or higher (scale is 4.00 = "A") within

two semesters of admission to the program. Deficiency courses commonly taken include:

- CSE 230 Computer Organization and Assembly Language Programming
- CSE 310 Data Structures and Algorithms
- CSE 330 Operating Systems
- CSE 340 Principles of Programming Languages or CSE 355 Introduction to Theoretical Computer Science

The applicant's undergraduate GPA and depth of preparation in computer science and engineering are the primary factors affecting admission.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/computer-science-cybersecurity-mcs/>) for program descriptions and to request more information.

Career Opportunities: Students completing the Master of Computer Science program are able to analyze key theories, algorithms and software modules used in the field of computer science. Graduates have a competitive advantage in securing employment.

Career examples include:

- computer network architect
- computer system security analyst
- computer systems engineer
- data scientist or engineer
- machine learning, AI or computer vision engineer
- software developer
- software engineer

Computer Science (Cybersecurity), MS (ESCSEIAMS)

Online Degree Search Title: Computer Science (Cybersecurity), MS

Campus: Tempe

Program Description: The MS program in computer science with a concentration in cybersecurity is designed for graduate students who want to pursue a thorough education in the area of cybersecurity and information assurance. This program offers a thesis and nonthesis project portfolio option.

This concentration program provides students with the knowledge and skills needed in science and engineering for cybersecurity. This includes computer and network security, software security, data and information security, applied cryptography and computer forensics.

According to the National Security Agency, information assurance is defined as the set of measures intended to protect and defend information and information systems by ensuring their availability, integrity, authentication, confidentiality and nonrepudiation. This includes providing restoration of information systems by incorporating protection, detection and reaction capabilities.

Domestic students enrolled in the cybersecurity concentration are eligible for federal fellowships such as the Department of Defense Information Assurance Scholarship Program and the Federal Cyber Service Scholarship for Service Program. For more information, students can visit the Cybersecurity and Trusted Foundations (<https://ctf.asu.edu/>) website.

Cybersecurity courseware at ASU has been certified by the Information Assurance Courseware Evaluation Program to satisfy the standards for Information Systems Security Professionals (NSTISSI 4011) and Senior Systems Managers (CNSSI 4012).

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus

master's degree with::

- Computer Science, BS
- Computer Science (Cybersecurity), BS
- Computer Science (Software Engineering), BS
- Computer Systems Engineering, BSE
- Computer Systems Engineering (Cybersecurity), BSE
- Software Engineering, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a portfolio, or 30 credit hours and a thesis, or 30 credit hours and the required applied project course (CSE 593).

Required Core Areas (9 credit hours)

applications (3)

foundations (3)

systems (3)

Concentration (9 credit hours)

CSE 543 Information Assurance and Security (3)

Choose two:

CSE 539 Applied Cryptography (3)

CSE 545 Software Security (3)

CSE 548 Advanced Computer Network Security (3)

Electives or Research (6 or 9 or 12 credit hours)

Culminating Experience (0 or 3 or 6 credit hours)

CSE 593 Applied Project or

CSE 599 Thesis (6) or

portfolio (0)

Additional Curriculum Information

Students should see the academic unit for the list of courses approved for each core area in applications, foundations and systems.

Courses that are used to satisfy the concentration requirement on the plan of study cannot be used to satisfy the core requirement. Additionally, courses selected as part of the core or concentration may not be used as other elective coursework on the same plan of study.

Students complete a thesis, applied project or portfolio for the culminating experience. Regardless of the culminating experience chosen, all students in the program must complete six credit hours from the restricted electives list. Students completing a portfolio take 12 credit hours of electives and must follow the academic unit's requirements for portfolio projects. Students in the applied project experience must also take nine credit hours of electives. Research credit hours may be included on the plan of study if the student is completing a thesis. Students should see the academic unit for more information.

MS program students who select the project portfolio as their culminating experience event must complete a project portfolio from two courses in which the student received a "B" grade (3.0 on a 4.0 scale) or higher. Students who select the applied project as their culminating event must complete their project at the direction of an approved computer science faculty member and complete the project course with a "B" grade (3.0 on a 4.0 scale) or higher.

Students complete a minimum of 30 credit hours for the program. At least 24 of these credit hours must be 500-level CSE courses at ASU. Up to six credit hours of 400-level courses may be applied to the plan of study.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply for the program if they have earned a bachelor's or master's degree in computer science, computer engineering or a closely related area from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee

- official transcripts
- GRE scores
- a statement of purpose
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

GRE scores are not required if the student has earned an undergraduate degree in computer science or computer systems engineering from ASU. ASU does not accept the GRE® General Test at home edition.

Students assigned any deficiency coursework upon admission must complete those classes with a grade of "C" (scale is 4.00 = "A") or higher within two semesters of admission to the program. Deficiency courses commonly taken include:

- CSE 230 Computer Organization and Assembly Language Programming
- CSE 310 Data Structures and Algorithms
- CSE 330 Operating Systems
- CSE 340 Principles of Programming Languages or CSE 355 Introduction to Theoretical Computer Science

The applicant's undergraduate GPA and depth of preparation in computer science and engineering are the primary factors affecting admission.

Career Opportunities: Graduates who complete the Master of Science program in computer science are able to analyze and apply key theories, algorithms and software modules used in the field of computer science. They are also able to evaluate and advance existing theories, algorithms and software modules in the field of computer science. Graduates have a competitive advantage in securing employment.

Career examples include:

- computer network architect
- computer systems analyst
- computer systems security engineer
- data scientist or engineer
- machine learning, AI or computer vision engineer
- software developer
- software engineer

Computer Science (Cybersecurity), PHD (ESCSEIAPHD)

Online Degree Search Title: Computer Science (Cybersecurity), PhD

Campus: Tempe

Program Description: The PhD program in computer science with a concentration in cybersecurity is designed for graduate students who want to pursue a thorough education in the area of cybersecurity and information assurance.

The goal of this concentration is to provide students with the knowledge and skills in science and engineering for cybersecurity, including applied cryptography, computer and network security, computer forensics, data and information security and software security.

According to the National Security Agency, information assurance is defined as the set of measures intended to protect and defend information and information systems by ensuring their availability, integrity, authentication, confidentiality and nonrepudiation. This includes providing restoration of information systems by incorporating protection, detection and reaction capabilities.

Domestic students enrolled in the cybersecurity concentration are eligible for federal fellowships, such as the Department of Defense Information Assurance Scholarship Program and the Federal Cyber Service Scholarship for Service Program. For more information, students can visit the Cybersecurity and Trusted Foundations (<https://ctf.asu.edu/>) website

ASU is certified as a National Center of Academic Excellence in Information Assurance Education and a National Center of Academic Excellence in Information Assurance - Research by the National Security Agency and the Department of Homeland Security. Information assurance courseware
2024-25 Academic Catalog Archive 796

at ASU has been certified by the Information Assurance Courseware Evaluation Program to satisfy the standards for Information Systems Security Professionals (NSTISSI 4011) and Senior Systems Managers (CNSSI 4012).

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, a prospectus and a dissertation.

Required Core Areas (9 credit hours)

applications (3)

foundations (3)

systems (3)

Concentration (9 credit hours)

CSE 543 Information Assurance and Security (3)

Choose two:

CSE 539 Applied Cryptography (3)

CSE 545 Software Security (3)

CSE 548 Advanced Computer Network Security (3)

Research (18 credit hours)

CSE 792 Research (18)

Electives and Additional Research (36 credit hours)

Culminating Experience (12 credit hours)

CSE 799 Dissertation (12)

Additional Curriculum Information

Courses that are used to satisfy the core area requirement cannot be used to satisfy electives or other requirements. A grade of "B" or better is required for core courses.

18 credit hours of CSE 792 Research are required, and up to 54 credit hours are allowed on the plan of study. Students with research credit hours in excess of 18 add these credit hours to their electives and additional research.

Electives include:

- additional CSE 792 Research credit hours (up to 36 credit hours allowed beyond the required 18)
- computer science courses of which up to 18 credit hours of CSE 590 and CSE 790: Reading and Conference is allowed
- up to six credit hours of interdisciplinary electives in other academic units that are subject to program chair approval

When approved by the academic unit and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this degree.

A maximum of three credit hours of 400-level coursework may be applied on the plan of study.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's degree in computer science, computer engineering or a closely related area. Most applicants should have earned a master's degree, but exceptional undergraduate applicants may be admitted directly into the doctoral program.

Applicants must have a minimum cumulative GPA of 3.50 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.50 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts from every university attended
- three letters of recommendation
- a statement of purpose
- curriculum vitae or resume
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

GRE scores are optional.

If the student is assigned any deficiency coursework upon admission, those classes must be completed with a grade of "C" (scale is 4.00 = "A") or higher within two semesters of admission to the program. Deficiency courses include:

CSE 230 Computer Organization and Assembly Language Programming
CSE 310 Data Structures and Algorithms
CSE 330 Operating Systems
CSE 340 Principles of Programming Languages or CSE 355 Introduction to Theoretical Computer Science

The applicant's undergraduate GPA and depth of preparation in computer science and engineering are the primary factors affecting admission.

Career Opportunities: Graduates with a doctorate in computer science are able to analyze, understand and apply key theories and algorithms used in the field of computer science. They are also able to generate and evaluate new theories, algorithms and software modules that can advance the field of computer science. Graduates have a competitive advantage when it comes to securing employment.

Career examples include:

- computer science researcher
- computer science security professor
- data scientist engineer
- machine learning, AI or computer vision engineer
- machine learning, AI or computer vision scientist

Computer Science (Media Arts and Sciences), MS (ESAMECSMS)

Online Degree Search Title: Computer Science (Media Arts and Sciences), MS

Campus: Tempe

This program's name has changed effective Fall 2024. The previous name was Computer Science (Art, Media and Engineering).

Program Description: The MS program in computer science with a concentration in media arts and sciences emphasizes research on the integration of the human physical experience with computation and digital media.

Media arts and sciences researchers produce experiential media systems and models that assist the disadvantaged, empower creativity, enhance scientific discovery, evolve human ability, facilitate learning and improve quality of life. Within these application areas, researchers explore experiential construction, interaction and feedback, knowledge creation, sensing, perception and modeling.

The purpose of the media arts and sciences concentration under the master's degree in computer science is to train hybrid engineering-arts graduates who get their inspiration from the arts and their methodology from computer science and engineering. Students specialize in transdisciplinary media development. More information about the media arts and sciences concentration can be found on the School of Arts, Media and Engineering (<https://artsmediaengineering.asu.edu/>) website.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Computer Science, BS
Computer Science (Cybersecurity), BS

Computer Science (Software Engineering), BS
Computer Systems Engineering, BSE
Computer Systems Engineering (Cybersecurity), BSE
Software Engineering, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a thesis, or 30 credit hours and the required applied project course (CSE 593).

Required Core Areas (9 credit hours)

applications (3)

foundations (3)

systems (3)

Concentration (9 credit hours)

AME 511 Advanced Interactive Sound (3)

AME 515 Machine Vision and Pattern Recognition (3)

AME 520 Movement and Computing (3)

AME 532 Creating Interactive Media (3)

AME 535 Mobile Development (3)

AME 570 Programming for Social and Interactive Media (3)

Electives or Research (6 or 9 credit hours)

Culminating Experience (3 or 6 credit hours)

AME 599 Thesis (2) and

CSE 599 Thesis (4) or

CSE 593 Applied Project (3)

Additional Curriculum Information

Students should see the academic unit for the list of courses approved for each core area in applications, foundations and systems.

Students complete nine credit hours of media arts and sciences concentration courses selected in consultation with the student's graduate advisor. Courses that are used to satisfy the concentration requirement on the plan of study cannot be used to satisfy the core requirement. Additionally, courses selected as part of the core or concentration may not be used as other elective coursework on the same plan of study.

Students complete a thesis or an applied project for their culminating experience. Students completing the thesis must earn six credit hours of electives, and students completing the applied project must earn nine credit hours of electives. Students who select the applied project must complete their project at the direction of an approved computer science faculty member and complete the project course with a "B" (3.00 on a 4.00 scale) or higher.

Students complete a minimum of 30 credit hours for the program. At least 19 of these credit hours must be 500-level CSE courses at ASU. Up to six credit hours of 400-level courses may be applied to the plan of study.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computer science, computer engineering or a closely related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- GRE scores
- statement of purpose
- curriculum vitae
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency
2024-25 Academic Catalog Archive

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

ASU does not accept the GRE® General Test at home edition. GRE scores are not required if the student has graduated with an undergraduate degree in computer science or computer systems engineering at ASU.

The statement of purpose must address the transdisciplinary nature of the media arts and sciences program. Applicants should explain in a concise and persuasive manner how their educational, professional and personal experiences inform their research and creative interests, writing on any aspect of their background that supports candidacy to the program. For further information on how this statement can be expanded upon by students interested in a research assistantship or an integrative graduate education and research traineeship within media arts and sciences, students should visit the School of Arts, Media and Engineering (<https://artsmediaengineering.asu.edu/>) website. Students should submit a curriculum vitae with the statement of purpose.

Students assigned any deficiency coursework upon admission must complete those classes with a grade of "C" (scale is 4.00 = "A") or higher within two semesters of admission to the program. Deficiency courses include:

CSE 230 Computer Organization and Assembly Language Programming
CSE 310 Data Structures and Algorithms
CSE 330 Operating Systems
CSE 340 Principles of Programming Languages or CSE 355 Introduction to Theoretical Computer Science

The applicant's undergraduate GPA and depth of preparation in computer science and engineering are the primary factors affecting admission.

Career Opportunities: This program can provide graduates with career opportunities in the following areas:

- artificial intelligence, machine learning and statistical modeling
- big data and data mining
- computational biology
- computer design and architecture, including non-volatile memory computing
- computer system security, cybersecurity and cryptography
- cyber-physical systems and IoT
- distributed computing and consensus protocols
- networking and computer systems
- novel computing paradigms (e.g., biocomputing, quantum computation)
- social computing
- theory and algorithms
- visualization and graphics

Computer Science (Media Arts and Sciences), PHD (ESAMECSPHD)

Online Degree Search Title: Computer Science (Media Arts and Sciences), PhD

Campus: Tempe

This program's name has changed effective Fall 2024. The previous name was Computer Science (Arts, Media and Engineering).

Program Description: The PhD program in computer science with a concentration in media arts and sciences emphasizes research on the integration of the human physical experience with computation and digital media. Media arts and sciences researchers produce experiential media systems and models that assist the disadvantaged, empower creativity, enhance scientific discovery, evolve human ability, facilitate learning and improve quality of life. Within these application areas, researchers explore experiential construction, interaction and feedback, knowledge creation, sensing, perception and modeling.

The program's purpose is to train hybrid engineering-arts students who get their inspiration from the arts and their methodology from computer science and engineering. Students specialize in transdisciplinary media development. More information about the media arts and sciences concentration can be found on the School of Arts, Media and Engineering (<https://artsmediaengineering.asu.edu/>) website.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Core Areas (9 credit hours)

applications (3)

foundations (3)

systems (3)

Depth (3 credit hours)

three additional credit hours in one core area (3)

Concentration (9 credit hours)

Select three courses from the following list:

AME 511 Advanced Interactive Sound (3)

AME 515 Machine Vision and Pattern Recognition (3)

AME 520 Movement and Computing (3)

AME 532 Creating Interactive Media (3)

AME 535 Mobile Development (3)

AME 570 Programming for Social and Interactive Media (3)

Research (18 credit hours)

AME 792 Research (6)

CSE 792 Research (12)

Electives (33 credit hours)

Culminating Experience (12 credit hours)

AME 799 Dissertation (6)

CSE 799 Dissertation (6)

Additional Curriculum Information

Courses that are used to satisfy the core area requirement cannot be used to satisfy electives or other requirements. A grade of "B" or better is required for core courses.

12 credit hours of CSE 792 Research and six credit hours of AME 792 are required, and up to 51 credit hours are allowed on the plan of study. Students with research credit hours in excess of 18 add these credit hours to their electives and additional research.

Electives include:

- additional CSE 792 Research credit hours (up to 33 credit hours allowed beyond the required 18)
- computer science courses, of which up to 18 credit hours of CSE 590 and CSE 790 Reading and Conference is allowed

When approved by the academic unit and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this degree.

A maximum of three credit hours of 400-level coursework may be applied to the plan of study.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's degree in computer science, computer engineering or a closely related area. Most applicants should have earned a master's degree, but exceptional undergraduate applicants may be admitted directly into the doctoral program.

Applicants must have a minimum cumulative GPA of 3.50 (scale is 4.00 = "A" in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.50 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts from every university attended
- three letters of recommendation
- a statement of purpose
- curriculum vitae or resume
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The statement of purpose must fulfill any requirements defined by the Graduate College and also address the transdisciplinary nature of the media arts and sciences program. Applicants should explain in a concise and persuasive manner how their educational, professional and personal experiences inform their research and creative interests, writing on any aspect of their background that supports candidacy to the program. Further information on how this statement can be expanded upon by students interested in a research assistantship or an Integrative Graduate Education and Research Traineeship within media arts and sciences is available from the department. Students should submit a current curriculum vitae with the statement of purpose.

GRE scores are optional.

Students assigned any deficiency coursework upon admission must complete those classes with a grade of "C" (scale is 4.00 = "A") or higher within two semesters of admission to the program. Deficiency courses commonly taken include:

CSE 230 Computer Organization and Assembly Language Programming
CSE 310 Data Structures and Algorithms
CSE 330 Operating Systems
CSE 340 Principles of Programming Languages or CSE 355 Introduction to Theoretical Computer Science

The applicant's undergraduate GPA and depth of preparation in computer science and engineering are the primary factors affecting admission.

Career Opportunities: Graduates who have received the doctorate in computer science with the media arts and sciences concentration are able to analyze, understand and apply key theories and algorithms used in the field of computer science. They are also able to generate and evaluate new theories, algorithms and software modules that can advance the field of computer science.

Career examples include:

- arts, media and engineering professor or researcher
- computer science professor or researcher
- data scientist or engineer
- machine learning, AI or computer vision engineer or scientist

Construction Engineering, MSE (ESCONEMSE)

Online Degree Search Title: Construction Engineering, MSE

Campus: Tempe

Program Description: The MSE in construction engineering is a transdisciplinary degree program that encompasses the areas of geotechnical engineering, structural engineering, transportation engineering, construction engineering and management-related topics.

This focus on a combination of design and management prepares the student for a career at the interface of design and construction. Students who are interested in a career emphasizing construction of infrastructure find this program especially desirable.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

- Civil Engineering, BSE
- Civil Engineering (Sustainable Engineering), BSE
- Construction Engineering, BSE

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a written comprehensive exam.

All candidates for the Master of Science in Engineering are required to complete approved graduate coursework.

Additional courses may be assigned by the graduate supervisory committee depending on the background of the candidate.

Details of the comprehensive written examinations for the different specialty areas can be obtained on the graduate studies section of the program's website.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in engineering or other closely related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

A student whose undergraduate degree is not in civil or construction engineering is required to take appropriate undergraduate courses as deficiency courses to establish a base of knowledge in the discipline. Deficiencies for admission to the graduate degree programs are specified at the time of admission and details can be obtained on the graduate studies section of the program's website.

Applicants with an undergraduate GPA lower than 3.00 (scale is 4.00 = "A") may be provisionally admitted at the discretion of the admission committee.

Career Opportunities: With a strong background in design and management, the construction engineering graduate is prepared to begin a career in the engineering and construction industry as a field engineer, project engineer or project designer working for:

- construction companies
- design firms
- facility owners
- materials suppliers
- specialty subcontractors

Construction Management, PHD (ESCONPHD)

Online Degree Search Title: Construction Management, PhD

Campus: Tempe

Program Description: The Del E. Webb School of Construction has one of the top construction management doctoral programs in the United States. It provides a rigorous education and teaching environment for students seeking an advanced degree.

The PhD program in construction management requires novel, independent research that broadly contributes to the construction management body of knowledge; transdisciplinary research is often required due to the nature of the topics studied. Students can focus their elective coursework in emphasis areas such as heavy construction, commercial and residential, and specialty construction.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

The doctoral program in construction typically requires three to four years of full-time study and research beyond the master's degree. Generally, students are admitted into the doctoral program at or near the completion of their master's degree.

The program requires 84 credit hours post-bachelor's degree or 54 credit hours post-master's degree.

The program consists of:

- core construction courses
- elective courses
- a qualifying examination
- a written and oral comprehensive examination
- admission to candidacy
- successful defense of a dissertation prospectus and complete dissertation

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Students who hold a master's degree in a related field from a regionally accredited university or equivalent are eligible to apply for admission to the program. Only exceptional students are admitted without a master's degree. Related fields include construction, civil engineering, architecture and business. At the discretion of the admission committee, students from other disciplines may be eligible as well. In addition, applicants are expected to be competent in construction topics.

Applicants must have a minimum cumulative GPA of 3.20 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- official GRE scores
- a current resume
- an evaluation of the student's academic and professional background
- master's degree thesis abstract
- personal statement
- research interests
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Applicants required to demonstrate English proficiency and seeking a teaching assistantship must demonstrate proficiency in spoken English; a score of 55 or better on the Speaking Proficiency English Assessment Kit or a score of 26 on the speaking portion of the TOEFL is required.

Applicants must take the GRE and have their official scores sent directly to Graduate Admission Services. ASU does not accept the GRE® General Test at home edition. More information regarding how to send official GRE scores can be found on the Graduate Admission Services website.

The personal statement should describe the applicant's career goals and research objectives.

Career Opportunities: Graduates of the Del E. Webb School of Construction's doctoral program have careers in architecture; engineering and construction industries; academia; and local, state and federal government. The program provides a foundation for those who wish to pursue careers as project managers, project engineers, estimators or schedulers and eventually become principals of firms engaged in the construction of industrial, commercial or residential projects.

The heavy construction emphasis area is preparation for careers related to public works such as highways, airports, bridges, utility systems, and water or waste treatment facilities.

The commercial and residential emphasis area is preparation for careers in real estate development, home production systems, commercial construction, health care and special industrial building projects, and for entrance into the sustainable or green construction market.

The specialty construction emphasis is preparation for organization, leadership and management of the building process at the subcontractor level and for careers as contractors working with mechanical and electrical systems. It also is preparation for careers in management at specialty contracting firms, such as control systems, electrical distribution or heating, ventilation and air conditioning systems for large and complex facilities such as data centers, health care organizations and semiconductor manufacturing plants, as well as commercial facilities.

Construction Management and Technology, MS (ESCONSTMS)

Online Degree Search Title: Construction Management and Technology, MS

Campus: Tempe, Online

Program Description: The transdisciplinary MS program in construction management and technology allows students with a bachelor's degree in construction or a related field such as architecture, business or engineering to broaden and improve their professional capabilities in construction. This meets the growing need for professionals with advanced technical, management and applied research skills in the construction industry.

The program allows a candidate's plan of study to reflect individual interests and career goals. Courses are offered in several areas, allowing a student to tailor their degree to their interests:

- commercial and residential areas
- construction management --- project, program and company
- facilities management --- maintenance, operation, renovation or decommissioning of existing facilities
- heavy construction --- infrastructure development
- specialty construction

This program is facilitated by the faculty of the Del E. Webb School of Construction.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

Construction Management and Technology, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a thesis, or 30 credit hours and a written comprehensive exam, or 30 credit hours including the required applied project course (CON 593).

Required Core (6 credit hours)

Project Management and Controls Core Area (3 credit hours)

CON 502 Front-end Planning (3)

CON 530 Facilities Operations and Maintenance (3)

CON 532 Facilities Project Management (3)

CON 534 Retrofit Construction (3)

CON 540 Construction Productivity (3)

CON 541 Public Works Capital Construction (3)

CON 545 Construction Project Management (3)

CON 548 Sustainable Construction (3)

CON 551 Alternative Project Delivery Methods (3)

CON 557 Principles of Leadership for Project Managers (3)

CON 567 Advanced Procurement Systems (3)
CON 589 Construction Company Financial Control (3)

Construction Technology Core Area (3 credit hours)
CON 508 Engineering and Construction Failures (3)
CON 509 Advanced Concrete Materials (3)
CON 510 Sustainable Bio-based Construction (3)
CON 531 Facility Management: Building Energy Management (3)
CON 554 Trenchless Construction Methods (3)
CON 570 Introduction to Advanced Technology Facilities (3)
CON 571 Construction of Advanced Technology Facilities (3)
CON 575 Information Technology in Construction (3)

Electives or Research (18--24 credit hours)

Culminating Experience (0--6 credit hours)
CON 593 Applied Project (3)
CON 599 Thesis (6)
written comprehensive exam (0)

Additional Curriculum Information

Students choose one three-credit-hour course from each of the core areas listed above for a total of six credit hours. If a course is chosen as a core area course, it cannot be used as an elective course simultaneously.

The number of electives and research is adjusted depending on the culminating experience chosen by the student.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- current resume
- an evaluation of the student's academic and professional background
- personal statement
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) by meeting the Graduate College English proficiency requirements regardless of their current residency.

Applicants required to demonstrate English proficiency and seeking a teaching assistantship must demonstrate proficiency in spoken English, and a score of 55 or better on the Speaking Proficiency English Assessment Kit or a score of 26 on the speaking portion of the TOEFL is required.

Applicants are expected to be competent in basic construction topics.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/master-science-construction-management/>) for program descriptions and to request more information.

Career Opportunities: Graduates of the construction management and technology program are well prepared for numerous types of careers, depending upon which subject area they focused their coursework:

- commercial and residential --- real estate developers, commercial construction managers, managers and supervisors of health care and special industrial building projects or home production systems, and managers or supervisors of sustainable or green construction
- construction management --- project managers, project engineers, estimators or schedulers who can eventually become principals of firms engaged in the construction of industrial, commercial or residential projects
- facilities management --- managers who supervise the maintenance, operation, renovation or decommissioning of existing facilities

- heavy construction --- supervisors of the construction and maintenance of public works such as highways, airports, bridges, utility systems and water or waste treatment facilities
- specialty construction --- organizers, leaders and managers of the building process at the subcontractor or contractor level working with mechanical and electrical systems, and in management at specialty contracting firms, such as those who do work in control systems, electrical distribution or HVAC systems for large and complex facilities such as data centers, health care organizations and semiconductor manufacturing plants as well as commercial facilities

Data Science, Analytics and Engineering, PHD (ESDSEPHD)

Online Degree Search Title: Data Science, Analytics and Engineering, PhD

Campus: Tempe

Program Description: The PhD program in data science, analytics and engineering engages students in fundamental and applied research.

The program's educational objective is to develop each student's ability to perform original research in the development and execution of data-driven methods for solving major societal problems. This includes the ability to identify research needs, adapt existing methods and create new methods as needed. This is accomplished through a rigorous education with research and educational experiences.

Students complete a foundational core covering database management, information assurance, statistical learning and statistical theory before choosing to focus on data analytics or data engineering. The program culminates in the production of a dissertation.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Core (12 credit hours)

CSE 511 Data Processing at Scale (3)

CSE 543 Information Assurance and Security (3)

CSE 572 Data Mining (3) or IEE 520 Statistical Learning for Data Mining (3) or EEE 549 Statistical Machine Learning: From Theory to Practice (3)

IEE 670 Mathematical Statistics (3) or STP 502 Theory of Statistics II: Inference (3) or EEE 554 Probability and Random Processes (3)

Electives and Additional Research (39 credit hours)

Research (12 credit hours)

DSE 792 Research (12)

Other Requirements (9 credit hours)

data engineering coursework or

data analytics coursework

Culminating Experience (12 credit hours)

DSE 799 Dissertation (12)

Additional Curriculum Information

All students must take qualifying exams covering the required core courses (3) within one year of matriculation into the program.

The dissertation prospectus should be submitted and its oral defense completed no later than one year following completion of the 60th credit hour and also no later than the fourth year in the program.

Students must select coursework from either the data engineering or the data analytics requirements. Students should see the academic unit for the approved course list.

Students cannot take a data engineering or data analytics course and have it meet an elective requirement at the same time. Students need to take a different elective course to reach the number of credit hours required for the program. Other coursework may be used with the approval of the

academic unit to fulfill these requirements.

Twelve credit hours of DSE 792 Research are required, and up to 24 credit hours are allowed on the plan of study. Students with research hours in excess of 12 will add these credit hours to their electives and additional research.

Electives include:

- additional DSE 792 Research credit hours (up to 12 credit hours allowed beyond the required 12)
- approved elective courses, of which up to three credit hours of DSE 790: Reading and Conference are permitted, with approval.

When approved by the student's supervisory committee and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this degree. If students do not have a previously awarded master's degree, the 30 hours of coursework are to be made up of electives to reach the required 84 credit hours.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in engineering, computer science, mathematics, statistics or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- two letters of recommendation
- letter of intent or written statement
- GRE scores
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

ASU does not accept the GRE® General Test at home edition.

If the student is assigned any deficiency coursework upon admission, those classes must be completed with a grade of "B" (scale is 4.00 = "A") or higher within two semesters of admission to the program. Deficiency courses do not apply to the total credit hours required to complete the degree program.

Deficiency courses are:

CSE 205 Object-oriented Programming and Data Structures

IEE 380 Probability and Statistics for Engineering Problem Solving

MAT 242 Elementary Linear Algebra or MAT 342 Linear Algebra or MAT 343 Applied Linear Algebra

MAT 267 Calculus for Engineers III

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Apply the tools and methods from industrial statistics, operations research, machine learning, computer science and computer engineering on solving data analytic problems.
- Manage large, heterogeneous data sets for knowledge discovery.
- Conduct research resulting in an original contribution to knowledge in data sciences.

Career Opportunities: Graduates demonstrate proficiency with existing methodology and significant accomplishment at advancing the state of the art in their chosen area, enabling them to pursue careers in the following fields:

- advanced research
- business
- government
- industry
- teaching

Data Science, Analytics and Engineering (Bayesian Machine Learning), MS (ESDSEBMLMS)

Online Degree Search Title: Data Science, Analytics and Engineering (Bayesian Machine Learning), MS

Campus: Tempe

Program Description: This concentration in Bayesian machine learning within the MS program in data science, analytics and engineering is offered in partnership with the School of Mathematical and Statistical Sciences. With its programs in statistics, applied mathematics and theoretical mathematics, the school is distinctly positioned to enable students to understand the statistical, probability and mathematical bases for the technical tools and emerging concepts in statistical and probabilistic machine learning and data science. The school also supports students' ability to collect, maintain, analyze, model and decide based on heterogeneous, time-dependent, noisy, biased, hierarchical and potentially large data sets.

Bayesian thinking is particularly suited to addressing the difficult issues associated with these high-dimension complex modeling challenges. Bayesian learning, decision-making and computation have made a significant impact on many areas of data science. Hierarchical modeling, time series analysis, ensemble modeling, spatial modeling and causal modeling are among the various areas of expertise covered by this program. Students will be able to apply these tools in a variety of domains such as engineering, physics, biology, social sciences, economics and finance.

Students in this program perform Bayesian data analysis, modeling, remodeling, and decision-making in data-enriched environments. This includes the exploratory analysis of massive and complex data streams, Bayesian modeling and computing, data management, causal modeling, and inference and decision under uncertainty using Bayesian trees, neural networks and text modeling popular in industry and academia.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

Data Science, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a thesis, or 30 credit hours including the required capstone course (FSE 570).

Required Core (9 credit hours)

STP 502 Theory of Statistics II: Inference (3), EEE 554 Probability and Random Processes (3) or DSE 501 Statistics for Data Analysts (3)

CSE 511 Data Processing at Scale (3), CSE 512 Distributed Database Systems (3) or IFT 530 Advanced Database Management Systems (3)

Choose one from the following:

CSE 572 Data Mining (3)

CSE 575 Statistical Machine Learning (3)

Additional Curriculum Information

Students should consult the academic unit for a list of approved electives and concentration course requirements.

Courses selected for required core or concentration may not be used as elective coursework on the same plan of study.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computing, engineering, mathematics, statistics, operations research, information technology or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- written statement
- professional resume
- two letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of current residency. Applicants demonstrate proficiency in the English language by scoring at least 90 on the TOEFL iBT (taken in a testing center), 7 on the IELTS or 115 on the Duolingo English test.

All applicants must demonstrate relevant coursework or experience in the following three areas:

- familiarity with Matlab, Python, SQL, R, or other relevant programming skills (in the professional resume)
- undergraduate linear algebra (e.g., MAT 343 Applied Linear Algebra)
- undergraduate statistics or probability (e.g., IEE 380 Probability and Statistics for Engineering Problem Solving, STP 420 Introductory Applied Statistics, STP 421 Probability, EEE 350 Random Signal Analysis)

In addition, applicants without an undergraduate degree in computer science, computer engineering, software engineering, information technology, industrial engineering, operations research, statistics or a related computing field must show evidence (in the professional resume) of at least one of the following certifications or equivalent experience:

- AWS-certified cloud practitioner
- Google data analytics certificate
- Google IT support certificate

In addition, this concentration requires completion of a three-credit course in linear algebra (equivalent to MAT 343 at ASU), which supersedes the second requirement above.

Career Opportunities: Statisticians and data scientists are consistently ranked among the top jobs in the USA. Applied statisticians with a strong background in Bayesian learning and decision can pursue opportunities in a variety of fields to collect and curate large and complex data related to business plans, model and communicate findings, and support rational decision making. Industries who hire people with data science skills include financial markets, central banks, pharmaceutical, semiconductor, communications, energy and power systems industries, as well as institutions such as the National Institutes of Health, Centers for Disease Control and Prevention, and National Oceanic and Atmospheric Administration.

Data Science, Analytics and Engineering (Computational Models and Data), MS (ESDSECMDMS)

Online Degree Search Title: Data Science, Analytics and Engineering (Computational Models and Data), MS

Campus: Tempe

Program Description: Data scientists are consistently ranked among the top jobs in the USA, and there is an increasing need for applied mathematicians to make use of data science tools like statistics, machine learning, artificial neural networks and artificial intelligence. Beyond the application of these tools, the fast-moving field of data science requires an understanding of the mathematical background of the algorithms behind these tools and the mathematical concepts that make these tools useful.

The MS program in data science, analytics and engineering with a concentration in computational models and data provides an advanced education in high-demand data science and computational mathematical modeling. A focus on computational skills in optimization, machine learning, stochastic processes and dynamical systems is enhanced by mathematical modeling in all application areas that use large scale data, including social sciences, astronomy, neuroscience, biosciences, engineering and epidemiology.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

Data Science, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a thesis, or 30 credit hours including the required capstone course (FSE 570).

Required Core (9 credit hours)

STP 502 Theory of Statistics II: Inference (3) or EEE 554 Probability and Random Processes (3) or DSE 501 Statistics for Data Analysts (3)

CSE 511 Data Processing at Scale (3) or CSE 512 Distributed Database Systems (3) or IFT 530 Advanced Database Management Systems (3)

Choose one:

CSE 572 Data Mining (3)

CSE 575 Statistical Machine Learning (3)

EEE 549 Statistical Machine Learning: From Theory to Practice (3)

IEE 520 Statistical Learning for Data Mining (3)

IFT 511 Analyzing Big Data (3)

IFT 512 Advanced Big Data Analytics/AI (3)

MAE 551 Applied Machine Learning for Mechanical Engineers (3)

STP 550 Statistical Machine Learning (3)

Concentration (9 credit hours)

APM 505 Applied Linear Algebra (3)

STP 530 Applied Regression Analysis (3)

Choose one:

APM 523 Optimization (3)

EEE 589 Convex Optimization (3)

IEE 620 Optimization I (3)

Electives (6 or 9 credit hours)

Culminating Experience (3 or 6 credit hours)

FSE 570 Data Science Capstone (3) or MAT 599 Thesis (6)

Additional Curriculum Information

Students should consult the academic unit for a list of approved electives and concentration course requirements.

Courses selected for the required core or concentration may not be used as elective coursework on the same plan of study. Students should check with their academic advisor to ensure that the total number of credit hours of their plan of study is equal to 30.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computing, engineering, mathematics, statistics, operations research, information technology or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- written statement
- professional resume
- two letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. Applicants demonstrate proficiency in the English language by scoring at least 90 on the TOEFL iBT[®]; (taken in a testing center), 7 on the IELTS or 115 on the Duolingo English test.

All applicants must demonstrate relevant coursework or experience in the following three areas:

- familiarity with Matlab, Python, SQL, R or other relevant programming skills (in the professional resume)
- undergraduate statistics or probability (e.g., IEE 380 Probability and Statistics for Engineering Problem Solving, STP 420 Introductory Applied Statistics, STP 421 Probability, EEE 350 Random Signal Analysis)
- undergraduate upper-division linear algebra (e.g., MAT 343 Applied Linear Algebra)

In addition, applicants without an undergraduate degree in computer science, computer engineering, software engineering, information technology, industrial engineering, operations research, statistics or a related computing field must show evidence (in the professional resume) of at least one of the following certifications or equivalent experience:

- AWS-certified cloud practitioner
- Google data analytics certificate
- Google IT support certificate

Career Opportunities: Applied mathematicians with a background in data science can pursue opportunities in a variety of fields to model, analyze and control dynamical processes that generate large data sets, including in the energy and power systems industry and pharmaceutical, semiconductor and communications industries. Graduates may also work in government labs such as the Centers for Disease Control and Prevention, the National Institutes of Health, and the National Oceanic and Atmospheric Administration.

Data Science, Analytics and Engineering (Human Centered Applications), MS (ESDSEHCAMS)

Online Degree Search Title: Data Science, Analytics and Engineering (Human-Centered Applications), MS

Campus: Polytechnic

Program Description: There is an increasing need for all engineers to make use of data science tools like statistics, machine learning, artificial neural networks and artificial intelligence. Yet the majority of engineering occupations require subject matter expertise beyond data science.

The MS program in data science, analytics and engineering with a concentration in human-centered applications provides students with advanced education in high-demand data science with an understanding of human systems. A focus on probability and statistics, machine learning, data mining and data engineering is complemented by courses focusing on human capabilities and understanding human bias to ensure increased breadth and depth in data science applications. Students learn how to address problems, such as biases in machine learning due to select input data, determining useful human feedback for interactive machine learning, ethical issues in machine learning applications, and the use of artificial intelligence to support human weaknesses without hindering human strengths. In interdisciplinary courses, students can work with colleagues to solve client-driven data science problems that address human needs and capabilities.

Degree Requirements:

30 credit hours and a thesis, or 30 credit hours including the required capstone course (FSE 570).

Required Core (9 credit hours)

STP 502 Theory of Statistics II: Inference (3), EEE 554 Probability and Random Processes (3) or DSE 501 Statistics for Data Analysts (3)

CSE 511 Data Processing at Scale (3), CSE 512 Distributed Database Systems (3) or IFT 530 Advanced Database Management Systems (3)

Choose one from the following:

CSE 572 Data Mining (3)

CSE 575 Statistical Machine Learning (3)

EEE 549 Statistical Machine Learning: From Theory to Practice (3)

IEE 520 Statistical Learning for Data Mining (3)

IFT 511 Analyzing Big Data (3)

IFT 512 Advanced Big Data Analytics/AI (3)

MAE 551 Applied Machine Learning for Mechanical Engineers (3)

STP 550 Statistical Machine Learning (3)

Concentration (9 credit hours)

HSE 520 Methods and Tools in Applied Cognitive Science (3)

HSE 530 Intermediate Statistics for Human Systems Engineering (3)

HSE 531 Data Analytics: Modeling Human Subjects Data (3)

HSE 542 Foundations of Human Systems Engineering (3)

Electives (6 or 9 credit hours)

Culminating Experience (3 or 6 credit hours)

FSE 570 Data Science Capstone (3)

HSE 599 Thesis (6)

Additional Curriculum Information

For Concentration coursework, students select three courses for a total of nine credit hours.

Courses selected for the Required Core or Concentration may not be used as elective coursework on the same plan of study. Students should check with their academic advisor to ensure that the total number of credit hours of their plan of study is equal to 30.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computing, engineering, mathematics, statistics, operations research, information technology or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in their first bachelor's degree program or in the last 60 hours of their first bachelor's degree program; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in nine semester hours of graduate coursework from a U.S. institution; or a cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable conferred master's degree program from a regionally accredited college or university.

Applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- written statement
- professional resume
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. Applicants must demonstrate proficiency in the English language by scoring at least 90 on the TOEFL iBT (taken in a testing center), 7 on the IELTS, or 115 on the Duolingo English test.

All applicants must demonstrate relevant coursework or experience in the following three areas:

- undergraduate statistics or probability (e.g., IEE 380 Probability and Statistics for Engineering Problem Solving, STP 420 Introductory Applied Statistics, STP 421 Probability, EEE 350 Random Signal Analysis)
- undergraduate linear algebra (e.g., MAT 242 Elementary Linear Algebra)
- familiarity with Matlab, Python, SQL, R, or other relevant programming skills (in the professional resume)

In addition, applicants without an undergraduate degree in computer science, computer engineering, software engineering, information technology, industrial engineering, operations research, statistics or a related computing field must show evidence (in the professional resume) of at least one of the following certifications or equivalent experience:

- AWS-certified cloud practitioner
- Google IT support certificate
- Google data analytics certificate

If the applicant does not meet the minimum GPA requirements, the application may still be considered. In certain cases, demonstrated aptitude through professional experience or additional postbaccalaureate education is considered.

Unofficial transcripts may be submitted at the time of application. If admitted, applicants must then submit official transcripts to ASU Graduate Admission Services.

Career Opportunities: Data scientists are consistently among the top jobs in the USA. Human-centered engineers with a background in data science can pursue opportunities in a variety of industries to manage and analyze data and extract knowledge from large data sets for decision-making, including in the following fields:

- clinical data managers
- computer and information research scientists
- human factors engineers and ergonomists
- statisticians

Campus: Tempe

Program Description: There is an increasing need for all engineers to make use of data science tools such as statistics, machine learning, artificial neural networks and artificial intelligence. Yet the majority of engineering occupations require subject matter expertise beyond data science. For mechanical and aerospace engineering, the need for data science, including machine learning, is felt in all subdisciplines, including controls, energy systems, aeronautics, astronautics and mechanics.

The mechanical and aerospace engineering concentration in the MS program in data science, analytics and engineering provides an advanced education that combines high-demand data science and mechanical and aerospace engineering. A focus on probability and statistics, machine learning and data engineering is complemented by mechanical and aerospace engineering-specific courses to ensure breadth and depth in both data science and mechanical and aerospace engineering.

Degree Requirements:

30 credit hours and a thesis, or 30 credit hours including the required applied project course (MAE 593), or 30 credit hours including the required capstone course (FSE 570).

Required Core (9 credit hours)

STP 502 Theory of Statistics II: Inference (3), EEE 554 Probability and Random Processes (3) or DSE 501 Statistics for Data Analysts (3)

CSE 511 Data Processing at Scale (3), CSE 512 Distributed Database Systems (3) or IFT 530 Advanced Database Management Systems (3)

Students choose one of the following:

CSE 572 Data Mining (3)

CSE 575 Statistical Machine Learning (3)

EEE 549 Statistical Machine Learning: From Theory to Practice (3)
IEE 520 Statistical Learning for Data Mining (3)
IFT 511 Analyzing Big Data (3)
IFT 512 Advanced Big Data Analytics/AI (3)
MAE 551 Applied Machine Learning for Mechanical Engineers (3)
STP 550 Statistical Machine Learning (3)

Concentration (9 credit hours)

Electives (6-9 credit hours)

Culminating Experience (3-6 credit hours)

FSE 570 Data Capstone (3), MAE 593 Applied Project (3) or MAE 599 Thesis (6)

Additional Curriculum Information

Concentration and elective coursework should be selected in consultation with the program advisor. Coursework selected for Required Core may not be used as elective coursework on the same plan of study. Students should check with their academic advisor to ensure that the total number of credit hours of their plan of study is equal to 30.

Admission Requirements: Applicants must fulfill the requirement of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in mechanical engineering, aerospace engineering or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- letter of intent
- professional resume
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of current residency. Applicants demonstrate proficiency in the English language by scoring at least 90 on the TOEFL iBT (taken in a testing center); 7 on the IELTS; or 115 on the Duolingo English test regardless of their current residency.

All applicants must demonstrate relevant coursework or experience in the following three areas:

- familiarity with Matlab, Python, SQL, R or other relevant programming skills (in the professional resume)
- undergraduate linear algebra (e.g., MAT 242 Elementary Linear Algebra)
- undergraduate statistics or probability (e.g., IEE 380 Probability and Statistics for Engineering Problem Solving; STP 420 Introductory Applied Statistics; STP 421 Probability; EEE 350 Random Signal Analysis)

In addition, applicants without an undergraduate degree in computer science, computer engineering, software engineering, information technology, industrial engineering, operations research, statistics or a related computing field must show evidence (in the professional resume) of at least one of the following certifications or equivalent experience:

- AWS certified cloud practitioner
- Google data analytics certificate
- Google IT support certificate

Career Opportunities: Data scientist is consistently ranked among the top jobs in the U.S. Mechanical and aerospace engineers with a background in data science can pursue opportunities in a variety of fields to manage and analyze data and extract knowledge from large data sets for decision-making, including in the following industries:

- aircraft design
- energy systems
- manufacturing
- product design
- space systems

Yet the majority of engineering occupations require subject matter expertise beyond data science.

This concentration in the MS program in data science, analytics and engineering provides an advanced education in high-demand data science and sustainable engineering and the built environment. A focus on probability and statistics, machine learning, data mining and data engineering is complemented by sustainable engineering and built environment-specific courses to ensure breadth and depth in data science and sustainable engineering and the built environment.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

30 credit hours and a thesis, or 30 credit hours including the required capstone course (FSE 570).

Required Core (9 credit hours)

STP 502 Theory of Statistics II: Inference (3), EEE 554 Probability and Random Processes (3) or DSE 501 Statistics for Data Analysts (3)

CSE 511 Data Processing at Scale (3), CSE 512 Distributed Database Systems (3) or IFT 530 Advanced Database Management Systems (3)

Choose one from the following:

CSE 572 Data Mining (3)

CSE 575 Statistical Machine Learning (3)

EEE 549 Statistical Machine Learning: From Theory to Practice (3)

IEE 520 Statistical Learning for Data Mining (3)

IFT 511 Analyzing Big Data (3)

IFT 512 Advanced Big Data Analytics/AI (3)

MAE 551 Applied Machine Learning for Mechanical Engineers (3)

STP 550 Statistical Machine Learning (3)

Concentration (9 or 12 credit hours)

CEE 501 Machine Learning Techniques in Civil Engineering (3)

three additional courses from an approved list

Electives (6 or 9 credit hours)

Culminating Experience (3 or 6 credit hours)

CEE, CON or EVE 599 Thesis (6)

FSE 570 Data Science Capstone (3)

Additional Curriculum Information

Students should consult the academic unit for a list of approved electives and concentration course requirements.

Courses selected for Required Core or Concentration may not be used as elective coursework on the same plan of study. Students should check with their academic advisor to ensure that the total number of credit hours of their plan of study is equal to 30.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computing, engineering, mathematics,

statistics, operations research, information technology or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- written statement
- professional resume
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must demonstrate proficiency in the English language by scoring at least 90 on the TOEFL iBT, 7 on the IELTS, or 115 on the Duolingo English test, regardless of their current residency.

All applicants must demonstrate relevant coursework or experience in the following three areas:

- undergraduate statistics or probability (e.g., IEE 380 Probability and Statistics for Engineering Problem Solving, STP 420 Introductory Applied Statistics, STP 421 Probability, EEE 350 Random Signal Analysis)
- undergraduate linear algebra (e.g., MAT 242 Elementary Linear Algebra)
- familiarity with Matlab, Python, SQL, R or other relevant programming skills (in their professional resume)

In addition, applicants without an undergraduate degree in computer science, computer engineering, software engineering, information technology, industrial engineering, operations research, statistics or a related computing field must show evidence (in their professional resume) of at least one of the following certifications or equivalent experience:

- AWS certified cloud practitioner
- Google IT support certificate
- Google data analytics certificate

Career Opportunities: Civil, environmental, sustainable or construction management engineers with a background in data science can pursue opportunities in a variety of fields to manage and analyze data and extract knowledge from large data sets for decision-making, including in the following industries:

- building
- construction
- environmental remediation
- transportation
- water treatment

Electrical Engineering, MS (ESEEMS)

Online Degree Search Title: Electrical Engineering, MS

Campus: Tempe

All students seeking a master's degree in electrical engineering must apply to the electrical engineering MSE (<https://degrees.apps.asu.edu/masters-phd/major/ASU00/ESEEMSE/electrical-engineering-mse>) program.

Program Description: This program does not accept applications to the MS directly. If interested in the Master of Science program, students should apply to the MSE program and, once admitted, consult with the Master of Science in Engineering program advisors.

The electrical engineering faculty in the Ira A. Fulton Schools of Engineering offer a research program leading to the Master of Science in electrical engineering.

Graduate courses and programs are offered in the following six areas of specialization:

- control systems
- electric power and energy systems

- electromagnetics, antennas and microwave circuits
- electronic and mixed-signal circuit design
- physical electronics and photonics
- signal processing and communications

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Electrical Engineering, BSE
- Electrical Engineering (Electric Power and Energy Systems), BSE

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a thesis.

The credits earned toward this research degree must include a minimum of eight courses (24 credit hours minimum) and six credit hours of EEE 599 Thesis. As part of the eight courses, at least two should be outside the area of specialization.

Requirements include:

- at least four EEE courses
- at least two courses outside the area of specialization
- at most two 400-level courses
- at least three EEE 500-level courses
- at most one EEE 590 Reading and Conference or FSE course exam

A final oral examination in defense of the thesis completes the master's degree requirements.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or they must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Students desiring the Master of Science in electrical engineering must initially apply to the Master of Science in Engineering program. Students who later obtain a research advisor may transfer to the Master of Science program.

Career Opportunities: A graduate with a Master of Science in electrical engineering degree has an advanced understanding of electrical engineering concepts and theories and the ability to develop, contribute to and apply them to their specialization.

Career examples include:

- computer hardware engineer
- computer and information research scientist
- computer network architect
- director of engineering
- electrical engineer
- electrical engineering researcher
- energy engineer

Electrical Engineering, MSE (ESEEMSE)

Online Degree Search Title: Electrical Engineering, MSE

Campus: Tempe, Online

Program Description: The electrical engineering faculty in the Ira A. Fulton Schools of Engineering offer a professional program leading to the MSE in electrical engineering.

Graduate courses and programs are offered in six areas of specialization:

- control systems (not an option for the online degree but available to on-campus students)
- electric power and energy systems
- electromagnetics, antennas and microwave circuits
- electronic and mixed-signal circuit design
- physical electronics and photonics
- signal processing and communications

A concurrent degree, the MBA/MSE in electrical engineering, is available as an online option. For more information, students should visit the W. P. Carey School of Business page on concurrent degrees (<https://wpcarey.asu.edu/mba-programs/online/concurrent-degrees>).

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Concurrent Program Options:

Students can choose to create their own concurrent degree combination to match their interests by working with their academic advisor during or after their first semester of study. Some concurrent combinations are not possible due to high levels of overlap in curriculum; students should speak with their academic advisor for more details.

This degree is also offered as a concurrent program with the following: W. P. Carey MBA - Online Program

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Earth and Space Exploration (Exploration Systems Design), BS
- Electrical Engineering, BSE
- Electrical Engineering (Electric Power and Energy Systems), BSE

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a portfolio.

The master's degree in electrical engineering is a professional degree program that requires a minimum of 30 credit hours of coursework (a minimum of 10 classes) and a portfolio based on attendance and review of seminars hosted by the School of Electrical, Computer and Energy Engineering.

Requirements include:

- at least five EEE courses
- at least three EEE 500-level courses
- at least two courses outside the area of specialization
- at most one EEE 590 Reading and Conference or FSE course
- at most two 400-level courses

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

The decision to admit a student who has earned a bachelor's degree from a program accredited by ABET to a master's degree program in electrical engineering is based on a number of factors. A minimum requirement is an undergraduate GPA of 3.00 (scale is 4.00 = "A") in the student's last two years of undergraduate work.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of purpose
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

International students seeking teaching assistantships must demonstrate proficiency in spoken English by scoring at least 26 on the speaking portion of the TOEFL iBT or 50 on the ASU-administered Speaking Proficiency English Assessment Kit.

Admission to electrical engineering graduate programs is highly competitive. Preferred applicants have an undergraduate degree in electrical engineering.

Applicants should see the program website for application deadlines.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/master-science-engineering-electrical-engineering/>) for program descriptions and to request more information.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Students are expected to differentiate key concepts within electrical engineering and demonstrate their understanding of those concepts on the written comprehensive exam and demonstrate knowledge of ethical standards in a professional setting.
- Students are expected to differentiate key concepts within electrical engineering and demonstrate their understanding of those concepts on the written comprehensive exam and demonstrate critical thinking skills in a professional setting.
- Students will understand and apply skills needed in order to select and secure professional employment in an electrical engineering-related field by practicing the skills they have learned in their courses and showing they have the ability to work successfully within the electrical engineering field, applying concepts from their academic experience, synthesizing knowledge, self-assessment on the student's part, and teamwork and communication to address societal needs.

Career Opportunities: Graduates of the Master of Science in Engineering program in electrical engineering have an advanced understanding of electrical engineering concepts and theories.

Career examples include:

- computer hardware engineer
- computer and information research scientist
- computer network architect
- director of engineering
- electrical engineer
- energy engineer

Electrical Engineering, PHD (ESEEPHD)

Online Degree Search Title: Electrical Engineering, PhD

Campus: Tempe

Program Description: The PhD in electrical engineering is awarded upon evidence of excellence in research leading to a scholarly dissertation that is a contribution to knowledge.

Graduate courses and programs are offered in the following six areas of specialization:

- control systems
- electric power and energy systems
- electromagnetics, antennas and microwave circuits
- electronic and mixed-signal circuit design
- physical electronics and photonics
- signal processing and communications

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Doctoral students are required to complete 84 credit hours of academic credit beyond the bachelor's degree. The following summarizes the degree course requirements:

Master's degree (30 credit hours)
from any accredited institution

Electives 500 level or above (18 credit hours)
at least nine credit hours of EEE courses

Research Class or Omnibus Courses (12 credit hours)
can be 400-level and above or
EEE 792 Research (12)

Dissertation (12 credit hours)
EEE 799 Dissertation (12)

Additional Curriculum Information

The 84 credit hours include 30 credit hours from the master's degree, a required 18 credit hours of doctoral coursework, 12 credit hours of research (EEE 792), and 12 credit hours (and only 12 credit hours) of dissertation (EEE 799).

The additional 12 credit hours can be more hours of research (EEE 792) or can be coursework as determined by the supervisory committee. At least nine credit hours of the minimum requirement of 18 credit hours of doctoral coursework must be in electrical engineering. EEE 790 Reading and Conference can be used for no more than three credit hours toward the required 18 but does not count toward the nine hours of 500-level EEE classes required.

All courses counting toward the required 18 credit hour minimum must be at the 500 level or higher. (Note: All courses with the prefix EEE 591 count as 400-level courses.) No more than one three-hour reading and conference course (EEE 790) may be taken as part of the 18 credit hour requirement. The content of any proposed reading and conference course must be reviewed and approved by the electrical engineering graduate program chair before a student registers for the course.

A qualifying examination, a comprehensive exam and the dissertation defense are required. Additional information on the program can be found in the Blue Student Guide published and available on the program's website.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

In general, a student must have a minimum GPA of 3.00 (scale is 4.00 = "A") in all undergraduate coursework and a minimum GPA of 3.50 (scale is 4.00 = "A") in all graduate coursework for admission to the doctoral program. A student usually must hold a master's degree before being admitted to the doctoral program. Direct doctoral admission is available for students graduating from an ABET-accredited electrical engineering program with

a GPA of 3.60 (scale is 4.00 = "A") or higher.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

International students seeking teaching assistantships must demonstrate proficiency in spoken English by scoring at least 26 on the speaking portion of the internet-based TOEFL or 50 on the ASU-administered Speaking Proficiency English Assessment Kit.

A student whose master's degree is not from a U.S. ABET-accredited institution must score 156 or higher on the quantitative section of the GRE General Test. A good score on the writing portion is considered desirable.

ASU does not accept the GRE® General Test at home edition.

A student whose undergraduate degree is not in electrical engineering may need to take appropriate undergraduate courses to establish a baseline of knowledge in the discipline.

Applicants should see the program website for application deadlines.

Career Opportunities: The graduate with a PhD in electrical engineering has an advanced understanding of electrical engineering concepts and theories and the ability to develop and contribute to their specialization through the application of these concepts and theories.

Career examples include:

- computer hardware engineer
- computer and information research scientist
- computer network architect
- director of engineering
- electrical engineer
- electrical engineering researcher
- energy engineer

Electrical Engineering (Media Arts and Sciences), MS (ESAMEMS)

Online Degree Search Title: Electrical Engineering (Media Arts and Sciences), MS

Campus: Tempe

This program's name has changed effective Fall 2024. The previous name was Electrical Engineering (Arts, Media and Engineering).

Program Description: This concentration in media arts and sciences in the MS program in electrical engineering is a collaboration between the electrical engineering program at ASU and the Herberger Institute for Design and the Arts. It is available for MS and PhD students admitted to this program who take two-thirds of their course, research and thesis credits from the electrical engineering program, and one-third from the media arts and sciences program.

Electrical engineering students in the media arts and sciences concentration undergo training toward integrating principles of digital signal processing, pattern recognition, computer vision and multimedia computing with transdisciplinary objectives, with the goal of enabling new paradigms of human-machine experience that directly address societal needs and facilitate knowledge. Examples include media-based intelligent systems for health care and well-being, and promotion of environmentally sustainable practices.

For more information on current research projects and initiatives, students should see the school's research page (<https://artsmediaengineering.asu.edu/research>).

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website.

The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

30 credit hours and a portfolio, or 30 credit hours and a thesis.

This program requires 30 credit hours of coursework.

Thesis students complete eight courses for the program, typically five from EEE and three from AME. In addition, six credit hours of thesis are required, typically four credit hours from EEE and two from AME.

Portfolio students complete 10 courses for the program, typically six from EEE and four from AME.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Students from ABET-accredited undergraduate programs who wish to be considered for a master's degree program must have a minimum GPA of 3.00 (scale is 4.00 = "A") in the last two years of undergraduate coursework. Students from undergraduate programs that are not accredited by ABET must have a minimum GPA of 3.50 (scale is 4.00 = "A") in the last two years of undergraduate coursework or have graduated first class with distinction.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of purpose
- curriculum vitae
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

International applicants seeking teaching assistantships must demonstrate proficiency in spoken English by scoring at least 26 on the speaking portion of the internet-based TOEFL or 50 on the ASU-administered Speaking Proficiency English Assessment Kit.

Applicants should submit materials that reflect the hybrid nature of the arts and engineering degree, including a statement of purpose and curriculum vitae demonstrating interest and relevant experience in the area. Applicants will have the opportunity to upload their curriculum vitae and statement of purpose when completing the online application. Additionally, the media arts and sciences program requires three letters of recommendation from individuals familiar with the applicant's ability to succeed in a transdisciplinary research environment.

Career Opportunities: Graduates are able to apply new ideas, theories and systems related to the intersection of media arts and electrical engineering. The transdisciplinary nature of this program allows media arts and sciences graduates to connect electrical engineering signals and systems constructs to multimedia computing, digital communication, immersive augmented reality and virtual reality experiences, and data visualization.

Career examples include:

- augmented and virtual reality researcher
- computer systems engineer
- electrical engineering professor
- systems software engineer

This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

The program requires the following:

- a comprehensive examination
- the dissertation defense
- a qualifying examination
- 10 courses, typically seven from EEE and three from AME
- 12 credit hours of dissertation, typically eight credits from EEE and four from AME
- 12 credit hours of research, typically eight credits from EEE and four from AME

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants with a master's degree who wish to be considered for the doctoral program must have a minimum GPA of 3.50 (scale is 4.00 = "A") in their master's degree program. Applicants without a master's degree must have a minimum GPA of 3.60 (scale is 4.00 = "A") in the last two years of undergraduate coursework and have graduated from an ABET-accredited undergraduate program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of purpose
- curriculum vitae
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Engineering, DEng (ESEGRDENG)

Online Degree Search Title: Engineering, DEng

Campus: Online

Program Description: Even engineers with master's degrees can find that they don't have all the skills needed to advance to the next level. Future engineering leaders require research experience, in-depth technical knowledge, leadership, project management, communication, storytelling and other nontechnical skills to be truly effective.

The DEng program enables students to continue their education without leaving their current position by providing advanced, doctoral-level coursework and a cutting-edge applied project experience. Required core classes in project management, leadership, statistical analysis and communication are complemented by focus area-specific courses, followed by an applied project of the student's choice to ensure both breadth and depth of knowledge in their chosen engineering discipline.

GI Bill® benefits

This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at <https://www.benefits.va.gov/gibill/> (<https://www.benefits.va.gov/gibill/>).

Degree Requirements:

60 credit hours including the required applied project course (IEE793).

Required Core (12 credit hours)

CON 532 Facilities Project Management (3) or CON 545 Construction Project Management (3) or IEE 558 Engineering Project Management (3)

IEE 541 Engineering Administration (3) or OGL 550 Leading Organizational Change (3) or OGL 552 Leading Diverse Teams (3)

IEE 520 Statistical Learning for Data Mining (3) or IEE 572 Design Engineering Experiments (3) or IEE 578 Regression Analysis (3) or IEE 582

Response Surfaces/Process Opt (3)

COM 504 Theories and Models in Communication (3) or COM 514 Communication and Gender (3) or COM 515 Communication in the Workplace

(3) or COM 530 Training and Development (3)

Electives (36 credit hours)

Other Requirements (3 credit hours)

IEE 701 Applied Doctoral Project Initiation (3)

Culminating Experience (9 credit hours)

IEE 793 Applied Project (9)

Additional Curriculum Information

Electives must be selected from an approved list.

The applied project addresses advanced, complex and practical engineering management problems with design through the development of innovative solutions in consideration of public health, safety, sustainability and welfare, as well as global, cultural, social, environmental and economic factors. The project includes independent applied research with industry sponsorship and faculty committee mentorship culminating in a final project report and examination for the Doctor of Engineering degree.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in engineering, computing, mathematics, statistics, operations research, information technology or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admissions application and application fee
- official transcripts
- letter of intent
- one letter of recommendation
- professional resume
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of current residency with a score of at least 90 on the internet-based TOEFL taken in a testing center, 7 on the IELTS or 115 on the Duolingo exam.

The letter of intent should include a purpose for completing the DEng program, basic qualifications, interest in ASU, academic journey and accomplishments and professional career journey and accomplishments.

The letter of recommendation should be submitted by a supervisor, colleague or former academic professor sharing their understanding of the applicant's motivations and capabilities for completing a doctoral-level engineering degree. Supervisors should also state their support for the student during the student's doctoral program and applied project.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/doctor-engineering/>) for program descriptions and to request more information.

Career Opportunities: Engineering professionals with the technical and nontechnical skills developed through this program can pursue opportunities in a variety of fields to manage projects, lead engineering teams, develop new products, and more. These skills can be applied to industries including:

- consulting
- information technologies
- manufacturing
- product development

Engineering, MEng (EENGRMENG)

Online Degree Search Title: Engineering, MEng

Campus: Online

Program Description: Engineers have the opportunity to gain valuable experience applicable to their chosen industry while gaining an advanced degree.

The MEng degree program is designed to meet the unique needs of professional engineers, and it is delivered entirely online. In this practice-oriented degree program, students can customize their learning experience by selecting a curriculum that addresses their academic and professional goals.

Multiple emphasis areas are available in this master's degree program. Within each area of study are specific course requirements, in addition to the general program requirements. Students can select one of several areas of study available, such as engineering management, quality, reliability and statistical engineering, and systems engineering. A computing and technology area of study has been developed to support ASU's global initiatives.

Convenience and flexibility are key advantages of this program. The Master of Engineering is a 30 credit hour degree program that does not require GRE results, a thesis or on-campus attendance; it is only available through distance learning. The program is supported through online courses available from the Ira A. Fulton Schools of Engineering.

Degree Requirements:

30 credit hours and a portfolio, or 30 credit hours and a written comprehensive exam, or 30 credit hours and an oral comprehensive exam, or 30 credit hours including the required applied project course (CSE 593 or IEE 585 or IEE 593).

Students must complete 30 credit hours equaling 10 courses to earn a Master of Engineering. Half of all coursework, excluding the practice-oriented project, must be in engineering.

Students must complete three credit hours of applied engineering mathematics and three credit hours of engineering management or business.

A culminating event is required and is identified by the student's advisory committee. It could be a final written or oral examination, portfolio, or the final report of a practice-oriented project. Additional requirements may exist for some academic units and emphasis areas of the Master of Engineering program.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in the desired field of study from a regionally accredited institution.

Applicants must have a minimum GPA of 3.00 (scale is 4.00 = "A") in the last 60 credit hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts from all institutions attended
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/>) for program descriptions and to request more information.

Career Opportunities: Engineers approach a broad range of disciplinary and transdisciplinary opportunities by applying new approaches and technologies to solve problems, innovate and create value.

The Master of Engineering degree is an interdisciplinary program that prepares engineering, science and technology majors with more advanced technical, management and practical skills that enhance their marketability to potential employers. The program is designed for people who are already employed in engineering or technical roles, or who are interested in expanding their skill set before entering a technical organization as a manager or individual contributor.

According to the Bureau of Labor Statistics, engineers are highly paid, and there is significant growth in the number of employment opportunities. Graduates of this multidisciplinary program are able to fill these roles in the following career paths:

- Engineering managers hold leadership positions in the management of projects, processes and people, combining engineering competency with managerial skills to support the efficient development of new technology and products.
- Quality and reliability engineers use engineering principles to make business and production processes and products more efficient and dependable. They may also look for ways to seek efficiencies while maintaining reliable products and production methods.
- Systems engineers may become technical managers who develop the technical design of complex systems and manage them by building on their interdisciplinary expertise, systems engineering principles and practical experience.

Engineering, MS (TSEGRMS)

Online Degree Search Title: Engineering, MS

Campus: Polytechnic

Program Description: In the MS program in engineering, students develop applied analytical expertise across disciplinary boundaries, with direct

applications of advanced design principles to system design, management and control.

The student's expertise, developed through the core curriculum, is reinforced with the flexibility of focus area options that include alternative energy, mechanical engineering and electrical engineering.

The culminating experience options are also flexible, allowing students to tailor the program to support their specific career goals while also becoming problem-solvers who create and shape the future.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

- Engineering (Automotive Systems), BSE
- Engineering (Electrical Systems), BSE
- Engineering (Mechanical Engineering Systems), BSE
- Engineering (Robotics), BSE
- Manufacturing Engineering, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a portfolio, or 30 credit hours and a thesis, or 30 credit hours including the required applied project course (EGR 593).

Required Core (6 credit hours)

EGR 520 Engineering Analysis I (3)

EGR 530 Principles of Systems Engineering (3)

Focus Area (15 credit hours)

Electives (3--9 credit hours)

Culminating Experience (0--6 credit hours)

EGR 593 Applied Project (3) or

EGR 599 Thesis (6) or

portfolio (0)

Additional Curriculum Information

Students should see the academic unit for a list of approved electives.

The elective credit hours required are dependent upon the chosen culminating experience option. Completion of 30 credit hours of coursework is required for all culminating experience options.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a U.S. bachelor's or master's degree from a regionally accredited institution or the equivalent of a U.S. bachelor's degree from an international institution that is officially recognized by that country in engineering, physical sciences, mathematics or a similar field.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in their first bachelor's degree program or in the last 60 hours of their first bachelor's degree program; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in nine semester hours of graduate coursework from a U.S. institution; or a cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable conferred master's degree program from a regionally accredited college or university.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- professional resume

- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Applicants should review the Graduate Admission Services website (<https://admission.asu.edu/apply/international/graduate/english-proficiency>).

If the applicant does not meet the minimum GPA requirements, the application may still be considered. In certain cases, demonstrated aptitude through professional experience or additional postbaccalaureate education will be considered.

Career Opportunities: Engineers collaborate on interdisciplinary teams to design, manufacture and deliver innovative technological products and services. Program graduates possess not only sophisticated engineering technical skills but also the important professional skills of communication, teamwork and collaboration, and the adaptability that many employers seek.

Graduates are prepared to work in large corporations, government agencies and small businesses, as well as to pursue a doctorate degree. Due to the emphasis on design and project-based learning, the program supports an entrepreneurial spirit, and some graduates start companies of their own.

Engineering Education Systems and Design, PHD (ESEESDPHD)

Online Degree Search Title: Engineering Education Systems and Design, PhD

Campus: Polytechnic

Program Description: The PhD program in engineering education systems and design prepares all students to conduct engineering education research related to their scholarly interests using a systems and design approach.

Students who enroll in the program have a passion for developing skills as engineering education researchers and commitment to contributing to the engineering education community. Learning is driven by engagement with faculty and peers through coursework, research and programmatic events. Those who complete the program are ready to take on a variety of roles across a range of educational settings (e.g., pre-college and higher education, science centers, government agencies, museums, policy setting institutions and industry).

Students may enter the program with a bachelor's or master's degree in an engineering or a related discipline. Areas of research may include workforce adaptability, culturally responsive education, education policy, accessibility, broadening participation in engineering, engineering classroom practices, studies of marginalized groups, student persistence, graduate education, online education and empathy.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam and a dissertation.

Required Core (21 credit hours)

EGR 535 Innovation and Design of Engineering Academic Settings (IDEAS) (3)

EGR 565 Qualitative Methods for Engineering Education Research (3)

EGR 572 Quantitative Methods for Engineering Education Research (3)

EGR 574 Engineering Education Systems in Context (3)

EGR 576 From Then Until Now: Examining Inequities in STEM (3)

EGR 671 Applications of Qualitative Methods for Engineering Education Research (3)

EGR 673 Applications of Quantitative Methods for Engineering Education Research (3)

Electives and Research (48 credit hours)

electives (36)

research (12)

Other Requirement (3 credit hours)

EGR 594 Topic: EESD Seminar (3)

Culminating Experience (12 credit hours)
EGR 799 Dissertation (12)

Additional Curriculum Information

Students may be allowed to apply up to 30 credit hours from a previously awarded master's degree to their doctoral program as approved by the academic unit and the Graduate College. If students do not have a master's degree, the remaining 30 credit hours must consist of at least 18 graduate-level credit hours in a particular engineering discipline and at most nine credit hours in support of the student's dissertation research area.

Students are allowed up to six credit hours of 400-level coursework on the student plan of study with appropriate faculty advisor and program chair approval.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in engineering or a closely related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in their first bachelor's degree program or in the last 60 hours of their first bachelor's degree program; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in nine semester hours of graduate coursework from a U.S. institution; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable conferred master's degree program from a regionally accredited college or university.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of purpose
- CV or resume
- writing sample
- two letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Applicants should see the graduate admission services website (<https://admission.asu.edu/apply/international/graduate/english-proficiency>).

Global Launch (<https://globallaunch.asu.edu/learn-english>) at ASU offers an online alternative to standardized testing for international students who are seeking admission to ASU but need proof of English proficiency.

Unofficial transcripts may be submitted at time of application. If admitted, applicants must then submit official transcripts to ASU Graduate Admission Services.

If the applicant does not meet the minimum GPA requirements, the application may still be considered. In certain cases, demonstrated aptitude through professional experience or additional postbaccalaureate education is considered.

Applicants can opt to note faculty members (see current endorsed list of faculty on the Polytechnic campus website) they've spoken to or are interested in working with if they were to matriculate at ASU.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Synthesize the engineering education ecosystem by examining its past and exploring its future.
- Conduct engineering education research using quantitative methods
- Conduct engineering education research using qualitative methods.
- Address the need for social justice, equity, diversity, and inclusion within engineering education

Career Opportunities: Graduates are equipped for competitive positions in top-tier research institutions as exemplary scholars and teachers or for work as leaders in engineering education in a variety of settings, including:

- education startups
- government agencies
- industry
- policy-setting institutions
- science centers and museums
- think tanks

- universities

Engineering Science (Software Engineering), MSE (ESSFEMSE)

Online Degree Search Title: Engineering Science (Software Engineering), MSE

Campus: Online

Program Description: The MSE program in engineering science with a software engineering concentration offers specialized courses founded on the fundamentals and principles of software engineering. The program provides the knowledge and skills needed by a software engineer or software task leader on large and small projects requiring either agile methodologies or formal capability maturity model integration approaches.

The program addresses major software development methodologies, techniques, tools and processes for developing and managing software projects. The curriculum is based on the Software Engineering Body of Knowledge under the leadership of the IEEE Computer Society. Each course places an emphasis on applied assignments and projects that are relative to the student's workplace.

Degree Requirements:

30 credit hours and a portfolio, or 30 credit hours including the required applied project course (CSE 593).

Required Core (6 credit hours)

CSE 565 Software Verification, Validation, and Testing (3)

CSE 566 Software Project, Process, and Quality Management (3)

Concentration (3 credit hours)

CSE 591 Topic: Software Engineering Principles and Concepts (3)

Restricted Electives (18 or 21 credit hours)

Culminating Experience (0 or 3 credit hours)

CSE 593 Applied Project (3)

portfolio (0)

Additional Curriculum Information

For an approved list of restricted electives, students should see the academic unit.

Students select five or six elective courses: five for the applied project option or six for the portfolio option.

Two faculty member-approved 400-level courses may also be selected as electives for the restricted electives.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computer engineering, software engineering or a related field from a regionally accredited institution.

Applicants must have a minimum GPA of 3.00 (scale is 4.00 = "A") in the last 60 credit hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 12 units of the postbaccalaureate transcript.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Applicants must provide evidence of demonstrated expertise in the area of object-oriented programming, advanced data structures, algorithm design and algorithm analysis; maturity in high-level programming (required); and successful completion of Calculus I (a minimum requirement).

Graduates of non-U.S. institutions must satisfy admission requirements established by the ASU Graduate College.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/master-science-engineering-engineering-science-concentration-software/>) for program descriptions and to request more information.

Career Opportunities: Software engineers solve a broad range of disciplinary and transdisciplinary problems and apply new technologies to improve the quality of life. This master's degree prepares graduates for advanced study in computing and engineering, and it provides leadership to software engineering development projects and teams. Graduates of the program have experience using the software development life cycle and tools to solve complex, real-world problems.

According to the Bureau of Labor Statistics, software engineers are highly paid, and there is significant growth in the number of employment opportunities. Some software engineering jobs may include:

- developing software to manage new regulatory requirements in industries such as health care, and administering existing policies digitally
- identifying requirements and developing testing plans for computer systems being built into consumer electronics
- leading software development teams and projects for organizations of various sizes and complexities

Environmental and Resource Management, MS (ESERMMS)

Online Degree Search Title: Environmental and Resource Management, MS

Campus: Polytechnic

Program Description: The MS program in environmental and resource management provides students with the regulatory and technical background needed to mitigate the environmental impact of industrial sources of pollution, ensure compliance with environmental regulations, and manage and preserve engineered and natural ecosystems. The program is designed for students with a background in the sciences, engineering, management, natural resources management, environmental health and safety, or other affiliated areas.

The curriculum focuses on areas such as environmental law, water and wastewater treatment, air pollution management, solid and hazardous waste management, management of hazardous materials, soils and groundwater contamination, water law and policy, environmental toxicology, hazardous waste management, natural resources management, occupational health and safety, sustainable development, and international environmental laws and policies.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Business (Agribusiness Innovation and Technology), BA
Environmental Science, BA
Environmental Science, BS
Environmental and Resource Management, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a portfolio, or 30 credit hours and a thesis, or 30 credit hours and a written comprehensive exam, or 30 credit hours including the required applied project course (ERM 593).

Required Core (6 credit hours)

ERM 502 Regulatory Framework for Toxic and Hazardous Substances (3) or ERM 527 Environmental and Resources Regulations Concepts (3)

ERM 503 Principles of Toxicology (3) or ERM 506 Chemistry of Hazardous Materials (3)

Track Courses (9 credit hours)

Electives or Research (9--15 credit hours)

Culminating Experience (0--6 credit hours)

ERM 593 Applied Project (3)

ERM 599 Thesis (6)

portfolio (0)

written comprehensive exam (0)

Additional Curriculum Information

Students select either the environmental management track or the international environmental management track.

Students choose one of the culminating experiences listed above. Thesis students take nine credit hours of electives or research; applied project students take 12 credit hours of electives or research; and portfolio and written comprehensive exam students take 15 credit hours of electives or research.

Students should see the academic unit for a complete list of approved electives and track courses.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution in one of the following fields: environmental engineering, environmental and resource management, biology, chemistry, geology, environmental health, environmental management, environmental science, occupational safety and health, environmental technology, industrial hygiene, natural resource management or a related field.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in their first bachelor's degree program or in the last 60 hours of their first bachelor's degree program; a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in nine semester hours of graduate coursework from a U.S. institution; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable conferred master's degree program from a regionally accredited college or university.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- professional resume
- two letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Applicants should see the Graduate Admission Services website (<https://admission.asu.edu/apply/international/graduate/english-proficiency>).

Global Launch (<https://globallaunch.asu.edu/learn-english/online-english/english-for-admission>) at ASU offers an online alternative to standardized testing for international students who are seeking admission to ASU and need proof of English proficiency.

If the applicant does not meet the minimum GPA requirements, the application may still be considered. In certain cases, demonstrated aptitude through professional experience or additional postbaccalaureate education is considered.

Unofficial transcripts may be submitted at the time of application. If admitted, applicants must then submit official transcripts to ASU Graduate Admission Services.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Apply sustainable development practices and trends to environmental systems
- Apply legal principles and concepts as described in environmental laws and regulations in order to manage engineered, industrial and natural ecosystems systems
- Apply management, scientific and technical solutions to natural and anthropogenic environmental problems

Career Opportunities: Graduates are employed by industrial operations such as manufacturing and mining industries; federal, state and local environmental and water agencies; environmental firms; utilities; nongovernmental organizations; and international agencies such as the United States Environmental Protection Agency.

Nations and the World Bank.

Professional Licensure: ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (<https://admission.asu.edu/academics/licensure>) webpage.

Students should note that not all programs within the Ira A. Fulton Schools of Engineering lead to professional licensure.

Environmental and Resource Management (Water Management), MS (ESERMWTMS)

Online Degree Search Title: Environmental and Resource Management (Water Management), MS

Campus: Polytechnic

Program Description: The MS program in environmental and resource management provides students who have a background in the sciences, engineering, management, natural resources management, environmental health and safety, or other affiliated areas with the regulatory and technical background they need to mitigate the environmental impact of industrial sources of pollution, ensure compliance with environmental regulations, and manage and preserve engineered and natural ecosystems.

The concentration in water management focuses on issues of water quality, supply, treatment, reclamation, conservation and augmentation strategies. This program is especially appropriate for people who work in municipal, state, federal and tribal water and environmental agencies; water providers to urban and agricultural users; people who work in manufacturing and mining industries; as well as those interested in sustainable development in this country and around the world.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Environmental Science, BA
- Environmental Science, BS
- Environmental and Resource Management, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

ERM 533 Water and Wastewater Treatment Technologies (3)

ERM 535 Water Law and Policy (3)

Electives or Research (9--15 credit hours)

Culminating Experience (0--6 credit hours)

ERM 593 Applied Project (3)

ERM 599 Thesis (6)

portfolio (0)

written comprehensive exam (0)

Additional Curriculum Information

Students choose one of the culminating experiences listed above. Thesis students take nine credit hours of electives or research; applied project students take 12 credit hours of electives or research; and portfolio and written comprehensive exam students take 15 credit hours of electives or research.

Students should see the academic unit for the approved course list for electives or research. Other coursework may be used with the approval of the academic unit.

The thesis and applied project options have an oral defense.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a U.S. bachelor's or master's degree from a regionally accredited institution or the equivalent of a U.S. bachelor's degree from an international institution that is officially recognized by that country in engineering, physical sciences, mathematics or a similar field.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in their first bachelor's degree or in the last 60 hours of their first bachelor's degree program; a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in nine semester hours of graduate coursework from a U.S. institution; or a cumulative minimum GPA of 3.00 (scale is 4.00 = "A") in an applicable conferred master's degree program from a regionally accredited college or university.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- professional resume
- two letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Applicants should see the Graduate Admission Services website (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) for more information.

Global Launch (<https://globallaunch.asu.edu/learn-english/online-english/english-for-admission>) at ASU offers an online alternative to standardized testing for international students who are seeking admission to ASU but need proof of English proficiency.

If the applicant does not meet the minimum GPA requirements, the application may still be considered. In certain cases, demonstrated aptitude through professional experience or additional postbaccalaureate education is considered.

Unofficial transcripts may be submitted at time of application. If admitted, applicants must then submit official transcripts to ASU Graduate Admission Services.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Apply sustainable development practices and trends to water management systems
- Apply legal principles and concepts as described in environmental laws and regulations in order to manage engineered, industrial and natural water systems
- Apply management, scientific and technical solutions to address water management challenges and problems

Career Opportunities: Graduates are employed by industrial operations such as manufacturing and mining industries; federal, state and local environmental and water agencies; environmental firms; utilities; international agencies such as the United Nations and the World Bank; and NGOs.

Professional Licensure: ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (<https://admission.asu.edu/academics/licensure>) webpage.

Students should note that not all programs within the Fulton Schools of Engineering lead to professional licensure.

Environmental Engineering, MS (ESEVEMS)

Online Degree Search Title: Environmental Engineering, MS

Campus: Tempe

Program Description: The MS program in environmental engineering is designed for students who have a background in agricultural, biological, chemical, civil or environmental engineering or related fields.

The program provides students with advanced knowledge that can be applied when addressing grand challenges facing society, such as how to supply clean water and safe food, design a future without pollution, recover valuable resources from waste, and create healthy and smart cities.

Environmental engineers study nanotechnology, biotechnology and sustainable engineering.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

Civil Engineering, BSE
Environmental Engineering, BSE

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a thesis, or 30 credit hours and a written comprehensive exam, or 30 credit hours including the required applied project course (EVE 593).

Required Core (12 credit hours)

CEE 561 Physical-chemical Treatment of Water and Waste (3)
CEE 562 Environmental Biochemistry and Waste Treatment (3)
CEE 563 Environmental Engineering Chemistry (3)
CEE 567 Environmental Microbiology (3)

Electives or Research (6-12 credit hours)

Other Requirements (6 credit hours)

CEE 560 Soil and Groundwater Remediation (3)
CEE 564 Contaminant Fate and Transport (3)
EVE 568 Environmental Risk Assessment (3)
EVE 571 Water Quality Modeling (3)

Culminating Experience (0-6 credit hours)

EVE 593 Applied Project (3) or
EVE 599 Thesis (6) or
written comprehensive exam (0)

Additional Curriculum Information

Students complete a thesis, complete an applied project or take a written comprehensive exam as the culminating experience. Regardless of the culminating experience chosen, all students in the program complete six credit hours from the Other Requirements course list. Other Requirement coursework may be substituted with approval of the academic unit.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in environmental engineering, chemical engineering, civil engineering, agricultural engineering, biological engineering or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or they must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Those seeking a teaching assistantship must demonstrate proficiency in spoken English with a score of 55 or better on the Speaking Proficiency English Assessment Kit or a score of 26 on the speaking portion of the TOEFL.

The student's credentials for admission are evaluated by the graduate program chair. A student whose undergraduate degree is not in environmental engineering or a related field is required to take appropriate undergraduate courses as deficiency courses to establish a base of knowledge in the discipline. Deficiencies for admission to the graduate degree program are specified at the time of admission.

Applicants are strongly encouraged to submit a professional resume and personal statement.

Career Opportunities: Graduates with a master's degree in environmental engineering are employed in engineering consulting companies, private industry, local and federal government and nongovernmental organizations.

Graphic Information Technology, MS (ESGITMS)

Online Degree Search Title: Graphic Information Technology, MS

Campus: Polytechnic, Online

Program Description: The MS program in graphic information technology provides students the opportunity to study within the various areas of graphics and cross-media design. Courses offered provide students with a working knowledge of the technology and management required in the diverse graphic industries. Possible course tracks include cross-media design, user experience and user interface, front-end web design and development, and the business of design.

This program prepares students to be industry leaders who develop and manage content through numerous communication and distribution modes. Creative and comfortable with complex digital technology, graduates are innovative problem-solvers prepared for leading roles in the rapidly evolving graphics industry.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

- Applied Science (Graphic Information Technology), BAS
- Applied Science (Internet and Web Development), BAS
- Graphic Information Technology, BS
- Graphic Information Technology (Full-Stack Web Development), BS
- Graphic Information Technology (User Experience), BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a portfolio, or 30 credit hours and a thesis, or 30 credit hours including the required applied project course (GIT 593).

Required Core (3 credit hours)

GIT 537 Current Issues in Cross Media Production (3)

Electives or Research (18--24 credit hours)

Other Requirement (3 credit hours)

GIT 500 Research Methods (3)

Culminating Experience (0--6 credit hours)

GIT 593 Applied Project (3) or

GIT 599 Thesis (6) or

portfolio (0)

Additional Curriculum Information

Students select an applied project, thesis or portfolio for the culminating experience. The culminating experience selected determines how many electives or research credit hours the student needs to take to complete 30 credit hours for the program.

Note that the thesis option is only available to on-campus students.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's degree or master's degree from a regionally accredited institution in a related field such as graphic design, web design and development, photography, videography, motion graphics and visual effects, or user experience design.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in their first bachelor's degree program or in the last 60 hours of their first bachelor's degree program; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in nine semester hours of graduate coursework from a U.S. institution; or a cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable conferred master's degree program from a regionally accredited college or university.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- professional resume
- writing sample
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Global Launch at ASU (<https://globallaunch.asu.edu/learn-english/asu-admission>) offers an online alternative to standardized testing for international students who are seeking admission to ASU and need proof of English proficiency.

Unofficial transcripts may be submitted at the time of application. If admitted, applicants must then submit official transcripts to ASU Admission Services.

If the applicant does not meet the minimum GPA requirements, the application may still be considered. In certain cases, demonstrated aptitude through professional experience or additional postbaccalaureate education is considered.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/graphic-information-technology-ms/>) for program descriptions and to request more information.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following

program outcomes:

- Analyze current cross-media research to determine appropriate standards for application to proposed solutions.
- Build client- and audience-centered design solutions through the synthesis of best practices and research data.
- Conduct industry-relevant research and communicate results effectively to diverse audiences.

Career Opportunities: This degree program prepares graduates for management positions in diverse graphic technology industries, such as:

- art director
- creative director
- cross-media designer
- digital asset manager
- digital media artist
- front-end designer or developer
- motion graphics artist
- pre-media, digital printing and publishing designer
- social media content creator
- user experience designer
- UX/UI engineer

Human Systems Engineering, MS (ECAPSYCHMS)

Online Degree Search Title: Human Systems Engineering, MS

Campus: Polytechnic

Program Description: The MS program in human systems engineering in the Ira A. Fulton Schools of Engineering provides students with a deep understanding of the science of human performance and experience.

Students learn to use methods and tools that enable them to apply this understanding, to design and problem-solve in a wide variety of domains such as product usability, learning design, sports performance, cyber security, human-robot teaming, and workplace and patient safety.

A broad range of professions needs experts in human factors to work on problems that involve an understanding of human performance. Students gain practical experience by tackling projects that examine contemporary issues such as cell phones as a source of driver distraction, detection of improvised explosive devices, process optimization in health care and even control of unmanned vehicles.

Interest areas include user experience, aviation human factors, cognitive performance, consumer psychology, transportation human factors, patient safety, effective teamwork, human-robot teaming, health psychology, learning optimization, social cognition, threat detection and sports psychology.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

Human Systems Engineering, BS

Human Systems Engineering (User Experience), BS

Technological Leadership, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a portfolio, or 30 credit hours and a thesis, or 30 credit hours including the required applied project course (HSE 593).

Required Core (12 credit hours)

HSE 520 Methods and Tools in Applied Cognitive Science (3)
HSE 530 Intermediate Statistics for Human Systems Engineering (3)
HSE 531 Data Analytics: Modeling Human Subjects Data (3)
HSE 542 Foundations of Human Systems Engineering (3)

Electives and Research (12--18 credit hours)

Culminating Experience (0--6 credit hours)

HSE 593 Applied Project (6) or
HSE 599 Thesis (6) or
portfolio (0)

Additional Curriculum Information

Students have the option of doing a thesis (with industry guidance), an applied project to develop and demonstrate professional knowledge and skills or a portfolio as the culminating experience.

Students selecting the thesis option work on the thesis, under faculty supervision, for at least one calendar year. The first three thesis credits are devoted to developing an idea and preparing a proposal for approval by a faculty committee. The next three credits allow for preparing the details of research design and data collection for the thesis (materials, computer programs, experimental test beds, questionnaires, etc.). The final six credits are devoted to collecting and analyzing data and writing and revising the thesis under the direction of the student's committee chair. Students defend the thesis in an oral examination.

In cases in which a student is engaged in a project initiated by industry, they may opt for the applied project option. Students carry out the applied project, under faculty supervision and guided by industry, in a calendar year in which the 12 credit hours outside of the core are allocated to a combination of research, applied project and report writing appropriate to the goals of the student and the industry partner. In all cases, the project culminates in a substantial written report followed by a comprehensive oral examination covering the project and other materials from required courses.

The portfolio should demonstrate a high level of mastery of the principles and practice of human systems engineering through a compilation of work that the student has completed through the course of their graduate study. While the specific details depend on the student's specialization, all portfolios must describe three notable projects or academic accomplishments that the student has completed through the course of graduate study that illustrate the evolution and advancement of the student's technical expertise and mastery of the field of human systems engineering. Submitted with the portfolio is a written document comprised of an overview of graduate experience and descriptions of the projects presented in the portfolio.

Applied project students take 12 elective credit hours, thesis students take nine elective credit hours plus three credit hours of HSE 592 Research and portfolio students take 18 elective credits.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in psychology or a related field (including engineering, computer science or business) from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in their first bachelor's degree program or the last 60 hours of their first bachelor's degree program; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in nine semester hours of graduate coursework from a U.S. institution; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable conferred master's degree program from a regionally accredited college or university.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of purpose describing professional and academic aspirations
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The letters of recommendation should be from college professors, employers (in a human factors-related field) or a combination of both academic and professional references.

Applicants to this program generally have completed an undergraduate course in statistics.

Unofficial transcripts may be submitted at time of application. If admitted, applicants must then submit official transcripts to ASU Graduate Admission Services.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Apply the methods of human systems engineering to test a hypothesis or solve an applied problem
- Conduct independent research to address problems in the space of Human Systems Engineering.
- Apply the appropriate statistical analysis, address violations of assumptions (e.g., sphericity), & run the analysis using SPSS.

Career Opportunities: This master's degree program prepares students for industry and government careers in positions such as:

- game designer
- human factors engineer
- human systems integrator
- information systems designer
- interface designer
- military scientist
- usability engineer
- user experience designer

Graduates may work as a member of a design team for a product or system.

Recent graduates are working at places like Intel, Boeing, GoDaddy, Mayo Clinic, PayPal, Motorola, Google and the Air Force Research Lab. Recipients of this master's degree also have gone on to pursue doctorates at ASU and other prestigious institutions.

Human Systems Engineering, PHD (TSSMACSPHD)

Online Degree Search Title: Human Systems Engineering, PhD

Campus: Polytechnic

Program Description: Human systems engineering describes a growing transdisciplinary field consisting of the disciplines of psychological sciences and engineering. This field explores how people interact with technological and social systems in contexts that include transportation, medicine, military, computing and other complex systems.

The program broadly pulls from the areas of human factors and cognitive science. Human factors provides training in the foundation for the application of psychological and physiological principles to the engineering and design of products, processes and systems. Cognitive science provides the foundation necessary for integrating human capabilities and limitations into complex sociotechnical systems (i.e., the practice of cognitive engineering), and the application of cognitive science relies heavily on human systems engineering techniques.

A large domain exists in which the combination of human factors and applied cognitive science with a systems approach is imperative for the design of complex sociotechnical systems. Examples include:

- the design and evaluation of learning settings and technology (learning engineering)
- development of intelligent agents that work well with humans
- driving simulators for research on driver distraction
- dynamical systems models of team interaction
- gaming simulators for studying business decision-making
- human-in-the-loop simulation studies of cybersecurity analysis
- medical simulations for health care research
- models of cognitive states and processes of sociocultural systems
- nuclear control room simulations for improved human system integration
- pilot training research using aircraft simulators
- simulations of consumer behavior
- tests of future airspace control concepts using air traffic control simulators

This PhD program in human systems engineering is designed to ensure graduates are well-grounded and skilled in the methods of human systems engineering. The curriculum provides transdisciplinary, research-driven training in the computing, engineering, technology, applied cognitive science and human systems integration.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Core (12 credit hours)

HSE 520 Methods and Tools in Applied Cognitive Science (3)

HSE 521 Methods and Tools in Human Systems Engineering (3)

HSE 540 Foundations of Applied Cognitive Science (3)

HSE 542 Foundations of Human Systems Engineering (3)

Foundations (6 credit hours)

Methods and Tools (3 credit hours)

Applications (9 credit hours)

Electives (36 credit hours)

Research (6 credit hours)

HSE 792 Research (6) or additional electives as selected by the PhD committee

Culminating Experience (12 credit hours)

HSE 799 Dissertation (12)

Additional Curriculum Information

When approved by the student's supervisory committee and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this degree. If students do not have a previously awarded master's degree, the 30 hours of coursework are made up of electives.

Electives are identified by the committee and approved by executive committee's approval.

No more than six credit hours of 400-level course work can be included on a graduate plan of study.

Students may petition the HSE Executive Committee to allow HSE-relevant or dissertation-relevant courses to be included as HSE elective courses.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a minimum of a bachelor's degree in psychology, engineering, cognitive science, computer science or a closely related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in their first bachelor's degree program or in the last 60 hours of their first bachelor's degree program; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in nine semester hours of graduate coursework from a U.S. institution; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable conferred master's degree program from a regionally-accredited college or university.

All applicants must submit:

- graduate admission application and application fee
- official transcripts from each college or university attended
- personal statement
- professional resume
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Applicants should review the Graduate Admission Services (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) website. Global Launch at ASU offers an online alternative to standardized testing for international students who are seeking admission to ASU but need proof of English

proficiency.

If the applicant does not meet the minimum GPA requirements, the application may still be considered. In certain cases, demonstrated aptitude through professional experience or additional postbaccalaureate education is considered.

Unofficial transcripts may be submitted at time of application. If admitted, applicants must then submit official transcripts to ASU Graduate Admission Services.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Graduates with a PhD in human systems engineering will synthesizing research in human systems engineering into a literature review.
- Graduates with a PhD in human systems engineering will be able to answer research questions using the methods and tools of human systems engineering area.
- Graduates with a PhD in human systems engineering will be able to independently design an approach for addressing the questions, collecting, analyzing and interpreting data in the area of human systems engineering.

Career Opportunities: Graduates are well-grounded in cognitive science and skilled in its methods and applications. Employers (e.g., Department of Defense, Federal Aviation Administration, Nuclear Regulatory Commission, hospitals) have an ever-increasing demand for personnel who can bridge the gap between rigorous science and solutions to contemporary problems. This program prepares students for industry, academic and government careers in positions such as:

- human factors engineer
- human systems integrator
- information systems designer
- interface designer
- military scientist
- usability engineer
- user experience designer

Graduates may work as a member of a design team for a product or system.

Human Systems Engineering (Aviation Human Factors), MS (ESHSEAHFMS)

Online Degree Search Title: Human Systems Engineering (Aviation Human Factors), MS

Campus: Polytechnic

Program Description: The MS program in human systems engineering with a concentration in aviation human factors provides students with a deep understanding of the science of human performance and experience in the aerospace and aviation industries.

Students in this program participate in courses focusing on methods and tools in applied cognitive science, foundations of human systems engineering, uses of simulation, aviation physiology and crew resource management, among other topics. Students gain an understanding of cognitive science and human systems concepts and tools that enables them to effectively analyze, design, and develop aerospace and aviation products, workspaces, operations and training programs.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

30 credit hours and a portfolio, or 30 credit hours and a thesis, or 30 credit hours including the required applied project course (HSE 593).

Required Core (12 credit hours)

HSE 520 Methods and Tools in Applied Cognitive Science (3)

HSE 530 Intermediate Statistics for Human Systems Engineering (3)

HSE 531 Data Analytics: Modeling Human Subjects Data (3)

HSE 542 Foundations of Human Systems Engineering (3)

Concentration (6 credit hours)

AMT 533 Aviation Systems and Psychology (3)

AMT 565 Safety in Complex Systems (3)

Electives and Research (6 or 12 credit hours)

Culminating Experience (0 or 6 credit hours)

HSE 593 Applied Project (6) or

HSE 599 Thesis (6) or

portfolio (0)

Additional Curriculum Information

For electives and research coursework, enrollment in HSE 592 Research for three credit hours is required for students completing a thesis and optional for students completing the applied project or portfolio culminating experience. Students in all culminating experience options should contact the academic unit for an approved electives list.

Students completing a portfolio for the culminating experience must complete 12 credit hours of electives and research coursework, while students completing an applied project or thesis complete six credit hours of electives and research coursework.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in engineering, aeronautical management, psychology or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in their first bachelor's degree program or in the last 60 hours of their first bachelor's degree program; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in nine semester hours of graduate coursework from a U.S. institution; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable conferred master's degree program from a regionally accredited college or university.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- curriculum vitae or professional resume
- professional statement
- research summary
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. Global Launch at ASU

(<https://globallaunch.asu.edu/learn-english/online-english/english-for-admission>) offers an online alternative to standardized testing for international students who are seeking admission to ASU but need proof of English proficiency.

Unofficial transcripts may be submitted at time of application. If admitted, applicants must then submit official transcripts to ASU Graduate Admission Services.

The letters of recommendation should be from college professors, employers (in a human factors or aviation-related field) or a combination of both academic and professional references.

Applicants to this program generally have completed an undergraduate course in statistics.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Choose the appropriate statistical analysis, address violations of assumptions (e.g., sphericity), & run the analysis using SPSS.
- Apply the methods of human systems engineering to test a hypothesis or solve an applied problem
- Conduct independent research to address problems in the space of aviation systems and human performance in those systems.

Career Opportunities: Graduates of this program are prepared for management, research, and training positions in aerospace and aircraft manufacturing, airlines, flight training and government.

Human Systems Engineering (Health Systems), MS (ESHSEHSMS)

Online Degree Search Title: Human Systems Engineering (Health Systems), MS

Campus: Polytechnic

Program Description: The MS program in human systems engineering with a concentration in health systems provides current and future managers with the technical expertise they will need to lead efficient health care systems.

Students learn to identify needs through system modeling, field research and analytics to improve existing health care systems. This concentration program also allows students to perform research and develop innovative approaches to transform health care from reactive to proactive systems, which reflect National Institute of Health initiatives.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

30 credit hours and a portfolio, or 30 credit hours and a thesis, or 30 credit hours including the required applied project course (HSE 593).

Required Core (12 credit hours)

HSE 520 Methods and Tools in Applied Cognitive Science (3)

HSE 530 Intermediate Statistics for Human Systems Engineering (3)

HSE 531 Data Analytics: Modeling Human Subjects Data (3)

HSE 542 Foundations of Human Systems Engineering (3)

Concentration (6 credit hours)

BMI 605 Health Information Systems and Applications (3)

BMI 613 Workflow Analysis and Redesign in Health Systems Engineering (3)

BMI 616 Clinical Decision Support and Evidence-based Medicine (3)

HCD 502 Foundations of U.S. Health Systems and Design (3)

HCD 570 Process Engineering (3)

HCD 575 Health Care Transformation and Professionalism (3)

Electives and Research (0 or 9 credit hours)

Other Requirements (3 credit hours)

HSE 525 Health and Human Systems Engineering (3)

Culminating Experience (0 or 6 credit hours)

HSE 593 Applied Project (6) or

HSE 599 Thesis (6) or

portfolio (0)

Additional Curriculum Information

For electives and research coursework, enrollment in HSE 592 Research for three credit hours is required for students completing a thesis, and optional for students completing the applied project or portfolio culminating experience. Students in all culminating experience options should contact the academic unit for an approved electives list.

Students completing a portfolio for the culminating experience must complete nine credit hours of electives and research coursework.

Other requirement course HSE 525 is required for all students, but in some situations may be substituted with academic unit approval.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in engineering, health, nutrition, psychology or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in their first bachelor's degree program or in the last 60 hours of their first bachelor's degree program; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in nine semester hours of graduate coursework from a U.S. institution; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable conferred master's degree program from a regionally accredited college or university.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- curriculum vitae or professional resume
- professional statement
- research summary
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Global Launch at ASU (<https://globallaunch.asu.edu/learn-english/online-english/english-for-admission>) offers an online alternative to standardized testing for international students who are seeking admission to ASU but need proof of English proficiency.

Unofficial transcripts may be submitted at time of application. If admitted, applicants must then submit official transcripts to ASU Graduate Admission Services.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Apply the appropriate statistical analysis, address violations of assumptions (e.g., sphericity), & conduct analyses using SPSS.
- Apply the methods of human systems engineering to test a hypothesis or solve an applied problem
- Conduct independent research to address problems in the space of human performance in healthcare systems.

Career Opportunities: Health care is a growing sector of the economy, accounting for 17% of the U.S. Gross Domestic Product in 2022 (<https://www.cms.gov/data-research/statistics-trends-and-reports/national-health-expenditure-data/historical> (<https://www.cms.gov/data-research/statistics-trends-and-reports/national-health-expenditure-data/historical>)). Recent changes to the health care landscape at the federal level have led to increasing demand for measurable increases in efficiency and effectiveness of care delivery. To that end, technologies are deployed to manage, track and measure treatment effectiveness, patient satisfaction, provider reimbursement and process improvement, all of which require understanding of the human system and the complex processes involved in this work. Thus, human systems engineering tools and techniques can create efficiencies in all aspects of care delivery in which a human is involved to improve system performance. Related to human systems engineers in health care, employment of industrial engineers is projected to grow 12% between 2022 and 2032, which is also faster than average for all occupations (Bureau of Labor Statistics).

Human Systems Engineering (Intelligent Systems), MS (ESHSEISMS)

Online Degree Search Title: Human Systems Engineering (Intelligent Systems), MS

Campus: Polytechnic

Program Description: Intelligent technologies have seen rapid growth in the last decade. These technologies are now seen within public sector industries such as military and space exploration, private sectors such as medical manufacturing, and the education sector. The rise of learning engineering focuses on interactive e-learning environments and the use of learning technology within classrooms and training settings. The real change will be the way humans can interact with the new robotic and AI assistant technologies.

The MS program in human systems engineering with a concentration in intelligent systems provides students with a deep understanding of the science of human performance and experience in the engineering of intelligent systems, robotics and autonomous systems industries.

Students in this program participate in courses focusing on methods and tools in applied cognitive science and foundations of human systems

engineering, including uses of simulation and robotics, among other topics.

This concentration prepares students for facilitating the future of work when humans will work closely with technology in the military, space exploration, education, manufacturing, medicine and agriculture.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Engineering (Robotics), BSE
- Information Technology, BS
- Technological Leadership, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a portfolio, or 30 credit hours and a thesis, or 30 credit hours including the required applied project course (HSE 593).

Required Core (12 credit hours)

HSE 520 Methods and Tools in Applied Cognitive Science (3)

HSE 530 Intermediate Statistics for Human Systems Engineering (3)

HSE 531 Data Analytics: Modeling Human Subjects Data (3)

HSE 542 Foundations of Human Systems Engineering (3)

Concentration (9 credit hours)

Electives and Research (3 or 9 credit hours)

Culminating Experience (0 or 6 credit hours)

HSE 593 Applied Project (6) or

HSE 599 Thesis (6) or

portfolio (0)

Additional Curriculum Information

For electives and research coursework, enrollment in HSE 592 Research for three credit hours is required for students completing a thesis and optional for students completing the applied project or portfolio culminating experience. Students in all culminating experience options should contact the academic unit for an approved electives list.

Students completing a portfolio for the culminating experience must complete nine credit hours of electives and research coursework.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in engineering, robotics engineering, mathematics or a related field from a regionally accredited institution. Students must have sufficient mathematics background for this concentration, including up to calculus III and linear algebra.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in their first bachelor's degree program or in the last 60 hours of their first bachelor's degree program; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in nine semester hours of graduate coursework from a U.S. institution; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable conferred master's degree program from a regionally accredited college or university.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- curriculum vitae or professional resume
- professional statement
- research summary
- three letters of recommendation

- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Global Launch at ASU (<https://globallaunch.asu.edu/learn-english/online-english/english-for-admission>) offers an online alternative to standardized testing for international students who are seeking admission to ASU but need proof of English proficiency.

Unofficial transcripts may be submitted at time of application. If admitted, applicants must then submit official transcripts to ASU Graduate Admission Services.

The letters of recommendation should be from college professors, employers (in a human factors or intelligent systems-related field), or a combination of both academic and professional references.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Apply the appropriate statistical analysis, address violations of assumptions (e.g., sphericity), & conduct analyses using SPSS to answer Intelligent Systems-based questions.
- Apply the methods of human systems engineering create hypothesis or solve an applied problem related to Intelligent Systems.
- Conduct independent research to address problems in the space of intelligent systems

Career Opportunities: Graduates skilled in human interactions with robots, artificial intelligence agents and autonomous systems are needed to design the future of work. To do this, graduates are equipped to join teams of human and nonhuman agents who interact safely and effectively with a positive impact on society and human well-being. The individuals who design those interactions and who decide what tasks to allocate to AI need to understand human capabilities and limitations and be able to work on multidisciplinary teams to ensure human considerations are accounted for.

Human Systems Engineering (User Experience Research), MS (ESHSEUERMS)

Online Degree Search Title: Human Systems Engineering (User Experience Research), MS

Campus: Polytechnic

Program Description: The MS program in human systems engineering with a concentration in user experience research focuses on how to conduct human-centered and experimental research to produce products that are useful, usable, desirable, efficient, and easy to learn and remember. It focuses on the research, design and validation of system components an end user interacts with, including software user interfaces, documentation, help systems, user support, aesthetics and communication.

Students may complement their education with courses in graphic information technology, technical communications and entrepreneurship to strengthen their skills in information architecture, visual design and user interface prototyping. Additionally, hands-on user experience projects in these classes help students build portfolios necessary for entry-level positions.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Human Systems Engineering (User Experience), BS
Technological Leadership, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply

(<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a portfolio, or 30 credit hours and a thesis, or 30 credit hours including the required applied project course (HSE 593).

Required Core (12 credit hours)

HSE 520 Methods and Tools in Applied Cognitive Science (3)

HSE 530 Intermediate Statistics for Human Systems Engineering (3)

HSE 531 Data Analytics: Modeling Human Subjects Data (3)

HSE 542 Foundations of Human Systems Engineering (3)

Concentration (9 credit hours)

HSE 521 Methods and Tools in Human Systems Engineering (3)

HSE 525 Health and Human Systems Engineering (3)

TWC 511 Principles of Visual Communication (3)

TWC 514 Visualizing Data and Information (3)

TWC 544 User Experience (3)

Electives or Research (3 or 9 credit hours)

Culminating Experience (0 or 6 credit hours)

HSE 593 Applied Project (6) or

HSE 599 Thesis (6) or

portfolio (0)

Additional Curriculum Information

For electives and research coursework, enrollment in HSE 592 Research for three credit hours is required for students completing a thesis and optional for students completing the applied project or portfolio culminating experience. Students in all culminating experience options should contact the academic unit for an approved electives list.

Students completing a portfolio for the culminating experience must complete nine credit hours of electives or research coursework, while students completing an applied project or thesis must complete three credit hours of electives or research coursework.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in engineering, user experience, psychology or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in their first bachelor's degree program or in the last 60 hours of their first bachelor's degree program; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in nine semester hours of graduate coursework from a U.S. institution; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable conferred master's degree program from a regionally-accredited college or university.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- curriculum vitae or professional resume
- professional statement
- research summary
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Unofficial transcripts may be submitted at time of application. If admitted, applicants must then submit official transcripts to ASU Admission Services.

The letters of recommendation should be from college professors, employers in a human factors-related field or a combination of both academic and professional references.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Apply the appropriate statistical analysis, address violations of assumptions (e.g., sphericity), & conduct analyses using SPSS to answer User Experience Research based questions.
- Apply the methods of human systems engineering create hypothesis or solve an applied problem related to User Experience Research.
- Conduct an independent evaluation to address problems in the space of human performance in User Experience Research.

Career Opportunities: This master's degree program prepares students for industry and government careers in positions such as:

- game designer
- human factors engineer
- human systems integrator
- information systems designer
- interface designer
- military scientist
- usability engineer
- user experience designer

Graduates of the Master of Science program in human systems engineering find employment in user experience design and user experience research at companies like Apple, Hulu, Slack, HP, GoDaddy and Intel.

Industrial Engineering, MS (ESINDENMS)

Online Degree Search Title: Industrial Engineering, MS

Campus: Tempe, Online

Program Description: The industrial engineering MS program prepares students to provide practical and economically efficient solutions to real-life, complex problems --- solutions that require a system-level approach. Examples of these problems include health delivery, food and energy systems, and those that arise in the strategic planning of manufacturing, logistics operations and service industries. Statistics, optimization, computer simulation and advanced analytics are some of the tools used to address these problems.

The industrial engineering program is immersed in the innovation environment that permeates Arizona State University, and its faculty members are internationally recognized for their innovative research projects funded by both government and industry.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Concurrent Program Options:

Students can choose to create their own concurrent degree combination to match their interests by working with their academic advisor during or after their first semester of study. Some concurrent combinations are not possible due to high levels of overlap in curriculum; students should speak with their academic advisor for more details.

This degree is also offered as a concurrent program with the following: W. P. Carey MBA - Online Program

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Engineering Management, BSE
- Industrial Engineering, BSE

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a thesis, or 30 credit hours including a portfolio.

Required Core (12 credit hours)

IEE 505 Information Systems Engineering (3) or IEE 506 Web-enabled Decision Support Systems (3)

IEE 545 Advanced Simulating Stochastic Systems (3) or IEE 561 Production Systems (3)

IEE 572 Design Engineering Experiments (3) or IEE 573 Reliability Engineering (3) or IEE 578 Regression Analysis (3)

IEE 574 Applied Deterministic Operations Research (3) or IEE 575 Applied Stochastic Operations Research Models (3)

Electives (12 or 18 credit hours)

Culminating Experience (0 or 6 credit hours)

IEE 599 Thesis (6) or

portfolio (0)

Additional Curriculum Information

The Master of Science in industrial engineering is a 30 credit hour program with a thesis and a nonthesis track. The thesis track requires 24 credit hours of coursework, six credit hours of thesis, a written thesis and a final oral examination. The nonthesis track requires 30 credit hours of coursework and a portfolio. The thesis track includes 12 credit hours of electives, and the nonthesis track includes 18 credit hours of electives.

Elective coursework includes IEE 500-level coursework and should be selected in consultation with the program advisor.

At the time of admission, students' applications are considered primarily for the nonthesis track. After matriculating at ASU, a student may consult with and receive approval from the industrial engineering faculty to pursue the thesis track.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.20 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts from all institutions attended
- a statement of purpose
- proof of English language proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

At the time of application, all applicants must have successfully completed a minimum of nine credit hours of calculus (Calculus I, II, III) with a grade of "C" (scale is 4.00 = "A") or higher.

A student with any deficiency coursework must complete each deficiency with a grade of "B" or better (scale is 4.00 = "A") within two semesters of admission to the program. Deficiency courses include:

CSE 110 Principles of Programming

CSE 205 Object-oriented Programming and Data Structures

IEE 376 Operations Research Deterministic Techniques/Applications

IEE 380 Probability and Statistics for Engineering Problem Solving

IEE 470 Stochastic Operations Research

MAT 242 Elementary Linear Algebra

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/master-science-industrial-engineering/>) for program descriptions and to request more information.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Conduct advanced modeling from the fields of operations research and management information systems through the use of analysis tools at the MS level
- Apply key theories and methods used in the field of industrial engineering to develop solutions.

- Integrate learning to deliver an organized description of an industrial engineering solution.

Career Opportunities: Industrial engineers integrate people, processes, equipment, information and systems to do things better. Industrial engineering graduates develop, implement and improve processes, operations and systems in industries for manufacturing, services, communications, agriculture or any other field.

Graduates of the Master of Science program in industrial engineering are well suited for careers in logistics, finance, defense, travel and health care.

Industrial Engineering, PHD (ESINDENPHD)

Online Degree Search Title: Industrial Engineering, PhD

Campus: Tempe

Program Description: The PhD program in industrial engineering engages students in fundamental and applied research. The overall educational objective of graduate study in industrial engineering is to improve each student's ability to identify, define and solve problems and perform original research in order to address the underlying causes of these problems. Industrial engineers develop qualitative and quantitative abilities to guide the design and operation of sustainable organizations and systems.

This doctoral program provides students with a rigorous education and with research and educational experiences. A large number of students are involved in applied research projects that are carried out in the context of government or privately funded research. Students have many opportunities to participate in highly impactful research projects and interact with the leaders in the subfield in which they choose to specialize. Many students graduate with significant accomplishments resulting from the work they performed during the course of their doctoral study.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

85 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Core (15 credit hours)

- IEE 605 Foundations of Information Systems Engineering (3)
- IEE 620 Optimization I (3)
- IEE 622 Optimization II (3)
- IEE 640 Probability and Stochastic Processes (3)
- IEE 670 Mathematical Statistics (3)

Electives (42 credit hours)

Research and Internship Required Coursework (16 credit hours)

- IEE 594 Conference and Workshop (1)
- IEE 700 Research Methods (1)
- IEE 784 Teaching Internship (1)
- IEE 790 Reading and Conference (1) or IEE 584 Internship (1)
- IEE 792 Research (12)

Culminating Experience (12 credit hours)

- IEE 799 Dissertation (12)

Additional Curriculum Information

Students are required to complete five core courses within the first year of full-time enrollment in the doctoral program. To be allowed to continue in the program after completion of the core courses, each student must successfully pass a qualifying exam on three of the five core courses.

Eligible students can request a master's in passing after successfully completing the qualifying exam and completing 30 credit hours in the doctoral program.

A written and an oral comprehensive examination are required no later than the semester following completion of 57 credit hours of coursework in the plan of study. The student must also successfully defend the dissertation prospectus and the dissertation research.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.50 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.50 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- a statement of purpose
- GRE scores (optional)
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

ASU does not accept the GRE® General Test at home edition.

At the time of application, all applicants must have successfully completed a minimum of nine credit hours of calculus (Calculus I, II, III) with a grade of "C" or higher (scale is 4.00 = "A").

A student with any deficiency coursework must complete each deficiency with a grade of "B" (3.00) or better within two semesters of admission to the program.

Deficiency courses include:

CSE 110 Principles of Programming
CSE 205 Object-oriented Programming and Data Structures
IEE 376 Operations Research Deterministic Techniques/Applications
IEE 380 Probability and Statistics for Engineering Problem Solving
IEE 470 Stochastic Operations Research
MAT 242 Elementary Linear Algebra

Students should see the program website for application deadlines.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Develop advanced modeling to solve problems/issues in the field of Industrial Engineering.
- Produce novel scholarly research that makes a unique contribution to the field of industrial engineering.
- Develop innovative methodology, algorithms, and tools to solve a complex systems problem.

Career Opportunities: Graduates of the program are prepared for careers in academia, government and industry. In these fields, graduates are qualified to teach, conduct advanced research, and develop and make use of advanced techniques for the operation of their businesses.

Information Technology, DIT (ESIFTDIT)

Online Degree Search Title: Information Technology, DIT

Campus: Polytechnic

Program Description: The DIT program is designed for innovative leaders who wish to improve their knowledge and skills in the technology innovations that are key to leading and influencing organizations. The program provides a multidisciplinary approach that leverages multiple courses for building competencies to innovate reliable, effective and secure communications networks; to design and implement secure systems for both employees and customers; and to leverage data models and architecture to support business decisions from data analytics.

Students develop the engineering skills and professional competencies of collaboration, communication, agility and teamwork to advance their leadership career. Students utilize leading technologies, including cloud computing, artificial intelligence, cybersecurity and data science to be prepared to work in large corporations, government agencies and small businesses.

GI Bill® benefits

This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at <https://www.benefits.va.gov/gibill/> (<https://www.benefits.va.gov/gibill/>).

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

60 credit hours including required applied project course (IFT 793).

Required Core (12 credit hours)

IFT 601 Applied Cybersecurity Systems Analysis (3)

IFT 602 Data Science Programming and Optimization (3)

IFT 603 Technology Strategic Leadership and Ethics (3)

IFT 604 Applied Research and Development Solutions (3)

Restricted Electives (21 credit hours)

Electives or Research (18 credit hours)

Other Requirements (3 credit hours)

IFT 701 Applied Doctoral Project Initiation (3)

Culminating Experience (6 credit hours)

IFT 793 Applied Project (6)

Additional Curriculum Information

Students should consult with advising for recommended 500- and 600-level electives.

When approved by the student's supervisory committee and the Graduate College, 15 credit hours from a previously awarded master's degree can be applied to this degree.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in information technology, information sciences, cybersecurity, computer science, computer systems engineering, computer engineering, software engineering or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admissions application and application fee
- official transcripts
- letter of intent
- professional resume
- two letters of recommendation
- proof of English proficiency

Additional Admission Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of current residency.

The resume should list education, work experience and community service. There are no minimum requirements for the resume. The resume is an opportunity for the committee to learn more about the candidate's interests.

Letters of recommendation should come from professors, managers or supervisors or from professional associates.

Career Opportunities: The Doctor of Information Technology program includes in-depth courses in information technology with a balanced exposure to networking, security and data science. Graduates possess the skills necessary to aspire to senior IT leadership positions in multiple industries such as corporations, governmental organizations and industrial research centers.

Graduates have acquired expertise in a wide variety of industry-specific areas, including:

- cloud and distributed computing
- computer systems design and architecture
- data analytics and big data
- database information management
- information security
- natural language processing

Information Technology, MS (TSIFTMS)

Online Degree Search Title: Information Technology, MS

Campus: Polytechnic, Online

Program Description: The MS program in information technology is a transdisciplinary program that prepares students to be industry leaders in the public and private sectors.

Students gain the technical competencies they need to design and develop information technology projects that interconnect people, process and technology to meet the needs of stakeholders and users.

The coursework emphasizes core technologies, and students select from two areas of focus: information technology security or information systems management.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website.

The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

Information Technology, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a portfolio, or 30 credit hours including the required applied project course (IFT 593).

Required Core (12 credit hours)

IFT 510 Principles of Computer and Information Technology Architecture (3)

IFT 520 Advanced Information Systems Security (3)

IFT 530 Advanced Database Management Systems (3)

IFT 540 Information Systems Development (3)

Open Elective (3 or 6 credit hours)

Focus Area Electives (12 credit hours)

Culminating Experience (0 or 3 credit hours)

IFT 593 Applied Project (3) or
portfolio (0)

Additional Curriculum Information

Students should see the academic unit for a complete list of approved coursework.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in information technology, computer science, applied computing, computer engineering or a closely related field from a regionally accredited college or university.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in their first bachelor's degree program or in the last 60 hours of their first bachelor's degree program; a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in nine semester hours of graduate coursework from a U.S. institution; or a cumulative GPA of 3.00 (scale is 4.00 = "A") from an applicable conferred master's degree program in a regionally accredited college or university.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- professional resume
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Applicants should see the graduate admission services website (<https://admission.asu.edu/apply/international/graduate/english-proficiency>).

Unofficial transcripts may be submitted at time of application. If admitted, applicants must then submit official transcripts to graduate admission services.

If the applicant does not meet the minimum GPA requirements, the application may still be considered. In certain cases, demonstrated aptitude through professional experience or additional postbaccalaureate education is considered.

The applicant's undergraduate GPA and depth of preparation in information technology and computer science are the primary factors that affect admission.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/information-technology-ms/>) for program descriptions and to request more information.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Integrate theories and concepts of information technology in their master applied technology research and industry careers.
- Build client-centered technology solution through the synthesis of best practices and transdisciplinary research.
- Conduct industry relevant research and communicate results effectively to diverse audiences.

Career Opportunities: Graduates of the information technology program, which couples technical skills with the business skills needed to manage technical functions, are well qualified for careers in the management of IT departments. Some graduates pursue careers as technical support staff based on the focus area and secondary skills they achieve. Graduates also have the ability to manage technical professionals within their focus areas.

Lean Six Sigma Black Belt (Certificate), Certificate (ESLSSBGRCT)

Online Degree Search Title: Lean Six Sigma Black Belt (Graduate Certificate)

Campus: Tempe, Online

Program Description: The Lean Six Sigma Black Belt graduate certificate is designed for engineers and managers who oversee tactical and strategic projects as well as various operational functions in their organizations.

This certificate program provides students with a set of contemporary tools to produce measurable improvements in business processes. Students gain an in-depth understanding of the Six Sigma define, measure, analyze, improve, control process and the tools used to achieve effective process and product improvement. They develop the leadership and team-building skills necessary for overseeing continuous improvement projects with many stakeholders, and they understand how lean principles and design for Six Sigma fit into the overall task of product and process improvement.

The culminating experience is in line with the black belt certification requirements used nationwide in similar certification programs.

Degree Requirements:

15 credit hours including the required capstone course (IEE 585).

Required Core (6 credit hours)

IEE 570 Advanced Quality Control (3)

IEE 581 Six Sigma Methodology (3)

Electives (6 credit hours)

Culminating Experience (3 credit hours)

IEE 585 Six Sigma Capstone (3)

Additional Curriculum Information

For electives, students should see the academic unit for the approved course list.

A minimum grade of "B" is required for capstone course IEE 585.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Required Prerequisite Courses:

CSE 110 Principles of Programming, or equivalent

IEE 380 Probability and Statistics for Engineering Problem Solving, or equivalent

MAT 267 Calculus for Engineers III, or equivalent

No more than 40% of coursework toward the requirements of a graduate certificate may be completed prior to admission to the certificate program.

This certificate is also available through the Pathways for the Future program (<https://pff.asu.edu/>).

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/certificates/lean-six-sigma-black-belt-graduate-certificate/>) for program descriptions and to request more information.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Apply the appropriate analytical and statistical methods when managing Lean Six Sigma projects.
- Apply the Lean Six Sigma methodology to the design and improvement of processes, products, and services.

Career Opportunities: Six Sigma is a proven systematic approach to continuous improvement of critical processes in a wide range of industrial environments such as banks, manufacturing facilities and hospitals. The American Society of Quality defines the certified Six Sigma Black Belt as a professional who can explain Six Sigma philosophies and principles, including supporting systems and tools.

Professional Licensure: ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (<https://admission.asu.edu/academics/licensure>) webpage.

Manufacturing Engineering, MS (TSMEGRMS)

Online Degree Search Title: Manufacturing Engineering, MS

Campus: Polytechnic

Program Description: Manufacturing engineering draws on two distinct bodies of knowledge: manufacturing processes (i.e., how materials are altered in either shape or properties) and the processes of manufacturing (i.e., manufacturing systems and management). This combination of topics is embedded in the MS program in manufacturing engineering, and students can follow their interests by developing deeper expertise in either manufacturing processes or the processes of manufacturing.

The program provides advanced technical content to help students prepare for career transitions and improve company competitiveness. It consists of a core set of courses designed to provide all students with advanced knowledge of manufacturing fundamentals and an introduction to systems engineering. The expertise developed in the core curriculum supports course offerings that build on existing unit faculty strengths, including smart automation; industrial robotics; additive and subtractive manufacturing processes; and data-driven modeling and simulation, microelectronics manufacturing and manufacturing management. Focus areas within this master's program include advanced manufacturing processes, factory operations management and smart manufacturing processes.

Thesis, applied project and portfolio options are offered for the culminating experience.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Engineering (Automotive Systems), BSE
- Engineering (Electrical Systems), BSE
- Engineering (Mechanical Engineering Systems), BSE
- Engineering (Robotics), BSE
- Manufacturing Engineering, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a portfolio, or 30 credit hours and a thesis, or 30 credit hours including the required applied project course (MFG 593).
Required Core (6 credit hours)

EGR 520 Engineering Analysis I (3)
EGR 522 Statistics for Quality Control in Manufacturing (3)

Electives (15-21 credit hours)

Other Requirement (3 credit hours)
MFG 598 Topic: Manufacturing Systems Management (3)

Culminating Experience (0-6 credit hours)
MFG 593 Applied Project (3) or
MFG 599 Thesis (6) or
portfolio (0)

Additional Curriculum Information
Students should see the academic unit for a complete list of approved electives.

MFG 598 Topic: Manufacturing Systems Management may be substituted with approval from the academic unit.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a minimum of a bachelor's or master's degree in engineering, physical sciences, mathematics or similar from a regionally accredited U.S. institution, or the equivalent of a U.S. bachelor's degree from an international institution that is officially recognized by that institution's country.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- professional resume
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Applicants should review the graduate admission services website (<https://admission.asu.edu/apply/international/graduate/english-proficiency>).

Global Launch at ASU (<https://globallaunch.asu.edu/learn-english/online-english/english-for-admission>) offers an online alternative to standardized testing for international students who are seeking admission to ASU and need proof of English proficiency.

If the applicant does not meet the minimum GPA requirements, the application may still be considered. In certain cases, demonstrated aptitude through professional experience or additional postbaccalaureate education is considered.

Unofficial transcripts may be submitted at time of application. If admitted, applicants must then submit official transcripts to ASU graduate admission services.

Career Opportunities: Graduates of the Master of Science program in manufacturing engineering find opportunities in both large and small corporations and government agencies, and within startup enterprises, where they play a critical role.

Typical job responsibilities include manufacturing process design, manufacturing process management, and quality control and assurance. Graduates with advanced degrees have opportunities to participate in and lead research teams that are developing the next generation of advanced manufacturing technologies.

ASU manufacturing engineering graduates are well placed and command top salaries in their engineering careers, some of which include:

- additive manufacturing
- automation and robotics
- engineering economics
- logistics and supply chain management
- manufacturing operations
- project management
- quality management and reliability

Manufacturing Engineering, PHD (ESMFGPHD)

Online Degree Search Title: Manufacturing Engineering, PhD

Campus: Polytechnic

Program Description: The PhD program in manufacturing engineering provides students with the knowledge, skills and abilities to meet the most difficult challenges of modern manufacturing industries on a global scale. The program involves faculty and industry members together with a hands-on approach to education and research, providing students with various career development opportunities (e.g., internships and exchange experiences).

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, an oral comprehensive exam, a written comprehensive exam, a prospectus and a dissertation.

Required Core (6 credit hours)

EGR 520 Engineering Analysis I (3)

EGR 602 Principles of Independent Research (3)

Other Requirements (9 credit hours)

MFG 691 Seminar (3 semesters of 1 credit) (3)

Students choose two courses related to their research area.

Examples include:

MFG 522 Intermediate Engineering Statistics (3)

MFG 523 Artificial Intelligence for Smart Manufacturing (3)

MFG 574 Polymer Science and Additive Manufacturing (3)

MFG 575 Design for Additive Manufacturing (3)

MFG 581 Simulating Manufacturing Systems (3)

MFG 582 Metal Additive Manufacturing (3)

Research (12 credit hours)

MFG 792 Research (15)

Electives or Research (45 credit hours)

Culminating Experience (12 credit hours)

MFG 799 Dissertation (12)

Additional Curriculum Information

When approved by the academic unit and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this program.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a minimum of a bachelor's or master's degree in manufacturing engineering or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of purpose
- curriculum vitae or professional resume

- two letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The statement of purpose requirement is a 300- to 500-word statement describing the applicant's motivation and rationale for obtaining a doctorate in manufacturing engineering at Arizona State University and how it relates to their long-term career goals.

Career Opportunities: With the doctoral degree, graduates typically seek research-oriented academic appointments or industrial research and development positions.

Professionals with a doctorate in manufacturing engineering have substantial opportunities at all levels in manufacturing engineering in research and development at companies, research institutes and national laboratories (e.g., DOD, DOE, NASA). Relevant careers and related titles include:

- industrial engineer
- manufacturing engineer
- materials engineer
- materials scientist
- mechanical engineer
- mechatronics engineer

Materials Science and Engineering, MS (ESMATEMS)

Online Degree Search Title: Materials Science and Engineering, MS

Campus: Tempe, Online

Program Description: The MS program in materials science and engineering stresses a sound foundation in technical fundamentals, communication and professionalism. To this end, a broad-based curriculum is offered in thermodynamics, structures and mechanical properties; kinetics; optical and magnetic properties; materials characterization; and energy production and storage.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Chemical Engineering, BSE
- Chemistry, BS
- Materials Science and Engineering, BSE
- Mechanical Engineering, BSE
- Mechanical Engineering (Computational Mechanics), BSE
- Mechanical Engineering (Energy and Environment), BSE
- Physics, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a thesis, or 30 credit hours including a portfolio, or 30 credit hours including the required applied project course (MSE 593).
 Required Core (6 credit hours)
 MSE 503 Concepts in Materials Science (3)

MSE 523 Structural and Mechanical Properties of Materials (3)
MSE 524 Advanced Thermodynamics (3)
MSE 525 Fundamentals of Electrical, Optical, and Magnetic Materials and Device Applications (3)
MSE 550 Advanced Materials Characterization (3)
MSE 560 Nanomaterials in Energy Production and Storage (3)
MSE 561 Phase Transformations, Kinetics and Diffusion in Solids (3)

Technical Electives (18 or 24 credit hours)

Culminating Experience (0-6 credit hours)

MSE 593 Applied Project (3) or

MSE 599 Thesis (6) or

portfolio (0)

Additional Curriculum Information

The materials science and engineering MS program has two options: thesis and nonthesis.

All students are admitted to the nonthesis option, which requires a portfolio. During the last semester of their program, students in this option submit a portfolio that contains at least two projects from previous materials science and engineering coursework, along with a paper explaining the projects. Students must successfully complete the portfolio requirements to pass the culminating experience. Students who complete a portfolio must also take an extra six credit hours of elective coursework to reach the required 30 credit hours for the program.

Students in the applied project option write a written report in consultation with their faculty chair and present it at the end-of-semester poster symposium.

If students wish to change to the thesis option, a faculty advisor must be secured, and then a petition may be submitted to request the change to the thesis option. Students in the thesis option must complete a thesis and pass the thesis defense examination.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Admission to the materials science and engineering graduate program is highly competitive. All applicants must submit:

- graduate admission application and application fee
- official transcripts from all institutions attended
- personal statement
- resume or curriculum vitae
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Applicants whose native language is not English must achieve a minimum score of 90 on the internet-based TOEFL.

Admission to the accelerated master's degree program requires a 3.50 ASU GPA (scale is 4.00 = "A") in degree-applicable courses. All applications are subject to review, and admission is not guaranteed.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/master-science-materials-science-and-engineering/>) for program descriptions and to request more information.

Career Opportunities: The program prepares engineers for doctoral study or for industrial positions that specialize in research, project management and product innovation in materials science and engineering.

Professionals with a materials science and engineering master's degree have strong opportunities at all levels in material design, selection, synthesis and characterization for a wide variety of applications, including electro-optical-magnetic systems, environmental systems, energy conversion and storage, manufacturing and construction. Materials jobs are available at many high-tech and manufacturing companies of all sizes, as well as national laboratories (Department of Energy, Department of Defense, NASA) and universities. Analytical skills learned in materials engineering are also valued for other nonengineering positions.

Career examples include:

- engineer
- engineering manager or director
- engineering professor
- research engineer

Materials Science and Engineering, PHD (ESENMATPHD)

Online Degree Search Title: Materials Science and Engineering, PhD

Campus: Tempe

Program Description: The PhD program in materials science and engineering draws upon a fundamental base of knowledge, with underpinnings in physics, chemistry and engineering. The program extends that knowledge to address a broad range of materials-driven challenges, such as energy efficiency, sustainability, functional nanostructures, electronic materials, biomaterials and polymers.

Interdisciplinary in nature, the curriculum offers required courses in four core subjects:

- advanced thermodynamics
- kinetics and phase transformations
- physics of materials
- structure and properties of materials

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Core (12 credit hours)

MSE 523 Structural and Mechanical Properties of Materials (3)

MSE 524 Advanced Thermodynamics (3)

MSE 525 Fundamentals of Electrical, Optical and Magnetic Materials and Device Applications (3)

MSE 561 Phase Transformations, Kinetics and Diffusion in Solids (3)

Electives (3-18 credit hours)

Research (24-39 credit hours)

MSE 792 Research

Other Requirement (3 credit hours)

MSE 591 Seminar (3)

Culminating Experience (12 credit hours)

MSE 799 Dissertation (12)

Additional Curriculum Information

Students entering with a bachelor's degree are required to complete a minimum of 18 credit hours of elective coursework. Graduate elective courses may be selected from any of the graduate courses in the materials science and engineering curriculum as well as elective courses from related disciplines (e.g., chemistry, physics, electrical engineering), subject to approval by the faculty advisor. These courses should comprise a focused plan of study with emphasis in a particular area of materials science, organized in consultation with faculty supervisory committee.

Students entering the doctoral program with a master's degree need to complete 24 credit hours of research (MSE 792). Students entering with a bachelor's degree are required to complete 39 credit hours of research (MSE 792).

MSE 591 is a one credit hour course to be taken in three semesters. The seminar course consists of a series of seminars presented by invited speakers and graduate students. Doctoral students are required to give a seminar presentation once during the academic year after they have begun their research.

When approved by the student's supervisory committee and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this degree. If students do not have a previously awarded master's degree, the 30 hours of coursework is made up of electives and research coursework as specified by the academic unit. If the master's degree has not been completed, a maximum of 12 credit hours of graduate work may be applied with program approval.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited U.S. or international institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Admission to the materials science and engineering doctoral program is highly competitive. All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- resume or curriculum vitae
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Once the application file is complete, the file is forwarded to the faculty admissions committee for evaluation and recommendation.

The admission process considers all aspects of the student's application. The typical successful applicant has, at minimum, a cumulative GPA of 3.25 (scale is 4.00 = "A") in engineering and science coursework in a bachelor's or master's degree program and has high TOEFL scores if applicable.

Financial aid is available to highly qualified students. The most common type of financial aid is teaching and research assistantships, which are accompanied by tuition waivers and major medical insurance benefits. Other types of financial aid include Ira A. Fulton Schools of Engineering fellowships and Science Foundation Arizona fellowships.

Career Opportunities: The program prepares students for professional careers in materials science and engineering and related fields in industry, government and educational institutions.

Professionals with a materials science and engineering doctoral degree have strong opportunities at all levels in material design, selection, synthesis and characterization for a wide range of applications, including electro-optical-magnetic systems, environmental systems, energy conversion and storage, manufacturing and construction. Materials jobs are available at a large number of high-tech and manufacturing companies of all sizes, as well as national laboratories (DOE, DOD, NASA) and universities. Analytical skills learned in materials engineering are also valued in other nonengineering positions.

Career examples include:

- engineer
- engineering manager or director
- engineering professor
- research engineer

Mechanical Engineering, MS (ESMEMS)

Online Degree Search Title: Mechanical Engineering, MS
2024-25 Academic Catalog Archive

Campus: Tempe

Program Description: The MS program in mechanical engineering stresses a sound foundation in technical fundamentals, communication and professionalism. To this end, a broad-based curriculum is offered in design, system dynamics and control; fluid mechanics and aerodynamics; mechanics and dynamics of solids and structures; transport phenomena; thermodynamics; and energy.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Aerospace Engineering (Aeronautics), BSE
- Aerospace Engineering (Astronautics), BSE
- Aerospace Engineering (Autonomous Vehicle Systems), BSE
- Mechanical Engineering, BSE
- Mechanical Engineering (Computational Mechanics), BSE
- Mechanical Engineering (Energy and Environment), BSE

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a portfolio, or 30 credit hours and a thesis, or 30 credit hours including the required applied project course (MAE 593).

Major Area of Emphasis (12 or 15 credit hours)

Technical Electives (6 or 9 credit hours)

Mathematics (6 credit hours)

Culminating Experience (0 to 6 credit hours)

MAE 593 Applied Project (3) or

MAE 599 Thesis (6) or

portfolio (0)

Additional Curriculum Information

All students are admitted to the nonthesis option unless a faculty thesis advisor is secured, at which time the student can initiate a change to the thesis option.

The plan of study must be in accordance with university and program requirements. A minimum cumulative GPA of 3.00 (scale is 4.00 = "A") is required throughout the program. Candidates for the program must complete a minimum of 30 credit hours of approved courses at the 500 level and above, with a minimum cumulative GPA of 3.00 or above.

Coursework for the major area of emphasis is restricted to MAE coursework.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- resume or curriculum vitae
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency; a minimum score of 80 on the internet-based TOEFL is required.

Admission to the mechanical engineering graduate program is highly competitive; preferred applicants have an undergraduate degree in aerospace engineering or mechanical engineering.

Admission to the accelerated master's degree program requires a 3.50 ASU GPA (scale is 4.00 = "A") in degree-applicable courses. All applications are subject to review, and admission is not guaranteed.

Applicants should see the program website for application deadlines.

Career Opportunities: The program in mechanical engineering prepares engineers for doctoral study or industrial positions that specialize in research, project management and product innovation in mechanical engineering.

Professionals with a mechanical engineering master's degree have strong opportunities at most levels in mechanical engineering in research, design and manufacturing at companies of all sizes as well as national laboratories (Department of Energy, Department of Defense, NASA). Analytical skills learned in mechanical engineering are also valued for other nonengineering positions.

Career examples include:

- engineer
- engineering manager or director
- research engineer

Mechanical Engineering, PHD (ESMEPHD)

Online Degree Search Title: Mechanical Engineering, PhD

Campus: Tempe

Program Description: This PhD program in mechanical engineering emphasizes original research and stresses a sound foundation in technical fundamentals, communication and professionalism. To this end, a broad-based curriculum is offered in design, system dynamics and control; fluid mechanics and aerodynamics; mechanics and dynamics of solids and structures; transport phenomena; thermodynamics; and energy. Modern computational and laboratory facilities are available to support timely research investigations.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

84 credit hours

qualifying exams

written and oral comprehensive exams

prospectus

dissertation

All students pursuing the doctorate are required to pass both a qualifying and a comprehensive examination administered by the program committee.

credit hours of coursework directly related to the research area (18)

credit hours of mathematics (9)

credit hours of graduate elective courses outside the major research area (9)

MAE 792 Research

MAE 799 Dissertation credit hours (12)

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from an accredited U.S. or international institution.

Applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- GRE scores
- personal statement
- resume or curriculum vitae
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency and is required to achieve a minimum score of 80 on the internet-based TOEFL.

ASU does not accept the GRE® General Test at home edition.

Admission to the mechanical engineering doctoral program is highly competitive, and preferred applicants have an undergraduate or Master of Science degree in aerospace engineering or mechanical engineering. The admission process considers all aspects of the student's application, and admission is not guaranteed. The typical successful applicant has at least a cumulative GPA score of 3.25 (scale is 4.00 = "A") in engineering and science coursework in a bachelor's or master's degree program, and a high GRE score; a successful applicant whose native language is not English typically also has a high TOEFL score.

Applicants should see the program website for application deadlines.

Career Opportunities: The doctorate program provides students with a strong background for employment in academic institutions, government laboratories and industrial research laboratories with a focus on mechanical engineering.

Professionals with a mechanical engineering doctoral degree have strong opportunities at all levels in mechanical engineering in research, design, and manufacturing at companies of all sizes as well as national laboratories (Department of Energy, Department of Defense, NASA). Analytical skills learned in mechanical engineering are also valued for other nonengineering positions.

Career examples include:

- engineer
- engineering manager or director
- engineering professor
- research engineer

Modern Energy Production and Sustainable Use, MS (ESMEPSUMS)

Online Degree Search Title: Modern Energy Production and Sustainable Use, MS

Campus: Tempe

Program Description: In the MS program in modern energy production and sustainable use, students are provided with the skills and knowledge they need to address the challenges associated with the different modalities in energy production and storage. They are encouraged to work with instructors in the program who are conducting research.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the 2024-25 Academic Catalog Archive

STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Mechanical Engineering, BSE
- Mechanical Engineering (Energy and Environment), BSE

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

- 30 credit hours and a portfolio.
- Required Core (12 credit hours)
- Students choose four courses:
 - ALT 535 Applied Photovoltaics (3)
 - CHE 573 Fuel Cells and Biofuel Cells (3)
 - CHE 578 Biomass Energy Conversion Technology (3)
 - MAE 576 Energy Efficiency (3)
 - MAE 579 Wind Energy (3)
 - MAE 582 Renewable Energy: Mechanical Systems (3)
 - MSE 560 Nanomaterials in Energy Production and Storage (3)
 - SEC 501 Solar Engineering and Commercialization I (3)

Mathematics Elective (3 credit hours)

Sustainability Electives (6 credit hours)

Technical Electives (9 credit hours)

Culminating Experience (0 credit hours)
portfolio (0)

Additional Curriculum Information

The modern energy production and sustainable use program requires a nonthesis portfolio.

Students should see the academic unit for a list of approved elective coursework. Other coursework may be used with approval of the academic unit.

During the last semester of their program, students submit a portfolio that contains at least two projects from previous engineering coursework, along with a paper explaining the projects. Students must successfully complete the portfolio requirements to pass the culminating experience.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any engineering, physical science or related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- three letters of recommendation
- professional resume
- personal statement
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. The minimum score required on the TOEFL iBT is 90.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Differentiate key concepts of energy generation and sustainable energy use within energy-centric engineering and demonstrate their understanding of those concepts on written exams/presentations.
- Differentiate key concepts within energy storage and demonstrate their understanding of those concepts on the written exam.
- Demonstrate problem solving skills in an engineering-related field.

Career Opportunities: This program prepares students for professional careers in transdisciplinary areas of renewable energy generation and storage, energy-saving materials, manufacturing, sustainable transportation and related fields in industry, government and educational institutions.

Professionals with a modern energy production and sustainable master's degree have strong opportunities at all levels in various energy-related technologies with private and government entities. The skills learned in this degree program prepare graduates for a career as a practicing engineer.

Career examples include:

- development engineer
- process engineer
- product engineer

Molecular, Cellular, Tissue, and Biomaterials Engineering (Certificate), Certificate (ESMCTBGRCT)

Online Degree Search Title: Molecular, Cellular, Tissue and Biomaterials Engineering (Graduate Certificate)

Campus: Tempe, Online

This program is not accepting applications at this time.

Program Description: Engineers are constantly improving in their capability to manipulate the components of biological systems. Approaches to localized delivery of drugs, genetic manipulations of cells and the building of tissue scaffolds are changing rapidly.

The certificate program in molecular, cellular, tissue and biomaterials engineering exposes students to many of the principles and techniques that are central to the field. Students who complete the program have a set of skills that enables them to participate in engineering biological systems at levels ranging from molecular to tissue.

Degree Requirements:

15 credit hours.

Required Core (3 credit hours)

BME 567 Tissue Engineering and Regenerative Medicine (3)

Electives (12 credit hours)

Additional Curriculum Information

Students should see the academic unit for an approved list of elective courses.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution. Students should see below for more information.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or they must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee

- official transcripts
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Students must have a BS or BSE in biomedical engineering; or a BS or BSE in engineering plus advanced (postbaccalaureate) training in medicine, physiology or related fields; or a BS in a science discipline plus additional background work in biology, thermodynamics, fluids, transport, and additional work in medicine, physiology or related fields. Specifically, applicants need to demonstrate equivalent proficiency in at least four of the following five areas:

- biomaterials
- electrical networks or circuits
- engineering mechanics
- fluid mechanics or engineering transport
- thermodynamics or physical chemistry

Admission examinations are not required.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu>) for program descriptions and to request more information.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Apply advanced biological concepts and principles at the cellular and molecular level to biomedical engineering solutions.
- Generalize advanced techniques and concepts from the cellular and molecular level to tissue engineering to address biomedical questions
- Apply biomaterials knowledge to solve biomedical engineering problems at the graduate level.

Career Opportunities: Professionals who specialize in molecular, cellular, tissue and biomaterials engineering are in high demand. They are sought after by local, national and international employers across sectors and industries, including business, academia, healthcare, government and research.

Neural Engineering (Certificate), Certificate (ESNENGRCT)

Online Degree Search Title: Neural Engineering (Graduate Certificate)

Campus: Online

ASU is not currently accepting applications for this program.

Program Description: Technologies for ameliorating neural disorders, such as epilepsy, paralysis and those caused by stroke, are developing rapidly. Understanding and deploying these technologies require specialized skills in neurophysiology, bioelectricity and neural-electronic interfaces.

The certificate program in neural engineering prepares clinical, industrial and academic practitioners with these skills through courses in areas of knowledge in neurophysiology, neuroanatomy and neuropathology. Students then learn the state-of-the-art neurotechnologies applied to current neural disorders as well as the biophysics that these devices exploit.

Degree Requirements:

15 credit hours.

Required Core (6 credit hours)

BME 526 Introduction to Neural Engineering (3)

BME 561 Clinical Neuroscience (3)

Electives (9 credit hours)

Additional Curriculum Information

For electives, students should see the academic unit for the approved course list.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution. Students should see below for more information.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or they must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. The English proficiency requirement is equivalent to the ASU Graduate College policy: TOEFL iBT of at least 80 or IELTS overall band score of 6.5.

Applicants must have earned a BS or BSE or master's degree in biomedical engineering; or have earned a BS or BSE in engineering and have advanced (postbaccalaureate) training in medicine, physiology or related fields; or a BS in a science discipline plus additional background work in thermodynamics, fluids and transport, and additional work in medicine, physiology or related fields. Specifically, applicants need to demonstrate equivalent proficiency in at least four of the following six areas:

- biomaterials
- electrical networks or circuits
- engineering mechanics
- fluid mechanics or engineering transport
- signals and systems or control systems
- thermodynamics or physical chemistry

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu>) for program descriptions and to request more information.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Apply advanced neural engineering concepts and principles to biomedical engineering solutions at the graduate level.
- Apply advanced neurorehabilitation principles to biomedical engineering solutions at the graduate level.

Nuclear Power Generation (certificate), Certificate (ESNPGGRCT)

Online Degree Search Title: Nuclear Power Generation (Graduate Certificate)

Campus: Tempe, Online

Program Description: The nuclear power generation graduate certificate program is a transdisciplinary professional option within the Ira A. Fulton Schools of Engineering.

Students typically begin with the study of nuclear science and engineering fundamentals. Subsequent core courses focus on nuclear power plant dynamics and diagnostics, nuclear power plant operations and safety, and nuclear reactor theory and design.

Elective courses allow students to tailor their remaining studies toward facilitating their career goals and to focus on studies tied to their academic interests. Example elective courses include nuclear power engineering, health physics and electrical power plants.

Degree Requirements:

15 credit hours.

Required Core (9 credit hours)

EEE 562 Nuclear Reactor Theory and Design (3)

EEE 563 Nuclear Reactor System Dynamics and Diagnostics (3)

EEE 564 Interdisciplinary Nuclear Power Operations (3)

Electives (6 credit hours)

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's degree in an engineering or science discipline, such as physics, chemistry and mathematics, from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- statement of career and educational goals
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Transcripts should be submitted for all undergraduate and graduate coursework taken.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/certificates/graduate-certificate-nuclear-power-generation/>) for program descriptions and to request more information.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Master the key concepts in the nuclear engineering field at an advanced level.
- Master the key concepts in the power engineering field at an advanced level.

Global Opportunities:

PLuS Alliance: The PLuS Alliance partnership combines the strengths of three leading research universities from three continents --- Arizona State University, King's College London and UNSW Sydney --- to create and share knowledge that will solve pressing educational and societal challenges.

Students have the opportunity to collaborate with peers and specialists across the globe through PLuS-partner courses offered online. Through this PLuS Alliance collaboration certificate program, students develop transferable global competencies and gain exposure to international teaching and academic content. <https://www.plusalliance.org/global-learning-network-programmes> (<https://www.plusalliance.org/global-learning-network-programmes>)

Career Opportunities: The program prepares students and professionals from a variety of engineering and scientific disciplines to work effectively in the nuclear energy industry. Career options include positions in nuclear power plants, government regulatory agencies and national laboratories.

Robotics and Autonomous Systems (Artificial Intelligence), MS (ESRASAIMS)

Online Degree Search Title: Robotics and Autonomous Systems (Artificial Intelligence), MS

Campus: Tempe

Program Description: The artificial intelligence concentration is one of four concentrations in the multidisciplinary MS program in robotics and autonomous systems, which emphasizes robotics, controls, autonomous systems, artificial intelligence and related fields. This concentration is appropriate for students who wish to emphasize applications in artificial intelligence and computer science.

Students receive a solid theoretical and practical background in a variety of topics that facilitate the study of intelligent agents --- that is, any robotic system that perceives its environment and takes actions that maximize its chance of successfully achieving its goals. Thus, students in this concentration are exposed to the frontiers of the general topics in AI, including statistical machine learning, computer vision, natural language processing, knowledge retrieval and reasoning, and formal methods of planning. As compared with the other concentrations, the AI concentration focuses more on the algorithmic aspects of robotics.

This concentration program is offered by the School of Computing and Augmented Intelligence.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Computer Science, BS
- Computer Systems Engineering, BSE
- Informatics, BS
- Software Engineering, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a portfolio, or 30 credit hours and a thesis, or 30 credit hours including the required applied project course (CSE 593).

Required Core (6 credit hours)

EGR 501 Applied Linear Algebra for Engineers (3) or MAE 501 Linear Algebra in Engineering (3)

EGR 545 Robotic Systems I (3) or MAE 547 Modeling and Control of Robots (3) or RAS 545 Robotic Systems I (3)

Concentration (6 credit hours)

Electives or Research (12-18 credit hours)

Culminating Experience (0-6 credit hours)

CSE 593 Applied Project (3) or

CSE 599 Thesis (6) or

portfolio (0)

Additional Curriculum Information

Students are required to select one of the approved culminating experiences for the concentration.

A defense is required for the thesis option. The portfolio is a compilation of two projects that are finished in the required concentration courses. Students must write a portfolio report that includes the highlights of the two projects. The applied project is a written report and oral presentation on research related to the student's coursework and interests.

Students should see the academic unit for the approved concentration coursework as well as the available elective and research courses. Elective or research coursework must be selected from among the courses listed for the other three concentrations. Additional electives must be graduate courses in science, engineering, mathematics or others approved by the graduate program committee.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in engineering, science, mathematics or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- letter of intent or written statement
- professional resume
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Applicants should review the admission services website (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) for more details.

Students applying to the artificial intelligence concentration are expected to possess basic knowledge in key relevant areas (e.g., programming languages, discrete mathematics, data structures and algorithms, or similar topics). Indicative ASU courses include CSE 220 Programming for Computer Engineering or 240 Introduction to Programming Languages; MAT 243 Discrete Mathematical Structures or 300 Mathematical Structures; and CSE 310 Data Structures and Algorithms.

Career Opportunities: Graduates with a Master of Science in artificial intelligence are prepared for doctoral study and for industrial positions in numerous industries as varied as manufacturing, transportation, aerospace, defense and health care.

Robotics and Autonomous Systems (Biomedical Engineering), MS (ESRASBEMS)

Online Degree Search Title: Robotics and Autonomous Systems (Biomedical Engineering), MS

Campus: Polytechnic, Tempe

Program Description: The biomedical engineering concentration is one of five concentrations in the multidisciplinary MS program in robotics and autonomous systems, which emphasizes robotics, controls, autonomous systems, artificial intelligence and related fields. This concentration is appropriate for students who wish to focus on applications in biomedical engineering.

This is an advanced degree that emphasizes competency in the rapidly growing fields of robotics and autonomous systems and with applications in biomedical engineering and medicine.

Biomedical engineers work at the interface of technology and medicine on challenges that are critical to the advancement of health and scientific discovery.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

30 credit hours and a portfolio, or 30 credit hours and a thesis, or 30 credit hours including the required applied project course (BME 593).

Required Core (6 credit hours)

EGR 501 Applied Linear Algebra for Engineers (3) or MAE 501 Linear Algebra in Engineering (3)

EGR 545 Robotic Systems I (3) or MAE 547 Modeling and Control of Robots (3) or RAS 545 Robotic Systems I (3)

Concentration (6 credit hours)

Electives or Research (12--18 credit hours)

Culminating Experience (0--6 credit hours)

BME 593 Applied Project (3) or

BME 599 Thesis (6) or

portfolio (0)

Additional Curriculum Information

Students are required to select one of the approved culminating experiences for the concentration.

Students should see the academic unit for the approved concentration coursework as well as the available elective or research courses. Elective or research coursework must be selected from among the courses listed for the other concentrations. Additional electives must be graduate courses in science, engineering, mathematics or others approved by the graduate program committee.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in engineering, science, mathematics or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- letter of intent or written statement
- professional resume
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Career Opportunities: Graduates are prepared for doctoral study and for industrial positions in numerous and varied industries, such as manufacturing, transportation, aerospace, defense and health care.

Robotics and Autonomous Systems (Electrical Engineering), MS (ESRASEEMS)

Online Degree Search Title: Robotics and Autonomous Systems (Electrical Engineering), MS

Campus: Tempe

Program Description: This advanced degree program emphasizes competency in the rapidly growing fields of robotics and autonomous systems. This concentration is appropriate for students who wish to focus on applications in electrical engineering.

The electrical engineering concentration is one of five concentrations in the multidisciplinary MS program in robotics and autonomous systems, which emphasizes robotics, controls, autonomous systems, artificial intelligence and related fields.

Students in this concentration receive a solid theoretical and practical background in a variety of topics that include theory, design and implementation of control systems; signal processing; real-time and embedded systems; computer vision and machine learning. They are exposed to state-of-the-art and emerging theories and implementations related to sensing, data processing, adaptive control, automated mobility, autonomous systems, human-machine interaction and robotic applications in various domains including public safety, manufacturing, health care, automotive and assistive technologies.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Electrical Engineering, BSE

Electrical Engineering (Electric Power and Energy Systems), BSE

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply

(<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a portfolio, or 30 credit hours and a thesis, or 30 credit hours including the required applied project course (EEE 593).

Required Core (6 credit hours)

EGR 501 Applied Linear Algebra for Engineers (3) or MAE 501 Linear Algebra in Engineering (3)

EGR 545 Robotic Systems 1 (3) or MAE 547 Modeling and Control of Robots (3) or RAS 545 Robotic Systems I (3)

Concentration (6 credit hours)

Electives or Research (12--18 credit hours)

Culminating Experience (0--6 credit hours)

EEE 593 Applied Project (3) or

EEE 599 Thesis (6) or

portfolio (0)

Additional Curriculum Information

Students should refer to the academic unit for the approved concentration coursework as well as the available elective and research courses.

Elective or research coursework must be selected from among the courses listed for the other three concentrations. Additional electives must be graduate courses in science, engineering, mathematics or others approved by the Graduate Program Committee.

Students are required to select one of the approved culminating experiences for the concentration.

A defense is required for the thesis option.

The portfolio includes a poster presentation with content from courses taken in the program. Students must write a portfolio report that includes the highlights of the three projects.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in engineering, science, mathematics or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- letter of intent or written statement
- professional resume
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Analyze and apply key sensing, signal processing, and control theories and methods used in this field.
- Differentiate key concepts within electrical engineering, demonstrate their understanding of those concepts on their portfolio or thesis at the end of their program, and demonstrate the ability to critically think and synthesize information.
- Understand and apply skills needed in order to select and secure professional employment in an electrical engineering related field by practicing the skills they have learned in their courses and showing they have the ability to work successfully within the electrical engineering field applying concepts from their academic experience, synthesizing knowledge, self-assessment on the student's part, and teamwork/communication to address societal needs.

Career Opportunities: Graduates of the electrical engineering concentration of the Master of Science program in robotics and autonomous systems are prepared for doctoral study and for industrial positions in numerous and varied industries. Some examples are manufacturing, transportation, aerospace, defense and health care.

Robotics and Autonomous Systems (Mechanical and Aerospace Engineering), MS (ESRASMAEMS)

Online Degree Search Title: Robotics and Autonomous Systems (Mechanical and Aerospace Engineering), MS

Campus: Tempe

Program Description: The mechanical and aerospace engineering concentration is one of the concentrations in the multidisciplinary MS program in robotics and autonomous systems. It emphasizes robotics, controls, autonomous systems, artificial intelligence and related fields.

This concentration is appropriate for students who wish to focus on applications in mechanical or aerospace engineering.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Aerospace Engineering (Aeronautics), BSE
- Aerospace Engineering (Astronautics), BSE
- Aerospace Engineering (Autonomous Vehicle Systems), BSE
- Mechanical Engineering, BSE

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a portfolio, or 30 credit hours and a thesis, or 30 credit hours including the required applied project course (MAE 593).

Required Core (6 credit hours)

EGR 501 Applied Linear Algebra for Engineers (3) or MAE 501 Linear Algebra in Engineering (3)

EGR 545 Robotic Systems I (3) or MAE 547 Modeling and Control of Robots (3) or RAS 545 Robotic Systems I (3)

Concentration (6 credit hours)

Electives or Research (12-18 credit hours)

Culminating Experience (0-6 credit hours)

MAE 593 Applied Project (3) or

MAE 599 Thesis (6) or

portfolio (0)

Additional Curriculum Information

Students are required to select from one of the available concentrations and one of the approved culminating experiences for the concentration.

A defense is required for the thesis option. The applied project requires a written report and an oral presentation. The portfolio includes a poster presentation with content from courses taken in the program. Students must write a portfolio report that includes the highlights of the three projects.

Students should see the academic unit for the approved concentration coursework as well as the available elective and research courses. Elective or research coursework must be selected from among the courses listed for the other three concentrations. Additional electives must be graduate courses in science, engineering, mathematics or others approved by the graduate program committee. Three credit hours of internship may be included among the electives.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in engineering, science, mathematics or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- letter of intent or written statement
- professional resume
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Career Opportunities: Robotics engineers are in high demand in various engineering specialty areas, such as manufacturing, mechanical, aerospace, biomedical-rehabilitation, autonomous vehicle and artificial intelligence engineering, among others. Skills in the design and control of robotic systems, artificial intelligence, machine learning and robot perception are valuable to consumer, automotive, aerospace and defense industries.

Career examples include:

- automation engineer
- machine learning and AI engineer
- robotics engineer
- systems engineer

Robotics and Autonomous Systems (Mechatronics and Automation), PHD (ESRASMAPHD)

Online Degree Search Title: Robotics and Autonomous Systems (Mechatronics and Automation), PhD

Campus: Polytechnic

Program Description: The mechatronics and automation concentration of the PhD program in robotics and autonomous systems provides an opportunity for in-depth independent research in a highly focused problem domain approved by the student's advisory committee. This program is intended primarily for those who desire to develop expertise in a particular and focused problem in the field of robotics and autonomous systems, including both traditional and advanced robotics and autonomous systems technologies, systems integration and data fusion techniques, and modeling and simulation development.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, an oral comprehensive exam, a written comprehensive exam, a prospectus and a dissertation.

Required Core (12 credit hours)

Concentration (6 credit hours)

EGR 550 Mechatronic Systems (3)

RAS 546 Robotic Systems II (3)

Other Requirements (6 credit hours)

EGR 602 Principles of Independent Research (3)

RAS 545 Robotic Systems I (3)

Electives or Additional Research (36 credit hours)

Research (12 credit hours)

Culminating Experience (12 credit hours)

RAS 799 Dissertation

Additional Curriculum Information

For elective courses (depending on concentration), up to six credits of MAE, EEE, MFG, EGR, CSE, AME or RAS 590 Reading and Conference are allowed.

The classes listed under the core requirements can also be taken as electives, if not already counted toward the core requirements.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in robotics and autonomous systems or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants are required to submit:

- graduate admissions application and application fee
- official transcripts
- personal statement
- professional resume
- two letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The applicant must have a master's degree in a relevant field with a GPA of 3.00 or higher. Relevant fields include mechanical engineering, aerospace engineering, computer science, computer engineering, electrical engineering, industrial engineering, automation engineering, manufacturing engineering, automotive engineering, biomedical engineering and human systems engineering.

Career Opportunities: Graduates with a doctorate in robotics and autonomous systems typically seek research-oriented academic appointments or industrial research and development positions. As trained researchers and scientists, graduates perform analysis, evaluation and synthesis for a wide variety of problems related to the design, implementation and efficient operation of robotics and autonomous systems. These professionals have substantial opportunities at all levels in manufacturing engineering in research and development at companies, research institutes and national laboratories (e.g., Department of Defense, Department of Energy, NASA). Relevant careers and related titles include:

- electronics engineer
- industrial engineer
- manufacturing engineer
- mechanical engineer
- mechatronics engineer
- robotics engineer

Robotics and Autonomous Systems (Systems Engineering), MS (ESRASSEMS)

Online Degree Search Title: Robotics and Autonomous Systems (Systems Engineering), MS

Campus: Polytechnic

Program Description: This is an advanced degree emphasizing system-level competency in the rapidly growing fields of robotics and autonomous systems.

The systems engineering concentration is one of the concentration options in the multidisciplinary MS program in robotics and autonomous systems, which emphasizes robotics, controls, autonomous systems, artificial intelligence and related fields.

This concentration is appropriate for students who wish to focus on applications in systems engineering.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Engineering (Automotive Systems), BSE
- Engineering (Electrical Systems), BSE
- Engineering (Mechanical Engineering Systems), BSE
- Engineering (Robotics), BSE
- Manufacturing Engineering, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a portfolio, or 30 credit hours and a thesis, or 30 credit hours including the required applied project course (RAS 593).

Required Core (6 credit hours)

EGR 501 Applied Linear Algebra for Engineers (3) or MAE 501 Linear Algebra in Engineering (3)

EGR 545 Robotic Systems I (3) or MAE 547 Modeling and Control of Robots (3) or RAS 545 Robotic Systems I (3)

Concentration (6 credit hours)

Electives or Research (12-18 credit hours)

Culminating Experience (0-6 credit hours)

RAS 593 Applied Project (3) or

RAS 599 Thesis (6) or

portfolio (0)

Additional Curriculum Information

Students are required to select one of the approved culminating experiences for the concentration.

A defense is required for the thesis option. The applied project requires a written report and an oral presentation. The portfolio includes a summary of the graduate program and a report highlighting three projects from the program.

Students should see the academic unit for the approved concentration coursework as well as the available elective and research courses. Elective or research coursework must be selected from among the courses listed for the other three concentrations. Additional electives must be graduate courses in science, engineering, mathematics, or others approved by the graduate program committee. Three credit hours of internship may be included among the electives.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in engineering, physical sciences, mathematics or a similar field from a regionally accredited U.S. institution or the equivalent of a U.S. bachelor's degree from an international institution that is officially recognized by that institution's country.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admission application and application fee

- official transcripts from each college or university attended
- personal statement
- professional resume
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Applicants should see the admission services (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) website.

Global Launch (<https://globallaunch.asu.edu/learn-english/online-english/english-for-admission>) at ASU offers an online alternative to standardized testing for international students who are seeking admission to ASU and need proof of English proficiency.

If the applicant does not meet the minimum GPA requirements, the application may still be considered. In certain cases, demonstrated aptitude through professional experience or additional postbaccalaureate education is considered.

Career Opportunities: Graduates are prepared for industry careers in positions such as:

- automation engineer
- controls engineer
- machine learning engineer
- robotics engineer
- systems engineer

Semiconductor Processing (Certificate), Certificate (ESSCPRGRCT)

Online Degree Search Title: Semiconductor Processing (Graduate Certificate)

Campus: Tempe, Online

Program Description: This certificate program provides a series of courses in semiconductor processing, packaging and characterization that prepare students for careers in the industry or for graduate studies. Students select from a set of core courses and technical electives.

Degree Requirements:

15 credit hours.

Required Core (9 credit hours)

EEE 530 Advanced Silicon Processing (3)

IEE 572 Design Engineering Experiments (3)

MSE 550 Advanced Materials Characterization (3)

Electives or Research (6 credit hours)

Additional Curriculum Information

Students should see the academic unit for available elective and research coursework.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in engineering or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- professional resume
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

International students who need an F-1 or J-1 visa need to apply to and be accepted into a graduate degree program prior to being considered for the certificate program. International students residing in the U.S. on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for admission to this certificate program.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/certificates/semiconductor-processing-graduate-certificate/>) for program descriptions and to request more information.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Demonstrate an understanding of key concepts of thin film processing in the field and how to apply those concepts in their culmination event (Portfolio).
- Demonstrate an understanding of key film materials characterization in the field and how to apply those concepts in their culmination event (portfolio).

Career Opportunities: Professionals with a semiconductor processing certificate can find employment with semiconductor device manufacturers and semiconductor processing equipment manufacturers at all levels. The skills learned in this program prepare graduates for a career as a practicing engineer.

Career examples include:

- development engineer
- process engineer
- product engineer

Sensor Signal and Information Processing (Certificate), Certificate (ESSSIPGRCT)

Online Degree Search Title: Sensor Signal and Information Processing (Graduate Certificate)

Campus: Tempe

Program Description: The graduate certificate program in sensor signal and information processing provides background and application-oriented training in processing and interpreting signals acquired from sensors. The focus is on building knowledge and skills in several sensor network applications.

The program includes courses on signal and data processing for sensor systems. Course topics include digital signal processing, random signal theory, detection and estimation, sensor systems, big data and machine learning. The certificate may be completed with on-campus coursework and iCourses.

Degree Requirements:

16 credit hours.

Required Core (7 credit hours)

EEE 517 Sensors and Machine Learning (1)

EEE 554 Probability and Random Processes (3)

EEE 556 Detection and Estimation Theory (3) or

EEE 606 Adaptive Signal Processing (3) or

EEE 607 Speech Comprehension and Recognition (3)

Electives (5 or 6 credit hours)

Other Requirements (3 or 4 credit hours)

EEE 509 DSP Algorithms and Software (3) or EEE 591 Seminar: Digital Signal Processing (4)

Additional Curriculum Information

For the required core, students choose either EEE 556, EEE 606 or EEE 607. Additionally, students complete either EEE 591 Seminar: Digital Signal Process and five credit hours of electives, or EEE 509 and six credit hours of electives.

For electives, students should see the academic unit for the approved course list. Other coursework may be used with the approval of the academic unit.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in an engineering or a science discipline such as physics, mathematics or computer science from an accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- statement of purpose
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

International students who need an F1 or J1 visa first need to apply to and be accepted into a graduate degree program prior to being considered for the certificate program. International students residing in the USA on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for admission to this certificate program.

Regular admission is granted to applicants who have at least a GPA of 3.00 or equivalent (scale is 4.00 = "A") and are competitive in the applicant pool. All prerequisites to the sensor signal and information processing certificate required courses must be in place (EEE 203 and EEE 350 from ASU, or signals and systems and random signals course equivalents from other universities).

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Master the key concepts in the sensor and signal processing engineering fields at an advanced level.
- Master the key concepts in the signal processing and communication engineering field at an advanced level.

Career Opportunities: The certificate is a professional graduate program. The area of sensor information extraction and interpretation has various professional applications including in health, sustainability, media, communications and security.

Software Engineering, MS (TSSERMS)

Online Degree Search Title: Software Engineering, MS

Campus: Polytechnic

Program Description: The MS program in software engineering focuses on students' development of advanced knowledge and abilities in the design and application of software.

This unique Master of Science program involves the application of engineering principles to software development, including design methodologies, operation principles, and maintenance and testing approaches. Students learn to solve issues through engaging projects, commonly as a member of a development team. The program develops students' professional skills in this discipline and provides opportunities for them to engage in and develop research abilities.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

Software Engineering, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a thesis, or 30 credit hours including the required capstone course (SER 517).

Required Core (9 credit hours)

SER 501 Advanced Data Structures and Algorithms (3)

SER 502 Emerging Languages and Programming Paradigms (3)

SER 515 Foundations of Software Engineering (3)

Electives (15 or 18 credit hours)

Culminating Experience (3 or 6 credit hours)

SER 517 Software Factory Capstone (3) or

SER 599 Thesis (6)

Additional Curriculum Information

Students should see the academic unit for a list of approved electives.

For the culminating experience, students have the choice of completing the capstone course (SER 517) or a thesis (SER 599). Completion of 30 credit hours of coursework is required for all culminating experience options.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in information technology, computer science, applied computing, engineering or a closely related field from a regionally accredited institution (or international equivalent).

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- proof of English language proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. More information is available on the admission services website (<https://admission.asu.edu/apply/international/graduate/english-proficiency>).

If the student is assigned any deficiency coursework upon admission, those classes must be completed with a grade of "B" (3.00) or higher within two semesters of admission to the program. Deficiency courses include:

CSE 240 Introduction to Programming Languages

CSE 360 Introduction to Software Engineering

SER 222 Design and Analysis of Data Structures and Algorithms or CSE 310 Data Structures and Algorithms

SER 334 Operating Systems and System Programming or CSE 330 Operating Systems

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Apply engineering principles to software projects, including design methodologies, evolutionary development, and requirements-driven improvement. (Technical Competence)

- Develop advanced knowledge and abilities in the design and application of software. (Design)

- Demonstrate professionalism in engineering situations and apply software engineering perspective for producing quality software systems. (Professionalism and Perspective)

Career Opportunities: Graduates are able to design and engineer innovative systems that may include mechanical and electrical components that interact with software. They are prepared for advanced study in computing or in an allied field, or to enter the computing profession, most commonly as an application software engineer.

According to the Bureau of Labor Statistics, software engineers are highly paid, and there is significant growth in the number of employment opportunities. Software engineering jobs may include:

- creating applications for mobile devices
- creating web applications
- designing, creating and validating software for avionics, robotics and similar systems fields

Sustainable Engineering, MSE (ESSUEMSE)

Online Degree Search Title: Sustainable Engineering, MSE

Campus: Online

Program Description: The MSE in sustainable engineering is a multidisciplinary graduate program ideal for professionals and graduate-level students with engineering and physical science backgrounds who wish to design a flexible individualized plan of study.

Courses cover such sustainable engineering topic areas as energy systems and alternative energy production; water, transportation or earth systems engineering; industrial ecology; life cycle assessment; environmental technologies; green construction practices; and sustainable technology systems.

The goal of sustainable engineering is to enable long-lasting improvement of the human condition. Sustainable engineering transcends traditional engineering education by integrating considerations of complex social, environmental, political and economic factors into engineering theory and practice in order to achieve more economically, technically, environmentally, institutionally and socially efficient and robust solutions.

Degree Requirements:

30 credit hours and a thesis, or 30 credit hours and a written comprehensive exam, or 30 credit hours including the required applied project course (CEE 593).

Required Core (9 credit hours)

Infrastructure Systems Track (9 credit hours) or

Green Buildings and Construction Practices Track (9 credit hours) or

Earth Systems Engineering and Industrial Ecology Track (9 credit hours) or

Global Technology and Policy (9 credit hours)

Electives (6-12 credit hours)

Culminating Experience (0-6 credit hours)

comprehensive exam (0) or

applied project (3) or

thesis (6)

Additional Curriculum Information

All students will initially be admitted into the comprehensive exam option. To pursue the applied project or thesis option, students must have a faculty member willing to oversee them.

Students complete nine credit hours in one selected track. Available track options are infrastructure systems, green buildings and construction
2024-25 Academic Catalog Archive

practices, earth systems engineering and industrial ecology, and global technology and policy. Students should see the academic unit for an approved course list.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's degree or master's degree in engineering or a closely related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Students who have a degree in civil engineering, environmental engineering, construction engineering, or mechanical engineering, or who have an engineering degree other than those listed, may be admitted with deficiencies as identified by the sustainable engineering faculty. If the applicant does not have an undergraduate degree in any of these programs, additional requirements may be necessary based on the applicant's background, including sufficient courses in mathematics that include calculus, differential equations and linear algebra. A faculty committee determines which required courses are needed on a case-by-case basis.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/master-science-engineering/>) for program descriptions and to request more information.

Career Opportunities: Sustainable engineering graduates can pursue careers as:

- corporate social responsibility sustainability professionals
- sustainability consultants
- sustainability managers
- water engineering specialists

Systems Engineering, PHD (ESSYSPHD)

Online Degree Search Title: Systems Engineering, PhD

Campus: Polytechnic

Program Description: The PhD in systems engineering is a transdisciplinary graduate program offered by the School of Manufacturing Systems and Networks.

The program is aimed at advancing the understanding of complex engineering systems and where these systems are inclusive of technological aspects, as well as social, cultural, environmental and other interacting components that impact the input, output and interactions within a system. The program prepares students to identify, model, analyze, interpret, optimize and manage the multidimensional interactions of the ever-increasing complexity of modern technological and societal challenges.

A typical incoming student in this doctoral program would have a master's degree in engineering or related discipline. Applicants with strong research background may be admissible directly from a bachelor's degree in engineering or related discipline. The core curriculum provides the foundation for systems thinking, systems identification, systems modeling and systems design and analysis using diverse disciplinary methodological approaches. Students in this program use their capacity to evaluate complex systems and a depth of mathematical maturity to study problems for which complexity is impeding progress.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam and a dissertation.

Required Core (9 credit hours)

EGR 602 Principles of Independent Research (3)

EGR 608 Advanced Simulation (3)

EGR 611 Complex Engineering Systems (3)

Technical Electives (3 credit hours)

Electives and Research (60 credit hours)

Culminating Experience (12 credit hours)

EGR 799 Dissertation (12) or

MFG 799 Dissertation (12) or

RAS 799 Dissertation (12)

Additional Curriculum Information

When approved by the student's supervisory committee and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used toward this degree. If students do not have a previously awarded master's degree, the 30 credit hours of coursework are made up of electives to reach the required 84 credit hours.

Students are required to take 12 credit hours of EGR 792, MFG 792 or RAS 792 as part of their research coursework.

Elective coursework should be directly in support of the student's research as advised by the supervisory committee.

Students with a BS degree coming into the doctoral program in systems engineering must complete at least nine credit hours of approved mathematics courses after the completion of their bachelor's degree. Students select appropriate elective courses in consultation with the academic unit.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a minimum of a bachelor's or master's degree in engineering from a regionally accredited institution, or if they have earned the equivalent of a U.S. bachelor's degree from an international institution that is officially recognized by that institution's country in engineering, physical sciences, mathematics or a similar field.

Applicants without a master's degree in engineering or a closely related field must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, coupled with a record of research or leadership accomplishments (or both). Applicants with a master's degree in engineering or a closely related field must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the applicable master's degree program. Exceptional undergraduates are encouraged to apply after completion of a BS degree.

All applicants must submit:

- graduate admission application and application fee
- official transcripts from each college or university attended
- two letters of recommendation
- statement of purpose
- resume or curriculum vitae
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Applicants should see the graduate admission services website (<https://admission.asu.edu/apply/international/graduate/english-proficiency>).

Global Launch (<https://globallaunch.asu.edu/learn-english/asu-admission>) at ASU offers an online alternative to standardized testing for international students who are seeking admission to ASU and need proof of English proficiency.

Unofficial transcripts may be submitted at time of application. If admitted, applicants must then submit official transcripts to ASU graduate admission services.

Career Opportunities: Graduates of the doctoral program in systems engineering are prepared for industry careers in areas such as:

- automotive systems
- energy systems, including alternative energy and grids
- manufacturing
- robotics

Technology (Aviation Management and Human Factors), MSTech (TSHFMSTECH)

Online Degree Search Title: Technology (Aviation Management and Human Factors), MSTech

Campus: Polytechnic

Program Description: The MSTech degree program offers a concentration in aviation management and human factors.

Students in this program are provided with professional skills and exposed to educational theory and practice for use in leadership positions within the aviation industry. Management and leadership positions at airports of all sizes require skills in labor management and policy, economics and analysis, national aerospace structure and aviation law, as well as an awareness of unmanned systems and flight operations. Those interested in the human systems and safety area find exceptional use of educational discussions on human performance and the human limitations and capabilities of working within a complex system.

Courses are offered at ASU's Polytechnic campus, with some offered as iCourses.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Aeronautical Management Technology (Air Traffic Management), BS
- Aeronautical Management Technology (Air Transportation Management), BS
- Aeronautical Management Technology (Professional Flight), BS
- Aeronautical Management Technology (Unmanned Aerial Systems), BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a portfolio, or 30 credit hours and a thesis, or 30 credit hours including the required applied project course (AMT 593).

Required Core (3 credit hours)

OMT 570 Advanced Project Management (3)

Concentration (6 credit hours)

AMT 533 Aviation Systems and Psychology (3)

HSE 530 Intermediate Statistics for Human Systems Engineering (3)

Track Coursework (12 or 15 credit hours)

Restricted Electives (3 or 6 credit hours)

Culminating Experience (0 or 3 or 6 credit hours)

AMT 593 Applied Project (3) or

AMT 599 Thesis (6) or

portfolio (0)

Additional Curriculum Information

The detailed design of the graduate student's program requirements with the selection of the required courses is the responsibility of the student and the supervisory committee chair and committee members.

Students in this graduate program also have the opportunity to enroll in human systems engineering (prefix HSE) and technological entrepreneurship and management (prefix TEM) graduate courses. Students may focus their study on courses that best prepare them for their career or for the next step in their educational process.

Applied project students complete 15 credit hours (five track courses), and thesis students complete 12 credit hours (four track courses) selected in consultation with an advisor. In addition, three credit hours of AMT elective coursework are chosen in conjunction with the student's advisor or committee. Students who do not select a track complete 15 or 18 credit hours from the restricted electives list or other courses approved by the student's supervisory committee. All students in the aviation management and human factors concentration must take at least five AMT graduate courses.

The portfolio option demonstrates a high level of mastery of the principles and practice of aviation management and human factors through a compilation of work the student completes through the course of their graduate study. While the specific details depend on the student's specialization, all portfolios must describe three notable projects or academic accomplishments that illustrate the evolution and advancement of the student's technical expertise and mastery of the field of aviation management and human factors. The submission must include a written document that includes an overview of the graduate experience and descriptions of projects presented in the portfolio.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a STEM field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in their first bachelor's degree program or in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in nine semester hours of graduate coursework from a U.S. institution or in an applicable conferred master's degree program.

Applicants must submit:

- graduate admission application and application fee
- official transcript from each college or university attended
- personal statement
- professional resume
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Unofficial transcripts may be submitted at the time of application. If admitted, applicants must then submit official transcripts to ASU Graduate Admission Services.

If the applicant does not meet the minimum GPA requirements, the application may still be considered. In certain cases, demonstrated aptitude through professional experience or additional postbaccalaureate education is considered.

Career Opportunities: The program's focus is on preparing graduates for a career in the aviation industry, and it can serve as the foundation for further advanced study. Graduates of this program possess technical and professional skills for use in leadership positions in the aviation industry.

Technology (Management of Technology), MSTech (TSMRMSTECH)

Online Degree Search Title: Technology (Management of Technology), MSTech

Campus: Polytechnic

business, technology and innovation. The MSTech program in technology was constructed for this purpose.

Students in this program develop a foundation in business and develop insights into the implications and impact of technology. The flexibility in course options allows students to gain new capabilities, and by integrating these disciplines, they learn to transform industries.

Students also receive a foundation of leadership and managerial skills to complement their existing technical skills. The program then adds cutting-edge innovation strategy, data-driven decision-making, and entrepreneurial skills that companies need to compete in future economies.

Finally, students choose classes in their areas of interest that mix hard and soft skills in critical areas of interdisciplinary data science; sustainable enterprises; social, entrepreneurial and disruptive innovation; enterprise logistics and operations; or advanced technologies such as smart manufacturing and engineering, artificial intelligence or blockchain technology industries.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Engineering (Automotive Systems), BSE
- Engineering (Electrical Systems), BSE
- Engineering (Mechanical Engineering Systems), BSE
- Engineering (Robotics), BSE
- Global Management, BGM
- International Trade, BS
- Technological Entrepreneurship and Management, BS
- Technological Leadership, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a portfolio, or 30 credit hours including the required applied project course (TMC 593).

Required Core (3 credit hours)

OMT 570 Advanced Project Management (3)

Concentration (12 credit hours)

OMT 520 Strategic Management of Technology (3)

TEM 501 Technological Innovation and Entrepreneurship (3) or FSE 501 Technology Entrepreneurship (3)

TEM 505 Data-driven Decision Making (3)

TEM 531 Disruptive Innovation and Technological Evolution (3)

Electives (12 or 15 credit hours)

Culminating Experience (0 or 3 credit hours)

portfolio (0)

TMC 593 Applied Project (3)

Additional Curriculum Information

Graduate courses from other majors may be selected with approval from the student's graduate advisory committee; these additional courses are selected to support the student's individual career goals and perceived needs. To ensure that all courses taken fit into the plan of study, all students are expected to discuss their tentative plan with their program advisors prior to registering for their first class, and they must have an approved plan of study on file by the completion of nine credit hours toward the degree.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a STEM field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in their first bachelor's degree program or in the last 60 hours of their

first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in nine semester hours of graduate coursework from a U.S. institution or in an applicable conferred master's degree program from a regionally-accredited college or university.

All applicants must submit:

- graduate admission application and application fee
- official transcripts from each college or university attended
- personal statement
- professional resume
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Applicants should see the graduate admission services website (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) for more details.

Global Launch at ASU offers an online alternative to standardized testing for international students who are seeking admission to ASU and need proof of English proficiency. More information on the program is available on the Global Launch website (<https://globallaunch.asu.edu/learn-english/online-english/english-for-admission>).

If the applicant does not meet the minimum GPA requirements, the application may still be considered. In certain cases, demonstrated aptitude through professional experience or additional postbaccalaureate education is considered.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Demonstrate the ability to analyze, design and implement solutions to management of technology problems through applied practice
- Demonstrate an ability to communicate complex management of technology solutions effectively
- Demonstrate ability to work as an integral team to identify, plan and execute technology-based projects

Career Opportunities: The Master of Science in Technology program with a concentration in management of technology is tailored to individual professional goals, ensuring that each graduate not only obtains basic leadership and management skills, but also is ready to excel in an array of tech leadership roles. Program alumni currently work in fields such as:

- artificial intelligence data analytics
- manufacturing
- marketing
- operations management
- product management
- project management
- QA
- startup founding

User Experience, MS (ESUSEXMS)

Online Degree Search Title: User Experience, MS

Campus: Polytechnic, Online

Program Description: The MS program in user experience addresses UX research, design, content development, communication, tone of voice and evaluation of all components and products with which end users interact.

Students learn how to research user needs, identify criteria for successful products and services, prototype those products and services, and refine them through usability testing and other user-centered evaluation methods.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website.

The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Graphic Information Technology (User Experience), BS
- Human Systems Engineering (User Experience), BS
- Technical Communication (User Experience), BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a portfolio.

Required Core (15 credit hours)

GIT 540 Cross-media Design Solutions (3)

HSE 542 Foundations of Human Systems Engineering (3)

TWC 501 Fundamentals of Technical Communication (3)

Choose two courses from the following:

GIT 542 Usability and User Experience (3)

HSE 521 Methods and Tools in Human Systems Engineering (3)

TWC 544 User Experience (3)

Electives or Research (15 credit hours)

Culminating Experience (0 credit hours)
portfolio (0)

Additional Curriculum Information

Students should see the academic units for a complete list of approved electives and research courses. Other courses may be used with approval of the academic units.

Admission Requirements: Applicants must fulfill the requirements of the Graduate College, the Ira A. Fulton Schools of Engineering and the College of Integrative Sciences and Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in related fields such as psychology, graphic information technology, graphic design, human systems engineering, business, cognitive science, design or technical communication from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in their first bachelor's degree program or the last 60 hours of their first bachelor's degree program; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in nine semester hours of graduate coursework from a U.S. institution; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") an applicable conferred master's degree program from a regionally accredited college or university.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- professional resume
- writing sample
- two letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Applicants should see the Graduate Admission Services website (<https://admission.asu.edu/apply/international/graduate/english-proficiency>).

Global Launch at ASU (<https://globallaunch.asu.edu/learn-english/online-english/english-for-admission>) offers an online alternative to standardized testing for international students who are seeking admission to ASU but need proof of English proficiency.

If the applicant does not meet the minimum GPA requirements, the application may still be considered. In certain cases, demonstrated aptitude

through professional experience or additional postbaccalaureate education is considered, including completion of a reputable and robust certification program in user experience or user interface. Applicants are strongly encouraged to include a copy of their completed certification with their resume.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/online-user-experience-masters/>) for program descriptions and to request more information.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Integrate appropriate user experience principles into UX design processes.
- Apply user research methods to projects to uncover usability challenges.
- Evaluate designs and contexts of use to identify problems and prototype approaches for the improving user experience.
- Synthesize technical information into written and visual documentation for user experience projects.

Career Opportunities: Graduates with this degree possess the skills to be UX professionals who effectively lead teams that constantly improve products and the lives of their users, and collaborate with clients and technical personnel.

UX is a rapidly growing field. Graduates can typically expect to find jobs in the areas of:

- design research
- digital visualization design
- human-computer interaction
- human factors research
- interface design
- interaction design
- usability testing
- user experience
- user research

Global Futures, College of

Applied Ethics and the Professions (Biomedical and Health Ethics), MA (LAAEPMEMA)

Online Degree Search Title: Applied Ethics and the Professions (Biomedical and Health Ethics), MA

Campus: Tempe

ASU is not currently accepting applications for this program.

Program Description: Medicine is infused with moral values and is deeply embedded in a variety of social and cultural contexts which significantly determine the effectiveness of medical care in achieving healthy outcomes for patients and populations. The objective of the biomedical and health ethics concentration in the MA program in applied ethics and the professions is to integrate academic and clinical dimensions of moral issues with medical practice and biomedical research.

Students from a broad range of backgrounds are exposed to the internal and external logics of medicine, health care and biotechnology, and they gain substantive understanding of ethical, cultural and societal issues in a variety of domains through coursework and other experiences. Students deliberate individually and collectively about a wide range of issues and problems in contemporary medicine and the history of medicine; develop advanced critical normative reasoning and judgment capacities; and cultivate effective communication skills for academic, clinical and policy contexts.

Degree Requirements:

30 credit hours including the required applied project course (AEP 593).

Required Core (3 credit hours)

AEP 501 Practical and Professional Ethics (3)

Concentration (3 credit hours)
BIO 516 Foundations of Bioethics (3)

Concentration Electives (18 credit hours)

Culminating Experience (6 credit hours)
AEP 593 Applied Project (6)

Additional Curriculum Information

Electives are related to the concentration study. Students must request approval from the chairperson of the degree program prior to selecting elective coursework.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement of interest and qualification
- resume
- two letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Applied Ethics and the Professions (Science, Technology and Ethics), MA (LAAEPSEEMA)

Online Degree Search Title: Applied Ethics and the Professions (Science, Technology and Ethics), MA

Campus: Tempe

ASU is not currently accepting applications for this program.

Program Description: The science, technology and ethics concentration of the MA program in applied ethics and the professions focuses on the ethical issues that arise from the multiple challenges involved in balancing economic, technological, environmental, social and cultural development in a world increasingly affected by science and technology. The program provides students with a general background in ethics and ethical systems, with an emphasis on ethical issues in science and technology. Students are also exposed to new challenges posed by rapidly evolving sociotechnical systems in such areas as:

- energy, environment and development
- genetic engineering and biotechnology
- information and communication technology
- nanotechnology
- risk assessment
- technology and security

Degree Requirements:

30 credit hours including the required applied project course (AEP 593).

Required Core (3 credit hours)

AEP 501 Practical and Professional Ethics (3)

Concentration (3 credit hours)

HSD 598 Special Topics (3)

Concentration Electives (18 credit hours)

Culminating Experience (6 credit hours)

AEP 593 Applied Project (6)

Additional Curriculum Information

Electives are related to the concentration study. Students must request approval from the chairperson of the degree program before selecting elective coursework. Students should consult their advisor regarding the approved topic for HSD 598.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- resume
- personal statement of interest and qualification
- two letters of recommendation
- proof of English language proficiency

Additional Application Information

Applied Mathematics for the Life & Social Sciences, PHD (LAAMLPHD)

Online Degree Search Title: Applied Mathematics for the Life and Social Sciences, PhD

Campus: Tempe

Program Description: The PhD program in applied mathematics for the life and social sciences focuses on the training needed for analyzing and more definitively answering questions about underlying patterns hidden within human health, behaviors and experiences, and for teaching others to do the same.

Under the transdisciplinary instruction of national experts from five different schools at Arizona State University, program participants learn new applications for tools such as agent-based models, evolutionary computing, geographical information systems, machine learning, multiobjective optimization, nonlinear dynamical systems and stochastic processes. In doing so, they unlock new revelations and categories for not just understanding the material, but also the need for scientists and professionals quantitatively trained in the life and social sciences.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Core (6 credit hours)

AML 610 Topics in Applied Mathematics for the Life and Social Sciences (3)

AML 612 Applied Mathematics for the Life and Social Sciences Modeling Seminar (3)

Other Requirements (15 credit hours)

ASM, AML or BIO: courses in evolution, ecology or social sciences (400 level or above) (3)*
one graduate-level course in biostatistics (3)*
one graduate-level School of Mathematical and Statistical Sciences course approved by graduate chair (3)
APM, AML, MAT 590 or 790 Reading and Conference (6)

*Substitution courses may be acceptable with approval of director.

Electives (39 credit hours)

Research (12 credit hours)
AML 592 or 792 Research (12)

Culminating Experience (12 credit hours)
AML 799 Dissertation (12)

Additional Curriculum Information

Electives must include six credit hours of life science and six credit hours of social sciences.

Once the 15 credit hour requirement in the Other Requirements section has been fulfilled, other courses from that category may be taken as electives.

Students must register for research credit (AML 592 or 792) supported by their participation in one of two summer programs, Mathematical and Theoretical Biology Institute or J. Bustoz Math-Science Honors Program, sponsored by the Simon A. Levin Mathematical, Computational and Modeling Sciences Center. Up to three credit hours of research per summer may be applied based on hours and level of participation with approval from the graduate chair and the summer program director.

When approved by the student's supervisory committee and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this degree. If students do not have a previously awarded master's degree, the 30 hours of coursework will be made up of electives to reach the required 84 credit hours.

All students must maintain an average GPA of 3.20 (scale is 4.00 = "A") in their courses and complete degree requirements per the program's satisfactory progress policy.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution. A master's degree in the social sciences (e.g., anthropology, gender studies, geography, sociology), life sciences or related fields (e.g., biology, ecology, genomics), applied mathematics, mathematics or statistics is preferred.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement outlining educational and professional goals
- current curriculum vitae or resume
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Applicants may submit an optional scholarly writing sample, not to exceed 30 double-spaced pages, to be included in their application materials.

Prior to admission, students should have completed, at the undergraduate junior or senior level, a minimum of the following:

- 15 credit hours of mathematics or statistics
- nine credit hours of life sciences and social sciences coursework at the senior or college graduate level
- no fewer than three credit hours each of life sciences and social sciences coursework

Global Opportunities:

Global Experience: Studying abroad is encouraged for graduate students. Nearly all of the College of Global Futures faculty-directed programs offer

graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the College of Global Futures Study Abroad (<https://collegeofglobalfutures.asu.edu/student-life/study-abroad/>) webpage, and additional opportunities and information on the ASU Global Education Office (<https://goglobal.asu.edu/>) website. These sites also include additional information about applying for funding to support global travel.

Graduate students are also encouraged to apply for funding for international research, study and professional development through ASU's Lorraine W. Frank Office of National Scholarships Advisement (<https://onsa.asu.edu/>).

Career Opportunities: The need for scientists and professionals quantitatively trained in the life and social sciences is strong in Arizona and the nation. This degree's applied use of mathematics, modeling, statistics and simulation methodologies are in high demand and provide excellent training for future academics and professionals.

Graduates are prepared to enter the environmental, life, health, mathematical and social science fields. They possess the quantitative, scientific and analytical skills that are critical for professionals working in these areas.

This program creates entirely new opportunities, while building upon mathematical foundations and in-demand career paths long established in fields such as:

- bioinformatics
- computational sciences
- data mining
- ecology
- genomics
- mathematical analysis
- mathematical epidemiology
- nonlinear dynamics
- population dynamics
- social science

Applied Mathematics for the Life and Social Sciences (Complex Adaptive Systems Science), PHD (LAAMLCPHD)

Online Degree Search Title: Applied Math for the Life and Social Sciences (Complex Adaptive Sys Science), PhD

Campus: Tempe

Program Description: The PhD program in applied mathematics for the life and social sciences focuses on training researchers to analyze scientific questions at the intersection of the mathematical, life and social sciences. Graduates of the program make innovative and far-reaching scientific contributions that rely on the advanced computational mathematical and modeling approaches.

This program focuses on producing quantitative scientists and applied mathematicians who conduct high-level transdisciplinary research. The program's faculty include mathematicians, statisticians, theoretical biologists and social scientists from five different schools at Arizona State University.

There is a high demand for first-rate scientists, researchers and faculty interested in meeting the challenges faced by communities in today's world. Institutional research and planning programs create the space and opportunity to address such challenges on a global scale. The health, environmental and natural resource challenges in Arizona and the nation are urgently in need of a large pool of researchers with these transdisciplinary skills.

There are three tracks a student can follow. Applied mathematics is a more in-depth focus on the tools applied to the life and social sciences, such as dynamical systems, computational and numerical methods, simulation and mathematical analysis. Life sciences focuses on understanding the tools for representing the structure and operation of complex biological and ecological processes. Social sciences focuses on understanding the

tools for representing the structure and operation of complex social systems and processes.

By offering courses that enhance transdisciplinary exchanges and collaboration among the faculty and students interested in addressing questions of social relevance, the program builds upon foundations already established.

The complex adaptive systems science concentration trains the next generation of scientists in advanced concepts and methods needed for approaching diverse phenomena in the social and life sciences. The program is tightly integrated with diverse, ongoing, university-wide research on complex adaptive system science at ASU and emphasizes the value of a complex adaptive perspective to give better insight and a more active role in seeking solutions to a broad array of critical issues facing society today. Students become fluent in the common language of complexity while also receiving a solid foundation in the domain knowledge of existing academic disciplines.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, a prospectus and a dissertation.

Required Core (6 credit hours)

AML 610 Topics in Applied Mathematics for the Life and Social Sciences (3)

AML 612 Applied Mathematics for the Life and Social Sciences Modeling Seminar (3)

Concentration Courses (6 credit hours)

ASM 570 Fundamentals of CAS Science (3) or BIO 570 Fundamentals of CAS Science (3)

Complex adaptive systems science approaches course (3)

Restricted Electives (12 credit hours)

biostatistics course (3)

numerical analysis course (3)

life sciences and social sciences (6)

Electives (36 credit hours)

Research (12 credit hours)

AML 592/792 Research (12)

Culminating Experience (12 credit hours)

AML 799 Dissertation (12)

Additional Curriculum Information

Students should see the academic unit for a complete list of complex adaptive systems sciences approaches courses required for the concentration.

For required research, other 592/792 Research courses may be substituted with academic unit approval.

When approved by the student's supervisory committee and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this degree. If students do not have a previously awarded master's degree, the 30 hours of coursework is made up of electives to reach the required 84 credit hours.

Students entering the program without a master's degree must earn an additional 30 hours of graduate credit, produce a research portfolio which is formally evaluated by a faculty committee and present that research in a public forum before continuing on in the later stage of the doctoral program.

All students must maintain an average GPA of 3.20 (scale is 4.00 = "A") in their courses and complete degree requirements per the program's satisfactory progress policy.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution. A master's degree in the social sciences (e.g., anthropology, sociology, gender studies or geography), life sciences or related fields (e.g., biology, genomics or ecology), applied mathematics, mathematics or statistics is preferred.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement outlining educational and professional goals
- current curriculum vitae or resume
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Applicants may submit an optional scholarly writing sample, not to exceed 30 double-spaced pages, to be included in their application materials.

Prior to admission, students should have completed at the undergraduate junior or senior level a minimum of the following:

- fifteen credit hours of mathematics or statistics
- nine credit hours of life sciences and social sciences coursework at the senior or college graduate level
- no fewer than three credit hours each of life sciences and social sciences coursework

Global Opportunities:

Global Experience: Studying abroad is encouraged for graduate students. Nearly all of the College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Biomimicry, MS (LABMYMS)

Online Degree Search Title: Biomimicry, MS

Campus: Online

Program Description: The world's only MS program in biomimicry is offered in conjunction with The Biomimicry Center (<http://biomimicry.asu.edu>), in cooperation with Biomimicry 3.8, the internationally recognized leader in the field.

Biomimicry, the practice of emulating nature's strategies for human designs, empowers change agents passionate about a world mentored by life's genius to work toward innovative and sustainable solutions to pressing global challenges, exploring the way business is conducted, buildings and products are designed, governments operate, health care is provided, goods are manufactured and how future generations will be educated --- all inspired by nature's time-tested sustainable solutions developed over the last 3.8 billion years.

The program's curriculum focuses on this emerging field, with a sustainability emphasis. It is designed to prepare students to facilitate the practice of biomimicry across corporate, government, education and nongovernment organization sectors. In addition to core content and electives, students gain biomimicry experience in biome-based applications, business case studies, biological strategy research and in each participant's self-designed biomimicry project in the student's chosen career field.

Degree Requirements:

30 credit hours and a portfolio.

Required Core (14 credit hours)

BMY 501 Essentials of Biomimicry (1)

BMY 502 Life's Principles (4)

BMY 503 Biology Taught Functionally (4)

BMY 504 Biomimicry Thinking (4)

BMY 505 The Ethos of Biomimicry: A Pathway from Practice to Philosophy (1)

Electives or Research (10 credit hours)

Other Requirements (6 credit hours; choose 3)

BMY 530 Virtual Design Lab Practicum (2)

BMY 580 Topic: BioBrainstorm Practicum (2)

BMY 580 Topic: Biomimicry Case Study Practicum (2)

BMY 580 Topic: Biomimicry Genius of Place Practicum (2)

Culminating Experience
portfolio

Additional Curriculum Information

For electives or research, students should contact the academic unit for the approved course list.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants must submit the following:

- graduate admission application and application fee
- official transcripts
- questionnaire (to be filled out and uploaded)
- curriculum vitae or resume
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/master-science-biomimicry/>) for program descriptions and to request more information.

Global Opportunities:

Global Experience: The biomimicry program offers a distinct global network of participants (approximately 30% are international students). In addition to multiple collaboration opportunities across the program with a diverse set of peers, one has the ability to custom design one or more of

their practicum courses to include studying abroad.

Studying abroad is encouraged for graduate students. Nearly all of the College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the College of Global Futures Study Abroad (<https://collegeofglobalfutures.asu.edu/student-life/study-abroad/>) webpage, and additional opportunities and information on the ASU Global Education Office (<https://goglobal.asu.edu/>) website. These sites also include additional information about applying for funding to support global travel.

Graduate students are also encouraged to apply for funding for international research, study and professional development through ASU's Lorraine W. Frank Office of National Scholarships Advisement (<https://onsa.asu.edu/>).

Career Opportunities: Training in biomimicry offers a toolkit of transferable skills that enhance work in any field, especially STEM, design, business and sustainability. Graduates engage and lead others within their organization or communities by practicing and demonstrating world-class biomimicry. Opportunities include leading research groups focused on biomimicry thinking, developing in-house training and biomimicry tools for companies, becoming a biologist at the design table, directing sustainability efforts, and leading public engagement initiatives for communities seeking sustainable solutions.

The knowledge and skills gained can also lead to initiating or transforming a consulting practice into the field of biomimicry. Biomimicry helps set professionals apart, brings about positive change and complements any career path.

As a transdisciplinary, transformative field, the unprecedented challenges the world faces today demand new thinking, perspectives, tools and solutions. Training in biomimicry distinctly positions one for careers and opportunities that don't yet exist but which the world is demanding.

From the School of Complex Adaptive System's 2022 alumni employment survey (<https://collegeofglobalfutures.asu.edu/careers/employment-data/>), 100% of the biomimicry graduates that responded are employed or pursuing continuing education.

Biomimicry (Certificate), Certificate (LABMYGRCT)

Online Degree Search Title: Biomimicry (Graduate Certificate)

Campus: Online

Program Description: The graduate certificate in biomimicry, the practice of emulating nature's strategies for human designs, is offered in conjunction with The Biomimicry Center (<http://biomimicry.asu.edu>) in cooperation with Biomimicry 3.8, the internationally recognized leader in the field.

The program is designed to introduce and delve into the core fundamentals of biomimicry, such as Biomimicry Thinking and Life's Principles, with the intention to apply the knowledge and tools to one's specific interests or discipline. It is best suited for individuals with an established career who wish to integrate biomimicry into their profession. Participants have the opportunity to explore the application of these core fundamentals in their own discipline, field or area of interest during the biomimicry Virtual Design Lab as their culminating project.

Graduates have the ability to work toward innovative and sustainable solutions within their discipline by emulating nature's time-tested sustainable solutions evolved over the last 3.8 billion years.

Degree Requirements:

15 credit hours.

Required Core (13 credit hours)

BMY 501 Essentials of Biomimicry (1)

BMY 502 Life's Principles (4)

BMY 503 Biology Taught Functionally (4)

BMY 504 Biomimicry Thinking (4)

Other Requirement (2 credit hours)

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program

Applicants must submit the following:

- graduate admissions application and application fee
- official transcripts
- fill out and upload questionnaire
- curriculum vitae or resume
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/international/graduate/english-proficiency>) regardless of their current residency.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/certificates/graduate-certificate-biomimicry/>) for program descriptions and to request more information.

Global Opportunities:

Global Experience: The biomimicry program offers a distinct global network of participants (approximately 30% are international students). In addition to multiple collaboration opportunities across the program with a diverse set of peers, one has the ability to custom design one or more of their practicum courses to include study abroad.

Study abroad is encouraged for graduate students. Nearly all of the College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Coastal and Marine Science and Management, MS (GFCMSMMS)

Online Degree Search Title: Coastal and Marine Science and Management, MS

Campus: Online

This program has a fee pending ABOR approval

Program Description: The MS program in coastal and marine science and management provides core knowledge and professional skills needed to ensure success as the next generation of scientists, resource managers, community leaders, policymakers, innovators, researchers and educators prepare to support and sustain resilient coastal and marine ecosystems for the future. The program prepares students with skills in context-specific and solutions-oriented research, geospatial and statistical data analysis, and written and oral communications, which are needed to lead their communities and organizations, locally and globally, in the stewardship of coastal and marine resources. Through the program coursework and culminating experience, students have the option to conduct use-inspired research and work within communities and both government and nongovernmental agencies on solutions-based projects focusing on coastal and marine science and management, in turn supporting societal needs and the university's mission.

One of the benefits of the program is the opportunity for students to gain additional experience through offerings at the ASU Bermuda Institute of Ocean Sciences (<https://bios.asu.edu/>) and Center for Global Discovery and Conservation Science (<https://globalfutures.asu.edu/gdcs/>) in Hawai'i.

GI Bill® benefits

This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at <https://www.benefits.va.gov/gibill/> (<https://www.benefits.va.gov/gibill/>).

Degree Requirements:

30 credit hours and a thesis, or 30 credit hours including the required capstone course (SEA 597).

Required Core (3 credit hours)

SEA 585 Graduate Ocean Futures Workshop (3)

Electives and Research (20 credit hours)

electives (17)

methods electives (3)

Other Requirements (1 or 4 credit hours)

SEA 591 Current Topics in Ocean Futures (1)

SEA 596 Ocean Futures Capstone Prep (3)

Culminating Experience (3 or 6 credit hours)

SEA 597 Graduate Ocean Futures Capstone (3) or

SEA 599 Thesis (6)

Additional Curriculum Information

Students choose one of two culminating experience options, the thesis or the capstone. Students who choose the capstone course will also need to take three credit hours of SEA 596.

For electives, students should see the academic unit for approved coursework that supports their educational and career objectives.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in biological sciences, ecology, environmental sciences, environmental studies, geography, marine science, natural resource management, oceanography, sustainability, urban planning, geography or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admissions application and application fee
- official transcripts
- professional resume
- two letters of recommendation
- written statement
- proof of English proficiency

Additional Admission Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The written statement should not exceed 600 words and should describe how the applicant's background will contribute to success in the program, and describe how completion of the degree will support long-term career goals. The statement should elaborate on key research questions the

applicant wishes to address or problems to solve as part of the plan of study, and it should identify potential faculty advisors.

Letters of recommendation must be from two people who can attest to the applicant's academic and professional achievements.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/coastal-marine-science-management>) for program descriptions and to request more information.

Global Opportunities:

Global Experience: Study abroad is encouraged for graduate students. Nearly all of the College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Beyond these, students in the Master of Science program in coastal and marine science and management have special opportunities to enhance their learning in locations like Bermuda and Hawai'i.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the College of Global Futures Study Abroad (<https://collegeofglobalfutures.asu.edu/student-life/study-abroad/>) webpage, and additional opportunities and information on the ASU Global Education Office (<https://goglobal.asu.edu/>) website. These sites also include additional information about applying for funding to support global travel.

Graduate students are also encouraged to apply for funding for international research, study and professional development through ASU's Lorraine W. Frank Office of National Scholarships Advisement (<https://onsa.asu.edu/>).

Career Opportunities: With the increasing recognition that global oceans and coastal communities play a critical role in protecting future well-being, marine professionals are in high demand across many sectors and industries, including county, state and federal agencies, as well as nongovernmental and community organizations. Those with expertise in areas such as coastal and marine ecosystem science, social and economic system science, natural resource policy and management, land-sea interactions, marine tourism, community-based stewardship, fisheries science and coral reef restoration are valuable to businesses and institutions looking for the next generation of leaders to steward coastal and marine resources.

Career paths include:

- community planner
- conservation manager
- education
- environmental consultant
- environmental scientist
- marine scientist
- natural resource manager
- researcher

Complex Adaptive Systems Science, PHD (GFCASPHD)

Online Degree Search Title: Complex Adaptive Systems Science, PhD

Campus: Tempe

Program Description: Complex adaptive system concepts and methods serve as a common language to fuse different intellectual disciplines, enabling the transdisciplinary collaborations needed to come to grips with current and future intellectual and societal challenges. Rather than focus on specialized understanding of the characteristics of a limited suite of phenomena, as is common in most academic disciplines, the PhD program in complex adaptive systems science emphasizes the interconnections among phenomena comprising dynamic, evolving systems. Many of the systems most critical to human life and society can be studied and understood in this way: from cells to organisms to populations to ecosystems to societies to technologies. Graduates of this program will be fluent in the language, concepts and methods of complexity needed to apply this innovative and valuable approach to understanding and addressing challenges of the complexly coupled human and natural world in which all

people live.

ASU is already an international leader in complex adaptive systems science, with a growing constellation of research centers, and now the first-of-its-kind School of Complex Adaptive Systems. By broadly embedding an understanding of complex adaptive systems approaches into scientific practice, students in the program gain the potential to transform science and society --- furthering ASU's global leadership in this emerging academic discipline. Students in the program develop skills in theoretical foundations, modeling, problem solving and critical thinking. The program promotes the development and testing of robust theory with sophisticated methods in a wide array of research settings, grounded in concrete examples and applications to provide a deeper understanding of the nature and dynamics of complex adaptive systems.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, an oral comprehensive exam, a written comprehensive exam, a prospectus and a dissertation..

Required Core (3 credit hours)

CAS 570 Fundamentals of CAS Science (3)

Focus Area (6 credit hours)

Electives (51 credit hours)

Research (12 credit hours)

CAS 792 Research (12)

Culminating Experience (12 credit hours)

CAS 799 Dissertation (12)

Additional Curriculum Information

Students select a focus area from either domain science or transdisciplinary bridging.

Domain science: Students will enhance their complex adaptive systems education with in-depth training in a social, life or physical science, or an engineering field. They are expected to be able to make significant contributions to their chosen domain science field from the perspective of complex adaptive systems science.

Transdisciplinary bridging: Students will enhance their complex adaptive systems education with advanced training in computer science and data science. The goal of this focus is to enable students to use a complex adaptive systems perspective and framework as a bridge to enable intellectual fusion across multiple disciplines by applying advanced knowledge of complex adaptive systems theory, data science and information technology.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution. The school encourages applicants with diverse educational backgrounds and experiences that are relevant to the school's core objectives.

Applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- letter of intent
- writing sample
- three letters of recommendation
- resume or curriculum vitae
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The statement of intent should not exceed 600 words and should describe how the applicant's background will contribute to success in the program,
2024-25 Academic Catalog Archive 910

describe how completion of the degree will support the applicant's long-term career goals, and explain why the applicant is applying to the College of Global Futures and, more specifically, the doctoral program in complex adaptive systems science. The statement of intent should elaborate on key research questions the applicant wishes to address or problems to solve as part of the plan of study, and it should identify potential faculty advisors.

Letters of recommendation must be from three people who can attest to the applicant's academic and professional achievements. At least one letter should be academic in nature.

Applicants will need to provide a writing sample that demonstrates graduate or professional-level writing.

Global Opportunities:

Global Experience: Study abroad is encouraged for graduate students. Nearly all of the College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the College of Global Futures Study Abroad (<https://collegeofglobalfutures.asu.edu/student-life/study-abroad/>) webpage, and additional opportunities and information on the ASU Global Education Office (<https://goglobal.asu.edu/>) website. These sites also include additional information about applying for funding to support global travel.

Graduate students are also encouraged to apply for funding for international research, study and professional development through ASU's Lorraine W. Frank Office of National Scholarships Advisement (<https://onsa.asu.edu/>).

Career Opportunities: This program is the first of its kind in the U.S., and graduates will have multiple career opportunities. Complex adaptive systems science is an important part of solutions in fields such as sustainability, social and ecological sciences, life sciences, biomedical sciences, geophysical sciences and computer science. It is equally foundational for understanding risk and security.

Complex Adaptive Systems Science (certificate), Certificate (SUCASGRCT)

Online Degree Search Title: Complex Adaptive Systems Science (Graduate Certificate)

Campus: Downtown Phoenix, Polytechnic, Tempe

Program Description: Complex adaptive systems science is the study of interactive and dynamic systems that change over time, producing their own emergent properties. The complex adaptive systems science graduate certificate can be pursued along with any doctoral degree program at Arizona State University. Students in the certificate program pursue their chosen field of study while addressing intricate global challenges.

Complex adaptive system concepts and methods provide a common language that enables the interdisciplinary collaborations required for coming to grips with the intellectual and societal challenges of today's world. The program trains the next generation of scientists in advanced concepts and methods that are necessary for approaching diverse phenomena in the social and life sciences. The program is tightly integrated with diverse, ongoing university-wide research on complex adaptive system science at Arizona State University and emphasizes the value of a complex adaptive systems perspective to give science better insight and a more active role in seeking solutions to a broad array of critical issues facing society today. Students become fluent in the common language of complexity while also receiving a solid foundation in the domain knowledge of existing academic disciplines.

Degree Requirements:

15 credit hours.

Required Core (12 credit hours)

Electives (3 credit hours)

Additional Curriculum Information

Students should contact the academic unit about appropriate coursework. Students pursuing the certificate must have a complex adaptive systems science faculty member (<https://graduateapps.asu.edu/graduate-faculty/degree/CASS>) on their supervisory committee. They must also take three research hours in their doctoral discipline with a complex adaptive systems science faculty member.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they are either enrolled in or accepted into an ASU doctoral degree program and they must be in good standing within the program.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admissions application and application fee
- official transcripts
- statement of intent
- letter of support from an ASU faculty member (for existing ASU students) or other faculty member (for incoming students)
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

International students who need an F1 or J1 visa first need to apply to and be accepted into a graduate degree program prior to being considered for the certificate program. International students residing in the USA on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for admission to this certificate program.

Global Opportunities:

Global Experience: Studying abroad is encouraged for graduate students. Nearly all of the College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the College of Global Futures Study Abroad (<https://collegeofglobalfutures.asu.edu/student-life/study-abroad/>) webpage, and additional opportunities and information on the ASU Global Education Office (<https://goglobal.asu.edu/>) website. These sites also include additional information about applying for funding to support global travel.

Career Opportunities: A complex systems approach to the program means graduates possess the ability to understand the interconnections within and between technological, economic, societal, biomedical and environmental systems and have developed advanced digital skills like modeling and network science. This gives them an edge in diverse careers in science, technology and data analytics, especially compared with peers in their field of study who lack such expertise.

Graduates who hold this certificate can apply the skills learned to any field or profession, although advanced degrees or certifications may be required. Career area examples include:

- business intelligence analytics
- consulting
- corporate social responsibility and sustainability
- data and microsystem engineering
- data science
- education
- military intelligence systems
- nongovernmental and nonprofit work
- policymaking in government and regulatory agencies
- research and development

Complex Systems Science, MS (GFCMPXSSMS)

Online Degree Search Title: Complex Systems Science, MS
2024-25 Academic Catalog Archive

Campus: Tempe, Online

Program Description: Most systems are complex. This means that through the interaction between their parts, these systems exhibit emergent properties and unintended consequences.

The curriculum in the MS program in complex systems science focuses on developing skills in theoretical foundations, modeling, problem solving, critical thinking, and the importance of direct experience through research or related activities. Complex systems science students cultivate the ability to approach complex problems through analysis and modeling and by identifying issues, asking questions and collaborating with others to create effective solutions.

Graduates in complex systems science can apply their skills to a large number of areas and in many professions where they can make a difference through innovative and creative methods. Knowledge and skills gained in the program include:

- business enabler skills such as project management, decision-making, visualization and data communication
- digital building block skills such as artificial intelligence and data analytics, big data and data management, software development and information security
- domain knowledge in areas such as strategy, economics, marketing, communications and public relations, talent development and human resources, research and design, and product development
- human skills such as critical thinking, creativity, analytical reasoning, communication and collaboration

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

30 credit hours including the required applied project course (CAS 593).

Required Core (15 credit hours)

CAS 501 Fundamentals of Complex Systems Science: Evolution (3)

CAS 502 Fundamentals of Complex Systems Science: Computation (3)

CAS 503 Fundamentals of Complex Systems Science: Collectives (3)

Choose two from the following:

CAS 520 Agent Based Modeling (3)

CAS 521 Methods for Complex Systems Science: Network Analysis (3)

CAS 522 Methods for Complex Systems Science: Dynamical Systems (3)

CAS 523 Methods for Complex Systems Science: Statistics and Dimensionality Reduction (3)

Electives (9 credit hours)

Culminating Experience (6 credit hours)

CAS 593 Applied Project (6)

Additional Curriculum Information

The applied project is a modeling and research project in any of the applied or foundational areas of complex systems science. Students define this project with a faculty mentor and apply a selection of methods covered in the methods courses to a dataset. The applied project also involves the creation of a portfolio of student accomplishments.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a STEM field, economics, social sciences, humanities or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- two letters of recommendation
- written statement
- professional resume
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of current residency.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/complex-system-science-masters/>) for program descriptions and to request more information.

Global Opportunities:

Global Experience: Studying abroad is encouraged for graduate students. Nearly all of the College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Energy and Sustainability (certificate), Certificate (SUERGSGRCT)

Online Degree Search Title: Energy and Sustainability (Graduate Certificate)

Campus: Tempe

Program Description: The global energy system is a complex sociotechnical system. Leaders in sustainable energy must have a transdisciplinary perspective that combines technical, economic, social and policy dimensions of energy systems. The certificate in energy and sustainability is designed to train students from diverse educational backgrounds who are in graduate-level energy-related fields to see beyond the boundaries of traditional methodologies and disciplinary viewpoints, enabling them to integrate technological knowledge with societal insights.

Graduates of the certificate program have a basic understanding of sustainable energy technology and systems, including social dimensions such as markets and policies. They understand energy transitions as a dynamic sociotechnical process, and they are able to perform analyses of energy

generation, consumption and costs, and how these metrics can be utilized in policy discussions.

Degree Requirements:

15 credit hours.

Required Core (6 credit hours)

SOS 572 Sustainable Energy Transitions (3)

SOS 574 Data Analytics for Sustainable Energy (3)

Electives (9 credit hours)

technical fundamentals of energy systems elective (3)

policy and governance of energy systems elective (3)

restricted elective (3)

Additional Curriculum Information

Students should contact the academic unit for the most recent approved elective coursework. Other coursework may be used with approval of the academic unit.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

International students who need an F1 or J1 visa first need to apply to and be accepted into a graduate degree program prior to being considered for the certificate program. International students residing in the USA on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for admission to this certificate program.

Global Opportunities:

Global Experience: Studying abroad is encouraged for graduate students. Nearly all of the College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. These sites also include additional information about applying for funding to support global travel.

Career Opportunities: Future energy challenges will be addressed by leaders who understand the complexity and dynamics of global energy systems and can communicate with diverse stakeholders to implement adaptive solutions. Graduates with this certificate are competitive for employment opportunities in academia, industry or government.

Career examples include:

- policy analyst
- project manager
- regulatory affairs specialist
- renewable energy engineer
- strategy consultant

Environmental and Sustainability Economics (Certificate), Certificate (SUESECGRCT)

Online Degree Search Title: Environmental and Sustainability Economics (Graduate Certificate)

Campus: Downtown Phoenix, Polytechnic, Tempe

Program Description: The graduate certificate program in environmental and sustainability economics provides training in the economic theory and quantitative modeling tools of environmental and resource economics. Environmental and resource economics provides an approach for evaluating the consequences, social benefits and costs of changes to markets and environmental policies.

Prospective students for this certificate include current master's and doctoral students in fields with a sustainability, environmental science or policy focus --- including sustainability, public affairs, biology, environmental social science, applied mathematics and agribusiness --- in which training in environmental and resource economics may be complementary to research interests or career development. To pursue this certificate, students must be concurrently enrolled in a graduate degree-granting program.

Graduates of the certificate program are able to identify and evaluate the economic assumptions embedded in policy analyses and recommendations. They are also able to critically evaluate the validity of publications in environmental and resource economics; apply economic modeling approaches to authentic cases; utilize econometric techniques to evaluate causal claims and generate predictions; and test hypotheses using applied economic models.

Degree Requirements:

17 credit hours.

Required Core (5 credit hours)

SOS 512 Environmental and Resource Economics (3)

SOS 529 Research Seminar in Environmental and Sustainability Economics (2)

Electives (12 credit hours)

Additional Curriculum Information

Students choose one elective course in each of the following categories: microeconomic theory, statistical and econometric modeling, environmental and resource economics, and modeling and empirical methods.

Students should see the academic unit for a list of approved electives.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

International students who need an F1 or J1 visa first need to apply to and be accepted into a graduate degree program prior to being considered for the certificate program. International students residing in the USA on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for admission to this certificate program.

There is no prerequisite coursework; however, it is strongly recommended that students have at least one semester of calculus or the equivalent such as MAT 251 Calculus for Life Sciences, MAT 265 Calculus for Engineers or SOS 211 Calculus and Probability.

Global Opportunities:

Global Experience: Studying abroad is encouraged for graduate students. Nearly all of the College of Global Futures faculty-directed programs offer

graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the College of Global Futures Study Abroad webpage (<https://collegeofglobalfutures.asu.edu/student-life/study-abroad/>), and additional opportunities and information on the ASU Global Education Office website (<https://goglobal.asu.edu/>). These sites also include additional information about applying for funding to support global travel.

Career Opportunities: Professionals with expertise in environmental and resource economics are in demand across sectors and industries, including business, sustainability, government, biology and applied mathematics.

Career examples include:

- chief sustainability officer
- economist
- environmental economist
- environmental engineer
- environmental protection specialist
- environmental restoration planner
- health sciences manager
- postsecondary environmental sciences professor
- sustainability specialist

Food Policy and Sustainability Leadership (certificate), Certificate (SUFPSLGRCT)

Online Degree Search Title: Food Policy and Sustainability Leadership (Graduate Certificate)

Campus: Tempe, Online

Program Description: The certificate program in food policy and sustainability leadership trains students in food policy, from understanding policymaking to developing specific, master-level skills that allow them to effectively navigate legislative, budgetary and administrative governmental processes. This empowers students to grapple with modern food system complexities and become effective agents of change.

Students are exposed to contemporary food policy issues and choose a food policy issue in which, with faculty assistance, they become an expert. Students participate in research projects and professional presentations that contribute to food policy knowledge among sustainable food system advocates.

The program includes two week-long experiences for students to engage in food systems. The first is in Arizona. Students have the opportunity to talk with and learn from farmers, ranchers and supply chain businesses about how food and agriculture policies and programs impact their operations. The second is a seminar in Washington, D.C. Students gain knowledge of leadership theories, develop leadership skills and engage in conversation with influential food policy leaders from a variety of sectors.

Degree Requirements:

15 credit hours including the required capstone course (SFS 565).

Required Core (12 credit hours)

SFS 560 Tools and Tactics for Food Policy Change (3)

SFS 561 Food and Farm Immersion Experience (2)

SFS 562 Managing Natural Resources for Food Production (3)

SFS 563 Applied Food Policy Immersion Experience (2)

SFS 564 American Agriculture in the Global Context (2)

Culminating Experience (3 credit hours)

SFS 565 Organizational Leadership (3)

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of a student's first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- two letters of recommendation
- professional resume
- personal statement
- interview (in-person or virtual)
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

International students who need an F1 or J1 visa first need to apply to and be accepted into a graduate degree program prior to being considered for the certificate program. International students residing in the USA on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for admission to this certificate program.

The personal statement should not exceed 1,500 words, and it should describe a food policy issue of interest to the applicant and why the applicant thinks that engaging in policy is important as it relates to this issue.

Applicants should also have a minimum of two years of professional or organizational experience in food and agriculture.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/certificates/sustainable-food/>) for program descriptions and to request more information.

Global Opportunities:

Global Experience: Studying abroad is encouraged for graduate students. Nearly all of the College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Futures and Design, MS (GFFDMS)

Online Degree Search Title: Futures and Design, MS

Campus: ASU at Mesa City Center

Program Description: The MS program in futures and design combines future-focused theories and practices, including speculative design, science fiction and foresight studies, to investigate and craft alternative futures. Students learn a range of future-oriented theories and methods used by organizations today and invent the theories and methods of tomorrow. Students explore a variety of epistemological perspectives and experiential processes to systematically define complex problems and explore robust strategies of change. In doing so, they diversify their critical thinking and problem-solving skills.

Drawing from social theory, innovation studies and design science, the program develops students' capacity to envision new futures across scales of complexity, including objects, platforms, services, organizations and systems. Students work in transdisciplinary teams with professional partners from industry and the community to produce compelling visions of that future in diverse media.

The Master of Science in futures and design is offered by the transdisciplinary School for the Future of Innovation in Society. One of the benefits of this program is the opportunity to learn within the Media and Immersive eXperience (MIX) Center (<https://herbergerinstitute.asu.edu/degree-programs/mix-center-graduate-degrees>), which offers emerging media technologies and collaborative engagement with the community.

Degree Requirements:

33 credit hours including the required applied project course (HSD 593).

Required Core (15 credit hours)

HDA 581 Emerging Media Colloquium (3)

HSD 550 Prototyping Futures (3)

HSD 551 Future-Focused Research Methods (3)

HSD 552 Worldbuilding and Imagination (3)

HSD 555 Strategic Design Futures (3)

Electives (9 credit hours)

Other Requirements (3 credit hours)

DSC 584 Internship (3)

DSC 590 Reading and Conference (3)

DSC 592 Research (3)

HDA 580 Practicum (3)

HSD 584 Internship (3)

HSD 590 Reading and Conference (3)

HSD 592 Research (3)

Culminating Experience (6 credit hours)

HSD 593 Applied Project (6)

Additional Curriculum Information

Students take the one credit hour course HDA 581 Emerging Media Colloquium three times to attain a total of three credits for the course.

Admission Requirements: Applicants must fulfill the requirement of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- professional resume
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency
2024-25 Academic Catalog Archive

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Global Opportunities:

Global Experience: Studying abroad is encouraged for graduate students. Nearly all of the College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the College of Global Futures Study Abroad webpage (<https://collegeofglobalfutures.asu.edu/student-life/study-abroad/>), and additional opportunities and information on the ASU Global Education Office website (<https://goglobal.asu.edu/>). These sites also include additional information about applying for funding to support global travel.

Graduate students are also encouraged to apply for funding for international research, study and professional development through ASU's Lorraine W. Frank Office of National Scholarships Advisement (<https://onsa.asu.edu/>).

Career Opportunities: There is an increasing demand for professionals who are trained in navigating uncertainty, design thinking and strategic coping with disruptive change --- key skills that graduates of this program are equipped with. In fact, one of the core methods covered in the program --- scenario planning --- was listed by Bain and Company as one of the top 25 management tools in 2023 (<https://www.bain.com/insights/management-tools-scenario-and-contingency-planning/> (<https://www.bain.com/insights/management-tools-scenario-and-contingency-planning/>)). Harvard Business School has identified anticipation as an essential skill of a strategic leader.

Some career examples include:

- director of futures strategy
- futurist
- global trends manager
- growth strategist
- ideation leader
- issues manager
- principal foresight researcher
- strategic planner

Global Development and Innovation (Certificate), Certificate (FIGDIGRCT)

Online Degree Search Title: Global Development and Innovation (Graduate Certificate)

Campus: Tempe, Online

Program Description: The graduate certificate program in global development and innovation responds to the gap in knowledge and skills that development practitioners around the world often struggle with. It provides current and critical perspectives as well as analytical and practical skills for addressing some of today's most pressing global challenges, including inequality, sustainability and poverty.

Graduates will have acquired an understanding of the main debates in global development, and they will be able to engage in informed and critical ways with professionals from a range of development backgrounds to challenge development orthodoxies. They will have learned how to approach development problems with creativity and confidence and with the ability to work collaboratively on addressing some of today's most pressing global challenges, including inequality and sustainability.

Degree Requirements:

15 credit hours.

Required Core (3 credit hours)

GTD 511 Development Policy and Practices (3)

Electives (12 credit hours)

Additional Curriculum Information

Students complete 12 credit hours of electives: six credit hours of courses focused on global development and six credit hours of other elective

courses that are relevant to the certificate. No more than three one-credit courses may count toward the 12. The electives can change over time as needed with unit director approval. For a current and complete list of approved electives, students should see the academic unit.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution or the equivalent from an international institution that is officially recognized by that country.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- personal statement
- resume
- official transcripts
- two letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Acceptable proof consists of a TOEFL iBT score of at least 80, an IELTS overall band score of at least 6.5 with no band below 6.0, or a Pearson Test of English score of at least 60. The most current requirements are available on the Admission Services website (<https://admission.asu.edu/apply/international/graduate/english-proficiency>).

International students who need an F1 or J1 visa first need to apply to and be accepted into a master's degree or doctoral degree program prior to being considered for the certificate program. International students residing in the USA on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for admission to this certificate program.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/certificates/global-development-and-innovation-graduate-certificate/>) for program descriptions and to request more information.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Able to communicate global development policies, the practice of development, and actual outcomes.

Global Opportunities:

Global Experience: Studying abroad is encouraged for graduate students. Nearly all of the College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the College of Global Futures Study Abroad webpage (<https://collegeofglobalfutures.asu.edu/student-life/study-abroad/>), and additional opportunities and information on the ASU Global Education Office website (<https://goglobal.asu.edu/>). These sites also include additional information about applying for funding to support global travel.

Career Opportunities: This certificate program may be paired with other graduate degrees, enabling graduates to pursue a variety of careers. Professionals with an understanding of the main debates in development are in high demand across a wide range of global development agencies, including nongovernmental organizations, civil society, foundations, industries and philanthropic organizations.

Career examples include:

- data analyst
- development field researcher
- development planner
- development program associate
- gender specialist in nongovernmental organizations
- organizational consultant

- organizational development specialist
- poverty policy analyst
- social entrepreneur

Global Sustainability Science, MS (SUGSUSSMS)

Online Degree Search Title: Global Sustainability Science, MS

Campus: Tempe

ASU is not currently accepting applications for this program.

Program Description: The MS in global sustainability science is a two-year, collaborative degree program offered jointly by Arizona State University and Leuphana University of Luneburg, Germany. Students who participate in the program earn a Master of Science in global sustainability science from ASU and a Master of Science in global sustainability science from Leuphana University.

Students from both universities collaborate throughout the program and spend one semester together at Leuphana in Luneburg as well as one semester together at ASU in Tempe, Arizona. The program culminates with a capstone project resulting in a publishable scientific journal article. Students have the opportunity to engage with sustainability problems and solutions in an international setting.

The program focuses on value-oriented and transformational aspects of sustainability, linking research with practical implementation of sustainability solutions. Project-based learning offers students opportunities to conduct their research on practical sustainability solutions in collaboration with stakeholders and professionals. In addition, the program facilitates intercultural collaboration, which prepares graduates for working in internationally operating institutions and organizations.

Degree Requirements:

41 credit hours including the required capstone course (SOS 596).

Required Core (17 credit hours)

SOS 510 Perspectives on Sustainability (3)

SOS 511 Advanced Sustainability Problem Solving (3)

SOS 525 Social-Ecological-Technical Systems (SETS): Domains and Interfaces (3)

SOS 557 Global Sustainability Research Preparation (1)

SOS 558 Global Sustainability Research Project (3)

SOS 559 Global Sustainability Science Perspectives Seminar (1)

SOS 581 Synthesis for Sustainability Research (3)

Methods Elective (3 credit hours)

Open Electives (15 credit hours)

Culminating Experience (6 credit hours)

SOS 596 Capstone: Scientific Paper (6)

Additional Curriculum Information

Students should see the academic unit for elective coursework approval.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- three letters of recommendation
- letter of intent or written statement
- professional resume

- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Applicants who don't meet the minimum GPA requirement may still be considered, but the college will require a GPA petition.

References should be from educators (this is preferred) or professionals familiar with the applicant's experience and capability for graduate work. It is highly recommended that the recommendations are academic in nature and address the applicant's experience and potential for success in a graduate program; however, professional recommendations also are accepted. If possible, at least one recommendation should be academic in nature.

All applicants must upload a statement of intent when completing the online application. In no more than 600 words, applicants must explain the goals they intend to achieve through their program of study at the College of Global Futures. Applicants should describe how their background will contribute to their success in the program and how completion of the degree program will support their long-term career goals. Finally, applicants should elaborate on key research questions they wish to address or problems they wish to solve as part of their program of study and identify potential faculty advisors.

Global Opportunities:

Global Degree: With a global degree program, students have the opportunity to receive their ASU degree in partnership with an international institution. Students and faculty can create and share knowledge, combining two institutions' strengths in research and teaching to solve pressing global and societal challenges. Global degree programs also give students exposure to international academic experiences and content. Students should contact the academic unit directly for more information about this global degree program.

Career Opportunities: Completing a master's degree in global sustainability science can help graduates apply sustainable solutions for a diverse workforce both domestically and internationally. Graduates often enter doctoral studies immediately after completing this program.

According to the School of Sustainability's 2021 alumni employment survey, 94% of master's degree program respondents are either employed or pursuing continuing education. Of those employed, 75% of respondents have jobs directly related to sustainability.

Career opportunities include:

- entrepreneur
- field director
- program manager
- sustainability analyst

Global Technology and Development, MS (LSGTDMS)

Online Degree Search Title: Global Technology and Development, MS

Campus: Tempe, Online

Program Description: The MS in global technology and development is a program in international development that examines social, economic and political development and is concerned with the global disparity in wealth and access to resources between and among countries around the world.

Global in scope, the program highlights the variables of technology and innovation in these development dynamics with explicit goals to seek equity and justice and ease human suffering. The program offers an interdisciplinary social science curriculum and trains students with diverse undergraduate degrees, backgrounds and experiences.

Students have the opportunity to pursue a customized program to address social, economic and political challenges anywhere in the world. Through a wide variety of theoretical, research, policy and special topics courses, students are prepared to finish the degree program with an applied project of their choosing that explores theoretical aspects of global development or applied solutions for impact.

Learning outcomes and skills include research, writing, analysis and the ability to understand the complexity of diverse cultural, social and political contexts. These in-demand skills and abilities transfer to a myriad of career pathways.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Innovation in Society, BS
- Innovation in Society, BA
- Technological Entrepreneurship and Management, BS
- Technological Leadership, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours including the required applied project course (GTD 593).

Required Core (3 credit hours)

GTD 511 Development Policies and Practices (3)

Other Requirements (12 credit hours)

GTD 501 Global Technology and Development (3)

GTD 503 Technology and the International Political System (3)

GTD 505 Social Science Inquiry for Global Development (3)

GTD 506 Applied Project Methods in Global Development (3)

Restricted Electives (12 credit hours)

Culminating Experience (3 credit hours)

GTD 593 Applied Project (3)

Additional Curriculum Information

For the approved electives course list, students should contact the academic unit. Other requirement courses may be substituted with approval of the academic unit.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's degree from a regionally accredited college or university recognized by ASU in a related field such as political science, international relations, sociology, anthropology, economics, business, education, technology, engineering, life sciences, foreign languages or literature (i.e., topics related to global development, culture or socioeconomic institutions).

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- two letters of recommendation
- resume
- proof of English language proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. A TOEFL score is required. Applicants should visit the admission services website (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) for more information.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/master-science-global-technology-development/>) for program descriptions and to request more information.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Identify, articulate and critique main theories of global technology and development.

- Identify a current problem in global development, and create relevant and focused research questions, followed by a research design, and completed research or applied solution.
- Identify current priorities in global development, and critique how discourse, institutions and policies shape development outcomes.

Global Opportunities:

Global Experience: Studying abroad is encouraged for graduate students. Nearly all of the College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the College of Global Futures Study Abroad webpage (<https://collegeofglobalfutures.asu.edu/student-life/study-abroad/>), and additional opportunities and information on the ASU Global Education Office website (<https://goglobal.asu.edu/>). These sites also include additional information about applying for funding to support global travel.

Graduate students are also encouraged to apply for funding for international research, study and professional development through ASU's Lorraine W. Frank Office of National Scholarships Advisement (<https://onsa.asu.edu/>).

Career Opportunities: Graduates of the global technology and development program pursue impactful and rewarding careers in international development, across all sectors and in all types of entities: government agencies, nongovernmental organizations, nonprofits, educational institutions, private businesses and corporations.

From the School for the Future of Innovation in Society's 2022 alumni employment survey (<https://collegeofglobalfutures.asu.edu/careers/employment-data/>), 100% of master's degree program respondents are either employed or pursuing continuing education. Of those respondents employed, 67% have jobs directly related to their degree.

Career examples include:

- analyst (research, project, technical, data)
- consultant (fundraising, marketing, information technology)
- coordinator (environmental, health, safety, operations)
- educator (instructional design, teacher, instructor)
- manager (product, project, security, business, program, information technology)
- project lead (humanitarian missions, Information and Communications Technologies for Development projects, smart city initiatives)
- researcher (higher education, government, nonprofit)

Global Technology and Development (Applied International Development), MS (FIGTDAIDMS)

Online Degree Search Title: Global Technology and Development (Applied International Development), MS

Campus: Online

This program is no longer offering the business specialization option.

Program Description: The MS in global technology and development with a concentration in applied international development is a program focused on policies and practices in the development field and includes specializations provided by other units across the university.

The program offers an interdisciplinary social science curriculum and trains students with diverse undergraduate degrees, backgrounds and experiences. Highly customizable, the program allows professionals at any stage of their career to develop and enhance their skills in planning, management, analysis and evaluation in development practice.

Students select an area to specialize in, such as education, sustainability, health, management, public policy or community development, where they can directly apply their knowledge to a relevant sector. Learning outcomes emphasize the utilization of skills and experience that students already possess, and enhanced abilities in analysis, critical thinking and the application of knowledge to development-related challenges. Through a wide variety of research, policy and special topics courses, students are prepared to finish the degree program with an applied project of their choosing that explores a critical aspect of global development and an applied solution for impact.

Degree Requirements:

30 credit hours including the required applied project course (GTD 593).

Required Core (3 credit hours)

GTD 511 Development Policy and Practices (3)

Concentration (9 credit hours)

GTD 501 Global Technology and Development (3)

GTD 503 Technology and the International Political System (3)

GTD 504 Technology and Development in Zones of Conflict (3)

GTD 505 Social Science Inquiry for Global Development (3)

GTD 506 Applied Project Methods in Global Development (3)

GTD 508 Technology and Development in Latin America (3)

NLM 520 Financial and Resource Management (3)

NLM 530 Program Evaluation and Information Management (3)

Specialization Electives (15 credit hours)

Culminating Experience (3 credit hours)

GTD 593 Applied Project (3)

Additional Curriculum Information

Students select three courses from the concentration list for a total of nine credit hours.

Students may take elective courses in an area of interest from a variety of academic programs such as education, sustainability, health, management, public policy and community development. Students should see the academic unit for available specializations and approved course list.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in global development, education, business, health, management, community development or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- letter of intent or written statement
- two letters of recommendation
- resume
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

A personal statement of purpose of one to two pages is required for admission as well as two letters of recommendation, either academic or professional. While the GRE is not required, the statement of purpose is a significant factor in the application process, and it should address the background and capabilities of the applicant as well as the applicant's interest in the program.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/global-technology-development-applied-international-development-ms/>) for program descriptions and to request more information.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Identify, and critique global technology and development concepts and current challenges.
- Identify and articulate a current problem in global development and create relevant and focused applied research project or an applied solution.
- Identify current priorities in global development, and critique how discourse, institutions and policies shape development outcomes.

Global Opportunities:

Global Experience: Studying abroad is encouraged for graduate students. Nearly all of the College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Human and Social Dimensions of Science and Technology, PHD (GCHSDSTPHD)

Online Degree Search Title: Human and Social Dimensions of Science and Technology, PhD

Campus: Tempe

Program Description: The PhD program in human and social dimensions of science and technology is an intellectually rigorous program with problem-oriented research. It prepares students to teach and conduct research using humanistic and social science methods on the social, historical, philosophical and policy foundations of science and technology, as well as on their current and future interactions with society.

The curriculum responds to growing demand for transdisciplinary research in the humanities, information sciences and social sciences that can provide insights into the dynamic relationship between science, technology and society.

The program is flexible, combining a strong, integrated first-year experience with substantial freedom for students who, in conjunction with their advisors, design carefully crafted plans of study relevant to their own areas of specialization and expertise. Distinct from programs of this kind in the nation, students also learn to communicate and work with scientists, engineers, policymakers, business and community officials, or the public in conducting and applying research.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Core (8 credit hours)

HSD 601 HSD I: Human Dimensions of Science and Technology (4)

HSD 602 HSD II: Science, Power and Politics (4)

Electives and Research (64 credit hours)

Culminating Experience (12 credit hours)

HSD 799 Dissertation (12)

Additional Curriculum Information

This is a research degree, culminating in a dissertation, which must draw on multiple disciplinary perspectives.

Students may apply up to 30 credit hours from a prior master's degree toward the total hour requirement, upon approval of the steering committee. Each student, with his or her supervisory committee, develops a distinct plan of study, which the student's supervisory committee approves.

Each student completes a yearlong core seminar, a second-year research project, two major fields, one minor field, methods training, electives and research. Students also regularly attend the program colloquia. There are no foreign language or statistics requirements, except as needed for a particular student's selected dissertation project.

Comprehensive Examination

The written dissertation prospectus and its oral defense constitute the written and oral comprehensive examinations required by the Graduate College for advancement to candidacy. Each student develops a written dissertation prospectus, including a bibliography and discussion of relevant research skills. The student makes an oral defense of the dissertation prospectus to the supervisory committee, which must approve the prospectus. Students normally complete the dissertation prospectus and its defense in the fifth semester.

Dissertation

The dissertation represents an original body of research that contributes to existing knowledge in a significant way.

Final Examination

Upon completing the dissertation, the student makes an oral defense of the dissertation to the supervisory committee, which must approve the dissertation. The doctorate is granted upon successful completion of the oral defense and any revisions to the dissertation required by committee members.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- HSD academic record form
- a curriculum vitae or resume
- a personal statement
- a writing sample
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. In order to meet English proficiency students must have an IELTS overall band score of at least 6.5 with no band below 6.0, or Pearson Test of English score of at least 60, or a TOEFL iBT score of at least 80. ASU's institutional code is 4007. ASU only accepts electronic copies of the TOEFL score report.

Preference is given to students with demonstrated interest and competence in relevant areas of intellectual work.

The personal statement should be one or two single-spaced pages. It must be a statement of proposed research that clearly explains why the student feels ASU is the appropriate place to pursue their doctorate, identifies at least one faculty member whose interest or work is relevant to the student's proposed research, and describes the goals for pursuing the degree.

The writing sample should be a 10- to 25-page sample of academic writing, such as a course paper, an undergraduate thesis, or an excerpt from a master's thesis.

Students should see the program website for application deadlines.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Evaluate foundational theories and existing literature in humanistic and social studies of science and technology and identify gaps and opportunities for future research
- Design a comprehensive research proposal to critique, analyze and explore a key issue or theme in the human and social dimensions of science and technology
- Communicate, orally and in writing, a well-developed research agenda in the human and social dimensions of science and technology

Global Opportunities:

Global Experience: Studying abroad is encouraged for graduate students. Nearly all of the College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the College of Global Futures Study Abroad webpage (<https://collegeofglobalfutures.asu.edu/student-life/study-abroad/>), and additional opportunities and information on the ASU Global Education Office website (<https://goglobal.asu.edu/>). These sites also include additional information about applying for funding to support global travel.

Graduate students are also encouraged to apply for funding for international research, study and professional development through ASU's Lorraine W. Frank Office of National Scholarships Advisement (<https://onsa.asu.edu/>).

Career Opportunities: Professionals with expertise in the human and societal dimensions of science, technology and innovation are in high demand across many sectors. From the School for the Future of Innovation in Society's 2022 alumni employment survey (<https://collegeofglobalfutures.asu.edu/careers/employment-data/>), 100% of doctoral program respondents are employed and have jobs directly related to their degree.

Most graduates have careers in academia, but a number also work in nonprofits, think tanks and government. Skills in foresight, technology assessment, implications and values of innovation, and science policy are critical for guiding businesses, institutions, governments and societies in considering and shaping the role of science, technology and innovation in their futures.

Career examples include:

- director of operations
- energy social scientist
- executive director
- information security manager
- professor
- research and development associate
- research strategist

Innovation in Global Development, PHD (FIIGDPHD)

Online Degree Search Title: Innovation in Global Development, PhD

Campus: Tempe

Program Description: The PhD program in innovation in global development emphasizes critical and diverse perspectives on global development and innovative policies and practices that challenge the status quo. This research-based program is both rigorous and flexible, designed to meet the needs of a diverse set of students committed to a vision of development that values context, inclusivity and equity and is socially, culturally and ecologically sensitive.

Students emerge from this program equipped with the comprehensive research capabilities, critical thinking skills, leadership skills and global perspectives that are needed to navigate complex development challenges in a way that reduces inequalities and builds a more sustainable and inclusive future.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Core (14 credit hours)

IGD 601 Re-Thinking Global Development (4)

IGD 602 Innovation for Inclusive Development (4)

IGD 603 Methods for Research in Global Development (4)

IGD 604 Colloquium in Innovation in Global Development (2)

Reading and Conference (3 credit hours)

Electives or Research (55 credit hours)

Culminating Experience (12 credit hours)

IGD 799 Dissertation (12)

Additional Curriculum Information

Students are required to take IGD 604 once for two credits as a core course requirement. They may take it one additional time for two more credits that can be used toward electives.

For the Reading and Conference requirement, students must enroll in IGD 790 Topic: Dissertation Prospectus.

Elective courses are chosen based on the student's area of interest and approval from their committee. Other electives may be used with approval of the academic unit.

When approved by the student's supervisory committee and the Graduate College, this program may allow up to 30 credit hours from a previously awarded master's degree to be used for this program. If students do not have a previously awarded master's degree, the remaining coursework is made up of electives and research.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in anthropology, natural resource management, agriculture development, political science, development studies, economics, development management, rural development, technology and development, sociology, science and technology or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- letter of intent or written statement
- professional resume
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Demonstrated their ability to contribute to the body of knowledge around global development.
- Design a comprehensive research proposal, synthesize a literature review, and analyze datasets using appropriate methodology
- Identify and articulate the main theories, concepts and challenges in the field of global development in their historical and contemporary contexts, and apply them in an equitable and sustainable manner
- Communicate, orally and in writing, a well-developed research agenda that includes development themes, theories, policies and practices; methodology and analysis; and conclusions for positive changes in global development

Global Opportunities:

Global Experience: Studying abroad is encouraged for graduate students. Nearly all of the College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the College of Global Futures Study Abroad webpage (<https://collegeofglobalfutures.asu.edu/student-life/study-abroad/>), and additional opportunities and information on the ASU Global Education Office website (<https://goglobal.asu.edu/>). These sites also include additional information about applying for funding to support global travel.

Graduate students are also encouraged to apply for funding for international research, study and professional development through ASU's Lorraine W. Frank Office of National Scholarships Advisement (<https://onsa.asu.edu/>).

Career Opportunities: The new generation of development scholars are competent in dealing with global development challenges with foresight and imagination that promote well-being and an equitable future for all. Professionals with expertise in global development are in high demand across a wide range of development agencies such as the World Bank, specialized agencies of the United Nations, Asian Development Bank, African Development Bank, United States Agency for International Development and nongovernmental organizations.

Scholars with training in theories, concepts and debates in the field of global development are also in high demand by research institutions, think tanks, universities, development studies centers, multinational companies, foundations and governments.

Career examples include:

- development researcher
- global development consultant
- global development specialist
- government official
- leader in civil society organizations
- organization official
- poverty alleviation advocate
- professor

Nonfiction Writing and Publishing (Certificate), Certificate (LANWPGRCT)

Online Degree Search Title: Nonfiction Writing and Publishing (Graduate Certificate)

Campus: Downtown Phoenix, Polytechnic, Tempe, West

ASU is not currently accepting applications for this program.

Program Description: The graduate certificate program in nonfiction writing and publishing teaches students the art of telling true stories. The program is based on the belief that work done within the university is most impactful when it can be shared in a clear and compelling way with audiences beyond one's chosen fields of research.

In this interdisciplinary program, students read, study and write narrative nonfiction, including literary journalism, op-ed pieces, explanatory essays and memoirs. Students learn how to analyze the craft and stylistic decisions of professional and literary nonfiction writers and utilize these skills in their own work.

Award-winning faculty teach scholars and students to produce vivid writing that connects with a larger public; they also teach the most effective ways to get their writing out into the world, be it through blogs, online or print publications, trade books, or film and television.

This program is open to all graduate students who want to write eloquently, persuasively and memorably about their research or life experiences.

Degree Requirements:

15 credit hours.

Required Core (6 credit hours)

HSD/HPS/HST 520 Masters of Nonfiction (3)

HSD 521 Writing True Stories that Matter (3)

Electives (9 credit hours)

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution. Applicants who attended school outside of the U.S. must hold a bachelor's degree, graduate degree or equivalent from an institution that is officially recognized by that country.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours or 90 quarter hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- writing sample
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

International students who need an F1 or J1 visa first need to apply to and be accepted into a graduate degree program prior to being considered for the certificate program. International students residing in the U.S. on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for admission to this certificate program.

Applicants are encouraged to enroll in a graduate degree program in conjunction with this certificate but are not required to do so.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Read, analyze, and synthesize works of journalistic or literary nonfiction and create individual works based on key concepts.
- Demonstrate an understanding of nonfiction writing and publishing conventions and the ability to write for diverse nonacademic audiences.

Career Opportunities: According to Forbes, storytelling is the most important skill in today's job market. Of the many sources of information in the world, people who write compelling stories are best heard.

Graduates with this skill are more attractive to employers both in academia and the private sector. Expertise in writing and storytelling are in demand in many fields, including business, media, entertainment, politics and community organizations. Strong writers and vivid storytellers are particularly valuable to businesses and institutions relying on narrative-based strategies to engage and grow audiences online.

Graduates may pair the certificate with other degrees to create stronger career opportunities.

Career examples include:

- communications specialist
- content strategist
- editor
- public relations manager or specialist
- screenwriter
- social media manager
- video game designer

Ocean Futures, PHD (GFSEAPHD)

Online Degree Search Title: Ocean Futures, PhD

Campus: Tempe

Program Description: The PhD program in ocean futures offers advanced doctoral training focused on comprehensively understanding intricate processes that govern our planet's global ocean, including threats to ecosystems and the human populations it supports. Students will have the opportunity to learn from and work with leading scientists and conduct use-inspired research that works towards culturally appropriate solutions for local to global stewardship for our future ocean.

The adaptable nature of the curriculum allows students to customize their electives based on their academic and professional goals. The flexibility enables them to leverage research and training opportunities by collaborating with scientific, professional and local communities, as well as stakeholders and rights holders. Students build skills in context-specific and solutions-oriented research, data analysis and communication, in turn supporting societal needs and the university's mission to enhance local impact and social embeddedness.

One of the benefits of the program is the opportunity for students to gain additional experience through course offerings and engagement opportunities at the ASU Bermuda Institute of Ocean Sciences (<https://bios.asu.edu/>) and the Center for Global Discovery and Conservation Science (<https://globalfutures.asu.edu/gdcs/>) in Hawai'i.

GI Bill® benefits

This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at <https://www.benefits.va.gov/gibill/> (<https://www.benefits.va.gov/gibill/>).

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, an oral comprehensive exam, a written comprehensive exam, a prospectus and a dissertation.

Required core (6 credit hours)

SEA 501 Exploring Ocean Futures (3)

SEA 585 Graduate Ocean Futures Workshop (3)

Electives (54 credit hours)

Research (12 credit hours)

SEA 792 Research (12)

Culminating Experience (12 credit hours)

SEA 799 Dissertation (12)

Additional Curriculum Information

Students complete 54 credit hours of electives, nine of which are 500- and 600-level SEA courses and three of which are quantitative and modeling coursework. Electives should be selected in consultation with the program advisor.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in biological sciences, ecology, environmental sciences, environmental studies, geography, marine science, natural resource management, oceanography, sustainability, urban planning, geography or a related discipline or related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admissions application and application fee
- official transcripts
- personal statement
- professional resume
- three letters of recommendation
- proof of English proficiency

Additional Admission Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of current residency.

The personal statement should not exceed 600 words and should describe how the applicant's research and other background will contribute to success in the program and describe how completion of the degree will support long-term career goals. The statement should elaborate on key research questions the applicant wishes to address or problems to solve as part of the program, and it should identify potential faculty advisors.

Letters of recommendation must be from three people who can attest to the applicant's academic and professional achievements.

Global Opportunities:

Global Experience: Students in the doctorate program have opportunities to develop their research with faculty who are working in a diverse array of locations, local and international. In particular, long-standing ASU research centers in Bermuda and Hawai'i offer faculty and logistical support for research projects in the Atlantic and Pacific regions.

Students can find additional internships, and short course programs specific to their interests on the College of Global Futures Study Abroad (<https://collegeofglobalfutures.asu.edu/student-life/study-abroad/>) webpage, and additional opportunities and information on the ASU Global Education Office (<https://goglobal.asu.edu/>) website. These sites also include additional information about applying for funding to support global travel.

Graduate students are also encouraged to apply for funding for international research, study and professional development through the Lorraine W. Frank Office of National Scholarships Advisement (<https://onsa.asu.edu/>).

Career Opportunities: With the increasing recognition that global oceans and coastal communities play a critical role in protecting future human and planetary well-being, graduates of the program find employment in universities, industry, and governmental and nongovernmental organizations that require a marine science background and relevant research experience.

Career possibilities for program graduates include:

- community development director
- environmental consultant
- marine biologist
- policy advisor
- professor
- program manager or director
- research scientist

Public Interest Technology, MS (FIPITCHMS)

Online Degree Search Title: Public Interest Technology, MS

Campus: Online

Program Description: The MS program in public interest technology asks this fundamental question: How can technology be used for good? When studying the public interest, it is vital to understand how new technologies pose new challenges and opportunities for society.

Students in this program acquire the ability to work in cross-disciplinary teams and gain a fluency that permeates technology and society issues and solutions. Students learn to think analytically, design new systems and processes, and will gain exposure to emerging technologies that can make a difference in how government agencies, nongovernment organizations, nonprofits and private companies emphasize social impact. People working in this space ask communities what their needs are and use a codesign approach to innovation with cultural awareness and values top of mind.

Public interest technology expertise is relevant to all entities who seek to embed the goals of technology assessment, fairness, sustainability and environmental justice in their products and processes.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

- Innovation in Society, BA
- Innovation in Society, BS
- Technological Leadership, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours including the required applied project course (PIT 593).

Required Core (12 credit hours)

PIT 501 Principles of Public Interest Technology (3)

PIT 502 Codesigning the Future (3)

PIT 503 Technology Impact Assessments (3)

PIT 504 Public Engagement Strategies (3)

Electives (15 credit hours)

Culminating Experience (3 credit hours)

PIT 593 Applied Project (3)

Additional Curriculum Information

Students should see the academic unit for the current elective course list. The elective list may change over time as new courses become available. Students must meet any prerequisites for the course in order to register for it or receive permission from the Master of Science in public interest technology degree program chair and the instructor of the course.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in computer science, public administration, engineering, business, marketing, science, social science, humanities or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- professional resume
- written statement
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/public-interest-technology-masters/>) for program descriptions and to request more information.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Think critically and evaluate the success or failure of existing sociotechnical systems and make recommendations on how to overcome systemic problems related to justice, equity, diversity, inclusion and fairness, among other human rights dimensions.
- Create and disseminate the results of their public engagements using different forms of communication such as professional report writing and oral communications, employing creative strategies through traditional and emerging online platforms.
- Students will be able to apply a transdisciplinary approach in the creation of a public interest technology design or development process, and analyze existing public interest technology solutions by applying fundamental principles, theoretical and conceptual frameworks (e.g., co-design) to real-world cases.

Global Opportunities:

Global Experience: Studying abroad is encouraged for graduate students. Nearly all of the College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the College of Global Futures Study Abroad webpage (<https://collegeofglobalfutures.asu.edu/student-life/study-abroad/>), and additional opportunities and information on the ASU Global Education Office website (<https://goglobal.asu.edu/>). These sites also include additional information about applying for funding to support global travel.

Graduate students are also encouraged to apply for funding for international research, study and professional development through ASU's Lorraine W. Frank Office of National Scholarships Advisement (<https://onsa.asu.edu/>).

Career Opportunities: Graduates have the ability to enact change within their workplace and to develop ideas for nonprofit and for-profit startups that are user-centric, collective and community-driven. They are public interest technologists, an emerging domain of expertise.

Generally, graduates become:

- advisors (solutions, technology impact)
- analysts (policy, data privacy, systems)
- assessors (public interest technology, public health)
- consultants (content strategist, business, safety, user experience)
- coordinators (advocacy, standards)
- managers (data governance, cybersecurity, data privacy, environmental affairs, executive)
- policymakers (human rights, emerging technology)

Other career fields include telecommunications, information technology, biotechnology, government, education, energy, transport, health care and medicine, standard-setting, accountability, oversight and ombudsperson service.

Responsible Innovation in Science, Engineering and Society (certificate), Certificate (GCRSESGRCT)

Online Degree Search Title: Responsible Innovation in Science, Engineering and Society (Graduate Certificate)

Campus: Tempe

Program Description: The certificate program in responsible innovation in science, engineering and society is designed for scientists, engineers, social scientists, creatives, research managers, technology officers, public administrators and policy officials who seek to advance or use science and technology to improve societal outcomes and develop creative solutions to the fundamental global challenges of today's world.

The program provides students with knowledge, skills and methods for analyzing innovation and technological systems and it addresses knowledge and uncertainty in decision-making; the regulation and governance of science and technology; the uptake of science and technology in complex societal settings; and interactions between science, technology and the public.

The certificate may be pursued by professionals in industry or government, or by students pursuing other Arizona State University graduate degree programs.

Degree Requirements:

15 credit hours including the required capstone course (HSD 580).

Required Core (3 credit hours)

HSD 540 Responsible Innovation and Research (3)

Electives (9 credit hours)

Culminating Experience (3 credit hours)

HSD 580 Practicum (3)

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- two letters of recommendation
- resume
- personal statement
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Acceptable proof of English proficiency is an IELTS overall band score of at least 6.5 with no band below 6.0 (no institutional code needed); or a Pearson Test of English score of at least 60; or a TOEFL iBT score of at least 80. Students should note that the ASU institutional code for the TOEFL is 4007. Also, students should note that ASU only accepts electronic copies of the TOEFL score report.

International students who need an F1 or J1 visa first need to apply to and be accepted into a master's or doctoral program prior to being considered for the certificate program. International students residing in the U.S. on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for admission to this certificate program.

Applicants should see the program website for application deadlines.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Students will be able to identify, analyze and recognize an opportunity to justify and design a responsible innovation program within a science and technology initiative.
- Students will be able to communicate, in writing and verbally, how to implement a responsible innovation program within a science policy initiative.

Global Opportunities:

Global Experience: Studying abroad is encouraged for graduate students. Nearly all of the College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the College of Global Futures Study Abroad webpage (<https://collegeofglobalfutures.asu.edu/student-life/study-abroad/>), and additional opportunities and information on the ASU Global Education Office website (<https://goglobal.asu.edu/>). These sites also include additional information about applying for funding to support global travel.

Career Opportunities: Recent graduates of this program have paired the certificate with technical graduate degrees to make themselves competitive for science policy jobs in the public sector. State legislatures, courts and agencies seek employees with the perspective and ability to understand and analyze how science and technology fit into social, political, environmental and economic contexts.

Career examples include:

- analyst
- environmental assessor
- federal agency staff
- government liaison
- law clerk
- legislative staff
- product designer
- science and technology communication specialist
- writer

Science and Technology Policy, MSTP (LAHSDPSM)

Online Degree Search Title: Science and Technology Policy, MSTP

Campus: Tempe

ASU is not currently accepting applications for this program.

Program Description: The MSTP program distinctly prepares its graduates to have an impact in today's science and technology decision-making. It is designed to train future leaders, policymakers and analysts in tackling diverse and complex policy issues such as climate change and artificial intelligence in ways that are socially responsible and that contribute to a more just and vibrant future.

This cohort-based program attracts students of the highest caliber and can be completed in one year or over an extended period on a part-time basis. It is suited to anyone interested in a career in which they work to ensure, through responsive and effective policy development and implementation, that science and technology serve society. Students come from a wide range of backgrounds.

The program provides students with knowledge and tools to analyze and answer complex questions around science and technology policy issues, including:

- How are science and technology influenced by the policy process?
- What is the rightful place of scientific expertise in public policymaking?
- What values and assumptions underlie society's current understanding of science and technology?
- Who should make decisions about science and technology policy? Only experts? Or should laypeople also have a voice?
- How should policymakers deal with the risks and uncertainties that come from new science and technology (e.g., biotechnology, nanotechnology, geoengineering, information technology)?
- How can policymakers balance concerns about science and technology while maintaining innovation and international competitiveness?

Students work on topics as varied as responsible innovation, technological convergence, social and environmental sustainability, health and well-being, energy, equity, security, data privacy, infrastructure, democracy, STEM education, the role of science, and space exploration and policy. They are able to describe the historical, social and institutional foundations of science and technology policy; discuss the complexities of science and technology policy decisions, decision-making under uncertainty and the role of experts; employ effective policy communications skills and techniques; and work collaboratively and effectively with experts from different backgrounds, including scientists, engineers and elected officials.

Graduates are able to apply critical skills and methods to science and technology policy analysis, apply advanced approaches to ensure socially responsive and responsible technology innovation, and contribute to developing and implementing creative solutions to many of today's most complex challenges.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

African and African American Studies, BA
Gender, Women and Sexuality Studies, BA
Innovation in Society, BS
Innovation in Society, BA
Justice Studies, BS
Justice Studies, BA

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours including the required applied project course (HSD 593).

Required Core (6 credit hours)

HSD 501 Science and Technology Policy (3)

HSD 502 Advanced Science and Technology Policy (3)

Electives (9 credit hours)

Restricted Electives (9 credit hours)

Other Requirements (3 credit hours)

HSD 591 Topic: MSTP Professional Development Seminar Series (3)

Culminating Experience (3 credit hours)

HSD 593 Applied Project (3)

Additional Curriculum Information

Restricted electives are from a list provided by the program chair.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's degree or equivalent or a graduate degree from a regionally accredited college or university of recognized standing. Students are strongly encouraged to have prior relevant education, training or experience in science and technology policy; management of science, technology or innovation; or science, technology and society.

Applicants must have a minimum cumulative GPA of a 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum of a 3.00 cumulative GPA (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- three letters of recommendation
- resume
- personal statement
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Students should see the program website for application deadlines.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Students will be able to identify and analyze science and technology policy challenges, apply policy frameworks, and develop policy insights and recommendations.
- Students will be able to communicate science and technology policy challenges, issues and options to diverse audiences.
- Students will be able to research and analyze the history of a public law related to science, technology or innovation, and use professional writing formats to explain how the law was implemented.

Global Opportunities:

Global Experience: Studying abroad is possible for graduate students. There are more than 50 program opportunities available, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

More information on available programs can be found on the Global Education Office website (<https://goglobal.asu.edu/students/graduate-students>) and the College of Global Futures study abroad webpage (<https://collegeofglobalfutures.asu.edu/student-life/study-abroad/>).

Career Opportunities: Science and technology policy professionals are in high demand across sectors and industries, including businesses, think tanks, nongovernmental organizations, international organizations, academic institutions, as well as local, state and federal government. Skills in policy analysis and the policymaking process are valuable to businesses and institutions that deal with science and technology policy issues.

From the School for the Future of Innovation in Society's 2021 alumni employment survey, 100% of master's degree program respondents are either employed or pursuing continuing education. Of those respondents employed, 62% have jobs directly related to their degree.

Some career examples include:

- editor of a science and technology-focused magazine or journal
- environmental protection specialist
- government program administrator
- information technology specialist in the federal government and private sector
- intelligence analyst on science and technology threats
- official at U.S. Patent and Trademark Office
- regulatory policy analyst
- science and technology research analyst, program or policy analyst, or legislative analyst
- science, technology or health care policy advisor
- smart cities program manager

Sustainability, MA (SUSUSTMA)

Online Degree Search Title: Sustainability, MA

Campus: Tempe

Program Description: The MA in sustainability is a research-oriented degree program that culminates with writing either a thesis or publishable scientific paper.

The program focuses on knowledge generation and investigating potential solutions to sustainability challenges and prepares students to design and conduct transdisciplinary research. Although the graduate degree programs emphasize the integration of a broad range of expertise, this program is best suited to students inclined toward transdisciplinary science, humanities, planning or related fields and who are interested in a career in research or academia.

Students learn how different disciplines view and approach the challenges of sustainability in theory, research and practice. They develop academic and technical skills as well as ethical insights that can help them understand, research and provide solutions to complex sustainability challenges at the local, regional, national and global levels.

All sustainability graduate students understand the need for a transdisciplinary approach to solving sustainability challenges; can communicate their work to professionals in other disciplines, to policymakers and to the general public; and have the breadth of vision to incorporate the interconnectedness of social, economic, environmental and technical systems into their research. They have the critical thinking skills necessary to approach sustainability challenges from a systems perspective, the ability to work effectively in interdisciplinary teams, and the technical skills to formulate and solve problems at the appropriate scale.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

35 credit hours and a thesis, or 35 credit hours including the required capstone course (SOS 596).

Required Core (14 credit hours)

SOS 510 Perspectives on Sustainability (3)

SOS 520 Research Design and Methods for Sustainability (3)

SOS 525 Social-Ecological-Technical Systems: Domains and Interfaces (3)

SOS 581 Synthesis for Sustainability Research (3)

SOS 589 Community of Graduate Student Scholars (2)

Electives (15 credit hours)

methods (3)

normative dimensions of sustainability (3)

general electives (9)

Culminating Experience (6 credit hours)

SOS 596 Capstone: Scientific Paper (6) or

SOS 599 Thesis (6)

Additional Curriculum Information

The taught-course element of the program is evaluated through course-specific examinations, research papers or applied projects and is considered successfully completed if the student obtains a GPA of 3.25 or higher. Graduate College policies and procedures for fulfillment of degree requirements must also be met.

SOS 589 is a one-credit-hour course students take twice for two credit hours total.

Approved general elective subjects include the following:

SOS, ASB, ART, PAF, SGS, POS, SOC, PSB, PHI, COM, CPP, CRD, ESS, NTR, MCO, GCU, SCM, HPS, HST, JHR, JMC, JUS, LAW, LES, PUP, SBS, STS, TDM and URB.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of intent
- three letters of recommendation
- resume or curriculum vitae
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The statement of intent should not exceed 600 words and should describe how the applicant's background will contribute to success in the program and describe how completion of the degree will support long-term career goals. The statement should elaborate on key research questions the applicant wishes to address or problems to solve as part of the plan of study, and it should identify potential faculty advisors.

Letters of recommendation must be from three people who can attest to the applicant's academic and professional achievements. At least one letter should be academic in nature.

Global Opportunities:

Global Experience: Studying abroad is encouraged for graduate students. Nearly all of the College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the College of Global Futures Study Abroad webpage (<https://collegeofglobalfutures.asu.edu/student-life/study-abroad/>), and additional opportunities and information on the ASU Global Education Office website (<https://goglobal.asu.edu/>). These sites also include additional information about applying for funding to support global travel.

Graduate students are also encouraged to apply for funding for international research, study and professional development through ASU's Lorraine W. Frank Office of National Scholarships Advisement (<https://onsa.asu.edu/>).

Career Opportunities: Professionals with expertise in sustainability frameworks, interdisciplinary research and strong research skills are in high demand across industries, including business, academia and government. Skills in critical thinking, teamwork, sustainability problem-solving and research are valuable to businesses and institutions burdened by sustainability problems.

From the School of Sustainability's 2022 alumni employment survey, 100% of master's degree program respondents are either employed or pursuing continuing education. Of those employed, 100% of respondents have jobs directly related to sustainability.

Career opportunities for graduates of this program include:

- chief sustainability officer
- conservation program lead

- disaster relief manager
- environmental restoration planner
- program director or manager
- research associate
- sustainability communications specialist
- sustainability instructor or teacher
- sustainability specialist
- zero waste consultant

Sustainability, MS (SUSUSTMS)

Online Degree Search Title: Sustainability, MS

Campus: Tempe

Program Description: The MS program in sustainability is a research-oriented degree program that culminates in writing either a thesis or publishable scientific paper.

The program focuses on knowledge generation and investigating potential solutions to sustainability challenges, and it prepares students for designing and conducting transdisciplinary research. This master's degree program is best suited to students inclined toward natural sciences, economics, engineering or related quantitative fields and who are interested in a career in research or academia.

Students learn how different disciplines view and approach the challenges of sustainability in theory, research and practice. They develop the academic and technical skills as well as the ethical insights that help them understand, research and provide solutions to complex sustainability challenges at the local, regional, national and global levels.

All sustainability graduate students understand the need for a transdisciplinary approach to solving sustainability challenges; can communicate their work to professionals in other disciplines, to policymakers and to the general public; and have the breadth of vision to incorporate the interconnectedness of social, economic, environmental and technical systems into their research. They have the critical thinking skills necessary to approach sustainability challenges from a systems perspective, the ability to work effectively in interdisciplinary teams, and the technical skills to formulate and solve problems at the appropriate scale.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

35 credit hours and a thesis, or 35 credit hours including the required capstone course (SOS 596).

Required Core (14 credit hours)

SOS 510 Perspectives on Sustainability (3)

SOS 520 Research Design and Methods for Sustainability (3)

SOS 525 Social-Ecological-Technical Systems: Domains and Interfaces (3)

SOS 581 Synthesis for Sustainability Research (3)

SOS 589 Community of Graduate Student Scholars (2)

Electives (15 credit hours)

methods (3)

normative dimensions of sustainability (3)

general electives (9)

Culminating Experience (6 credit hours)

SOS 596 Capstone: Scientific Paper (6) or

SOS 599 Thesis (6)

Additional Curriculum Information

SOS 589 is taken twice for two credit hours total.

The taught-course element of the program is evaluated through course-specific examinations, research papers or applied projects and is considered to have been successfully completed if the student obtains a GPA of 3.25 (scale is 4.00 = "A") or higher. Graduate College policies and procedures for fulfillment of degree requirements also must be met.

Approved general electives prefixes include the following: SOS, ASB, ART, PAF, SGS, POS, SOC, PSB, PHI, COM, CPP, CRD, ESS, NTR, MCO, GCU, SCM, HPS, HST, JHR, JMC, JUS, LAW, LES, PUP, SBS, STS, TDM and URB.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree, in any field, from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of intent
- three letters of recommendation
- resume or curriculum vitae
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The statement of intent should not exceed 600 words and should describe how the applicant's background will contribute to success in the program, and describe how completion of the degree will support long-term career goals. The statement should elaborate on key research questions the applicant wishes to address or problems to solve as part of the plan of study, and it should identify potential faculty advisors.

Letters of recommendation must be from three people who can attest to the applicant's academic and professional achievements. At least one letter should be academic in nature.

Global Opportunities:

Global Experience: Studying abroad is encouraged for graduate students. Nearly all of the College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the College of Global Futures Study Abroad webpage (<https://collegeofglobalfutures.asu.edu/student-life/study-abroad/>), and additional opportunities and information on the ASU Global Education Office website (<https://goglobal.asu.edu/>). These sites also include additional information about applying for funding to support global travel.

Graduate students are also encouraged to apply for funding for international research, study and professional development through ASU's Lorraine W. Frank Office of National Scholarships Advisement (<https://onsa.asu.edu/>).

Career Opportunities: Professionals with expertise in sustainability frameworks, interdisciplinary research and strong research skills are in high demand across industries, including business, academia and government. Skills in critical thinking, teamwork, sustainability problem solving and research are valuable to businesses and institutions burdened by wicked sustainability problems.

From the School of Sustainability's 2022 alumni employment survey, 89% of master's degree program respondents are either employed or pursuing continuing education. Of those employed, 100% of respondents have jobs directly related to sustainability.

Career opportunities for graduates of this program include:

- chief sustainability officer
- energy analyst
- environmental economist
- industrial ecologist
- natural science manager
- operations consultant

- research associate
- sustainability specialist
- zero waste consultant

Sustainability, PHD (SUSUSTPHD)

Online Degree Search Title: Sustainability, PhD

Campus: Tempe

Program Description: The PhD program in sustainability prepares students to become scientists and leaders in research who investigate the urgent sustainability challenges of this century. The flexible, transdisciplinary nature of the program allows students to focus on problems of interest to them, drawing upon relevant knowledge from sustainability science and a variety of disciplines. This full-time program includes a high degree of faculty interaction and collaboration.

All sustainability doctoral students gain a better understanding of the need for a transdisciplinary approach to solving sustainability challenges as well as the ability to communicate their research effectively to academic and non-academic audiences alike.

In addition to the common learning outcomes, students are able to conduct research on particular sustainability challenges using theoretical lenses and methods from sustainability science and a range of complementary disciplines. Students learn to translate sustainability challenges to tractable research questions; develop a portfolio of quantitative and qualitative research methods to address these research questions; formulate and test hypotheses; utilize rigorous elicitation methods to gather qualitative and quantitative datasets; learn to engage with stakeholders to co-produce knowledge; use statistical and other analytic techniques to analyze data; and build and apply models of social-ecological systems.

They develop expertise in the analysis of institutional policies and regulations, as well as the design of the built environment and technologies, to support sustainable development. They also develop the foundational knowledge of concepts and methods required to conduct interdisciplinary and transdisciplinary research and effectively communicate their findings across academic disciplines, as well as to policymakers and the general public.

Graduates possess an advanced understanding of the dynamics of coupled social-ecological systems and use this knowledge to conduct original research to inform robust solutions to specific sustainability challenges. They are equipped to lead others in the development of sustainable strategies at the local, national and global levels.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

86 credit hours, a written comprehensive exam, a prospectus and a dissertation.

Required Core (11 credit hours)

SOS 510 Perspectives on Sustainability (3)

SOS 520 Research Design and Methods for Sustainability (3)

SOS 525 Social-Ecological-Technical Systems (SETS): Domains and Interfaces (3)

SOS 589 Community of Graduate Student Scholars (2)

Solutions Workshop Electives (6 credit hours)

Open Electives (45 credit hours)

Research (12 credit hours)

SOS 792 Research (12)

Culminating Experience (12 credit hours)

SOS 799 Dissertation (12)

Additional Curriculum Information

Students take SOS 589 twice for one credit hour. For electives, students should see the academic unit for the approved course list. Other

coursework may be used with the approval of the academic unit. Only six credit hours of 400-level coursework can be included in the plan of study.

When approved by the student's supervisory committee and the Graduate College, this program allows up to 30 credit hours from a previously awarded master's degree to be used for this program. If students do not have a previously awarded master's degree, the remaining coursework is to be made up of appropriate electives.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution. The school encourages applicants with diverse educational backgrounds and experiences that are relevant to the school's core objectives.

Applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of intent
- three letters of recommendation
- resume or curriculum vitae
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The statement of intent should not exceed 600 words and should describe how the applicant's background will contribute to success in the program; describe how completion of the degree will support long-term career goals; elaborate on key research questions the applicant wishes to address or problems to solve as part of the plan of study; and identify potential faculty advisors.

Letters of recommendation must be from three people who can attest to the applicant's academic and professional achievements. At least one letter should be academic in nature.

Global Opportunities:

Global Experience: Studying abroad is encouraged for graduate students. Nearly all of the College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Students can find programs specific to their interests on the College of Global Futures Study Abroad webpage (<https://collegeofglobalfutures.asu.edu/student-life/study-abroad/>), and additional opportunities and information on the ASU Global Education Office website (<https://goglobal.asu.edu/>). These sites also include additional information about applying for funding to support global travel.

Graduate students are also encouraged to apply for funding for international research, study and professional development through ASU's Lorraine W. Frank Office of National Scholarships Advisement (<https://onsa.asu.edu/>).

Career Opportunities: Professionals with expertise in sustainability frameworks and interdisciplinary research are in high demand across industries, including business, academia and government. Skills in critical thinking, teamwork, sustainability problem solving and research are valuable to businesses and institutions, many of which are in need of expertise to solve critical sustainability problems and introduce sustainability principles into their business models.

From the School of Sustainability's 2022 alumni employment survey, 100% of doctoral program respondents are employed. Of those respondents employed, 100% have jobs directly related to sustainability. Students can learn more about careers in sustainability and where graduates of sustainability doctoral programs are now employed by visiting the School of Sustainability's alumni employment data website (<https://schoolofsustainability.asu.edu/careers-3/career-advising/alumni-employment-data/phd-alumni-employment-data/>).

Career possibilities for program graduates include:

- chief sustainability officer
- data analyst
- environmental scientist

- geographic information systems coordinator
- professor
- program manager or director
- research scientist
- sustainability consultant
- sustainability policy advisor
- sustainability specialist

Sustainability (Certificate), Certificate (SUSUSGRCT)

Online Degree Search Title: Sustainability (Graduate Certificate)

Campus: Downtown Phoenix, Polytechnic, Tempe, West, Online

Program Description: The development and implementation of sustainable solutions depends on the development of core sustainability competencies, effective collaboration and inspiring leadership. The graduate certificate program in sustainability provides the foundational knowledge required to promote sustainable solutions in any professional field.

The skills developed in this program, like systems thinking and futures thinking, are essential to addressing sustainability challenges across many kinds of organizations. Students in the program learn to communicate and collaborate with colleagues from varied backgrounds, preparing them to lead teams in the future.

Courses introduce students to the foundations of sustainability through a disciplinary overview and problem-solving methodology. With electives, students can explore specific areas that are of greatest interest to them.

Students in the online graduate certificate program can take courses from the MSL degree. Classes in that program focus on leadership, communication, sustainability strategy and enterprise sustainability.

This program is designed to be taken independently or as a supplement to another graduate degree program. If done independently, a graduate certificate does not meet the requirements for a student visa.

Degree Requirements:

15 credit hours.

Required Core (6 credit hours)

SOS 508 Pathways to Sustainability (3)

SOS 509 Leading Sustainability Transitions (3)

Electives (9 credit hours)

Additional Curriculum Information

Students select six credit hours of sustainability-focused electives from EMS, SFS and SOS course prefixes. Other coursework may be used with approval of the sustainability graduate committee. In addition, students take three credit hours of other elective coursework related to sustainability.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency
 2024-25 Academic Catalog Archive

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/certificates/graduate-sustainability-certificate/>) for program descriptions and to request more information.

Global Opportunities:

Global Experience: Study abroad is encouraged for graduate students. Nearly all of the College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the College of Global Futures Study Abroad (<https://collegeofglobalfutures.asu.edu/student-life/study-abroad/>) webpage, and additional opportunities and information on the ASU Global Education Office website (<https://goglobal.asu.edu/>). These sites also include additional information about applying for funding to support global travel.

Career Opportunities: Graduates of this program can pair the certificate with a range of graduate degrees to enhance their expertise and career prospects related to sustainability.

Because many organizations seek to implement greener initiatives, knowledge of sustainability may be valuable across many areas, including business, engineering, government, nonprofit and education sectors. Graduates can use their skills to bring sustainable initiatives to organizations in a variety of industries.

Career examples include the following. Additional advanced degrees or certifications may be required for some.

- chief sustainability officer
- civil engineer
- economist
- energy engineer
- environmental economist
- environmental restoration planner
- industrial ecologist
- project coordinator
- sustainability specialist
- urban planner
- water resource specialist

Sustainability (Complex Adaptive Systems Science), PHD (SUSUSTCPHD)

Online Degree Search Title: Sustainability (Complex Adaptive Systems Science), PhD

Campus: Tempe

Program Description: Complex adaptive systems science is the study of interactive and dynamic systems that change over time.

The complex adaptive systems science concentration program under the PhD in sustainability trains the next generation of scientists in advanced concepts and methods needed for approaching diverse phenomena in the social and life sciences. The program is tightly integrated with varied, ongoing, university-wide research on complex adaptive systems science at Arizona State University and emphasizes the value of a complex adaptive systems science perspective for better insight and an active role in seeking solutions to a broad array of critical issues facing society today. Students become fluent in the common language of complexity while also receiving a solid foundation in the domain knowledge of existing academic disciplines.

By broadly embedding an understanding of complex adaptive system-relevant approaches into the practice of normal science, students gain the ability to transform science. The program promotes the development and testing of more robust theories and sophisticated methods in a wider array of research settings needed in order to develop a deeper understanding of the nature and dynamics of complex adaptive systems, which are

grounded in concrete examples and applications.

The program prepares students to become scientists and leaders in research and to investigate the urgent sustainability challenges of this century. Graduates possess an understanding of the need for a transdisciplinary approach to solving sustainability challenges; the ability to communicate their work to professionals in other disciplines, to policymakers and to the general public; and the breadth of vision to recognize the interconnectedness of social, economic, environmental and technical systems. Their critical thinking skills enable them to approach sustainability challenges from a systems perspective; they also have the skills needed to work effectively in interdisciplinary teams and the technical skills to formulate and solve problems at the appropriate scale.

In addition to the common learning outcomes, graduates are able to conduct research on particular sustainability challenges using standard skills, including the capacity to identify problems; to formulate and test hypotheses; to use statistical, econometric and geographical information system techniques to construct and analyze datasets; and to build and apply models. They are prepared to lead others in the analysis and design of the built environment and institutions' policies, regulations and technologies to support sustainable development and lead others in applying these concepts and methods to the development of sustainable strategies for water, land, air and urban management at the local and global levels. Graduates understand the concepts and methods of a number of critical disciplines bearing on the sustainability of systems at different spatial and temporal scales.

Degree Requirements:

86 credit hours, a written comprehensive exam, a prospectus and a dissertation.

Required Core (8 credit hours)

SOS 510 Perspectives on Sustainability (3)

SOS 520 Research Design and Methods for Sustainability (3)

SOS 589 Community of Graduate Student Scholars (2)

Solutions Workshop Electives (6 credit hours)

Open Electives (36 credit hours)

Concentration (12 credit hours)

CASS fundamentals (3)

mathematics of CASS (3)

modeling CASS (3)

application of CASS approaches (3)

Research (12 credit hours)

SOS 792 Research (12)

Culminating Experience (12 credit hours)

SOS 799 Dissertation (12)

Additional Curriculum Information

For open electives and concentration coursework, students should see the academic unit for the approved course list. Students should note that only six credit hours of 400-level coursework can be included on the plan of study.

When approved by the student's supervisory committee and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this degree. If students do not have a previously awarded master's degree, the remaining coursework is made up of appropriate electives.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution. The school encourages applicants with diverse educational backgrounds and experiences that are relevant to the school's core objectives.

Applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of intent
- three letters of recommendation
- resume or curriculum vitae
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The statement of intent should not exceed 600 words and should describe how the applicant's background will contribute to success in the program, describe how completion of the degree will support the applicant's long-term career goals and explain why the applicant is applying to the College of Global Futures and, more specifically, the doctoral program with a complex adaptive systems science concentration. The statement of intent should elaborate on key research questions the applicant wishes to address or problems they wish to solve as part of the plan of study, and it should identify potential faculty advisors.

Letters of recommendation must be from three people who can attest to the applicant's academic and professional achievements. At least one letter should be academic in nature.

Global Opportunities:

Global Experience: Studying abroad is encouraged for graduate students. Nearly all of the College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Sustainability and Enterprise (Certificate), Certificate (GFSEGRCT)

Online Degree Search Title: Sustainability and Enterprise (Graduate Certificate)

Campus: Tempe, Online

Program Description: Organizations are increasingly aware of the need to address sustainability challenges. The CEOs of large private sector companies and leaders in the public and nonprofit sectors agree that sustainability will be critical to the future success of their enterprises. New

types of enterprise models, including hybrids, mission-driven enterprises, benefit corporations and cooperatives are emerging, and there is an increased demand for professionals who can guide enterprises to include sustainability principles in their operating strategies.

The graduate certificate in sustainability and enterprise prepares its graduates to advance sustainability practices and communicate sustainability as a means for transformational change, organizational success and innovation. It is designed for individuals who wish to develop the sustainable enterprises of the future and employ sustainability as a strategy for enterprise success.

Skills developed in this program include:

- applying personal collaborative strengths to work in teams to assess sustainability opportunities and strategies
- applying sustainability competencies to develop and implement enterprise improvement proposals
- communicating sustainable enterprise approaches, challenges, risks and opportunities
- critically assessing enterprises against a comprehensive set of sustainability criteria
- identifying opportunities that exist for enterprises that address sustainability problems

This graduate certificate in sustainability and enterprise may be paired with a graduate degree at ASU or completed on its own. If done independently, a graduate certificate does not meet the requirements for federal financial aid or a student visa.

Degree Requirements:

15 credit hours.

Required Core (9 credit hours)

EMS 523 Strategic Sustainability and Leadership (3)

SOS 508 Pathways to Sustainability (3)

SOS 509 Leading Sustainability Transitions (3)

Electives (6 credit hours)

Additional Curriculum Information

Students should see their program advisor for an approved list of electives.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in sustainability, business or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admissions application and application fee
- official transcripts
- proof of English proficiency

Additional Admission Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of current residency. The School of Sustainability requires a score of at least 100 on the TOEFL iBT® taken in a testing center (or equivalent).

Applicants are not required to be currently enrolled in a graduate program at Arizona State University.

At this time, only applications for fall and spring session A are being accepted due to the availability of the core classes SOS 508 and SOS 509 in fall and spring session A only.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/certificates/sustainability-enterprise/>) for program descriptions and to request more information.

Global Opportunities:

Global Experience: The College of Global Futures offers a slate of study abroad programs (<https://collegeofglobalfutures.asu.edu/student-life/study-abroad/>) and global intensive experiences every year which are led by faculty and open to undergraduate and graduate students. The specific offerings depend on faculty availability and interest.

The Fraser Global Mentorship Program (<https://collegeofglobalfutures.asu.edu/student-life/mentorship-networking/frasier-global-mentorship-program/>) provides global mentoring opportunities for undergraduate and graduate students in the School of Sustainability. If students in this certificate are simultaneously enrolled in the Master of Sustainability Solutions program, they are eligible to participate in the Fraser program.

Career Opportunities: Career examples include the following roles. Additional advanced degrees or certifications may be required for some careers.

- chief sustainability officer
- environmental scientist or specialist
- management analyst
- project manager
- sustainability consultant
- sustainability specialist

Sustainability Leadership, EMSL (SUEMSLEMSL)

Online Degree Search Title: Sustainability Leadership - Executive, EMSL

Campus: Online

Program Description: A sustainable future requires leaders who are able to integrate sustainability into existing institutions and new enterprises. A particular knowledge base and skill set is required to drive this kind of transformational change. Professionals with tools and skills learned in sustainability leadership, as opposed to other degree programs, are in a prime position to establish sustainability practices in any type of organization.

The EMSL program prepares professionals to advance social, economic and environmental responsibility. Designed to be completed in 12 continuous months, the program is created and delivered by people who have worked in and with companies making sustainability transitions and those who continue to be on the forefront of global sustainability leadership.

The curriculum includes coursework in the following synergistic thematic areas:

- communications and change management
- global context of sustainability
- leadership for sustainability
- sustainability and strategy

The program also includes opportunities for students to add elective coursework that is related to their specific area of interest. In addition to the coursework, students also have monthly individual coaching sessions with program faculty to help with career planning and professional development.

Degree Requirements:

30 credit hours including the required capstone courses (EMS 515 and EMS 516).

Required Core (18 credit hours)

EMS 522 Mastering the Global Sustainability Context (3)

EMS 523 Strategic Sustainability and Leadership (3)

EMS 524 Sustainability Storytelling and Communications (3)

EMS 525 Essentials for Transformative Leadership in Sustainability (3)

SOS 508 Pathways to Sustainability (3)

SOS 509 Leading Sustainability Transitions (3)

Electives (6 credit hours)

Culminating Experience (6 credit hours)

EMS 515 EMSL Capstone Course I (3)

EMS 516 EMSL Capstone Course II (3)

Additional Curriculum Information

Students are encouraged to attend one in-person session in a major metropolitan city in the United States. Students who cannot attend should

contact the college for an alternative option.

Elective courses must be at the 500 level or above.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- resume or curriculum vitae
- two letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Applicants to the program should be interested in and passionate about advancing sustainability in their organizations, either directly or indirectly. Successful candidates are expected to draw from and apply solutions to actual professional challenges and opportunities.

Because this is an executive master's degree for experienced professionals, work and life experience may be taken into account in lieu of deficiencies from past bachelor's degree program experience. Applicants with GPAs lower than 3.00 (scale is 4.00 = "A") may be admitted on a provisional status. Applicants should contact the program for more details if their GPA falls below the 3.00 requirement.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/executive-sustainability-leadership/>) for program descriptions and to request more information.

Career Opportunities: Graduates of this program advance their leadership skills with practical, actionable tools and can accelerate sustainability throughout their organizations.

An Executive Master of Sustainability Leadership degree enhances career opportunities in a variety of sectors, including business, technology, science, education and government. The School of Sustainability's 2022 alumni employment survey shows that 95% of degree program respondents are either employed or pursuing continuing education. Of those employed, 89% of respondents have jobs directly related to sustainability.

Typical careers include:

- business organization manager
- chief executive officer
- chief sustainability officer
- consultant
- director of strategic initiatives
- sustainability analyst
- sustainability coordinator
- sustainability director
- sustainability manager
- training manager

Sustainability Leadership, MSL (SUSUSLMSL)

Online Degree Search Title: Sustainability Leadership, MSL

Campus: Online

Program Description: A sustainable future requires leaders who are able to integrate sustainability into existing institutions and new enterprises. A particular knowledge base and skill set is required to drive this kind of transformational change. Professionals with tools and skills learned in sustainability leadership, as opposed to other degree programs, are in a prime position to establish sustainability practices in any type of organization.

The MSL program prepares professionals to advance social, economic and environmental responsibility. It equips graduates to drive high-impact sustainability results in organizations and communities. The program is designed and delivered by people who have worked in and with companies making sustainability transitions and continue to be on the forefront of global sustainability leadership. Students can complete the program in one to three years.

The curriculum includes four synergistic thematic areas:

- communications and change management
- global context of sustainability
- leadership for sustainability
- sustainability and strategy

The program also includes opportunities for students to include electives that are related to their specific area of interest. Elective courses are offered that focus on organizational sustainability assessment, cities, climate, food systems and other thematic areas. Students also may choose to go on an approved study abroad trip (<https://goglobal.asu.edu/students/asu-online-students>) to fulfill elective credits.

Degree Requirements:

30 credit hours including the required applied project course (EMS 593).

Required Core (21 credit hours)

EMS 522 Mastering the Global Sustainability Context (3)

EMS 523 Strategic Sustainability and Leadership (3)

EMS 524 Sustainability Storytelling and Communications (3)

EMS 525 Essentials for Transformative Leadership in Sustainability (3)

EMS 589 MSL Capstone Project Preparation (3)

SOS 508 Pathways to Sustainability (3)

SOS 509 Leading Sustainability Transitions (3)

Electives (6 credit hours)

Culminating Experience (3 credit hours)

EMS 593 Applied Project (3)

Additional Curriculum Information

Elective courses must be at the 500 level or above.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution. They should also have a minimum of three years of professional or organizational experience or the equivalent.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program. Applicants who have a GPA less than 3.00 may submit a statement describing contributing circumstances and reference personal experience to be considered for admission.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of intent
- resume or curriculum vitae
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/master-sustainability-leadership-sustainability-leadership/>) for program descriptions and to request more information.

Global Opportunities:

Global Experience: Study abroad is encouraged for graduate students. Nearly all of the College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the College of Global Futures Study Abroad webpage (<https://collegeofglobalfutures.asu.edu/student-life/study-abroad/>), and additional opportunities and information on the ASU Global Education Office website (<https://goglobal.asu.edu/>). These sites also include additional information about applying for funding to support global travel.

Graduate students are also encouraged to apply for funding for international research, study and professional development through ASU's Lorraine W. Frank Office of National Scholarships Advisement (<https://onsa.asu.edu/>).

Career Opportunities: Graduates of this program advance their organizational leadership skills in a variety of sectors, including business, technology, science, education and government. According to the School of Sustainability's 2022 alumni employment survey, 96% of master's degree program respondents are either employed or pursuing continuing education. Of those employed, 75% of respondents have jobs directly related to sustainability.

Typical career paths include:

- business organization manager
- chief executive officer
- chief sustainability officer
- consultant
- director of strategic initiatives
- sustainability analyst
- sustainability coordinator
- sustainability director
- sustainability manager

Sustainability Solutions, MSUS (SUSUSOMSUS)

Online Degree Search Title: Sustainability Solutions, MSUS

Campus: Tempe

Program Description: The MSUS program teaches students how to analyze and solve sustainability challenges in organizations and communities. Students learn how to apply sustainability principles and approaches. The focus is on developing solutions in concert with stakeholders.

A distinguishing element of the program is its applied approach. Students begin the program with a foundation in sustainability frameworks and methods, then they take electives in an area of interest and ultimately use this knowledge to develop solutions to actual sustainability challenges in real time.

Final courses include learning how to manage sustainability projects. In the capstone experience, students team up with a company, a government agency or a nongovernmental organization to develop a practical sustainability solution. Carried out collaboratively in lieu of a thesis, the capstone provides practical experience that positions program graduates for today's competitive, knowledge- and skills-intensive job market.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website.

The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Concurrent Program Options:

Students can choose to create their own concurrent degree combination to match their interests by working with their academic advisor during or after their first semester of study. Some concurrent combinations are not possible due to high levels of overlap in curriculum; students should speak with their academic advisor for more details.

This degree is also offered as concurrent degree program with:

- Legal Studies, MLS
- Mass Communication, MMC
- Public Administration, MPA
- Public Policy, MPP
- Urban and Environmental Planning, MUEP

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Sustainability, BA
- Sustainability, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours including the required applied project course (SOS 593).

Required Core (6 credit hours)

SOS 508 Pathways to Sustainability (3) or SOS 510 Perspectives on Sustainability (3)

SOS 509 Leading Sustainability Transitions or SOS 511 Advanced Sustainability Problem Solving (3)

Other Requirements (15 credit hours)

SOS 582 Project Management for Sustainability (3)

competency mastery courses (6)

methods courses (6)

Focus Area Electives (6 credit hours)

Culminating Experience (3 credit hours)

SOS 593 Applied Project (3)

Additional Curriculum Information

MSUS students specialize in a focus area and take six credit hours of elective coursework related to that area with approval by their academic advisor.

For a list of approved courses that may fulfill the methods and competency mastery requirements, students should see the academic unit. No more than six credit hours of 400-level coursework can be included in the plan of study.

The Graduate College policies and procedures for fulfillment of degree requirements must also be met.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of intent
- three letters of recommendation
- resume or curriculum vitae
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Letters of recommendation must be from three people who can attest to the applicant's academic and professional achievements. At least one letter should be academic in nature.

The statement of intent should not exceed 600 words and should explain the goals the applicant intends to achieve through the plan of study, describe how the applicant's background will contribute to success in the program, explain how completion of the degree will support long-term career goals, and elaborate on project ideas the applicant wishes to pursue as part of the program of study.

In order to promote access, students may submit a GPA petition if they don't meet the 3.00 GPA requirement for admission. More information can be found on the School of Sustainability graduate admission website (<https://schoolofsustainability.asu.edu/admissions/application-process/graduate-admissions/>).

Global Opportunities:

Global Experience: Studying abroad is encouraged for graduate students. Nearly all of the College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. These sites also include additional information about applying for funding to support global travel.

Graduate students are also encouraged to apply for funding for international research, study and professional development through ASU's Lorraine W. Frank Office of National Scholarships Advisement (<https://onsa.asu.edu/>).

Career Opportunities: Professionals who understand how to solve difficult problems and work with and draw from different disciplines are in high demand across sectors and industries. Graduates of the Master of Sustainability Solutions program have the knowledge base and skill set needed to create sustainability solutions in a variety of sectors including business, education, nonprofit, governmental and nongovernmental organizations. Graduates are trained to help organizations approach differing values and perspectives in a collaborative way, understand and explore the complexity of systems, plan for various future scenarios and develop strategies for action.

From the School of Sustainability's 2022 alumni employment survey, 94% of master's degree program respondents are either employed or pursuing continuing education. Of those employed, 86% of respondents have jobs directly related to sustainability. Students can learn more about careers in sustainability and where Master of Sustainability Solutions graduates are now employed by visiting the School of Sustainability alumni employment data website (<https://collegeofglobalfutures.asu.edu/careers/employment-data/>).

Career examples include:

- chief sustainability officer
- environmental specialist
- industrial ecologist
- sustainability analyst
- sustainability consultant
- sustainability specialist

Sustainable Energy, PHD (SUSUEPHD)

Online Degree Search Title: Sustainable Energy, PhD

Campus: Tempe

Program Description: Society is in the midst of a transition toward sustainable energy.
2024-25 Academic Catalog Archive

Because the global energy system is a complex, sociotechnical system, the transition toward sustainable energy requires the next generation of leaders to possess a transdisciplinary perspective comprising both technical and societal dimensions of energy. The PhD program in sustainable energy integrates these perspectives in preparing students to address the challenges in energy transitions. Students enter the program from diverse backgrounds in engineering, planning, business, policy, and natural and social sciences.

The core classes provide students with interdisciplinary expertise and skills related to current and emerging energy technologies and systems, economic analysis of energy systems, and social and policy dynamics of energy transitions. Elective classes allow students to develop more specialized methodological skills, technical expertise and topical knowledge.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Core (17 credit hours)

SOS 571 Sustainable Energy Technologies and Systems (3)

SOS 572 Sustainable Energy Transitions (3)

SOS 573 Sustainable Energy Policy (3)

SOS 574 Data Analytics for Sustainable Energy (3)

SOS 575 Sustainable Energy Research Seminar (4)

SOS 589 Community of Graduate Student Scholars (1)

Electives or Research (42 credit hours)

Other Requirement (13 credit hours)

SOS 792 Research (13)

Culminating Experience (12 credit hours)

SOS 799 Dissertation (12)

Additional Curriculum Information

Students take SOS 575 in four different semester terms for 1 credit hour each term.

Electives can be chosen from applicable courses in the following areas based on the student's area of interest and approval from the committee:

- engineering of matter, transport and energy
- future of innovation in society
- geographical sciences and urban planning
- life sciences
- molecular sciences
- physics
- sustainability
- sustainable engineering and the built environment

Other electives may be used with approval from the academic unit. Student electives are customizable based on the student's area of research.

Doctoral students are expected to include higher level courses (600 and 700 levels) as part of the elective and research coursework.

When approved by the student's supervisory committee and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this degree. If students do not have a previously awarded master's degree, the 30 credit hours of coursework is made up of electives and research.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.25 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- resume or curriculum vitae
- statement of intent
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The school encourages applicants with diverse educational backgrounds and experiences. Sample related fields include engineering, geography, urban planning, environmental science, physics, chemistry, or planning for future innovations and societal changes.

All applicants must upload a statement of intent as part of the application process. In no more than 600 words, applicants must explain the goals they intend to achieve through their program of study at the College of Global Futures. Applicants should describe how their background will contribute to their success in the program and how completion of their degree will support their long-term career goals. Finally, applicants should elaborate on key research questions they wish to address or problems they wish to solve as part of their program of study and identify potential faculty advisors.

Global Opportunities:

Global Experience: Studying abroad is encouraged for graduate students. Nearly all of the College of Global Futures faculty-directed programs offer graduate credit. In addition, the Global Education Office offers more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find programs specific to their interests on the College of Global Futures Study Abroad webpage (<https://collegeofglobalfutures.asu.edu/student-life/study-abroad/>), and additional opportunities and information on the ASU Global Education Office website (<https://goglobal.asu.edu/>). These sites also include additional information about applying for funding to support global travel.

Graduate students are also encouraged to apply for funding for international research, study and professional development through ASU's Lorraine W. Frank Office of National Scholarships Advisement (<https://onsa.asu.edu/>).

Career Opportunities: From the School of Sustainability's 2022 alumni employment survey, 100% of doctoral program respondents are employed. Of those respondents employed, 100% have jobs directly related to sustainability.

Professionals with expertise in sustainable energy are in high demand across industries that including academia, business, planning and government. Skills in cross-disciplinary research, sociotechnical innovation, sustainable energy solutions and policymaking are valuable to businesses and institutions relying on data-driven strategies to solve urgent sustainability problems and shape global futures.

Career examples include:

- chief sustainability officer
- director of policy advocacy
- energy analyst
- professor
- project manager
- renewable energy project manager
- researcher
- science and technology policy advisor
- senior policy analyst
- sustainability consultant
- sustainability specialist
- urban and regional planner

Sustainable Food Systems, MS (SUSUSFSMS)

Online Degree Search Title: Sustainable Food Systems, MS

Campus: Online

Program Description: The MS in sustainable food systems is a research-oriented degree program in which students develop an understanding of present-day health, agriculture and environmental policy; develop strategies to lead policy discussions; interact with a network of food and agriculture policy leaders and mentors; and apply their knowledge and skills to address problems related to food and food systems.

The program includes two week-long experiences for students to engage in food systems. The first is in Arizona. Students have the opportunity to talk with and learn from farmers, ranchers and supply chain businesses about how food and agriculture policies and programs impact their operations. The second is a seminar in Washington, D.C. Students gain knowledge of leadership theories, develop leadership skills and engage in conversation with influential food policy leaders from a variety of sectors.

Graduates of the program are able to employ solutions-based thinking and a dynamic systems framework to create the inclusive, diverse and resilient food systems of the future.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

Sustainable Food Systems, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours including the required capstone course (SFS 596).

Required Core (21 credit hours)

SOS 508 Pathways to Sustainability (3)

SOS 509 Leading Sustainability Transitions (3)

SFS 560 Tools and Tactics for Food Policy Change (3)

SFS 561 Food and Farm Immersion Experience (2)

SFS 562 Managing Natural Resources for Food Production (3)

SFS 563 Applied Food Policy Immersion Experience (2)

SFS 564 American Agriculture in the Global Context (2)

SFS 565 Organizational Leadership (3)

Electives (6 credit hours)

Culminating Experience (3 credit hours)

SFS 596 Capstone (3)

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Global Futures.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

Global Management, Thunderbird School of

Applied Leadership and Management, MALM (TBALMMALM)

Online Degree Search Title: Applied Leadership and Management, MALM

Campus: Online

ASU is no longer accepting new students to this program. Interested students should apply to the Leadership and Management MLM (<https://degrees.apps.asu.edu/masters-phd/major/ASU00/TBLDMGMLM/leadership-and-management-mlm>) program.

Program Description: Professionals expand their management and leadership repertoire while sharpening their business skills in Thunderbird School of Global Management's MALM program, earning a unique graduate degree with classes taught online by Thunderbird's world-class professors. The program provides mastery of modern practices for managers and executives in transnational organizations from a global perspective, delivering the highest quality graduate education in a flexible online format.

This in-depth, professional degree program features applicable training in the nuances of managing a global business, government agency or

nonprofit organization.

The Master of Applied Leadership and Management program combines cutting-edge management coursework with a truly global curriculum, cross-cultural communication and negotiation training, personal development and leadership components to prepare graduates to thrive as decision-makers in enterprises that operate across borders.

Designed to empower graduates with well-rounded, future-ready skill sets, this transformational master's degree provides a strategically choreographed progression through every facet of international management, with courses spanning the gamut of Thunderbird's online offerings, from accounting and data-driven decision making to global finance and marketing. Students also receive hands-on, experiential learning opportunities in practical, real-world situations through elective courses that allow them to apply the full range of professional skills acquired during their studies.

The Master of Applied Leadership and Management allows students to work at their own pace to earn their degree in as few as 12 months. The program is designed specifically for students from around the world and allows them to join the globally connected Thunderbird alumni network that opens doors and opportunities all over the planet. More information is available on the Thunderbird alumni website (<https://thunderbird.asu.edu/alumni?action>).

Specializations

Thunderbird's Master of Applied Leadership and Management degree offers optional specializations, one delivered in English and three delivered in Mandarin. Students should see the Thunderbird website for details.

The global and public affairs specialization is delivered in English, and more information is available on the program website (<https://thunderbird.asu.edu/degree/graduate/master-leadership-and-management>).

The data analytics, financial management and global business specializations are delivered in Mandarin. More information on these specialization areas are available on the ASU Online website (<https://www.asuonline.cn/mlm/>).

About Thunderbird

Thunderbird School of Global Management has produced world-class leaders for more than 75 years. The ideal Thunderbird student is curious, globally minded, and eager to develop and advance their careers in leadership and management within the global and digital landscape of the Fourth Industrial Revolution. Upon completion of this degree, graduates will join a thriving global alumni network nearly 50,000 strong, managing some of the world's largest institutions, companies, nonprofits and NGOs.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

- Global Management, BGM
- International Trade, BS
- Technological Entrepreneurship and Management, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours including the required capstone course (TAM 542).

Required Core (3 credit hours)

TAM 582 Communicating and Negotiating in a Dynamic Global World (3) or TGM 506 Communicating and Negotiating Across Cultures (3)

Electives (24 credit hours)

Culminating Experience (3 credit hours)

TAM 542 Global Leadership and Personal Development (3)

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Thunderbird School of Global Management

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- professional resume or CV
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. The English proficiency requirements are the same as the Graduate College requirements.

Two years of work experience is preferred but not required.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Develop the ability to inspire others in a global world.
- Develop the ability to analyze complex global issues concisely.
- Develop the ability to be an effective communicator and negotiator in a cross-cultural setting.

Global Opportunities:

Global Experience: Students in the Master of Applied Leadership and Management program have the unique opportunity to apply their learning in an international setting. Some options include:

Global Field Seminars --- During this course, students experience an intensive one-week immersion in-country. Students enjoy a hands-on learning experience in a focused region of the world, comprising company site visits, high-level meetings and presentations with business, government and cultural leaders as well as Thunderbird alumni. Through these interactions, students learn the challenges and opportunities that make doing business in the region unique.

Thunderbird Global Challenge Laboratories --- This client-facing, project-based course involves a one-week immersion in-country. Projects are tailored to the business needs of the client and provide sophisticated data and market analysis; strategy recommendations; and practical, effective plans for sustained growth. For more information, students should visit the Thunderbird Global Challenge Lab website (<https://thunderbird.asu.edu/degree/students/graduates/global-challenge-lab>).

The program fee for one Global Field Seminar or Global Challenge Lab experience is included in the tuition and fees for the Master of Applied Leadership and Management degree. Airfare and incidental expenses are extra.

Career Opportunities: More than ever, today's global organizations need versatile leaders and managers with creative problem-solving skills who can elevate diverse teams across cultures in multiple markets around the world. The Master of Applied Leadership and Management prepares graduates to lead in all sectors: government, private enterprise, NGOs and nonprofits.

Career examples include:

- compensation and benefits manager
- financial analyst
- human resources manager
- logistics analyst
- logistics manager
- management analyst
- marketing manager
- sales manager
- supply chain manager

Global Affairs and Management, MA (TBGAMMA)

Online Degree Search Title: Global Affairs and Management, MA
2024-25 Academic Catalog Archive

Campus: Downtown Phoenix, ASU at Washington, D.C.

ASU is not currently accepting applications for this program.

Program Description: The MA in global affairs and management is a transdisciplinary degree program that covers all aspects of global affairs and management, including global relations, political economy and cross-cultural communications, while supplementing this valuable international affairs curriculum with core courses in accounting, finance, management and marketing.

The program prepares students with the tools and insight needed to address complex issues in diplomacy, business and society and to bring an increased focus on social responsibility to corporate employers.

About Thunderbird

Thunderbird School of Global Management has produced world-class leaders for more than 75 years. The ideal Thunderbird student is curious, globally minded, and eager to develop and advance their careers in leadership and management within the global and digital landscape of the Fourth Industrial Revolution. Upon completion of this degree, graduates join a thriving global alumni network nearly 50,000 strong, managing some of the world's largest institutions, companies, nonprofits and NGOs.

Degree Requirements:

30 credit hours including the required capstone course (TGM 545).

Required Core (3 credit hours)

TGM 575 Global Affairs (3)

Other Requirements (18 credit hours)

TGM 501 Global Accounting (3)

TGM 502 Financial Management for Global Value Creation (3)

TGM 503 Global Marketing (3)

TGM 504 Managing Organizations from a Global Perspective (3)

TGM 505 States and Markets in a Global Economy (3)

TGM 508 Regional Business Environment I: Emerging Markets (3)

Electives (6 credit hours)

Culminating Experience (3 credit hours)

TGM 545 Global Leadership and Strategy (3)

Additional Curriculum Information

Other Requirements courses may be substituted with approval of the academic unit.

For elective coursework, students should see the academic unit for the approved course list.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Thunderbird School of Global Management.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- one letter of recommendation
- proof of English proficiency

Additional Admission Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Develop the ability to build sustainable and trusting relationships with others from diverse parts of the world.
- Develop the ability to analyze complex global issues concisely.
- Develop the ability to strategize with impact in a complex world.

Global Opportunities:

Global Experience: Students can choose to travel abroad by adding one of Thunderbird's immersive weeklong Global Challenge Labs or Field Seminars.

Global Field Seminar

This one-week, for-credit seminar offers a hands-on learning experience in a focused region of the world. Through site visits, high-level meetings and presentations with business, government and cultural leaders, students learn what makes doing business in the region unique.

Thunderbird Global Challenge Laboratories

This is a client-facing, project-based course built on a one-week immersion assignment in destinations all over the world. Projects are tailored to the business needs of the client and challenge students to provide sophisticated data and market analysis, strategy recommendations and plans for sustained growth that are both practical and effective. For more information, students should visit the Thunderbird Global Challenge Lab website (<https://thunderbird.asu.edu/degree/students/graduates/global-challenge-lab>).

Career Opportunities: Career examples include positions as:

- business continuity planners
- diplomats
- foreign service officers
- intelligence analysts
- political scientists
- regulatory affairs specialists
- social and community service managers

Global Affairs and Management (Executive), MA (TBGAMEMA)

Online Degree Search Title: Global Affairs and Management - Executive, MA

Campus: ASU at Washington, D.C.

Program Description: At the Intersection of Global Business and Global Policy

Today's world needs future-ready global leaders and managers more than ever. Accelerating global complexity and dynamism in this changing world is reshaping how people create value, work and live.

This one-year MA program in global affairs and management with an executive focus provides a digital global mindset and a unique combination of hard and soft skills for leading systems and new enterprises, managing complexity, disruptive innovation, digital transformation, collaborative problem-solving and creating sustainable global futures across geographies, cultures and sectors.

Based in Washington, D.C., the program is tailored for midcareer professionals in all sectors, offering specializations in global business or global public policy. The schedule --- most classes meet every other Friday and Saturday --- allows participants to remain working while earning their degree. Students can choose to travel abroad by adding one of Thunderbird's immersive weeklong Global Challenge Labs or Field Seminars.

Earning this leading-edge executive master's degree prepares graduates for executive leadership positions within their existing organizations or to make a bold move in their careers by switching industries entirely. The program allows students to earn a master's degree from a top global leadership and management school in as little as one year, so they can immediately put their newly acquired skills to work and leverage Thunderbird's global alumni network to advance their career goals.

Global Leadership for the Fourth Industrial Revolution

Thunderbird's executive Master of Arts program in global affairs and management in Washington, D.C., includes an intensive focus on how to manage the systemic hazards facing the business and policy worlds. Policymakers and business leaders alike learned from the financial crisis of 2008 that they need to understand the risks emerging from interactions in interdependent financial institutions, rather than merely looking at each institution on its own. Such systemic fragilities are becoming increasingly apparent as a result of the coronavirus pandemic, global social unrest, and the ever more evident impacts of climate upheaval, for example. To build more robust organizations and resilient societies, new mindsets and new tools are needed.

Thunderbird School of Global Management has produced unique leaders for over 75 years --- leaders in every sector capable of tackling the world's greatest challenges. The alumni network comprises 45,000 graduates and 170 chapters around the globe.

Degree Requirements:

30 credit hours including the required capstone course (TGM 545).

Required Core (3 credit hours)

TGM 575 Global Affairs (3)

Electives (9 credit hours)

Other Requirement (15 credit hours)

TGM 505 States and Markets in a Global Economy (3)

TGM 518 International Finance and Trade (3)

TGM 549 Global Leadership (3)

TGM 577 International Organizations (3)

TGM 586 Global Entrepreneurship and Sustainable Business (3)

Culminating Experience (3 credit hours)

TGM 545 Global Leadership and Strategy (3)

Additional Curriculum Information

Students focus their elective courses in a specific area approved by the academic unit. Other requirement courses may be substituted with approval of the academic unit.

Coursework on complex systems provides a framework for insights into how many social, economic and ecological systems actually work, and --- despite the inherent uncertainties in such systems --- how to manage them, using a much larger toolkit than the standard tools of policy and business analysis.

A key element of managing complexity and uncertainty is the engagement of a wide range of stakeholders in decision-making. Multiple required courses and elective courses cover techniques for facilitating productive multistakeholder engagement in the context of complex global systems. For example, in the core course on the craft of global networks in global affairs, students learn how and why to build resilient collaborations across borders and sectors in areas as varied as health, human rights, war, economic renewal, the environment and terrorism.

The program culminates in the global leadership and strategy capstone course, which enables students to apply the new form of leadership needed to manage complex systems through a deep dive into addressing a specific real-world problem. The course thus pulls together the full set of capabilities required to excel at the top of a global organization.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and Thunderbird School of Global Management.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any subject from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or they must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- one letter of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Develop the ability to build sustainable and trusting relationships with others from diverse parts of the world.
- Develop the ability to analyze complex global issues concisely.
- Develop the ability to strategize with impact in a complex world.

Global Opportunities:

Global Experience: Students can choose to travel abroad by adding one of Thunderbird's immersive weeklong Global Field Seminars or Global Challenge Labs.

Global Field Seminar

During this course, students experience an intensive one-week immersion in-country. Students enjoy a hands-on learning experience in a focused region of the world, comprising company site visits, high-level meetings and presentations with business, government and cultural leaders, as well as Thunderbird alumni. Through these interactions, students learn the challenges and opportunities that make doing business in the region unique.

Global Challenge Laboratories

This is a client-facing, project-based course built on a one-week immersion assignment in one of many destinations all over the world. Projects are tailored to the business needs of the client and challenge students to provide sophisticated data and market analysis, strategy recommendations and plans for sustained growth that are both practical and effective. For more information, students should visit the Thunderbird Global Challenge Labs (<https://thunderbird.asu.edu/degree/students/graduates/global-challenge-lab>) website.

Career Opportunities: Career examples include:

- adjunct professor
- chief executive
- chief sustainability officer
- general and operations manager
- human resources manager
- lawyer and officer for the Joint Chiefs of Staff
- leader of an international organization
- leader in federal and state government
- managing partner at a consulting firm
- senior diplomat

Global Leadership and Management, DPP (TBGLMDPP)

Online Degree Search Title: Global Leadership and Management, DPP

Campus: SYNC

Program Description: The DPP program in global leadership and management is crafted to prepare practitioners to be responsive to growing challenges and develop potential leaders and managers facing these challenges. Those with senior-level work experience who are interested in developing their leadership and management capabilities in today's digital environment to help organizations transform are especially sought for the program.

Students develop the models, strategies, networks and solutions to address increasingly pressing challenges across the public, private and nonprofit sectors through this high-touch and high-tech program, which is delivered synchronously online in dynamic and interactive ways. This format provides working professionals the greatest convenience and flexibility while enabling them to benefit from the live delivery of courses provided by Thunderbird's world-class faculty.

Students on I-20 visas are not permitted to complete courses via Sync and should speak with an advisor about other options to complete this program.

Students seeking to use GI Bill® benefits for ASU Sync programs should contact the Pat Tillman Veterans Center regarding certain limitations.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at www.benefits.va.gov/gibill. (<https://www.benefits.va.gov/gibill>)

About Thunderbird

Thunderbird School of Global Management has produced world-class leaders for more than 75 years. The ideal Thunderbird student is curious, globally minded, and eager to develop and advance their careers in leadership and management within the global and digital landscape of the current world. Upon completion of this degree, graduates join a thriving global alumni network nearly 50,000 strong, managing some of the world's largest institutions, companies, nonprofits and NGOs.

Degree Requirements:

60 credit hours including the required applied project course (TGM 793).

Required Core (18 credit hours)

TGM 705 Philosophies, Theories and Methods of Research (3)
TGM 710 Shaping the Future: The Fourth Industrial Revolution and Digital Transformation in a Global Economy (3)
TGM 715 States and Markets in the Fourth Industrial Revolution Global Economy: Applications for Global Leaders (3)
TGM 720 Qualitative Analysis for Systems Thinkers: Learning from the Field (3)

TGM 740 Leading and Managing Global Organizations: Advanced Topics (3)

Restricted Electives (15 credit hours)

Electives (6 credit hours)

Research (18 credit hours)

TGM 790 Reading and Conference (6)

TGM 792 Research (12)

Culminating Experience (3 credit hours)

TGM 793 Applied Project (3)

Additional Curriculum Information

With approval from the student's supervisory committee and Graduate College, 15 credit hours from a previously awarded master's degree can be used for this degree.

Students should consult with the academic unit for selection of open electives and restricted electives.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and Thunderbird School of Global Management.

Applicants are eligible to apply to the program if they have earned a master's degree in any subject or related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or they must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- professional resume
- written statement
- two letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Preferred applicants have eight years of senior-level work experience. This information should be reflected in the applicant's professional resume.

The applicant's written statement should demonstrate a global perspective and desire for an applied focus in their program.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Apply concepts of social capital to their research through the creation of relationships with people from various countries and cultures from across the world.
- Conduct independent, basic or applied research in the field of global leadership and management that includes a thorough literature review, development of appropriate methodology and analysis, and written communication of the results.
- Translate their own research knowledge into practice or policy that influences global leadership and management.

Global Opportunities:

Global Experience: Thunderbird's network of Centers of Excellence from Los Angeles to Tokyo, and Amsterdam to Nairobi provides a truly global presence that facilitates academic offerings in major commercial centers around the world, connecting and engaging its worldwide alumni network and supporting international research and employment opportunities.

Career Opportunities: Graduates of this program have gained knowledge and skills and developed their leadership and management capabilities

to manage the rapid disruptions happening now in traditional business and industry processes. Students can advance and transform their careers through practical, research-based approaches and apply them to globally oriented public, private, governmental or nonprofit organizations.

Career examples include:

- chief executive officer
- chief operating officer
- director
- financial manager
- general manager
- government official
- public policy analyst
- senior organization consultant
- supply chain manager
- sustainability officer

Global Leadership and Strategy, MGLS (TBGLSMGLS)

Online Degree Search Title: Global Leadership and Strategy, MGLS

Campus: Downtown Phoenix

ASU is not currently accepting applications for this program.

Program Description: The MGLS is a global cohort executive leadership and strategy program that centers on development of students' advanced capabilities to conceptualize and deliver profitable growth, along with the competencies to lead strategy execution efforts in a complex and dynamic global environment. This innovative program closely patterns executive decision realities by orienting around key themes that naturally flow --- from the macro to the micro, global to local, public to private --- interweaving relevant disciplines to address the pressing issues that executives face. It is transdisciplinary in both approach and execution.

The Master of Global Leadership and Strategy program combines thematically anchored content with field-deployed experiential learning projects (alternating between developed and emerging markets) that enable participants to interact firsthand with leaders who shape policy and industry and to demonstrate executive acumen through action and response simulation, sprint consultancy engagement, and innovation challenge delivery. The result is a deeply innovative, action-oriented, global executive education experience.

Degree Requirements:

30 credit hours including the required capstone course (TGM 606).

Required Core (5 credit hours)

TGM 601 Megatrends: Understanding Future Drivers and their Influencers (5)

Other Requirement (20 credit hours)

TGM 602 Sustainable Futures: Building, Tapping and Creating Shared Value in a Changing World (5)

TGM 603 Shaping Markets: Market Entry and Winning Strategies (5)

TGM 604 Capturing Dividends: Finding, Fostering and Exploiting New Insights (5)

TGM 605 Deliver Results I: Resourcing and Influencing to Maximize Impact (5)

Culminating Experience (5 credit hours)

TGM 606 Delivering Results II: Peak Dynamism Execution and Comprehensive Debrief (5)

Additional Curriculum Information

Other requirement courses may be substituted with approval of the academic unit.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Thunderbird School of Global Management.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any subject or related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- professional resume
- letter of intent or written statement
- admission interviews
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Applicants should be of high potential (i.e., selected by their organization as being on a trajectory to senior executive positions), and they must have at least eight years of leadership or executive experience.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Develop the ability to inspire, influence and motivate others in a global world.
- Develop the ability to leverage shared value creation to drive innovation.
- Develop the ability to analyze, digest and interpret complex global issues concisely.

Global Leadership and Strategy, MGLS (TBGLSX MGLS)

Online Degree Search Title: Global Leadership and Strategy - Executive, MGLS

Campus: Downtown Phoenix

ASU is not currently accepting applications for this program.

Program Description: Thunderbird School of Global Management's MGLS program with an executive focus delivers an immersive training experience for executives that takes the student inside the boardrooms of businesses and governments around the world, providing actionable insights into the strategy and leadership nuances at play in today's complex and dynamic global economy.

Through an integrated curriculum that follows a thematic pattern mirroring executive decision-making realities, students engage in online courses and on-site experiential learning opportunities that develop their global mindset and bring them face-to-face with leaders of transnational enterprises who shape policy and industry.

The program consists of six rigorous courses of five credits each --- deep dives led by eminent professors and practitioners into topics such as global business megatrends, building sustainable enterprises, and tapping into emerging markets. The six on-site modules are delivered in key global locations, taking students on a transformative journey that includes in-person learning experiences in Los Angeles, Geneva, Nairobi, Mumbai, Shanghai and São Paulo. These travel-training adventures feature powerful professional development experiences, such as attending exclusive business and government roundtables or taking part in targeted site visits that offer students inside access to regional business. All in-person instruction follows a schedule designed for working professionals and is supplemented by sophisticated online coursework.

The Master of Global Leadership and Strategy program breaks free of the traditional, lockstep curriculum of other graduate business programs, immersing the student in hands-on, culturally complex leadership situations that build their analysis and decision-making capabilities, enhance their executive presence and accelerate their career advancement.

Global Management, MGM (TBTGMMGM)

Online Degree Search Title: Global Management, MGM

Campus: Downtown Phoenix

Program Description: The specialized MGM program delivers cross-cultural, hands-on training in the nuances of international management, preparing students with the perfect balance of practical and people skills to inspire, influence and drive global success. Students globalize their mindset and marketability by pairing their deep-dive leadership training with an innovative concentration area, foreign language options, practical training, consultative collaborations with corporate partners, internships, real-world simulations and study abroad modules.

Programs start in August or January with a 16- or 21-month track.

The accelerated MGM (<https://thunderbird.asu.edu/degree/accelerated/accelerated-master-global-management>) allows students to earn both a bachelor's and master's degree in as few as five years. This cost-effective option allows students, with the help of their undergraduate academic advisor, to take 12 credit hours of core master's degree classes during their senior year.

Students choose one of the 17 concentration areas or design their own concentration. This program features three concentration options for STEM specializations that meet F-1 student visa status requirements, starred below.

Thunderbird concentrations:

- global affairs
- global business*
- global digital transformation*
- global entrepreneurship

Concentrations offered in partnership with other ASU schools and colleges:

- creative industries and design thinking
- data science*
- global development and innovation
- digital audience strategy
- global health care delivery
- global health care innovation
- global legal studies
- nonprofit leadership and management
- public administration
- public policy
- space leadership, business and policy
- sustainability solutions
- sustainable tourism

Students complete rigorous core courses in global management, international political economy and cross-cultural engagement, with electives spanning the gamut of the university's offerings. The result is a flexible, multidisciplinary curriculum featuring a rich variety of coursework in international business and management, social sciences and humanities.

A Thunderbird education features experiential learning for exponential impact. Applied learning courses give students diverse opportunities to work face-to-face with clients or participate in real-life simulations as part of their program. Students choose from a variety of options that enable them to develop and refine their hard skills. A hands-on courses and applied learning offerings --- both practical and cutting-edge --- prepare students to enter the workforce and thrive immediately. These real-world experiences are built into the curriculum, ensuring 100% participation from students.

Moving from theory to real-world practice, students gain invaluable experience by taking on projects for major corporations and other global organizations, including nonprofits and government agencies. In the Global Challenge Labs, students work on consulting projects in emerging markets while developing leadership skills, cultural sensitivity and international business acumen.

In the Global Organizational Consulting program, students gain distinctive experience in consulting frameworks through client projects. Internships allow students to work for multinational businesses in a wide variety of industries in full-time positions for at least eight weeks on graduate-level projects or over the summer. Thunderbird's simulations present real-world scenarios in the areas of global marketing, global finance and global strategy, enabling students to test solutions in a sandbox setting. They can also travel to specific regions to study local business practices, master intercultural management skills and develop international relationships that can last a lifetime.

Concurrent Program Options:

Students can choose to create their own concurrent degree combination to match their interests by working with their academic advisor during or after their first semester of study. Some concurrent combinations are not possible due to high levels of overlap in curriculum; students should speak with their academic advisor for more details.

This degree is also offered as a concurrent program with the following: Artificial Intelligence in Business, MS

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

49 credit hours including a foreign language exam and the required capstone course (TGM 597).

Required Core (3 credit hours)

TAM 582 Communicating and Negotiating in a Dynamic Global World (3) or

TGM 506 Communicating and Negotiating Across Cultures (3)

Other Requirements (21 credit hours)

TGM 515 Navigating Global and Regional Business Environments (3)

TGM 517 Global Accounting and Financial Management (3)

TGM 545 Global Leadership and Strategy (3)

TGM 557 Global Marketing and Data Analytics (3)

TGM 586 Global Entrepreneurship and Sustainable Business (3)

TGM 596 Thunderbird Experiential Practicum (6)

Electives (24 credit hours)

Culminating Experience (1 credit hour)

TGM 597 Thunderbird Personal Leadership Development (1)

Additional Curriculum Information

Proficiency in a second language is required for the MGM degree. Students whose native language is not English who meet the admission requirements for this program satisfy the language requirement.

Students whose native language is English must satisfy the graduation requirement for language proficiency either through an oral proficiency interview administered by a third-party vendor or by successfully completing six credit hours of 400-level or higher foreign language coursework.

For electives coursework, students should see the academic unit for approved courses.

For other requirements coursework, other courses may be used with approval from the academic unit.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Thunderbird School of Global Management.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution. The program is open to candidates from any undergraduate major.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- resume
- essay response to application question
- one professional or academic reference
- interview
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The resume should demonstrate the applicant's professional and academic history.

An interview is required. Final applicants may be asked to complete an additional interview.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Develop the ability to build sustainable and trusting relationships with others from diverse parts of the world.
- Employ technology to analyze data for decision making.
- Develop the ability to inspire others in a global world.

Global Opportunities:

Global Experience: Students in Thunderbird's Master of Global Management program have unique opportunities to apply and hone their learning in international settings. Experiential learning exposes students to actual problems faced by leaders of multinational businesses and governmental or nonprofit organizations that operate on an international level. Working with Thunderbird professors, their fellow students, alumni and corporate partners, students master and apply global management principles and concepts to meet real business challenges through special courses, labs and projects. Thunderbird offers a wide variety of experiential learning engagements, enabling students to solve real-world challenges by collaborating with the school's corporate partners around the world. Options include the following:

Global Field Seminars

This one- or two-week seminar exposes students to the dynamics and nuances of doing business in a focused region of the world. Teams of students go on company site visits and attend high-level meetings and presentations with business, government and cultural leaders as well as with

Thunderbird alumni. Students gain invaluable hands-on experience while expanding their global business skills, enabling them to become major assets to any organization they join after graduating.

Global Challenge Labs

This client-facing, project-based course is built on a five-week immersion assignment in a key emerging market. Projects take students to destinations all over the world. They are tailored to the business needs of the client and challenge students to provide sophisticated data and market analysis, strategy recommendations and plans for sustained growth that are both practical and effective. For more information, students should visit the Global Challenge Lab website (<https://thunderbird.asu.edu/degree/students/graduates/global-challenge-lab>).

Career Opportunities: Thunderbird prepares graduates to enter the complex and exciting global economy with specialized, hands-on training in international business, cross-cultural relations, global political economy and regional business environments. With their global mindset, core professional skills, mastery of management principles and practices, and multicultural outlook, Thunderbird graduates are prepared for leadership roles in organizations with a global scope.

Career examples for graduates include positions as:

- financial managers
- general and operations managers
- intelligence analysts
- logistics managers
- management analysts
- marketing managers
- market research analysts and marketing specialists
- social and community services managers
- supply chain managers
- sustainability specialists

Global Management, MGM (TBTGMXMGM)

Online Degree Search Title: Global Management (Executive), MGM

Campus: Downtown Phoenix

Program Description: Thunderbird School of Global Management's MGM program with an executive focus provides cutting-edge management coursework, cross-cultural insight and regional studies to prepare graduates to lead transnational businesses, nonprofit organizations and government agencies. With the busy schedules of working professionals in mind, this specialized degree is designed to be completed as a lockstep program in 12 months.

Students in the program learn to lead teams and manage projects across borders and across all levels of an organization that operates in different locations around the world. This program goes beyond the traditional executive-level business degree, offering comprehensive instruction in global management disciplines as well as cross-cultural communications, negotiations and international political economy. With its transdisciplinary philosophy blending business and trade, public policy and international affairs, the well-rounded curriculum builds capability in every facet of international management, featuring hands-on, experiential learning opportunities and practical, applicable explorations of the intricacies of leading global enterprises.

The yearlong executive focus program begins with an intensive residence module delivered in the school's state-of-the-art facilities located in the downtown business district of Phoenix. Throughout the program, the cohort meets on weekends for in-person instruction with Thunderbird faculty. A highlight of the program is when students get the opportunity to apply what they have learned in an international location through a Global Field Seminar or Global Challenge Lab.

About Thunderbird

Thunderbird School of Global Management has produced world-class leaders for more than 75 years. The ideal Thunderbird student is curious, globally minded, and eager to develop and advance their careers in leadership and management within the global and digital landscape of the Fourth Industrial Revolution. Upon completion of this degree, graduates join a thriving global alumni network nearly 50,000 strong, managing some of the world's largest institutions, companies, nonprofits and NGOs.

Degree Requirements:

31 credit hours including the required capstone course (TGM 597).

Required Core (3 credit hours)

TAM 582 Communicating and Negotiating in a Dynamic Global World (3) or

TGM 506 Communicating and Negotiating Across Cultures (3)

Other Requirements (15 credit hours)

TGM 515 Navigating Global and Regional Business Environments (3)

TGM 530 Big Data in the Age of the Global Economy (3)

TGM 549 Global Leadership (3)

TGM 598 Topic: Global Digital Transformation (3)

TGM 598 Topic: Lifelong Personal Leadership in the Global Economy (3)

Electives (12 credit hours)

Culminating Experience (1 credit hour)

TGM 597 Thunderbird Personal Leadership Development (1)

Additional Curriculum Information

For other requirements, the academic unit may approve other courses to be used than those listed.

For electives coursework, students should see the academic unit for the approved course list.

Students are allowed up to six credit hours of 400-level courses on the plan of study.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Thunderbird School of Global Management.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution. The program is open to candidates from any undergraduate major.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- resume
- one letter of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Develop the ability to build sustainable and trusting relationships with others from diverse parts of the world.
- Employ technology to analyze data for decision making.
- Develop the ability to inspire others in a global world.

Global Opportunities:

Global Experience: Students in the executive Master of Global Management program travel with classmates on one faculty-led Global Field Seminar or Global Challenge Lab during the program.

Global Field Seminar

This one-week, for-credit seminar offers a hands-on learning experience in a focused region of the world. The seminar comprises site visits, high-level meetings and presentations with business, government and cultural leaders, enabling students to learn what makes doing business in the region unique.

Global Challenge Lab

This client-facing, project-based course is built on a one-week immersion assignment in a key emerging or advanced market. Projects take students to destinations all over the world. They are tailored to the business needs of the client and challenge students to provide sophisticated data and market analysis, strategy recommendations, and plans for sustained growth that are both practical and effective. For more information, students

should visit the Global Challenge Lab website (<https://thunderbird.asu.edu/degree/students/graduates/global-challenge-lab>).

Career Opportunities: Career opportunities include professional titles such as:

- chief compliance officer
- chief executive officer
- chief financial officer
- chief information officer
- chief marketing officer
- chief operating officer
- chief sustainability officer
- executive director
- vice president

Global Management (Creative Industries and Design Thinking), MGM (TBGMCIDMGM)

Online Degree Search Title: Global Management (Creative Industries and Design Thinking), MGM

Campus: Downtown Phoenix

Program Description: The World Economic Forum reports that empathy and collaboration are two critical abilities for global manager success. These are equally critical for those seeking careers in creative industries and industries that use design thinking. These abilities rely on the development of social capital. Students in this program learn to build sustainable, trusting relationships --- the basis of social capital --- with others from diverse parts of the world by developing a deep capacity for intercultural empathy, the ability to have an interpersonal impact and the ability to act with diplomacy. This program is designed to develop a student's social capital through field-based action learning, team-based projects and stretch assignments.

This concentration is offered in collaboration with the Herberger Institute for Design and the Arts (<https://herbergerinstitute.asu.edu/>).

Inventive thinking. Innovative leadership.

This program can fill the entrepreneurial skills gap that exists among traditional art and design graduates. The National Strategic National Arts Alumni Project survey of over 100,000 art and design graduates indicates that while 77% of architecture graduates and 75% of fine arts graduates believe entrepreneurial skills to be somewhat or very important, only 24% and 21%, respectively, gained the necessary entrepreneurial knowledge and skills as undergraduates.

The MGM program with a concentration in creative industries and design thinking teaches students critical skills with an interdisciplinary focus to meet a current need in the globally expanding field of creative industries. Additionally, providing students with an entrepreneurial skill set strengthens their ability to connect interdisciplinary knowledge of the cultural industries with design thinking methodology, building on management skills and the ability to apply entrepreneurial vision to the globally interconnected sector of art and design. Students are exposed to design-thinking pedagogy as they increase their capacity for interpersonal communication, public communication, opportunity recognition, network and systems thinking, problem recognition and creativity. They demonstrated abilities in cultural leadership, knowledge of the creative industries, distribution of creative products, the creative process and management of innovation in the creative industries.

This program empowers students to advance innovation in the cultural sector, support creative work and careers, harness social capital, and design public and private enterprises that will strengthen arts and design in the future. The program prepares graduates to understand the complex economic, legal, political and social contexts that surround any innovation or enterprise.

Thunderbird School of Global Management has produced unique leaders for over 75 years --- leaders in every sector capable of tackling the world's greatest challenges. The alumni network comprises 45,000 graduates and 170 chapters around the globe.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Global Management (Data Science), MGM (TBGMDSCMGM)

Online Degree Search Title: Global Management (Data Science), MGM

Campus: Downtown Phoenix

Program Description: This STEM-designated data science concentration within the MGM program, designed in partnership with the School of Computing and Augmented Intelligence (<https://scai.engineering.asu.edu/>) in the Ira A. Fulton Schools of Engineering, is designed for students who are interested in gaining both global management and data management expertise to work in multinational corporations, international nonprofit entities, and governmental and nongovernmental organizations around the globe.

As global companies and organizations continue to rely on data to drive management decisions, it is increasingly important for leaders to have the skills necessary to understand and interpret that data.

About Thunderbird

Thunderbird School of Global Management has produced world-class leaders for more than 75 years. The ideal Thunderbird student is curious, globally minded, and eager to develop and advance their careers in leadership and management within the global and digital landscape of the Fourth Industrial Revolution. Upon completion of this degree, graduates join a thriving global alumni network nearly 50,000 strong, managing some of the world's largest institutions, companies, nonprofits and NGOs.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

Global Management (Digital Audience Strategy), MGM (TBGMDASMGM)

Online Degree Search Title: Global Management (Digital Audience Strategy), MGM

Campus: Downtown Phoenix

Program Description: The MGM degree program with a concentration in digital audience strategy is designed for students who are interested in augmenting their digital skills in the areas of marketing, design and product development to complement a strong core of global leadership and management skills. Offered in collaboration with the Walter Cronkite School of Journalism and Mass Communication (<https://cronkite.asu.edu/>), this program enables students to combine digital expertise with the global management skills found in graduates of the traditional Master of Global Management program.

The research approaches used to identify and reach target audiences through digital audience strategy include traditional and emerging methods, such as real-time website and social media audience analysis, social network analysis, search engine optimization analysis, surveys, focus groups and competitive analysis. Graduates master a range of methods to inform strategy for specific outcomes.

TGM 517 Global Accounting and Financial Management (3)

TGM 545 Global Leadership and Strategy (3)

TGM 557 Global Marketing and Data Analytics (3)

TGM 586 Global Entrepreneurship and Sustainable Business (3)

TGM 596 Thunderbird Experiential Practicum (6)

Culminating Experience (1 credit hour)

TGM 597 Thunderbird Personal Leadership Development (1)

Additional Curriculum Information

For the concentration coursework, students must take MCO 561, then choose three courses from MCO 562, MCO 563, MCO 564 and MCO 565, for a total of 12 credit hours.

Electives are approved by the academic unit.

Except for TGM 596 and the foreign language requirement, other requirement courses may be substituted with approval of the academic unit.

Proficiency in a second language is required for graduation from the MGM degree program. Students whose native language is not English who meet the admission requirements for the Master of Global Management program satisfy the language requirement.

Students whose native language is English must satisfy the graduation requirement for language proficiency either through an oral proficiency interview administered by a third-party vendor or by successfully completing six credit hours of 400-level or higher foreign language coursework as part of the program electives.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Thunderbird School of Global Management.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any subject or related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- resume
- essay response to application question
- one professional or academic reference
- interview
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The resume should demonstrate the applicant's professional and academic history.

An interview is required. Final applicants may be asked to attend an additional interview.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Develop the ability to build sustainable and trusting relationships with others from diverse parts of the world.
- Apply strategies and tactics for acquiring and engaging audiences in the digital sphere.
- Develop the ability to inspire others in a global world.

Global Opportunities:

Global Experience: Students in Thunderbird's Master of Global Management program have unique opportunities to apply and hone their learning in international settings. Experiential learning exposes students to actual problems faced by leaders of multinational businesses and governmental or nonprofit organizations that operate on an international level.

Working with Thunderbird professors, their fellow students, alumni and corporate partners, students master and apply global management principles and concepts to meet real business challenges through special courses, labs and projects. Thunderbird offers a wide variety of experiential learning engagements, giving students the ability to solve real-world challenges by collaborating with the school's corporate partners around the world. Some options include the following:

Global Field Seminars

This one- or two-week seminar exposes students to the dynamics and nuances of doing business in a focused region of the world. Teams of students go on company site visits and attend high-level meetings and presentations with business, government and cultural leaders, as well as with Thunderbird alumni. Students gain invaluable hands-on experience while expanding their global business skills, enabling them to become major assets to any organization they join after graduating.

Thunderbird Global Challenge Laboratories

This is a client-facing, project-based course built on a six- to seven-week immersion assignment in a key emerging or advanced market. Projects take students to destinations all over the world. They are tailored to the business needs of the client and challenge students to provide sophisticated data and market analysis, strategy recommendations, and plans for sustained growth that are both practical and effective. For more information, students should visit the Thunderbird Global Challenge Lab website (<https://thunderbird.asu.edu/degree/students/graduates/global-challenge-lab>).

Career Opportunities: Career examples include positions as:

- instructional designers and technologists
- intelligence analysts
- management analysts
- marketing managers
- market research analysts and marketing specialists
- sales managers

Global Management (Global Business), MGM (TBGMGBMGM)

Online Degree Search Title: Global Management (Global Business), MGM

Campus: Downtown Phoenix

Program Description: The STEM-designated global business concentration within the MGM program allows students to specialize in the various pathways in global business, such as global finance, global marketing, supply chain or management consulting. By developing students' skills --- such as cross-cultural competency, social and emotional intelligence, and creative and adaptive thinking --- this program helps sharpen their global mindset, along with leadership and management skills, preparing them for a boundless career.

Global business effectiveness requires knowledge and understanding of global dynamics, the ability to simplify and explain complex ideas, and a nuanced, cosmopolitan view of the world. These three dimensions form the basis of global intellectual capital. In the Master of Global Management degree program, this capital is built inside and outside the classroom through a cutting-edge international business curriculum reinforced with field-based projects that integrate international business experience, illustrating social proof of global intellectual capital mastery. The concentration in global business prepares students who aspire to become global managers or leaders in their chosen fields.

About Thunderbird

Thunderbird School of Global Management has produced world-class leaders for more than 75 years. The ideal Thunderbird student is curious, globally minded, and eager to develop and advance their careers in leadership and management within the global and digital landscape of the Fourth Industrial Revolution. Upon completion of this degree, graduates join a thriving global alumni network nearly 50,000 strong, managing some of the world's largest institutions, companies, nonprofits and NGOs.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Concurrent Program Options:

Students can choose to create their own concurrent degree combination to match their interests by working with their academic advisor during or after their first semester of study. Some concurrent combinations are not possible due to high levels of overlap in curriculum; students should speak with their academic advisor for more details.

This degree is also offered as a concurrent program with the following: Artificial Intelligence in Business, MS

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Global Management (Global Development and Innovation), MGM (TBGMGDIMG)

Online Degree Search Title: Global Management (Global Development and Innovation), MGM

Campus: Downtown Phoenix

Program Description: The global development and innovation concentration within the MGM program prepares global leaders to leverage innovation strategies in order to tackle development and planetary challenges.

Tailored to each student's ambitions and interests, this unique academic concentration is offered in collaboration with the School for the Future of Innovation in Society (<https://sfis.asu.edu/>). It is relevant to development practitioners who seek to complement their skills and experience and to those interested in pursuing careers in international development agencies within and beyond government, as well as in nongovernmental organizations and community organizations at local, national and international levels.

Graduates are equipped with the analytical and practical skills and experience needed to engage critically as leaders in issues around innovation and development and to work across the intersections of innovation, development policy and global management. They are prepared to make a positive impact in leadership roles alongside the school's global alumni network of professionals who are making a difference.

TGM 597 Thunderbird Personal Leadership Development (1)

Additional Curriculum Information

For concentration coursework, students choose four courses from the approved list for a total of 12 credit hours.

Electives are approved by the academic unit.

Except for TGM 596 and the foreign language requirement, other requirement courses may be substituted with approval of the academic unit.

Proficiency in a second language is required for graduation from the MGM degree program. Students whose native language is not English who meet the admission requirements for the Master of Global Management program satisfy the language requirement.

Students whose native language is English must satisfy the graduation requirement for language proficiency by waiving this requirement through an oral proficiency interview administered by a third-party vendor or by successfully completing six credit hours of 400-level or higher of foreign language coursework as part of the program electives.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Thunderbird School of Global Management.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any subject or related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- resume
- essay response to application question
- one professional or academic reference
- interview
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The resume should demonstrate the applicant's professional and academic history.

An interview is required. Final applicants may be asked to complete an additional interview.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Develop the ability to build sustainable and trusting relationships with others from diverse parts of the world.
- Analyze competing theories and practices on global development and innovation.
- Develop the ability to inspire others in a global world.

Global Opportunities:

Global Experience: Students in Thunderbird's MGM program have unique opportunities to apply and hone their learning in international settings. Experiential learning exposes students to actual problems faced by leaders of multinational businesses and governmental or nonprofit organizations that operate on an international level.

Working with Thunderbird professors, their fellow students, alumni and corporate partners, students master and apply global management principles and concepts to meet real business challenges through special courses, labs and projects. Thunderbird offers a wide variety of experiential learning engagements, giving students the ability to solve real-world challenges by collaborating with the school's corporate partners around the world. Some options include the following:

Global Field Seminars

This one- or two-week seminar exposes students to the dynamics and nuances of doing business in a focused region of the world. Teams of students go on company site visits and attend high-level meetings and presentations with business, government and cultural leaders as well as with Thunderbird alumni. Students gain invaluable hands-on experience while expanding their global business skills, enabling them to become major assets to any organization they join after graduating.

Thunderbird Global Challenge Laboratories

This is a client-facing, project-based course built on a six- to seven-week immersion assignment in a key emerging or advanced market. Projects take students to destinations all over the world. They are tailored to the business needs of the client and challenge students to provide sophisticated data and market analysis, strategy recommendations and plans for sustained growth that are both practical and effective. For more information, students should visit Thunderbird's Global Challenge Lab website (<https://thunderbird.asu.edu/degree/students/graduates/global-challenge-lab>).

Career Opportunities: Career examples include:

- business continuity planner

- environmental economist
- environmental restoration planner
- regulatory affairs manager
- sustainability specialist
- urban and regional planner
- water resource specialist

Global Management (Global Digital Transformation), MGM (TBGMGDTMGM)

Online Degree Search Title: Global Management (Global Digital Transformation), MGM

Campus: Downtown Phoenix

Program Description: The STEM-designated global digital transformation concentration within the MGM degree program is geared toward students interested in augmenting their digital skills in the areas of management consulting, marketing, design and product development.

Students can tailor this cutting-edge academic concentration to fit their specific learning goals. Through collaborative courses offered in partnership with other ASU colleges, students may combine the global management skills gained in the Master of Global Management with digital expertise to create a dual specialization that will continue to be in high demand throughout the global economy.

Students expand their electives, fuse technological skills with managerial skills, and combine the global management skills of the MGM with digital expertise by specializing in the various pathways of global digital transformation through program coursework and applied learning projects guided by faculty experts.

About Thunderbird

Thunderbird School of Global Management has produced world-class leaders for more than 75 years. The ideal Thunderbird student is curious, globally minded, and eager to develop and advance their careers in leadership and management within the global and digital landscape of the current world. Upon completion of this degree, graduates join a thriving global alumni network nearly 50,000 strong, managing some of the world's largest institutions, companies, nonprofits and NGOs.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Concurrent Program Options:

Students can choose to create their own concurrent degree combination to match their interests by working with their academic advisor during or after their first semester of study. Some concurrent combinations are not possible due to high levels of overlap in curriculum; students should speak with their academic advisor for more details.

This degree is also offered as a concurrent program with the following: Artificial Intelligence in Business, MS

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Asia Studies (East Asia), BA
- Asia Studies (South Asia), BA
- Asia Studies (Southeast Asia), BA
- Biological Sciences, BS
- Biological Sciences (Biology and Society), BS
- Biological Sciences (Genetics, Cell and Developmental Biology), BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

49 credit hours, a foreign language exam, including the required capstone course (TGM 597).

Required Core (3 credit hours)

TAM 582 Communicating and Negotiating in a Dynamic Global World (3) or

TGM 506 Communicating and Negotiating Across Cultures (3)

Concentration (12 credit hours)

Electives (12 credit hours)

Other Requirement (21 credit hours)

foreign language

TGM 515 Navigating Global and Regional Business Environments (3)

TGM 517 Global Accounting and Financial Management (3)

TGM 545 Global Leadership and Strategy (3)

TGM 557 Global Marketing and Data Analytics (3)

TGM 586 Global Entrepreneurship and Sustainable Business (3)

TGM 596 Thunderbird Experiential Practicum (6)

Culminating Experience (1 credit hour)

TGM 597 Thunderbird Personal Leadership Development (1)

Additional Curriculum Information

Electives are approved by the academic unit.

Except for TGM 596 and the foreign language requirement, other requirement courses may be substituted with approval of the academic unit.

Proficiency in a second language is required for graduation from the Master of Global Management degree program. Students whose native language is not English and who meet the admission requirements for the program satisfy the language requirement.

Students whose native language is English must satisfy the graduation requirement for language proficiency by waiving this requirement through an oral proficiency interview administered by a third-party vendor or by successfully completing six credit hours of 400-level or higher foreign language coursework as part of the program electives.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Thunderbird School of Global Management.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any subject or related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- resume
- essay response to application question
- one professional or academic reference
- interview
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The resume should demonstrate the applicant's professional and academic history.

An interview is required. Final applicants may be asked to complete an additional interview.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Develop the ability to build sustainable and trusting relationships with others from diverse parts of the world.
- Demonstrate proficiency in strategy and tactics for analytic decision making in and managing of digital transformation, emphasizing global management and marketing analytics.
- Develop the ability to inspire others in a global world.

Global Opportunities:

Global Experience: Students in Thunderbird's MGM program have unique opportunities to apply and hone their learning in international settings. Experiential learning exposes students to actual problems faced by leaders of multinational businesses and governmental or nonprofit organizations that operate on an international level.

Working with Thunderbird professors, their fellow students, alumni and corporate partners, students master and apply global management principles and concepts to meet real business challenges through special courses, labs and projects. Thunderbird offers a wide variety of experiential learning engagements, giving students the ability to solve real-world challenges by collaborating with the school's corporate partners around the world. Some options include:

Global Field Seminars

This one- or two-week seminar exposes students to the dynamics and nuances of doing business in a focused region of the world. Teams of students go on company site visits and attend high-level meetings and presentations with business, government and cultural leaders as well as with Thunderbird alumni. Students gain invaluable hands-on experience while expanding their global business skills so they can become major assets to any organization they join after graduating.

Thunderbird Global Challenge Laboratories

This is a client-facing, project-based course built on a six- to seven-week immersion assignment in a key emerging or advanced market. Projects take students to destinations all over the world. They are tailored to the business needs of the client and challenge students to provide sophisticated

data and market analysis, strategy recommendations and plans for sustained growth that are both practical and effective. For more information, students should visit the Thunderbird Global Challenge Lab website (<https://thunderbird.asu.edu/degree/students/graduates/global-challenge-lab>).

Career Opportunities: Career examples include:

- intelligence analyst
- logistics analyst
- management analyst
- marketing manager
- market research analyst and marketing specialist

Global Management (Global Health Care Delivery), MGM (TBGMGHDMGM)

Online Degree Search Title: Global Management (Global Health Care Delivery), MGM

Campus: Downtown Phoenix

Program Description: The global health care delivery concentration within the MGM program provides students with practical skills and hands-on experience in both global management and health care delivery.

Offered in collaboration with the College of Health Solutions (<https://chs.asu.edu/>), this concentration enables graduates to meet the growing need for skilled health care managers who possess a solid foundation of international business skills and a global mindset. It is designed for current or aspiring executives and managers in health care who would like to hone their leadership and business skills to position themselves for careers leading health care organizations around the world. Some health care practitioners, such as nurses and doctors, may also use the degree to move from clinical practice into management roles.

Students master core and advanced skills in designing systems, processes and mechanisms used to optimize health care delivery anywhere in the world. In addition, students integrate evidence-based financial principles geared toward improved individual and population health outcomes, such as leadership strategies in change management.

Global Management (Global Health Care Innovation), MGM (TBTGMHCMGM)

Online Degree Search Title: Global Management (Global Health Care Innovation), MGM

Campus: Downtown Phoenix

Program Description: The MGM program with a concentration in global health care innovation prepares students to assume leadership and managerial responsibilities in global health care organizations.

Students design, apply knowledge to, implement and create innovative solutions that can transform health care ecosystems. They learn how to create and sustain cultures of innovation in health care from multiple perspectives. These perspectives may include personal competence for innovation, use of evidence in decision-making, reframing system infrastructures, financing, cross-cultural communication, entrepreneurship, technology and policymaking. Students develop competence in the design, application and testing of innovative processes and products.

A primary focus of this concentration is to prepare students to lead processes of innovation and transformation globally.

Degree Requirements:

49 credit hours, a foreign language exam, including the required capstone course (TGM 597).

Required Core (3 credit hours)

TGM 506 Communicating and Negotiating Across Cultures (3) or TAM 582 Communicating and Negotiating in a Dynamic World (3)

Other Requirements (21 credit hours)

Global Management (Global Legal Studies), MGM (TBGMGLSMGM)

Online Degree Search Title: Global Management (Global Legal Studies), MGM

Campus: Downtown Phoenix

Program Description: The global legal studies concentration within the MGM program is designed for students who desire to work in areas that require knowledge of global legal issues but may not want to be lawyers. Other students may use this concentration as an introduction to legal studies before pursuing law school.

Offered in collaboration with the Sandra Day O'Connor College of Law (<https://law.asu.edu/>), this program provides students with transdisciplinary global management and legal expertise that opens doors in multiple sectors within organizations operating around the world.

The first step in understanding and applying laws is developing an understanding of basic legal principles and then using those principles to identify and analyze relevant legal issues. Through the foundational courses of the Master of Global Management with a concentration in global legal studies, students master relevant legal principles while gaining legal analysis skills, mainly through case briefings, such as identifying a particular case's legal issue, articulating the legal rule, discussing the court's analysis and concluding. These legal analysis skills are tested on final exams in the foundational courses through hypothetical fact scenarios. Students gain a strong understanding of legal principles --- the basis of legal analysis -- and the ability to apply them in their field of interest.

About Thunderbird

Thunderbird School of Global Management has produced world-class leaders for more than 75 years. The ideal Thunderbird student is curious, globally minded, and eager to develop and advance their careers in leadership and management within the global and digital landscape of the Fourth Industrial Revolution. Upon completion of this degree, graduates join a thriving global alumni network nearly 50,000 strong, managing some of the world's largest institutions, companies, nonprofits and NGOs.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Asia Studies (East Asia), BA
- Asia Studies (South Asia), BA
- Asia Studies (Southeast Asia), BA
- Biological Sciences, BS
- Biological Sciences (Biology and Society), BS
- Biological Sciences (Genetics, Cell and Developmental Biology), BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

49 credit hours, a foreign language exam, including the required capstone course (TGM 597).

Required Core (3 credit hours)

TAM 582 Communicating and Negotiating in a Dynamic Global World (3) or

TGM 506 Communicating and Negotiating Across Cultures (3)

Concentration (12 credit hours)

Electives (12 credit hours)

Other Requirements (21 credit hours)

foreign language

TGM 515 Navigating Global and Regional Business Environments (3)

TGM 517 Global Accounting and Financial Management (3)

TGM 545 Global Leadership and Strategy (3)

TGM 557 Global Marketing and Data Analytics (3)

TGM 586 Global Entrepreneurship and Sustainable Business (3)

TGM 596 Thunderbird Experiential Practicum (6)

Culminating Experience (1 credit hour)

TGM 597 Thunderbird Personal Leadership Development (1)

Additional Curriculum Information

Electives are approved by the academic unit.

Except for TGM 596 and the foreign language requirement, other requirement courses may be substituted with approval of the academic unit.

Proficiency in a second language is required for graduation from the MGM degree program. Students whose native language is not English who meet the admission requirements for the Master of Global Management program satisfy the language requirement.

Students whose native language is English must satisfy the graduation requirement for language proficiency either through an oral proficiency interview administered by a third-party vendor or by successfully completing six credit hours of 400-level or higher foreign language coursework as part of the program electives

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Thunderbird School of Global Management.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any subject or related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- resume
- essay response to application question
- one professional or academic reference
- interview
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The resume should demonstrate the applicant's professional and academic history.

An interview is required. Final applicants may be asked to complete an additional interview.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Develop the ability to build sustainable and trusting relationships with others from diverse parts of the world.
- Able to analyze global legal issues.
- Develop the ability to inspire others in a global world.

Global Opportunities:

Global Experience: Students in Thunderbird's MGM program have unique opportunities to apply and hone their learning in international settings. Experiential learning exposes students to actual problems faced by leaders of multinational businesses and governmental or nonprofit organizations that operate on an international level.

Working with Thunderbird professors, their fellow students, alumni and corporate partners, students master and apply global management principles and concepts to meet real business challenges through special courses, labs and projects. Thunderbird offers a wide variety of experiential learning engagements, giving students the ability to solve real-world challenges by collaborating with the school's corporate partners around the world. Some options include:

Global Field Seminars

This one- or two-week seminar exposes students to the dynamics and nuances of doing business in a focused region of the world. Teams of students go on company site visits and attend high-level meetings and presentations with business, government and cultural leaders as well as with Thunderbird alumni. Students gain invaluable hands-on experience while expanding their global business skills, enabling them to become major assets to any organization they join after graduating.

Thunderbird Global Challenge Laboratories

This is a client-facing, project-based course built on a six- to seven-week immersion assignment in a key emerging or advanced market. Projects take students to destinations all over the world. They are tailored to the business needs of the client and challenge students to provide sophisticated data and market analysis, strategy recommendations and plans for sustained growth that are both practical and effective. For more information, students should visit Thunderbird's Global Challenge Lab website (<https://thunderbird.asu.edu/degree/students/graduates/global-challenge-lab>).

Career Opportunities: Career examples include:

- compensation and benefits manager
- compliance manager

- human resources manager
- intelligence analyst
- regulatory affairs manager
- urban and regional planner

Global Management (Nonprofit Leadership and Management), MGM (TBGMNLMGM)

Online Degree Search Title: Global Management (Nonprofit Leadership and Management), MGM

Campus: Downtown Phoenix

Program Description: The nonprofit leadership and management concentration within the MGM program provides students with a deep understanding of the nonprofit sector's role in the global economy and with the knowledge and skills to lead and manage transnational nonprofit organizations. Through a collaboration with Watts College of Public Service and Community Solutions (<https://publicservice.asu.edu/>), students take courses in nonprofit leadership and management through Watts College. Students learn to evaluate and articulate the historical and philosophical context of nonprofit organizations in society and the theory and practice of philanthropy while mastering cutting-edge financial management practices.

Because the lines between the functions of nonprofit and for-profit organizations are increasingly blurry, Thunderbird's renowned faculty have designed a cross-sectoral and transdisciplinary curriculum that is tailored for students who aspire to leadership roles in global nonprofit institutions in which they can leverage their business and global management expertise in their work.

Global Management (Public Administration), MGM (TBGMPAMGM)

Online Degree Search Title: Global Management (Public Administration), MGM

Campus: Downtown Phoenix

Program Description: The public administration concentration within the MGM program is designed for future leaders who want public service skills and experience as part of their global management repertoire. It is also intended for students who are seeking roles within public institutions or roles that interact with those institutions, especially on matters where public policy overlaps with business or other global enterprises. The program is designed by Thunderbird's renowned faculty and allows students to take courses in public administration through Watts College of Public Service and Community Solutions (<https://publicservice.asu.edu/>).

Students acquire a broad skill set and solid foundational understanding of public administration, leadership, management and policy analysis in service to the public good. This program prepares students for leadership roles in governmental and nonprofit organizations around the world.

Global Management (Public Policy), MGM (TBGMPPMGM)

Online Degree Search Title: Global Management (Public Policy), MGM

Campus: Downtown Phoenix

Program Description: The public policy concentration within the MGM program is designed for students who wish to work in cross-sector roles within public and nonprofit institutions around the world. Other students may use this program as a springboard into jobs in the private sector that have significant overlap with public agencies. In short, graduates are prepared in both global management and public policy to meet the demands of an increasingly interwoven economy.

Through this concentration, offered in collaboration with the Watts College of Public Service and Community Solutions (<https://publicservice.asu.edu/>), graduates are able to apply analytical techniques and conceptual frameworks to understand policy issues and to identify potential solutions to real-world challenges.

Global Management (Space Leadership, Business and Policy), MGM (TBGMSBPMGM)

Online Degree Search Title: Global Management - Executive (Space Leadership, Business and Policy), MGM
2024-25 Academic Catalog Archive

Campus: Downtown Phoenix

Program Description: Designed and taught by industry-leading faculty and experts, this 12-month executive MGM program in global management with a concentration in space leadership, business and policy is tailored for individuals pursuing leadership and management careers in commercial spaceflight, defense and civil aerospace, AI and big data, and next-generation manufacturing. This credential can open doors across the aerospace and technology sectors.

The cutting-edge curriculum prioritizes industry immersion and focuses on modern practices, principles and case studies for corporate, startup, nonprofit and governmental organizations operating in space. To build cross-disciplinary skills, students can take science and technology courses featuring renowned practitioners and scholars from ASU's School of Earth and Space Exploration.

Substantial opportunities are available for hands-on learning and networking with leaders at NASA, in private industry and with global nonprofits, including a workshop and networking session at Kennedy Space Center and facility visits to NASA, Space Force and commercial space companies.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

Liberal Studies, BA

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

31 credits including the required capstone course (TGM 597).

Required Core (3 credit hours)

TAM 582 Communicating and Negotiating in a Dynamic Global World (3) or

TGM 506 Communicating and Negotiating Across Cultures (3)

Concentration (18 credit hours)

TGM 517 Global Accounting and Financial Management (3)

Global Management (Sustainability Solutions), MGM (TBGMSSMGM)

Online Degree Search Title: Global Management (Sustainability Solutions), MGM

Campus: Downtown Phoenix

Program Description: Solutions for the planet and industry

The Thunderbird MGM program with a concentration in sustainability solutions prepares students for the professions of the future. In this concentration, students earn a degree that benefits their career and the planet. There is an accelerating demand for leaders with a global mindset who possess expertise in sustainability, understand how to apply its principles and technology in approaching problems, and know how to work with and draw from different disciplines to develop practical solutions to the world's most urgent sustainability challenges.

The World Economic Forum reports that empathy and collaboration are two critical abilities for global manager success. These are equally critical for those seeking careers in sustainability solutions. These abilities rely on the development of social capital. This program is designed to develop a student's social capital through field-based action learning, team-based projects and stretch assignments. Students gain the ability to build sustainable trusting relationships --- the basis of social capital --- with others from diverse parts of the world by learning techniques and methods of developing intercultural empathy, how to have interpersonal impact, and ways to act with diplomacy when influencing others.

This concentration is offered in collaboration with ASU's School of Sustainability.

Thunderbird School of Global Management has produced unique leaders for over 75 years --- leaders in every sector capable of tackling the world's greatest challenges. The alumni network comprises 45,000 graduates and 170 chapters around the globe.

TGM 586 Global Entrepreneurship and Sustainable Business (3)

TGM 596 Thunderbird Experiential Practicum (6)

Culminating Experience (1 credit hour)

TGM 597 Thunderbird Personal Leadership Development (1)

Additional Curriculum Information

For concentration coursework, SOS 508 and 509 are required. The remaining six credit hours required for the student's concentration are to be selected from the approved course list, available from the academic unit.

Electives are approved by the academic unit.

Except for TGM 596 and the foreign language requirement, other requirement courses may be substituted with approval of the academic unit.

Proficiency in a second language is required for graduation from the MGM degree program. Students whose native language is not English who meet the admission requirements for the Master of Global Management program satisfy the language requirement.

Students whose native language is English must satisfy the graduation requirement for language proficiency by waiving this requirement through an oral proficiency interview administered by a third-party vendor or by successfully completing six credit hours of 400-level or higher foreign language coursework as part of the program electives.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Thunderbird School of Global Management.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any subject or related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- resume
- essay response to application question
- one professional or academic reference
- interview
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The resume should demonstrate the applicant's professional and academic history.

An interview is required. Final applicants may be asked to complete an additional interview.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following

program outcomes:

- Develop the ability to build sustainable and trusting relationships with others from diverse parts of the world.
- Develop the ability to effectively analyze a sustainability problem in an organization or community.
- Develop the ability to inspire others in a global world.

Global Opportunities:

Global Experience: Students in Thunderbird's Master of Global Management program have unique opportunities to apply and hone their learning in international settings. Experiential learning exposes students to actual problems faced by leaders of multinational businesses and governmental or nonprofit organizations that operate on an international level. Working with Thunderbird professors, their fellow students, alumni and corporate partners, students master and apply global management principles and concepts to meet real business challenges through special courses, labs and projects. Thunderbird offers a wide variety of experiential learning engagements, giving students the ability to solve real-world challenges by collaborating with the school's corporate partners around the world. Some options include:

Global Field Seminars

This one- or two-week seminar exposes students to the dynamics and nuances of doing business in a focused region of the world. Teams of students go on company site visits and attend high-level meetings and presentations with business, government and cultural leaders as well as with Thunderbird alumni. Students gain invaluable hands-on experience while expanding their global business skills, enabling them to become major assets to any organization they join after graduating.

Thunderbird Global Challenge Laboratories

This is a client-facing, project-based course built on a six- to seven-week immersion assignment in a key emerging or advanced market. Projects take students to destinations all over the world. They are tailored to the business needs of the client and challenge students to provide sophisticated data and market analysis, strategy recommendations, and plans for sustained growth that are both practical and effective. For more information, students should visit the Thunderbird Global Challenge Lab website (<https://thunderbird.asu.edu/degree/students/graduates/global-challenge-lab>).

Career Opportunities: Doing well by doing good with a specialized master's degree

Research conducted by McKinsey in 2021 indicates that one of the top five priorities for CEOs in the next normal is to center strategy on sustainability. In a 2021 survey, McKinsey found that 40% of respondents expect their companies to generate value from sustainability, and 57% indicated that sustainability is part of their corporate culture.

Governments are also increasingly recognizing the importance of sustainability. This has led the United Nations to outline sustainable development goals for 2030, an effort that many multinational corporations, nonprofit organizations and state entities have pledged to join.

As sustainability gains more traction, knowledge and management expertise in this area will become increasingly attractive to employers. Graduates of the sustainability solutions concentration are prepared for these new organizational norms and to capitalize on the need for expert leadership in this rapidly growing profession.

Career examples include:

- business continuity planner
- environmental economist
- environmental restoration planner
- quality control systems manager
- sustainability specialist
- urban and regional planner
- water resource specialist

Global Management (Sustainable Tourism), MGM (TBGMSTMG)

Online Degree Search Title: Global Management (Sustainable Tourism), MGM

Campus: Downtown Phoenix

Program Description: Solutions for the planet and the tourism industry

Thunderbird's MGM program with a concentration in sustainable tourism prepares students for management and executive-level positions in the tourism industry globally. Offered in collaboration with ASU's Watts College of Public Service and Community Solutions (<https://publicservice.asu.edu/>), Thunderbird's sustainable tourism concentration addresses the unique character of the sustainability revolution. The

program prepares graduates to transform the sustainability practices of global enterprises in tourism development and management.

The concentration in sustainable tourism opens up a world of opportunities, allowing students to take courses in sustainable tourism from ASU's Watts College of Public Service and Community Solutions, located in the heart of the state capital's thriving business district.

Students specialize in sustainable tourism management, mastering the principles and practices of successful sustainable development in the tourism field. Together, a diverse cohort learns to integrate economic, social and environmental aspects of sustainability as it relates to tourism; conduct sustainability audits for destinations and businesses; evaluate community impacts of tourism; innovate and evaluate sustainable tourism practices; and perform business planning and management. Students receive specialized, hands-on training in international business, cross-cultural relations, global political economy and regional business environments.

Thunderbird School of Global Management has produced unique leaders for over 75 years --- leaders in every sector capable of tackling the world's greatest challenges. The alumni network comprises 45,000 graduates and 170 chapters around the globe.

- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The resume should demonstrate the applicant's professional and academic history.

An interview is required. Final applicants may be asked to attend an additional interview.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Develop the ability to build sustainable and trusting relationships with others from diverse parts of the world.
- Evaluate the dominant concepts and practices in sustainable tourism.
- Develop the ability to inspire others in a global world.

Global Opportunities:

Global Experience: Students in Thunderbird's Master of Global Management program have unique opportunities to apply and hone their learning in international settings. Experiential learning exposes Thunderbird students to actual problems faced by leaders of multinational businesses and governmental or nonprofit organizations that operate on an international level. Working with Thunderbird professors, their fellow students, alumni and corporate partners, students master and apply global management principles and concepts to meet real business challenges through special courses, labs and projects. Thunderbird offers a wide variety of experiential learning engagements, enabling students to solve real-world challenges by collaborating with the school's corporate partners around the world. Some options include:

Global Field Seminars

This one- or two-week seminar exposes students to the dynamics and nuances of doing business in a focused region of the world. Teams of students go on company site visits and attend high-level meetings and presentations with business, government and cultural leaders, as well as with Thunderbird alumni. Students gain invaluable hands-on experience while expanding their global business skills, enabling them to become major assets to any organization they join after graduating.

Thunderbird Global Challenge Laboratories

This is a client-facing, project-based course built on a six- to seven-week immersion assignment in a key emerging or advanced market. Projects take students to destinations all over the world. They are tailored to the business needs of the client and challenge students to provide sophisticated data and market analysis, strategy recommendations and plans for sustained growth that are both practical and effective. For more information, students should visit the Thunderbird Global Challenge Lab website (<https://thunderbird.asu.edu/degree/students/graduates/global-challenge-lab>).

Career Opportunities: The program is designed for students interested in working in sustainable tourism, hospitality, travel and related fields. Graduates enter their profession ready to oversee initiatives in research, development, implementation, execution and evaluation of sustainable tourism plans for businesses and destinations. They are prepared to enter today's complex and exciting global economy at the top of organizations that operate across borders, and they join a global network of Thunderbird alumni who hold leadership positions in global organizations worldwide.

With their global mindset, future-ready core professional skills, mastery of management principles and multicultural outlook, graduates are prepared to lead enterprises with a global scope. Potential employers include international tour operators as well as cities and venues around the world that attract guests from all over the globe.

Career examples include:

- business continuity planner
- environmental economist
- environmental restoration planner
- quality control system manager
- sustainability specialist
- transportation manager
- urban and regional planner

Global Management, Entrepreneurship and Innovation (Certificate), Certificate (TBTGMGRCT)

Online Degree Search Title: Global Management, Entrepreneurship and Innovation (Graduate Certificate)

Campus: Downtown Phoenix, Online

Program Description: Thunderbird's graduate certificate program in global management, entrepreneurship and innovation provides an in-depth study of global political economy, leadership, strategy, negotiation and cross-cultural communications, giving students the skills they need to succeed in today's increasingly global business environment.

The school's innovative and practical curriculum --- with a strong core of global business management skills, international political economy and cross-cultural training --- is delivered through a transdisciplinary approach.

Thunderbird School of Global Management has produced unique leaders for over 75 years --- leaders in every sector capable of tackling the world's greatest challenges. The alumni network comprises 45,000 graduates and 170 chapters around the globe.

Degree Requirements:

15 credit hours.

Required Core (3 credit hours)

TGM 545 Global Leadership and Strategy (3)

Restricted Electives (12 credit hours)

TGM 506 Communicating and Negotiating Across Cultures (3)

TGM 515 Navigating Global and Regional Business Environments (3)

TGM 517 Global Accounting and Financial Management (3)

TGM 557 Global Marketing and Data Analytics (3)

TGM 586 Global Entrepreneurship and Sustainable Business (3)

Additional Curriculum Information

For restricted electives, students select four courses from the list above. Other courses may be approved by the academic unit.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Thunderbird School of Global Management.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- one letter of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

International students who need an F-1 or J-1 visa need to apply to and be accepted into a graduate degree program prior to being considered for the certificate program. International students residing in the U.S. on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for admission to this certificate program.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/certificates/graduate-global-management-certificate/>) for program descriptions and to request more information.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Develop applied global leadership skills.
- Develop tools and strategies necessary for the creation of new ventures.

- Examine the importance of data visualizations and analysis for decision-making.

Career Opportunities: Graduates who have combined the certificate in global management, entrepreneurship and innovation with their major program of study may become more marketable to employers. Many decide to pursue employment in corporate functions such as marketing, strategy, finance, human resources and supply chain management.

Advanced degrees or certifications may be required for academic or clinical positions.

Leadership and Management, MLM (TBLDMGMLM)

Online Degree Search Title: Leadership and Management, MLM

Campus: ASU at Washington, D.C., Online

Program Description: Professionals expand their management and leadership repertoire while sharpening their business skills in Thunderbird School of Global Management's MLM program, earning a unique graduate degree with classes taught by Thunderbird's world-class professors. The program focuses on mastery of modern practices from a global perspective for managers and executives in transnational organizations, delivering the highest quality graduate education in a flexible format.

This in-depth professional degree program features applicable training in the nuances of managing a global business, government agency or nonprofit organization.

The Master of Leadership and Management program combines cutting-edge management coursework with a truly global curriculum, cross-cultural communication and negotiation training, and personal development and leadership components to prepare graduates to thrive as decision-makers in enterprises that operate across borders.

Empowering graduates with well-rounded, future-ready skill sets, this transformational master's degree provides a strategically choreographed progression through every facet of international management, with courses spanning the gamut of Thunderbird's offerings, from accounting and data-driven decision making to global finance and marketing. Students also receive hands-on, experiential learning opportunities in practical, real-world situations through elective courses that enable them to apply the full range of professional skills acquired during their studies.

The Master of Leadership and Management program allows students to work at their own pace to earn their degree in as few as 12 months. The program is designed specifically for students from around the world and allows them to join the globally connected Thunderbird alumni network (<https://thunderbird.asu.edu/alumni?action>), which opens doors and opportunities all over the planet.

Specializations

Thunderbird's Master of Leadership and Management degree program offers optional specializations. Students can focus their coursework in global and public affairs (delivered in English) and data analytics, financial management or global business (delivered in Mandarin).

Thunderbird School of Global Management has produced unique leaders for more than 70 years --- leaders in every sector capable of tackling the world's greatest challenges. The alumni network comprises 45,000 graduates and 170 chapters around the globe.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Global Management, BGM
- International Trade, BS
- Technological Entrepreneurship and Management, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours including the required capstone course (TAM 541).

Required Core (3 credit hours)

TAM 582 Communicating and Negotiating in a Dynamic Global World (3) or
TGM 506 Communicating and Negotiating Across Cultures (3)

Electives (24 credit hours)

Culminating Experience (3 credit hours)

TAM 541 Strategy in a Competitive World (3)

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Thunderbird School of Global Management.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- professional resume
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Two years of work experience is preferred but not required.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/leadership-management-masters/>) for program descriptions and to request more information.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Develop the ability to inspire, influence and motivate others in a global world.
- Examine the impact of cultural differences on managerial communication and negotiation, and develop the ability to be an effective communicator and negotiator in a cross-cultural setting.
- Develop the ability to analyze, digest and interpret complex global issues concisely.

Global Opportunities:

Global Experience: Students in the Master of Leadership and Management program have the unique opportunity to apply their learning in an international setting. Some options include:

Global Field Seminars --- During this course, students experience an intensive one-week immersion in-country. Students enjoy a hands-on learning experience in a focused region of the world, comprising company site visits and high-level meetings and presentations with business, government and cultural leaders as well as Thunderbird alumni. Through these interactions, students learn the challenges and opportunities that make doing business in the region unique.

Thunderbird Global Challenge Laboratories --- This client-facing, project-based course involves a one-week immersion in-country. Projects are tailored to the business needs of the client and provide sophisticated data and market analysis; strategy recommendations; and practical, effective plans for sustained growth. For more information, students should visit the Global Challenge Lab website (<https://thunderbird.asu.edu/degree/students/graduates/global-challenge-lab>).

The program fee for one Global Field Seminar or Global Challenge Lab experience is included in the tuition and fees for the Master of Leadership and Management degree. Airfare and incidental expenses are extra.

Career Opportunities: More than ever, today's global organizations need versatile leaders and managers with creative problem-solving skills who can elevate diverse teams across cultures in multiple markets around the world. The Master of Leadership and Management program prepares graduates to lead in all sectors: government, private enterprise, NGOs and nonprofits.

Career examples include:

- compensation and benefits manager
- financial analyst
- human resources manager

Leadership and Management (Global Creative Industries), MLM (TBLDMGCMLM)

Online Degree Search Title: Leadership and Management (Global Creative Industries), MLM

Campus: ASU at Los Angeles

Program Description: The MLM program with a concentration in global creative industries is for creatives seeking management training, and managers who lead creative teams. This 11-month graduate degree program delivers leadership and management fundamentals for success across sectors in the global creative industries, as well as a digital global mindset and a holistic approach to the global creative industries.

In this program, students gain the hard and soft skills needed to navigate and thrive in the Fourth Industrial Revolution (e.g., finance, accounting, marketing, data analytics, negotiation, cross-cultural communication and emerging digital technologies) and gain a deeper understanding of the creative process. Students attain a comprehensive set of practices that foster generative and sustainable innovation and implementation geared toward opportunity recognition within tomorrow's increasingly cross-border and trans-industry marketplace. The program prioritizes industry immersion in every class and focuses on the nexus of art and commerce, emphasizing creativity for managers and management for creatives.

Degree Requirements:

30 credit hours including the required capstone course (TAM 541).

Required Core (3 credit hours)

TAM 582 Communicating and Negotiating in a Dynamic Global World (3)

TGM 506 Communicating and Negotiating Across Cultures (3)

Concentration (9 credit hours)

HDA 521 Counting Arts and Culture: Reasoning with Empirical Evidence (3)

HDA 598 Topic: Creativity and Design Thinking (3)

TGM 503 Global Marketing (3)

TGM 549 Global Leadership (3)

TGM 567 Career Development for the Global Creative Industries (3)

TGM 568 Metaverse and the Global Enterprise (3)

Electives (15 credit hours)

Culminating Experience (3 credit hours)

TAM 541 Strategy in a Competitive World (3)

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Thunderbird School of Global Management.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in leadership and management or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admissions application and application fee

- official transcripts
- one letter of recommendation
- professional resume
- written statement
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

An applicant interview is also required.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Develop the ability to inspire others in the global creative industries.
- Develop the ability to analyze complex global issues concisely.
- Apply design thinking to identify challenges to and opportunities for success in the creative industries.

Career Opportunities: Graduates are well qualified for global leadership and management careers in film, television and new media; music; augmented reality, virtual reality and extended reality; gaming; design; the arts; location-based entertainment; e-sports; advertising; branding; and Metaverse tech such as gaming, blockchain, crypto and NFTs.

Career opportunities include professional titles such as:

- business development executive
- creative industries entrepreneur
- executive producer
- general manager
- graphic design manager
- marketing manager
- media relations manager
- product development executive
- production manager
- talent acquisition manager

Health Solutions, College of

Audiology, AuD (LAAUDAUD)

Online Degree Search Title: Audiology, AuD

Campus: Tempe

ASU is not currently accepting applications for this program.

Program Description: The three-year course of study for the AuD degree consists of basic science coursework, professional knowledge coursework and clinical practicum experiences. Full-time commitment is critical because graduate courses are offered once per academic year. In addition, course content and the sequence of courses are closely tied to clinical practicum assignments. Moreover, full-time enrollment ensures timely completion of the program.

Students have the option of graduating after the completion of the three-year program of study or enrolling in a clinical externship during their fourth year for up to an additional three credit hours of clinical training. A minimum of 850 hours of clinical training is required for graduation and is obtained during the first three years of training. Additional practicum hours toward the 1,820 hours required for the Certificate of Clinical Competence in Audiology, also known as CCC-A, by the American Speech-Language-Hearing Association can be met during completion of the fourth year externship under the supervision of an ASHA-certified audiologist. The remaining clinical clock hours for ASHA certification can also be met after graduation. However, students should be aware of state licensure requirements when making the determination of whether or not to

complete an externship. Initial licensure in some states may require the completion of the externship.

Degree Requirements:

88 credit hours, a written and oral comprehensive exam.

Required Core (58 credit hours)

SHS 502 Basic Audiometry (4)

SHS 504 Amplification I (4)

SHS 505 Sign Language for Audiologists and Speech Pathologists (2)

SHS 508 Pediatric Audiology (3)

SHS 510 Amplification II (3)

SHS 511 Auditory Perception by the Hearing Impaired (3)

SHS 513 Auditory Neuroscience (3)

SHS 516 Auditory Evoked Potentials (4)

SHS 517 Balance Assessment (4)

SHS 518 Rehabilitative Audiology (3)

SHS 520 Auditory Pathologies/Disorders and Otoneurologic Applications (4)

SHS 522 Tinnitus/Advanced Audiometry (3)

SHS 523 Central Auditory Processing Disorders (4)

SHS 524 Counseling in Communication Disorders (2)

SHS 525 Audiology Practice Management (3)

SHS 526 Launch to Clinical Methods in Audiology (1)

SHS 552 Physiological Measures of Auditory Function (4)

SHS 555 Cochlear Implants (4)

Other Requirements (27-30 credit hours)

SHS 500 Research Methods (3)

SHS 580 Clinical Practicum (8)

SHS 584 Clinical Internship (12)

SHS 589 Audiology Grand Rounds (4)

SHS 590 Reading and Conference (Audiology Clerkship) (0-3)

American Speech-Language-Hearing Association Praxis national certification examination in audiology (0)

Electives and Research (3 credit hours)

Culminating Experience

written and oral comprehensive exam

Additional Curriculum Information

Students have the option to continue enrollment in SHS 590 at one credit per semester for up to three semesters for the additional training experience and to complete the externship requirements of the ASHA certification if desired. These extra hours of clinical experience allow students to apply for ASHA certification upon graduation or for state licensure for certain states. Students should maintain continuous enrollment and not apply for graduation until they have completed the additional clinical hours for the certification.

Because certification and licensure requirements vary by profession and from state to state, the College of Health Solutions recommends that students visit the ASU licensure website (<https://admission.asu.edu/academics/licensure>) to determine if their program meets the requirements of individual state licensures or national certifications, as applicable. The decision to complete an externship or not is an individual decision based on career objectives and desired state of licensure among other factors.

In addition to the Graduate College requirements, eligibility for graduation is based on the following:

Formative Exam (Year 1)

Students must pass a formative exam given at the end of the first academic year of the program. This is a 100-question multiple-choice test covering the content of the courses taken during the fall and spring semesters. Students who receive scores of less than 70% are given one opportunity to retake the exam.

Summative Exam (Year 3)

Students must pass a summative exam in the fall of the third academic year of the program. This is a comprehensive written and oral exam pertaining to clinical case diagnosis and management. One retake is allowed if the student does not pass on the initial attempt.

National Certification Exam (Praxis)

All students pursuing the Doctor of Audiology degree must pass the praxis examination in audiology as a graduation requirement. There are no credit hours tied to it. For the graduation approval to be processed, the praxis exam result must be sent directly from the Education Testing Service to the ASU audiology program office.

Clinical Clock Hours

Students must successfully complete 850 hours of supervised clinical clock hours as accrued between on-campus clinic, off-campus internship sites and possible simulation opportunities.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's degree in speech and hearing science or another related discipline from a regionally accredited institution. Applicants with degrees in related fields, such as nursing, education and any of the biological sciences, may apply, although they may be admitted as leveling students and must complete at least one year of prerequisite courses in speech and hearing science at the undergraduate level.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Upon receipt of the application, a timed writing statement will be administered as part of the first stage of the admissions process. Applicants meeting the first-stage admissions criteria will be notified and invited to provide additional information to complete the second stage of the admissions process. All other applicants will be denied admission. Invited applicants who wish to continue the application process must provide a 7- to 10-minute video introducing themselves and answering several questions from the admission committee. The same questions are given to all applicants, along with instructions about format and submission. Applicants who do not submit a video and writing sample are denied admission. The committee may ask to schedule an interview to ascertain additional information from applicants after reviewing the recorded video and will make final decisions regarding admission. Space is available for a total of 15 students. Invitations will be sent by the beginning of February, with a deadline for video submission in mid-February.

The personal statement should not exceed 300 words and should describe the reasons for pursuing graduate study in audiology; successful applicants submit statements that are free of grammatical errors and demonstrate proficiency in written communication.

Letters of recommendation should outline the applicant's potential success for graduate-level coursework. Letters from faculty members are most useful. A standard form is not used; letters should be submitted on letterhead from the recommender's institution.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Students graduating from the AuD program will be able to understand and apply the foundations of clinical practice that provide the building blocks for professional, evidence-based practice of audiology.
- Students graduating from the AuD program will be able to analyze and evaluate clinical information by graduation.
- Students graduating from the AuD program will meet eligibility criteria for certification or licensure in audiology.

Career Opportunities: A career as an audiologist offers fulfilling work with an exceptional work-life balance. Graduates who complete the Doctor of Audiology degree find rewarding careers in hospitals, physician's offices, audiology clinics, school districts and industry. Careers associated with a doctoral degree in audiology and areas of specialization include:

- audiologist
- cochlear implant audiologist
- cochlear implant manufacturer representative
- educational audiologist
- hearing aid manufacturer representative
- intraoperative monitoring
- manufacturer representative
- pediatric audiologist
- research audiologist
- vestibular audiologist

Professional Licensure: ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another

state. For more information, students should visit the ASU professional licensure (<https://admission.asu.edu/academics/licensure>) webpage.

Auditory and Language Neuroscience, MS (NHALNEUMS)

Online Degree Search Title: Auditory and Language Neuroscience, MS

Campus: Tempe

Program Description: The MS program in auditory and language neuroscience trains scholars in basic and applied research to prepare them for doctoral-level graduate studies and for positions in science, health care and industry.

In addition to innovative coursework in neuroscience, this program includes hands-on training in instrumentation such as neuroimaging, neurophysiology and clinical research applications. Students develop a strong foundation that enables them to conduct impactful neuroscience research related to auditory and language processing and human communication.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

Speech and Hearing Science, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

31 credit hours including a thesis, or 31 credit hours including the required applied project course (SHS 593).

Required Core (6 credit hours)

EXW 501 Research Statistics (3), PSY 530 Intermed Statistics (4) or STP 530 Applied Regression Analysis (3)

SHS 542 Applied Research Methods in Auditory and Language Neuroscience (3)

Restricted Electives (12 credit hours)

Research (6 credit hours)

SHS 592 Research (6)

Other Requirement (1 credit hour)

SHS 590 Topic: Research Integrity and Conduct in ALN (1)

Culminating Experience (6 credit hours)

SHS 593 Applied Project (6) or

SHS 599 Thesis (6)

Additional Curriculum Information

Students should contact the academic unit for a list of approved elective courses.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited college or university.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or they must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- three references (academic or professional)
- letter of intent
- resume or curriculum vitae
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

In the letter of intent, applicants should indicate potential research mentors with whom they are interested in working, previous experiences that have prepared them for success in the program, and career plans.

Contact information for three references is required. References will be contacted via email to submit a letter of recommendation and respond to a series of questions about the applicant. References should be instructors, research mentors or clinical supervisors who can speak to the applicant's aptitude for research and master's-level coursework.

Applicants are encouraged to submit an optional writing sample, such as an honors thesis, conference abstracts, articles or chapters.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Demonstrate the ability to critically analyze and synthesize knowledge from the neuroscience research literature related to language and hearing
- Demonstrate competence in experimental design, data collection, data analysis and interpretation of neuroscience research related to language and hearing
- Demonstrate the ability to identify and describe principles and concepts related to the responsible conduct of research

Career Opportunities: The experience that graduates have acquired through clinical and medical applications and the skills they have gained in lab rotations give them increased marketability and enable them to be competitive for jobs in technology or for further doctoral-level training.

Employment opportunities for graduates include working in team settings in clinical research centers and hospitals; with manufacturers of hearing aids, cochlear implants and EEG systems or augmentative and alternative communication applications; and with software development companies working with speech recognition programs and brain-computer interfaces.

Career examples include:

- data analyst
- educator
- laboratory technician or manager
- product developer
- public relations specialist or spokesperson for a research institute or device manufacturer
- research scientist
- speech analyst for a tech company

Behavioral Health (Clinical), DBH (NHBVHCDBH)

Online Degree Search Title: Behavioral Health (Clinical), DBH

Campus: Online

Program Description: The DBH program with a clinical concentration is a global, interdisciplinary degree program that offers an innovative curriculum, direct patient care internship experience in an integrated primary care placement, and an applied research project for domestic and international students.

The clinical concentration is designed for individuals who have completed prior clinical training and have supervised clinical experience. Students in

this concentration operate within the scope of clinical practice dictated by their existing state-issued license.

The curriculum addresses the:

- barriers to patient access
- problem of poor health outcomes
- rising health care costs

The student learning experience includes easy access to online articles, videos and websites; weekly live webinars led by faculty experienced in the field; live peer student interactions; and written assignments that parallel the writing used for clinical and business proposals.

In the culminating project, students address a primary care clinic's clinical, operational or financial challenge using the quality improvement model to solve key problems. The internship program is hands-on in a local primary care clinic with in-person consultation by a licensed faculty member in a weekly small group webinar format. Students also have a site preceptor with whom they collaborate in support of the patient-centered medical home and accountable care organization approaches to primary care.

Graduates of the clinical concentration are positioned to achieve the Quadruple Aim in health care:

- cost savings
- improved health care team experience
- improved patient experience of care
- population health management

This program of study does not provide a pathway to licensure.

Degree Requirements:

60 credit hours including the required applied project course (IBC 793).

Required Core (15 credit hours)

HCD 501 Population Health Data Management and Analysis (3)

IBC 586 Behavioral Health Professional Writing Style (3)

IBC 611 Population-Based Behavioral Health Management (3)

IBC 614 Quality and Performance Measurement, Improvement and Incentives in Health Care (3)

IBC 720 Behavioral Health Entrepreneurship (3)

Concentration (12 credit hours)

IBC 601 Models of Integrated Primary Care (3)

IBC 603 Brief Interventions in Primary Care (3)

IBC 604 Clinical Medicine/Pathophysiology (3)

IBC 608 Psychopharmacology for the Behavioral Care Provider (3)

Electives or Research (21 credit hours)

Other Requirement (6 credit hours)

IBC 684 Internship (6)

Culminating Experience (6 credit hours)

IBC 793 Applied Project (6)

Additional Curriculum Information

Students who enter the doctoral program with a master's degree in a related discipline may count up to 15 credit hours from the master's degree toward the total credit hours, with program approval.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- copy of the applicant's license or license eligibility
- one reference (professional)

- resume or curriculum vitae
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Applicants with master's degrees in counseling, family therapy, nursing, PA/NP, occupational health and social work, among others, are encouraged to apply. Students in the clinical concentration are required to hold a license or license eligibility to practice in a clinical field. The most competitive candidates are master's degree-level professionals who are either currently employed or have direct patient care experience in a clinical capacity in an integrated health care organization.

Licensed and license-eligible are terms defining a license to practice that is issued by a state licensing board (e.g., Arizona Board of Behavioral Health Examiners, Arizona Board of Occupational Therapy Examiners). Examples include license-eligible master's degree-level behavioral clinician, licensed master's degree-level behavioral clinician, and master's degree-level licensed medical or ancillary health care provider (nurse, dietitian, occupational therapist).

The program application includes acknowledgments of program policies, professional license disclosure and a series of essay questions (responses must be no longer than 500 words).

Contact information of at least one reference is required. The reference will be contacted via email to respond to a series of questions about the applicant. Examples of appropriate references include a supervisor who can assess either the applicant's clinical or professional performance or other professional persons (not relatives) such as a licensed behavioral health clinician, medical or other health care provider, or faculty member from the applicant's master's degree program who is well-acquainted with the applicant's professional practice or academic achievement.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/doctor-behavioral-health-clinical/>) for program descriptions and to request more information.

Career Opportunities: Graduates of the clinical concentration program have the skills to move into clinical leadership and management positions across health care settings. They are well prepared to develop and manage programs related to integrated behavioral health care.

Potential job titles include:

- behavioral health provider, consultant or specialist in primary care and other medical settings
- CEO of integrated care
- clinical team manager
- director of clinical services or operations
- health and wellness manager
- integrated care clinical provider
- integrated care manager or consultant
- integrated health care manager or specialist
- wellness program administrator

Behavioral Health (Management), DBH (NHBVHMDBH)

Online Degree Search Title: Behavioral Health (Management), DBH

Campus: Online

Program Description: The DBH with a concentration in management is a global, interdisciplinary degree program that offers an innovative curriculum, a hands-on internship placement in health care settings, and an applied research project for domestic and international students.

Integrated health care is the team-based, coordinated approach to the treatment of medical and behavioral health issues, lifestyle issues and behaviors that affect health, all in one setting. The management concentration enables students to tailor innovative management practices to their local health system geography, culture and policy.

The curriculum focuses on:

- accountable care organization models
- business entrepreneurship
- health technologies such as electronic health records, mobile health applications and wearable health monitoring devices
- integrated behavioral health program design
- integrated health management in primary care, especially in the patient-centered medical home
- quality and performance measurement

Graduates of the management concentration are positioned to achieve the Quadruple Aim in health care:

- cost savings
- improved health care team experience
- improved patient experience of care
- population health management

Students learn to apply entrepreneurial concepts and skills to promote integrated health programs with key stakeholders, such as medical directors and chief executive officers.

This program of study does not provide a pathway to licensure.

Degree Requirements:

60 credit hours including the required applied project course (IBC 793).

Required Core (15 credit hours)

HCD 501 Population Health Data Management and Analysis (3)

IBC 586 Behavioral Health Professional Writing Style (3)

IBC 611 Population-Based Health Management (3)

IBC 614 Quality and Performance Measurement, Improvement and Incentives in Health Care (3)

IBC 720 Behavioral Health Entrepreneurship (3)

Concentration (15 credit hours)

HCD 602 Health Informatics for Health Care Professionals (3)

IBC 601 Models of Integrated Primary Care (3)

IBC 626 Behavioral Health Management (3)

IBC 630 Financial Management of Health Care (3)

IBC 660 Healthcare Legal, Ethical, and Professional Issues (3)

Electives or Research (21 credit hours)

Other Requirement (3 credit hours)

IBC 684 Internship (3)

Culminating Experience (6 credit hours)

IBC 793 Applied Project (6)

Additional Curriculum Information

Students who enter the doctoral program with a master's degree in a related discipline may count up to 15 credits from that degree toward the total credit hours, with program approval.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (on a 4.00 scale) in the applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- one reference (professional)
- resume or curriculum vitae
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Applicants with a master's degree in business administration, public health, nursing, counseling, behavioral health, health care administration or social work, among others, are encouraged to apply. Applicants must be master's degree-level professionals who are currently employed in, or aspire to be employed in, a clinical capacity within integrated health care.

The program application includes acknowledgments of program policies and a series of essay questions (responses restricted to 500 words or less).

Contact information of at least one reference is required. The reference will be contacted via email to respond to a series of questions about the applicant. Examples of appropriate references include a supervisor who can assess the applicant's clinical or professional performance, or other professional person (not relatives) such as a licensed behavioral health clinician, medical or other health care provider, or faculty from the applicant's master's degree program who is well acquainted with their professional practice or academic achievement.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/doctor-behavioral-health-management/>) for program descriptions and to request more information.

Career Opportunities: Graduates of the management concentration have the organizational understanding and management skills required to move into leadership and management positions across health care settings. They are well prepared to develop and manage programs related to integrated behavioral health care. Graduates often choose careers in integrated care practice management; leadership positions in integrated care delivery systems, health plans and managed care organizations; and positions as integrated care industry consultants.

Potential job titles include:

- behavioral health staff coordinator
- CEO or director of an integrated care practice or organization
- director of physician relations
- health and wellness manager
- integrated care manager
- member services manager
- operational care manager or team leader
- practice manager and facilitator
- quality improvement manager
- wellness program administrator

Biomedical Diagnostics, MS (NHBMDMS)

Online Degree Search Title: Biomedical Diagnostics, MS

Campus: Online

Program Description: Students studying biomedical diagnostics gain insights into a growing industry that is at the center of health care innovation and personalized medicine. The MS program in biomedical diagnostics can be completed in one year, if enrolled full time.

The biomedical diagnostics program has been designed by expert faculty with significant experience in the business, legal and technical aspects of diagnostics.

Students in this program will progress through the four foundational areas:

- application of diagnostics
- business of diagnostics
- science of diagnostics
- technology of diagnostics

Students complete a culminating experience in which they work with fellow students on a team-based project with diagnostics leaders in the industry on a topic driven by real needs in the field.

Degree Requirements:

31 credit hours including the required applied project course (BMD 593).

Required Core (19 credit hours)

BMD 502 Foundations of Biomedical Informatics Methods I (3)

BMD 510 Current Perspectives in Biomedical Diagnostics (3)

BMD 513 Principles of Diagnostic Technology: Immunoassays (4)

BMD 514 Principles of Diagnostic Technology: Molecular Diagnostics (3)

BMD 667 Regulation of Medical Diagnostics (3)

HCD 511 Health Economics and Policy (3)

Electives (6 credit hours)

Research (3 credit hours)

BMD 592 Research (3)

Culminating Experience (3 credit hours)

BMD 593 Applied Project (3)

Additional Curricular Information

Students should see the academic unit for a list of approved elective courses. BMD 592 and BMD 593 are contiguous courses and cannot be taken in different academic years.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited college or university in one of the following fields, or a closely related field: biomedical informatics, biology, life sciences, chemistry, biochemistry, engineering, biomedical engineering, business, computer science, supply chain management, health sciences or medical studies.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- two references (academic or professional)
- resume or curriculum vitae
- statement of purpose
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The one- to two-page statement of purpose should include the applicant's interest in the program, what they expect to learn from the program, their professional goals, and a short description of their background in the sciences.

Contact information for two references is required. References will be contacted via email to submit a letter of recommendation and respond to a series of questions about the applicant.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/master-science-biomedical-diagnostics/>) for program descriptions and to request more information.

Career Opportunities: Professional opportunities are quite broad and depend on the student's educational and work backgrounds as well as their personal interests. Graduates can pursue diverse options such as executive leadership, competitive intelligence, research and development, laboratory management or entrance to professional school. The following career examples are just a small portion of the possibilities:

Analysts

- clinical research
- competitive intelligence
- quality assurance
- research lab

Department and organizational leadership

- diagnostics
- laboratory
- regulatory compliance
- research and development

Managers

- accounts
- clinical research
- marketing and sales
- medical and health services
- product
- quality control
- research lab
- program and project management

Laboratorians and technologists

- clinical lab
- research lab

Biomedical Informatics, PHD (ESBMIPHD)

Online Degree Search Title: Biomedical Informatics, PhD

Campus: Tempe

Program Description: The PhD program in biomedical informatics enables students to develop expertise in areas such as bioinformatics, clinical informatics, population health management and imaging science.

The biomedical informatics program fosters collaborations among academic researchers, health care providers and industry partners to apply new developments in informatics theory to clinical practice, biomedical research and public health. Students may also explore cross-cutting areas such as data science and artificial intelligence.

Students learn at the leading edge of the field through specialized coursework in an area of focus and independent research. The program fosters strong collaborative relationships with a variety of healthcare organizations, the bioscience industry and governmental agencies, providing an unparalleled opportunity for doctoral students to explore and contribute to advances in informatics.

Students should note that some courses and faculty offices are located at the Health Futures Center (<https://gis.m.asu.edu/asucampus/?marker=-111.95140300401944%2C33.65711400174794%2C%2C%2C&markertemplate=%7B%22title%22%3A%22HEALTH%20FUTURES%20CENTER%22%2C%22longitude%22%3A-111.95140300401944%2C%22latitude%22%3A33.65711400174794%2C%22isIncludeShareUrl%22%3Atrue%7D&level=10>) building in North Phoenix.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Core (22 credit hours)

BMI 502 Foundations of Biomedical Informatics Methods I (3)

BMI 504 Introduction to Clinical Environments (3)

BMI 505 Foundations of Biomedical Informatics Methods II (3)

BMI 515 Applied Biostatistics in Medicine and Informatics (3)

BMI 540 Problem Solving in Biomedical Informatics (3)

BMI 560 Teaching in Biomedical Informatics (2)

BMI 570 BMI Symposium (2)

BMI 601 Fundamentals of Health Informatics (3)

Electives (32 credit hours)

Research (18 credit hours)

BMI 792 Research (18)

Culminating Experience (12 credit hours)

BMI 799 Dissertation (12)

Additional Curriculum Information

Students entering the doctoral program with a master's degree in a related discipline may count up to 30 credit hours from the master's degree toward the total credit hours, with program approval.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of purpose
- educational background essay
- resume or curriculum vitae
- three references (academic or professional)
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Prior bachelor's or master's degrees in biology, computer science, engineering or statistics, or postbaccalaureate training as a health professional in medicine, nursing or pharmacy is preferred. Applicants who have earned degrees in other unrelated fields with appropriate academic backgrounds are also considered.

All applicants must have basic competencies in general biology (BIO 181 or equivalent), statistics (HCD 300 or STP 226 or equivalent) and computer programming (BMI 110 or CSE 110 or equivalent).

The statement of purpose should be one to two pages and indicate the applicant's interest in the program, knowledge of the field and career plans. Applicants are encouraged to connect with program faculty who could be potential research mentors and include this information in their statement if it is available at the time of application.

To accommodate students' diverse backgrounds, the applicant is asked to describe their educational and professional background in the following areas: computer science, decision sciences, artificial intelligence, statistics and mathematics, biological sciences and health sciences. This essay should be no longer than one page.

Contact information of three references is required. References will be contacted via email to submit a letter of recommendation and respond to a series of questions about the applicant.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Generate designs to solve biomedical informatics problems.
- Apply theories, typology, frameworks, representations, methods, and processes used in different contexts of biomedical informatics
- Create new knowledge, including theories, typologies, frameworks, representations, methods, and processes, to address biomedical informatics problems

Career Opportunities: Professionals with advanced training in biomedical informatics are in high demand across a variety of sectors and
2024-25 Academic Catalog Archive 1041

industries, including academic institutions, not-for-profit research institutes, and governmental and public health agencies and health care organizations, as well as the information technology, biotech and pharmaceutical industries.

Career examples include:

- bioinformatics scientist
- biostatistician
- data scientist
- deep learning engineer
- public health informatics scientist
- research scientist
- senior analyst
- software engineer
- university faculty

Biomedical Informatics and Data Science, MS (ESBIOINFMS)

Online Degree Search Title: Biomedical Informatics and Data Science, MS

Campus: Tempe

This program's name has changed effective Fall 2024. The previous name was Biomedical Informatics.

Program Description: The MS program in biomedical informatics and data science offers students the opportunity to become professionals who use biomedical data, information and knowledge to improve human health.

Students in this program learn problem-solving, theory and the methodologies underlying the field of biomedical informatics, taking courses in areas such as knowledge representation, clinical environments, imaging, bioinformatics and data science. Core courses provide a background in clinical informatics, while electives allow specialization in areas such as data science or mobile health.

Biomedical informatics fosters collaborations among academic researchers, clinical practitioners and regional health care providers to apply new developments in informatics theory to clinical practice. Students gain the informatics knowledge and skills that enable them to:

- detect disease early
- improve the patient hospital experience
- improve the precision of diagnosis
- improve the quality of patient health care and reduce its cost
- minimize hospital visits

Biomedical informatics has a key role to play in the transition to more effective and efficient health care through the use of knowledge and information technology.

Students should note that some courses and faculty offices are located at the Health Futures Center ([https://gis.m.asu.edu/asucampus/?marker=-111.95140300401944%2C33.65711400174794%2C%2C%2C&markertemplate=%7B%22title%22%3A%22HEALTH%20FUTURES%20CENTER%22%2C%22longitude%22%3A-](https://gis.m.asu.edu/asucampus/?marker=-111.95140300401944%2C33.65711400174794%2C%2C%2C&markertemplate=%7B%22title%22%3A%22HEALTH%20FUTURES%20CENTER%22%2C%22longitude%22%3A-111.95140300401944%2C%22latitude%22%3A33.65711400174794%2C%22isIncludeShareUrl%22%3Atrue%7D&level=10)

[111.95140300401944%2C%22latitude%22%3A33.65711400174794%2C%22isIncludeShareUrl%22%3Atrue%7D&level=10](https://gis.m.asu.edu/asucampus/?marker=-111.95140300401944%2C33.65711400174794%2C%22isIncludeShareUrl%22%3Atrue%7D&level=10)) building in North Phoenix.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

Biomedical Informatics, BS

the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

32 credit hours including the required applied project course (BMI 593).

Required Core (17 credit hours)

BMI 502 Foundations of Biomedical Informatics Methods I (3)

BMI 505 Foundations of Biomedical Informatics Methods II (3)

BMI 515 Applied Biostatistics in Medicine and Informatics (3)

BMI 540 Problem Solving in Biomedical Informatics (3)

BMI 570 BMI Symposium (2)

BMI 601 Fundamentals of Health Informatics (3)

Other Requirements (3 credit hours)

BMI 404 Clinical Environments (3) or

BMI 504 Introduction to Clinical Environments (3)

Electives (9 credit hours)

Culminating Experience (3 credit hours)

BMI 593 Applied Project (3)

Additional Curriculum Information

BMI 570 is a one credit hour course. Students take BMI 570 twice for a total of two credit hours.

Students should contact the academic unit for a list of approved elective courses. Electives must include at least six credit hours of BMI coursework.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in biology, computer science, engineering, nursing or statistics from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of purpose
- resume or curriculum vitae
- three references (academic or professional)
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Applicants who have earned degrees in other unrelated fields with appropriate academic backgrounds or postbaccalaureate training also will be considered.

All applicants must have basic competencies in general biology (BIO 181 or equivalent), statistics (HCD 300 or STP 226 or equivalent) and computer programming (BMI 110 or CSE 110 or equivalent).

A one- to two-page statement of purpose is required. Students must explain why they are interested in the program, outline their background, describe expected outcomes from the program, identify potential faculty advisors and areas of research, and elaborate on how the degree will support their goals. To accommodate applicants' diverse backgrounds, the statement must include at least one paragraph that describes the applicant's educational and professional background in the following three areas: computer science; statistics and mathematics; and biological sciences and health sciences.

Contact information for three references is required. References will be contacted via email to submit a letter of recommendation and respond to a series of questions about the applicant.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Graduates will be able to synthesize the history and values of biomedical informatics and its relationship to other fields while demonstrating an ability to read, interpret and critique the core literature and be prepared to be successful in the biomedical informatics workforce.
- Graduates of this program will be able to apply and evaluate approaches in the context of biomedical problems, including imaging and signal analysis; information documentation, storage and retrieval; machine learning and data mining; networking, security and databases; natural language processing and semantic technologies; representation of logical and probabilistic knowledge and reasoning; simulation and modeling; and software engineering.
- Graduates of this program will be able to apply knowledge in design, evaluation, behavioral and organizational sciences, ethical and legal issues, and economic and social context of biomedical research, pharmaceutical and biotechnology industries, medical instrumentation, health care and public health.

Career Opportunities: Professionals with advanced training in biomedical informatics and data science are in high demand across a variety of sectors and industries, including academic institutions, not-for-profit research institutes, government and public health agencies, and health care organizations, as well as information technology, biotech and pharmaceutical industries. Graduates can also pursue admission to medical school.

Career examples include:

- account manager
- analyst
- data scientist
- product manager
- research scientist

Biostatistics, MS (NHBSTMS)

Online Degree Search Title: Biostatistics, MS

Campus: Downtown Phoenix

Program Description: The MS program in biostatistics provides training in applied biostatistical methodology and its applications to solve practical problems in health-related sciences. Expertise is necessary to design, implement, evaluate and disseminate research and translate information into improved health outcomes for individuals, systems and populations. Students in this program learn fundamental biostatistics skills that provide the knowledge necessary for effective collaboration with health researchers. Students learn how to design randomized, controlled clinical trials and intervention studies to guarantee data quality and make valid causal inferences. An applied research focus and mentorship approach aids students as they work to solve a real health-related research problem to complete their program.

GI Bill® benefits

This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at <https://www.benefits.va.gov/gibill/> (<https://www.benefits.va.gov/gibill/>).

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

30 credits and an applied project course (BST 593).

Required Core (15 credit hours)

BST 601 Biostatistical Theory and Inference (3)

BST 602 Applied Multi-level and Longitudinal Data Analysis (3)

BST 604 Computational Biostatistics (3)

BST 605 Biostatistical Data Analysis (3)

BST 606 Applied Clinical Trial Design and Analysis (3)

Electives (9 credit hours)

Culminating Experience (6 credit hours)
BST 593 Applied Project (6)

Additional Curriculum Information

Elective coursework should be selected in consultation with the program advisor.

The applied project will depend upon the student's background and goals for after graduation.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in biomedical informatics, demography, mathematics, public or population health, social sciences or statistics from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admissions application and application fee
- official transcripts
- professional resume
- two references (academic or professional)
- statement of purpose
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of current residency.

All applicants must have completed and passed an undergraduate statistics course (e.g. HCD 300, STP 226, ECN 221, or PSY 230), a linear algebra course (e.g. MAT 242, MAT 342 or MAT 343), and a calculus course (e.g. MAT 210, MAT 251 or MAT 270) prior to admission. If the requisite coursework is not completed prior to admission, then it must be completed prior to matriculating.

Contact information of two references is required. References will be contacted via email to submit a letter of recommendation. Letters of recommendation are preferably written by instructors, research mentors or supervisors who can speak to the applicant's aptitude for research and graduate-level coursework.

The statement of purpose should be one to two pages that indicate the applicant's interest in the program, knowledge of the field, and career plans. Applicants are encouraged to connect with program faculty who could be potential research mentors and include this information in their statement, if available at the time of application.

Career Opportunities: Students with a Master of Science in biostatistics can be employed in academic institutions, government agencies and health-related industries. Graduates are well-positioned to support public health needs. Career opportunities include:

- biostatisticians
- data scientists
- professors
- senior data analysts
- statisticians

These positions are all classified as "Bright Outlook occupations" from the Bureau of Labor Statistics, which is officially defined as the occupations expected to grow rapidly in the next several years with large numbers of job openings. They are new and emerging occupations with potential high salaries.

Online Degree Search Title: Biostatistics, PhD

Campus: Downtown Phoenix

This program will begin accepting applications for the Fall 2025 semester.

Program Description: The PhD program in biostatistics offers a comprehensive and specialized education in the novel development and application of biostatistical methods to the health and biomedical sciences. This innovative program is designed to equip students with advanced skills in designing research studies, analyzing data and implementing biostatistical solutions to address applicable health challenges. Collaborating closely with health researchers and professionals from various disciplines, students develop expertise in crafting impactful strategies for improving health outcomes and advancing medical research.

Emphasis is placed on designing and analyzing randomized, controlled clinical trials; intervention studies and biostatistical models. Collaborations within ASU's College of Health Solutions foster a dynamic environment for cross-disciplinary learning and research. Students are encouraged to engage with a wide spectrum of health-related fields, including behavioral science, biomedical informatics, kinesiology, nutrition, population health and others.

By working closely with health researchers, students gain valuable hands-on experience in problem-solving, data analysis and collaborative research. This approach not only enhances their technical skills but also cultivates effective communication and teamwork abilities, which are vital for thriving in diverse health care environments.

GI Bill® benefits

This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at <https://www.benefits.va.gov/gibill/> (<https://www.benefits.va.gov/gibill/>).

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

Required Core (18 credit hours)

BST 601 Biostatistical Theory and Inference (3)

BST 602 Applied Multi-level and Longitudinal Data Analysis (3)

BST 603 Survival Data Analysis (3)

BST 606 Applied Clinical Trial Design and Analysis (3)

BST 608 Applied Meta-analysis (3)

BST 609 Categorical Data Analysis in Health Sciences (3)

Electives (42 credit hours)

Research (12 credit hours)

BST 792 Research (12)

Culminating Experience (12 credit hours)

BST 799 Dissertation (12)

Additional Curriculum Information

Elective coursework should be selected in consultation with the program advisor. Students may also work with their program director to identify suitable elective alternatives.

This program requires a qualifying exam and a written comprehensive exam. A submission of a written dissertation prospectus and its oral defense are required. It is expected that the submission of a written dissertation prospectus and its oral defense will take place no later than the end of the fourth year.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in applied statistics, applied mathematics, quantitative psychology or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admissions application and application fee
- official transcripts
- professional resume
- two references (academic or professional)
- statement of purpose
- writing sample (six to ten pages)
- proof of English proficiency

Additional Admission Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of current residency.

All applicants must have completed and passed an undergraduate statistics course (e.g. HCD 300, STP 226, ECN 221, or PSY 230), a linear algebra course (e.g. MAT 242, MAT 342 or MAT 343) and a calculus course (e.g. MAT 210, MAT 251 or MAT 270) prior to admission. If the requisite coursework is not completed prior to admission then it must be completed prior to matriculating.

Contact information of two references is required. References will be contacted via email to submit a letter of recommendation. Letters of recommendation preferably are written by instructors, research mentors or supervisors who can speak to the applicant's aptitude for research and graduate-level coursework.

The statement of purpose should be one to two pages that indicate the applicant's interest in the program, knowledge of the field and career plans. Applicants are encouraged to connect with program faculty who could be potential research mentors and include this information in their statement, if available at the time of application.

Preference will be given to students with extensive quantitative background and computation skills with health-related experience.

An oral interview with the program faculty is required. Strong applicants will be contacted to schedule an interview in person or via videoconference prior to acceptance.

Career Opportunities: Graduates with a doctorate in biostatistics can be employed in academic institutions, government agencies and industries as:

- biostatisticians
- data scientists
- professors
- senior data analysts
- statisticians

These positions are all classified as "Bright Outlook occupations" from the Bureau of Labor Statistics, which defines them as the occupations expected to grow rapidly in the next several years with large numbers of job openings. They are new and emerging occupations with potential high salaries.

Clinical Exercise Physiology, MS (NHCEPMS)

Online Degree Search Title: Clinical Exercise Physiology, MS

Campus: Downtown Phoenix

Program Description: In the MS program in clinical exercise physiology, students learn how to use primary and secondary prevention strategies to improve, maintain or abate declines in fitness and health in populations of various age groups.

Students learn to collaborate with medical professionals to guide exercise and rehabilitation programs for at-risk clients and those with chronic diseases. The program offers personalized mentorship and hands-on experience with expert faculty in research and clinical settings.

Students obtain the knowledge, clinical experience and skills needed to successfully complete the examination for the registered clinical exercise physiologist certification offered by the American College of Sports Medicine, <https://www.acsm.org/> (<https://www.acsm.org/>).

This program is accredited through the Commission on Accreditation of Allied Health Education Programs endorsed by the American College of
2024-25 Academic Catalog Archive 1047

Sports Medicine, <https://www.caahep.org/> (<https://www.caahep.org/>).

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

Clinical Exercise Science, BS
Kinesiology, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

31 credit hours and a written comprehensive exam, or 31 credit hours, a thesis and a written comprehensive exam.

Required Core (21 credit hours)

NTR 502 Statistics in Research (3)

EXW 535 Advanced Exercise Assessment and Prescription (3)

EXW 542 Health Promotion (3)

EXW 560 Cardiopulmonary Rehabilitation (3)

EXW 565 Cardiovascular and Pulmonary Physiology (3)

EXW 568 Management and Treatment of Chronic Disease for the Clinical Exercise Physiologist (3)

KIN 547 ECG Interpretation (3)

Seminar (1 credit hour)

EXW 591 Seminar: Clinical Exercise Physiology (1)

Other Requirement (3 or 9 credit hours)

EXW 500 Research Methods (3) or

EXW 515 Advanced Exercise Physiology (3) and EXW 584 Clinical Exercise Physiology Internship (6)

Culminating Experience (0 or 6 credit hours)

written comprehensive exam (0) or

EXW 599 Thesis (6)

Additional Curriculum Information

This program has a thesis option and a nonthesis option. Students in the thesis option must take EXW 500 Research Methods before EXW 599 Thesis. Students who select the nonthesis option must complete a clinical internship of six credit hours (EXW 584 Clinical Exercise Physiology Internship) and take EXW 515 Advanced Exercise Physiology.

All students must pass a written comprehensive exam. Thesis students must also pass an oral defense.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in exercise science, exercise physiology, kinesiology or a closely related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- resume or curriculum vitae
- letter of intent
- three references (academic or professional)
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Applicants who do not have credit for basic courses from their undergraduate degree must complete the courses before beginning the application process or before beginning graduate coursework. The corresponding ASU course is in parentheses:

- Human Anatomy and Physiology with laboratories (BIO 201 and BIO 202)
- Physiological Foundations of Movement [Exercise Physiology] (KIN 340)
- Human Nutrition (NTR 241)
- Functional Anatomy and Kinesiology (KIN 334)
- Psychology (PSY 101)
- Statistics (STP 226 or similar)
- Exercise Testing with Laboratory (EXW 420)
- Exercise Prescription (EXW 425)

The letter of intent should be 600 words or less and address the applicant's area of professional or scholarly interest, career and professional goals, and relevant background, experience and training.

Contact information of three references is required. References will be contacted via email to respond to a series of questions about the applicant. At least two references must be academic (such as prior instructors) with at least one from the applicant's major. The third reference may be from an academic or related professional source.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Synthesize the current literature and guidelines on the epidemiology, pathophysiology, progression, risk factors, key clinical findings, and treatments of chronic diseases.
- Create exercise training interventions for patients with chronic disease.
- Analyze patient status changes through continuous monitoring of exercise interventions while incorporating behavior modification models that support active patient engagement.

Career Opportunities: Clinical exercise physiology, in which exercise is used to help clients manage or reduce their risk of chronic disease, is an exciting and growing profession in the health care realm. It has recently been organized on the national level and is now recognized by the federal government and defined as an occupation.

The American College of Sports Medicine is the national association that establishes guidelines and recommendations for exercise testing and prescription, and evaluation of research for both healthy populations and those with chronic disease. Graduates are prepared to sit for ACSM certification, the organization's most prestigious credential for clinical professionals.

This unique and vital profession will grow as certifications and licensures support the value of clinical exercise physiology. Career opportunities are available in:

- hospital-based clinical research facilities
- hospitals
- outpatient clinics
- physician offices
- university and research laboratories

Professional Licensure: ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (<https://admission.asu.edu/academics/licensure>) webpage.

Communication Disorders, MS (LACOMDISMS)

Online Degree Search Title: Communication Disorders, MS

Campus: Tempe

Program Description: The MS program in communication disorders prepares students to become certified speech-language pathologists. This is a full-time residential program that can be completed in 20 months.

In the first year of the program, students take a series of courses to develop knowledge of and skills in assessment and intervention approaches for communication disorders across the life span. They also gain hands-on experience providing services to real-world clients in on-campus clinics, guided by clinical faculty educators.

In the second year, students take required and elective courses to further develop their knowledge in selected topic areas and to acquire additional clinical skills in supervised external placements in the community.

This program offers research and clinical opportunities in many diverse settings, including:

- early intervention programs and private practice clinics
- inpatient and outpatient medical sites
- public schools

A part-time employment program is available for speech-language pathology assistants in public schools. Those seeking specialized training can pursue a certificate in multilingual and multicultural services. Students interested in research have the opportunity to work in labs and complete a master's thesis.

Students may have the option of completing some second-year courses via ASU Sync, with program approval. ASU Sync enables students to attend live classes remotely via Zoom, and classes are designed to foster active collaboration and discussion in real time with faculty and peers.

Students on I-20 visas are not permitted to complete courses via Sync and should plan to complete their second year courses in-person.

Students seeking to use GI Bill® benefits for ASU Sync programs should contact the Pat Tillman Veterans Center regarding certain limitations.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at www.benefits.va.gov/gibill/ (<https://www.benefits.va.gov/gibill/>).

This program is accredited by the Council on Academic Accreditation of the American Speech-Language-Hearing Association.
<https://www.asha.org/> (<https://www.asha.org/>)

Degree Requirements:

60 credit hours and a thesis, or 60 credit hours and a written comprehensive exam.

Required Core (34 credit hours)

SHS 538 Clinical Methods and Simulation in Speech-Language Pathology (4)

SHS 539 Professional Issues in Speech-Language Pathology (2)

SHS 567 Neural Bases of Communication Disorders (2)

SHS 570 Communication Disorders and Multicultural Populations (2) or SHS 597 Bilingual Speech-Language Pathology (2)

SHS 571 Augmentative Communication and Language Programming (2)

SHS 572 Language Assessment and Intervention in Infants and Toddlers (2)

SHS 573 Language Assessment and Intervention with School-Age Populations (2)

SHS 574 Management of Feeding and Swallowing Disorders (2)

SHS 575 Aphasia and Related Neurogenic Language Disorders (2)

SHS 577 Current Assessment, Intervention and Research in Autism (2)

SHS 578 Fluency Disorders (2)

SHS 579 Voice and Resonance Disorders (2)

SHS 581 Traumatic Brain Injury and Cognitive Linguistic Disorders (2)

SHS 582 Differential Diagnosis of Communication Disorders (2)

SHS 585 Articulation and Phonology: Assessment and Intervention (2)

SHS 587 Language Assessment and Intervention with Preschool Populations (2)

Electives (0 or 6 credit hours)

Other Requirements (20 credit hours)

SHS 500 Research Methods (1)

SHS 580 Clinical Practicum (9)

SHS 584 Clinical Internship (10)

American Speech-Language-Hearing Association Praxis national exam in speech language pathology (0)

Culminating Experience (0 or 6 credit hours)

written comprehensive exam (0) or

SHS 599 Thesis (6)

Additional Curriculum Information

SHS 538 and SHS 539 should each be taken twice across consecutive fall and spring semesters. Students who choose the written comprehensive examination as their culminating experience must take six credit hours of electives. Students should see their academic unit for an approved list of elective courses.

All students must take the American Speech-Language Hearing Association Praxis national exam and have their scores reported to the program.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's degree in speech and hearing science or a related field from a regionally accredited institution and completed prerequisite coursework in speech and hearing.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- resume or curriculum vitae
- personal statement, not to exceed 300 words
- three references (academic or professional)
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Applicants who have earned a bachelor's degree in a related field are considered; however, these applicants must complete prerequisite coursework before admission. Courses include:

- Introduction to Phonetics (SHS 250)
- Anatomical and Physiological Bases of Speech (SHS 310)
- Hearing Science (SHS 311)
- Language Science (SHS 367)
- Speech Science (SHS 375)
- Introduction to Audiology (SHS 401)
- Clinical Methods and Treatment of Communication Disorders (SHS 402)
- Speech and Language Acquisition (SHS 465 or 565)
- Aural Rehabilitation (SHS 496 or 596) strongly recommended

Contact information for three references is required. References are contacted via email to submit a letter of recommendation and respond to a series of questions about the applicant. At least two references must be speech and hearing faculty; the third may be professional.

An interview may be required in person or via teleconference.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Formulate prevention, assessment and treatment options for clients with communication and swallowing disorders
- Function in their role as a speech-language pathologist including active utilization of interprofessional collaboration, interpersonal skills, counseling skills, supervision, advocacy for individuals who need services as well as the ability to act in accordance with the ethical, legal and philosophical principles of the speech-language pathology profession and the American Speech-Language-Hearing Association.
- Generate recommendations for clients by synthesizing in-depth knowledge of communication and swallowing processes including etiologies, characteristics, anatomical, physiological, acoustic, psychological, developmental, linguistic, and cultural correlates.
- Demonstrate skill-based competency in the evaluation and treatment of people across the lifespan with communication, speech, language, literacy, cognition, and swallowing difficulties.
- Evaluate evidence-based resources using scientific foundation principles to justify an approach to service provision as a speech-language pathologist.

Career Opportunities: Speech-language pathologists evaluate speech, language, cognitive, hearing, feeding and swallowing functions, integrating medical history and background information to diagnose disorders and plan treatment. Graduates have many opportunities to work with culturally and linguistically diverse populations.

Speech-language pathologists are in high demand. Employment rates are extremely high across all settings, including:

- all school levels, including elementary, middle and high school
- early intervention settings, including home health
- inpatient and acute care hospitals
- neonatal intensive care units
- outpatient rehabilitation
- pediatric outpatient centers
- private practice

Professional Licensure: ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (<https://admission.asu.edu/academics/licensure>) webpage.

Communication Disorders in Multilingual/Multicultural Populations (certificate), Certificate (NHCDMPGRCT)

Online Degree Search Title: Communication Disorders in Multilingual/Multicultural Populations (Graduate Certificate)

Campus: Tempe

Program Description: Designed for students in the master's degree program in communication disorders, this certificate program provides expanded coursework in issues related to culturally and linguistically diverse populations.

In addition to specialized academic courses, this program offers clinical experience in community-based settings and engagement in community-centered, interprofessional projects.

Students who complete the certificate program have the knowledge and practical experience to effectively address the needs of culturally and linguistically diverse adults, children and families. Knowledge of another language is not required.

Degree Requirements:

17 credit hours including the required applied project course (SHS 593).

Required Core (10 credit hours)

SHS 524 Counseling in Communication Disorders (2)

SHS 570 Communication Disorders and Multicultural Populations (2)

SHS 586 Language Essentials for Teaching Reading (2)

SHS 588 Bilingual Language Acquisition (2)

SHS 597 Bilingual Speech-Language Pathology (2)

Other Requirement (5 credit hours)

SHS 584 Clinical Internship (5)

Culminating Experience (2 credit hours)

SHS 593 Applied Project (2)

Additional Curriculum Information

The culminating experience is an applied, community-based project that builds depth of knowledge.

Students who wish to obtain a bilingual endorsement must complete the Arizona Classroom Teacher Spanish Proficiency Examination administered by the School of International Letters and Cultures.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the certificate program if they are enrolled in the MS program in communication disorders at ASU.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Applicants who are currently enrolled in the master's degree program in communication disorders are encouraged to connect early with their graduate advisor regarding the recommended timeline for applying to this certificate program.

Applicants who are not yet admitted to the master's degree program in communication disorders may apply to that program and this certificate program at the same time (separate applications are required). Acceptance to the certificate program is not granted if the applicant is not accepted to the master's degree program.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Adapt communication, assessment, and treatment to meet the cultural and linguistic diversity of the clients they serve.
- Prepared to use evidence-based practices to serve clients who are culturally and linguistically diverse.
- Practice as a speech-language pathology clinician and evaluate appropriate resources, including mentorship, in settings that have culturally and linguistically diverse populations.

Career Opportunities: Employers in many settings value professionals who are equipped to work with diverse populations. Students can advance their career options as a certified and licensed speech-language pathologist with this certificate, which demonstrates that they have undertaken the specialized training required for working with clients who are from diverse linguistic or cultural backgrounds.

Professional Licensure: ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (<https://admission.asu.edu/academics/licensure>) webpage.

602-496-3300

Exercise and Nutritional Sciences, PHD (ECNUTRIPHD)

Online Degree Search Title: Exercise and Nutritional Sciences, PhD

Campus: Downtown Phoenix

Program Description: Within integrated disciplinary contexts, the PhD in exercise and nutritional sciences curriculum trains scholars and leaders to conduct high-impact, interdisciplinary research in exercise and nutritional sciences.

Students and faculty conduct high-quality, use-inspired research in exercise, nutrition and health promotion that is intended to reduce the physical, social and economic costs of unhealthy living. Students engage in research at every stage of the program through:

- dissertation research
- participation in research practicums
- preclinical research and clinical trials
- research seminars and colloquia
- translational research teams

Students work collaboratively with an approved mentor throughout the program and focus their research on one of three primary areas of interest: translational metabolism and physiology, behavioral and community health sciences, or biomechanics and motor control.

Those who have earned a master's degree can complete the program in four years of full-time study. The program also accepts part-time students.

Degree Requirements:

89 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Core (6 credit hours)

BMI 515 Applied Biostatistics in Medicine and Informatics (3) or EXW 640 Analysis of Variance for Exercise and Wellness (3)

EXW 645 Advanced Applied Methods and Data Analysis (3)

Required Research (12 credit hours)

EXW 700 Research Methods (3)

EXW 701 Scientific Grant Writing (3)

EXW 780 or NTR 780 Practicum (6)

Elective Research (15 credit hours)

Professional Development (5 credit hours)

CHS 791 Seminar: Early Career Professional Development (3)

EXW 784 Internship (2)

Focus Area (9 credit hours)

Electives (30 credit hours)

Culminating Experience (12 credit hours)

EXW 799 or NTR 799 Dissertation (12)

Additional Curriculum Information

Students tailor a course of study in one of three focus areas: behavioral and community health sciences, biomechanics and motor control, or translational metabolism and physiology. Courses in the focus area are determined in collaboration with the student's supervisory committee.

The program integrates professional development through a teaching internship (EXW 784) and a three-semester seminar (CHS 791 Seminar: Early Career Professional Development) that addresses career opportunities and preparation for faculty or professional positions in the nutrition, exercise and health promotion fields.

Students entering the doctoral program with a master's degree in a related discipline may count up to 30 credit hours from the master's degree toward the total credit hours, with program approval.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a master's degree in any field from a regionally accredited institution; completion of a data-based research thesis is preferred.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, and applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- letter of intent
- resume or curriculum vitae
- three references (academic or professional)
- writing sample (6-10 pages)
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The letter of intent should indicate research or scholarly interest and primary program area, and include a statement of career goals and the name of a potential faculty mentor from the list of approved faculty mentors.

All applicants must have completed a graduate-level research methods and a graduate-level research statistics course before admission. Students are expected to take a refresher in research statistics in the summer before they start the program.

It is expected that students admitted to the program have documented academic training and a strong interest in nutrition science, exercise science, biomechanics, rehabilitation or health promotion. Thus, depending on their academic training, background, scholarly interests and focus area, a student may be asked to take undergraduate courses as deficiencies prior to, or concurrently with, graduate course enrollment.

Contact information for three references is required. References will be contacted via email to submit a letter of recommendation and respond to a series of questions about the applicant.

Strong applicants will be contacted to schedule an interview via teleconference prior to acceptance.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Apply appropriate advanced research methodology in the design and evaluation of research studies in exercise and nutritional sciences.
- Apply appropriate statistical analyses to evaluate research and data relevant to exercise and nutritional sciences.
- Create a grant proposal that clearly demonstrates significance, innovation, and a scientifically justified approach to address a novel research question.
- Communicate research findings to scientific audiences, including peer-reviewed literature and presentations at scientific conferences and to lay audiences.

Career Opportunities: Graduates are prepared for research careers in research-intensive universities, government agencies and health-related research positions in private industry. Students are strongly encouraged to pursue postdoctoral research opportunities upon graduation.

Career examples include:

- consultant
- entrepreneur
- exercise physiologist
- dietician or nutritionist
- health educator
- health, research or sports scientist
- postsecondary biomechanics, exercise science or nutrition teacher
- professor
- public health professional

Genetic Counseling, MS (NHGCOMS)

Online Degree Search Title: Genetic Counseling, MS

Campus: Downtown Phoenix

Program Description: The MS program in genetic counseling prepares students for a successful career as a genetic counselor. Graduates can apply their knowledge and unique skill set to advance the understanding of genetics and genomic-related conditions in the communities where they work and live.

The two-year, full-time program is taught by genetic counselors and medical geneticists. Students participate in fieldwork experiences throughout Phoenix and engage in a comprehensive curriculum covering:

- advanced genetic counseling techniques
- clinical genetics and genomics
- cultural competencies in genetics
- fundamentals of genetic counseling
- the role of genetic counselors in laboratories and research
- social and ethical dimensions of genetic counseling and decision-making

Students gain the knowledge and experience necessary to pass the American Board of Genetic Counseling certification exam and find employment that fits their skill set.

This program is classified as Accredited, New Program by the Accreditation Council for Genetic Counseling, <https://www.gceducation.org/> (<https://www.gceducation.org/>). Students should refer to the college webpage (<https://chs.asu.edu/degree-programs/additional-program-information>) for additional accreditation information.

Students should note that some courses and faculty offices are located at the Health Futures Center (<https://gis.m.asu.edu/asucampus/?campus=downtown&building=UCENT&marker=-111.95140300401944%2C33.65711400174794%2C%2C%2C&markertemplate=%7B%22title%22%3A%22HEALTH%20FUTURES%20CENTER%22%2C%22longitude%22%3A-111.95140300401944%2C%22latitude%22%3A33.65711400174794%2C%22isIncludeShareUrl%22%3Atrue%7D&level=15>) building in North Phoenix.

Degree Requirements:

71 credit hours and a thesis, or 71 credit hours including the required applied project course (GCO 593).

Required Core (46 credit hours)

BMD 562 Bioethical Issues in Applied Biomedicine (3)

GCO 510 Fieldwork Preparatory (1)

GCO 530 Genetic Counseling Fundamentals (3)

GCO 540 Foundations of Medical Genetics (3)

GCO 560 Practice of Genetic Counseling (3)

GCO 570 Clinical Genetics (3)

GCO 610 Laboratory Fundamentals and Population Screening (3)

GCO 620 Genetic Counseling Techniques (3)

GCO 625 Cultural, Ethical and Legal Aspects of Genetics (3)

GCO 630 Advanced Genetic Counseling Techniques (3)

GCO 650 Cancer, Cardiac Genomics and Precision Medicine (3)

GCO 659 Embryology and Genetics (3)

GCO 660 Professional Issues for Genetic Counselors (3)

HCD 501 Population Health Data Management and Analysis (3)

HCD 520 Population Health (3)

IBC 640 Family and Couples in Primary Care (3)

Fieldwork (15 credit hours)

GCO 583 or GCO 683 Fieldwork (15)

Other Requirements (4 credit hours)

GCO 691 Topic: Journal Club I (1)

GCO 691 Topic: Journal Club II (1)

GCO 691 Topic: Journal Club III (1)

GCO 691 Topic: Journal Club IV (1)

Culminating Experience (6 credit hours)

GCO 593 Applied Project (6) or

GCO 599 Thesis (6)

Additional Curriculum Information

GCO 691 Journal Club topics are taken consecutively for 1 credit hour in each term of the program.

Students must have a minimum of 50 participatory cases during their fieldwork experiences with individuals who are being evaluated in the specialty areas of prenatal, pediatric, cancer and other adult conditions, with no one specialty dominating. All 50 participatory cases must be supervised by an experienced genetic counselor with certification from the American Board of Genetic Counseling, the American Board of Medical Genetics and Genomics or the Canadian Association of Genetic Counsellors. Students will be placed in fieldwork sites by the program.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admissions application and application fee
- official transcripts
- letter of intent
- resume or curriculum vitae
- three references (academic or professional)
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Applicants must register with National Matching Services, Inc. prior to applying to ASU to be considered for this program (<https://natmatch.com/gcadmissions> (<https://natmatch.com/gcadmissions/>)). The Genetics Counseling, MS program at ASU has an ID code of 15710. Applications will be reviewed by the admissions committee after all materials have been received, and the applicant has registered with Match.

All applicants must have coursework in the following areas, as evidenced in their transcript:

- biology (two courses)
- chemistry (one course)
- biochemistry (one course)
- genetics (one course)
- statistics (one course)
- psychology, sociology, or public health (two courses)

The letter of intent (single-spaced, one to two pages) should include experience and knowledge in the field of genetic counseling and articulate what makes the applicant a good candidate for this program.

Contact information for three references is required. References will be contacted via email to submit a letter of recommendation. Academic and professional recommendations are strongly encouraged. If possible, candidates are encouraged to include at least one letter of recommendation from a genetic counselor.

All applicants are strongly encouraged to interview genetic counselors and observe genetic counseling sessions when possible. It is also highly recommended that applicants have experience working in a health care setting; experience volunteering or working with individuals who have special needs; advocacy experience; or experience providing crisis counseling.

Career Opportunities: Graduates of the program are prepared for a position as a genetic counselor in a clinical care, research or laboratory setting or as an industry-based genetic counselor. Genetic counselors are uniquely trained with a skill set that will allow them to work in a variety of medical, scientific or research-based settings, as well as in private practice and academia.

The Bureau of Labor Statistics predicts a growth rate of 16% for genetic counseling positions between 2022 and 2032, which is much faster than average.

Professional Licensure: ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (<https://admission.asu.edu/academics/licensure>) webpage.

Health Care Administration and Policy, MS (NHSHCDMS)

Online Degree Search Title: Health Care Administration and Policy, MS

Campus: Downtown Phoenix, Online

This program's name has changed effective Fall 2024. The previous name was Science of Health Care Delivery.

Program Description: The MS program in health care administration and policy focuses on the study and design of systems, processes, leadership and management approaches used to optimize health care delivery and health outcomes for all.

The curriculum is centered on achieving high-value care through leadership, population health, informatics, systems engineering, health care management, health economics, equity, bioethics and policy.

Students customize their elective coursework to their interests and goals, with courses being offered in three focus areas:

- health policy and advocacy
- health systems management
- performance improvement in health care

The program challenges students to work on innovative solutions to improve the U.S. health care system by simultaneously improving the health of populations, enhancing the patient experience and reducing per capita cost of care.

Participating students work in a cohort through the program and are able to complete the degree in as few as nine months. Students are also paired with leading health care delivery organizations and leaders to complete an applied capstone project during the program.

Degree Requirements:

30 credit hours including the required capstone course (HCD 550).

Required Core (18 credit hours)

HCD 501 Population Health Data Management and Analysis (3)

HCD 502 Foundation of U.S. Health Systems and Design (3)

HCD 510 Patient-centered Care (3)

HCD 511 Health Economics and Policy (3)

HCD 521 Health Policy and Equity (3)

HCD 575 Health Care Transformation and Leadership (3)

Focus Area Courses (9 credit hours)

Research (2 credit hours)

HCD 592 Research: Part One (1)

HCD 592 Research: Part Two (1)

Culminating Experience (1 credit hour)

HCD 550 Capstone (1)

Additional Curriculum Information

Students are able to select coursework from any of three focus areas: health systems management; performance improvement in health care; or health policy and advocacy. Students should contact the academic unit regarding course selection for the focus area.

The research requirement is taken in preparation for the capstone course. Students complete HCD 592 for one credit hour twice in consecutive terms prior to HCD 550.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited college or university of recognized standing in a related field such as biology, chemistry, biochemistry, nursing, public health, pharmacy, biomedical informatics, social work, premed, prehealth, nutrition, health promotion or others.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 credit hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- three references (academic or professional)
- personal statement
- resume or curriculum vitae
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Contact information for three references is required. References will be contacted via email to submit a letter of recommendation. References must be academic or professional; friends or relatives are not accepted.

A personal statement must be submitted that explains how the applicant plans to contribute to the health care system after the degree is obtained, how the program will help the applicant achieve their goals, what the applicant's career aspirations are, and what interested the applicant in this degree program.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/master-science-science-health-care-delivery/>) for program descriptions and to request more information.

Career Opportunities: Graduates are trained for a career in the health care industry --- particularly leadership, management and administration. Professionals with knowledge about innovations and improvements for health care delivery are in demand across the health care industry. This flexible degree program is also ideal for gap-year students who are pursuing entrance to medical and professional school prior to intended careers in health and health care.

Career examples for program graduates include:

- health care providers
- hospital administrators
- policy experts
- program managers

Professional Licensure: ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (<https://admission.asu.edu/academics/licensure>) webpage.

Health Informatics, MAS (GCHLHINMAS)

Online Degree Search Title: Health Informatics, MAS

Campus: Online

Program Description: The MAS in health informatics is a flexible program designed to meet the needs of working professionals, and options are available for students to continue their education on their own time.

Core courses provide a foundation in health informatics principles, health communication, health care data and databases, and healthcare leadership. Electives allow students flexibility to specialize in various areas in health informatics, such as clinical informatics and population health informatics. Other program areas include clinical workflow, telehealth and telemedicine, and human-computer interactions in health care. Course topics include:

- bioethical issues in applied biomedicine
- clinical decision support and evidence-based medicine
- health economics and policy
- telemedicine
- workflow analysis and redesign in health systems engineering

Degree Requirements:

30 credit hours including the required applied project course (BMI 593).

Required Core (15 credit hours)

BMI 601 Fundamentals of Health Informatics (3)

BMI 603 Health Informatics Database Modeling and Applications (3)

BMI 604 Health Information Communication (3)

BMI 614 Current Perspectives in Health Informatics (3)

HCD 575 Health Care Transformation and Leadership (3)

Electives (12 credit hours)

Culminating Experience (3 credit hours)

BMI 593 Applied Project (3)

Admission Requirements: Applicants must fulfill the requirements of the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a related field, such as biology, computer science, medicine, nursing, pharmacy or public health, from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- resume or curriculum vitae
- two references (academic or professional)
- statement of purpose
- proof of English proficiency

Additional Admission Requirements

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. TOEFL iBT or IELTS scores must be from tests taken no more than two years before the applicant's anticipated start date at ASU.

The statement of purpose should be a maximum of 500 words and describe the applicant's interest in the program, what they hope to learn and accomplish, and their career goals.

Contact information for two references is required. References will be contacted via email to submit a letter of recommendation. References must be current or former professors or supervisors of a relevant position held by the applicant.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/master-advanced-study-health-informatics/>) for program descriptions and to request more information.

Career Opportunities: Graduates are prepared with skills for careers in a wide range of health care settings. Professionals from fields outside health and health care can also develop the skills needed to transition into careers in this rapidly expanding field.

Career opportunities include these positions:

- chief health informatics officer (medical doctorate may be required)
- clinical application developer
- clinical informatics manager
- director of clinical informatics (health informatics)
- director of health information management or health IT
- electronic health record application specialist
- health care informatics consultant or manager
- health care IT project manager
- health care or clinical informatics data analyst
- health data resource manager or clinical data manager
- health informatics director

Integrated Behavioral Health - Clinical (Certificate), Certificate (NHIBHCGRCT)

Online Degree Search Title: Integrated Behavioral Health - Clinical (Graduate Certificate)

Campus: Online

Program Description: The integrated behavioral health clinical certificate meets the growing demand to integrate behavioral health clinicians into primary care or other traditional medical settings.

The curriculum offers clinician students a deeper understanding of models of primary care behavioral health as well as training on evidence-based approaches to behavioral health care. Program courses focus on various aspects of behavioral health care, including models, clinical medicine and pathophysiology, clinical interventions and population health.

It is ideal for clinicians who aspire to a career in, or are already working in, integrated primary care behavioral health. The program may be completed:

- as a stand-alone program

- to complement a student's graduate degree program of study
- to supplement a student's existing clinical skills or their current practice within an integrated team-based health care setting

Degree Requirements:

15 credit hours.

Required Core (12 credit hours)

IBC 601 Models of Integrated Primary Care (3)

IBC 603 Brief Interventions in Primary Care (3)

IBC 604 Clinical Medicine/Pathophysiology (3)

IBC 611 Population-Based Behavioral Health Management (3)

Electives (3 credit hours)

Additional Curriculum Information

Students should see the academic unit for the approved course list of electives. Other coursework may be used with the approval of the academic unit.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a master's degree in a related field --- such as social work, counseling, family therapy, clinical psychology or nursing --- from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of intent
- one reference (professional)
- resume or curriculum vitae
- submission of licensure form and copy of license
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

All applicants are required to hold a master's degree that results in behavioral health licensure or license eligibility. In rare cases, applicants are considered with a master's degree and licensure unrelated to their degree (e.g., an applicant with a master's degree in public health and licensure as a registered dietician).

Contact information of at least one reference is required. The reference will be contacted via email to respond to a series of questions about the applicant.

Applicants are asked to respond to the following prompt for the statement of intent:

The integrated behavioral health (clinical) certificate program focuses on evidence-based techniques for integrated primary care (e.g., behavioral interventions that incorporate a therapeutic lifestyle change or incorporate a patient's medical condition). Clearly articulate the specific career goals and the detailed ways in which an IBH (clinical) certificate will help you accomplish those goals. Please be sure to incorporate information from the program description and required courses.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/certificates/integrated-behavioral-health-clinical-graduate-certificate/>) for program descriptions and to request more information.

Career Opportunities: Graduates who have combined the certificate in clinical integrated behavioral health with their major program of study, their license or their practice within integrated team-based health care settings may gain an edge in a competitive job market.

Completion of this innovative program, in conjunction with a clinical degree, can help a graduate launch their career as:

- a behavioral health case manager
- a behavioral health provider

- a counselor of behavioral health
- an integrated behavioral health care supervisor
- a program coordinator

Integrated Behavioral Health - Management (Certificate), Certificate (NHIBHMGRCT)

Online Degree Search Title: Integrated Behavioral Health - Management (Graduate Certificate)

Campus: Online

Program Description: The integrated behavioral health management certificate with a concentration in management meets the growing demand for health care managers of programs that integrate behavioral health into primary care and other traditional medical settings.

This program trains students to manage and contain health care costs while working to obtain a return on investment through revenue management in the various health care financial models.

Students learn to develop management strategies that address the needs of populations with evidence-based practices and team-based care that is focused on quality, leveraging technology and cost-effectiveness.

It is ideal for clinicians who aspire to work in integrated primary care behavioral health. The program may be completed:

- as a stand-alone program
- to complement a student's graduate degree program of study
- to supplement a student's existing clinical skills or their current practice within an integrated team-based health care setting

Degree Requirements:

15 credit hours.

Required Core (12 credit hours)

IBC 601 Models of Integrated Primary Care (3)

IBC 614 Quality and Performance Measurement, Improvement and Incentives in Health Care (3)

IBC 626 Behavioral Health Management (3)

IBC 630 Financial Management of Health Care (3)

Electives (3 credit hours)

Additional Curriculum Information

Students should see the academic unit for the approved course list of electives. Other coursework may be used with the approval of the academic unit.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a master's degree in a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of intent
- one reference (professional)
- resume or curriculum vitae
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Contact information for at least one reference is required. The reference will be contacted via email to respond to a series of questions about the applicant.

Applicants are asked to respond to the following prompt for the statement of intent:

The integrated behavioral health (management) certificate focuses on management of organizations that offer integrated behavioral health services (e.g., using quality improvement strategies, cost containment and control). Clearly articulate your specific career goals and the detailed ways an IBH (management) certificate will help you accomplish those goals. Please be sure to incorporate information from the program description and required courses.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/certificates/integrated-behavioral-health-management-grad-certificate/>) for program descriptions and to request more information.

Career Opportunities: Graduates who have combined the certificate in clinical integrated behavioral health with their graduate degree program of study, their license or their practice within integrated team-based health care settings may gain an edge in a competitive job market. This management-focused certificate provides refined learning in integrated care, quality and performance interventions, financial management, and behavioral health management skill building for integrated health care.

Completion of this innovative program in conjunction with other degrees and training can help graduates launch their career as a:

- behavioral health case manager
- behavioral health manager
- behavioral health quality improvement manager
- integrated care leader
- program coordinator
- program supervisor

International Health Management, MIHM (NHIHMIHM)

Online Degree Search Title: International Health Management, MIHM

Campus: Online

Program Description: The MIHM degree is offered by Arizona State University in partnership with the University of New South Wales in Sydney, Australia.

Ideal for students seeking a career in international health systems management, this Master of International Health Management program advances the core principles of the PLuS Alliance to develop solutions to global challenges and generate social impact in health and health care.

The collaborative and international nature of the program provides students access to global academic networks and industry partners. Students in the program build knowledge in leadership and management, including in policy, economics, finance, quality and safety --- from the combined expertise of faculty at two world-renowned research universities.

After completing courses in health care management, finance and comparative health systems, students choose an area of focus in health economics, health informatics, hospital management or quality improvement in health care.

Degree Requirements:

30 credit hours including the required capstone course (HCD 550).

Required Core (6 credit hours)

HCD 532 Health Care Management and Finance (3)

HCD 537 Comparative Health Care Systems (3)

Track Courses (12 credit hours)

Electives (9 credit hours)

Research (2 credit hours)
HCD 592 Research (2)

Culminating Experience (1 credit hour)
HCD 550 Capstone (1)

Additional Curriculum Information

Coursework taken for this program is provided through ASU and the University of New South Wales; students should see the academic unit for guidance on enrollment in UNSW courses.

Students select from tracks in health economics, health informatics, hospital management, or quality improvement in health care. Courses may not count toward both the track and the elective areas. Students should see the academic unit for an approved list of track and elective courses.

The research requirement is taken in preparation for the capstone course. Students complete HCD 592 for one credit hour twice in consecutive terms prior to HCD 550.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's degree or equivalent or master's degree from a regionally accredited college or university in a related field, such as biology, chemistry, biochemistry, nursing, public health, pharmacy, biomedical informatics, social work, premed, prehealth, nutrition or health promotion.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- three references (academic or professional)
- personal statement
- resume or curriculum vitae
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

A personal statement must be submitted that explains how the applicant plans to contribute to the health care system after obtaining the degree, how the program will help the applicant achieve their goals, what the applicant's career aspirations are, and what interested the applicant in this degree program.

Contact information for three references is required. References will be contacted via email to submit a letter of recommendation. References must be academic or related professional sources. Three letters of recommendation from either academic or professional sources are required; reference letters from friends and relatives are not accepted. Letters demonstrating involvement in health care, community service or leadership are encouraged.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/international-health-management-mihm/>) for program descriptions and to request more information.

Global Opportunities:

PLuS Alliance: The PLuS Alliance partnership combines the strengths of three leading research universities from three continents --- Arizona State University, King's College London and UNSW Sydney --- to create and share knowledge that will solve pressing educational and societal challenges.

Students have the opportunity to engage with peers and specialists across the globe through PLuS-partner courses offered online. Through this PLuS Alliance collaborative degree program, students develop transferable global competencies and gain exposure to international teaching and academic content. <https://www.plusalliance.org/global-learning-network-programmes> (<https://www.plusalliance.org/global-learning-network-programmes>)

Career Opportunities: There is a significant growth market for graduates with skills in international health management, given aging populations and the need for a health care workforce competent in informatics, leadership and finance.

Major sites of employment for graduates include:

- hospital systems
- nursing homes and similar facilities
- outpatient clinics

Medical Nutrition, MS (NHMNTSMS)

Online Degree Search Title: Medical Nutrition, MS

Campus: Online

Program Description: Graduate students in the MS in medical nutrition program learn the role of nutrition in health maintenance, the treatment of disease and disease prevention. Coursework and culminating experiences provide an overview of the components of therapeutic diets and the role of qualified health care providers in diet prescription.

This master's degree is ideal for:

- current and future healthcare professionals, including gap-year students
- current medical students, residents, fellows and practitioners in the aforementioned fields who seek to develop a strong knowledge base in the nutritional sciences and its application in the health care field
- those who have completed their bachelor's degree but have not yet secured admission to medical, veterinary, dental, osteopathic, physician assistant or similar schools

The program emphasizes self-directed learning with immersion in current nutrition research. Students in this program develop foundational knowledge of nutritional assessment techniques used by health care providers in clinical practice and are well versed in making recommendations grounded in evidence-based practice.

This program is a nonthesis degree option that targets students focusing on the health professions, particularly preprofessional students in their gap years. Students receive intensive, clinically oriented nutrition introductory courses, detailed courses on body systems, and courses that cover emerging health and health care topics.

Degree Requirements:

30 credit hours including the required applied project course (NTR 593).

Required Core (21 credit hours)

NTR 502 Statistics in Research (3)

NTR 510 Food and Nutrition Across the Lifespan (3)

NTR 511 Medical Nutrition in the Care and Prevention of Disease (3)

NTR 524 Chronic Inflammation and Metabolic Syndrome: The Common Pathway for Cardiovascular Disease, Diabetes (3)

NTR 525 Complementary Nutrition (3)

NTR 533 Food Systems, Ethics and the American Diet (3)

NTR 535 Nutrigenomics (3)

Other Requirement (3 credit hours)

NTR 500 Research Methods (3)

Electives (3 credit hours)

Culminating Experience (3 credit hours)

NTR 593 Topic: Medical Nutrition (3)

Additional Curriculum Information

Other requirement coursework may be substituted with the approval of the student's graduate committee.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution. A previous bachelor's or master's degree in nutrition, public health, biology, chemistry or related field is preferred.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- resume or curriculum vitae
- three references (academic)
- personal statement
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Prior to starting the program, applicants are expected to have completed courses in introductory nutrition (NTR 100 or NTR 241 or equivalent) and physiology (BIO 160 or BIO 202 or equivalent).

The personal statement (one to two pages) should address the applicant's interest in the program and how the program will impact their professional goals, and describe their strengths and weaknesses that may influence their performance in the program.

Contact information for three references is required. References are contacted via email to respond to a series of questions about the applicant. References should be academic, such as professors or instructors.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/medical-nutrition-ms/>) for program descriptions and to request more information.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Graduates will be able to create evidence-based nutrition plans to support patient care.
- Graduates will be able to evaluate evidence to address a nutrition research question.
- Students will be able to compose written and oral presentations geared toward lay and professional audiences in the nutrition field.

Career Opportunities: A medical nutrition degree complements a variety of pursuits, so career opportunities for those who have completed this program are vast.

Career opportunities include:

- dentist
- medical doctor
- nurse
- pharmacist
- physical therapist
- physician assistant

This program is not a pathway to become a registered dietitian (<https://chs.asu.edu/degree-programs/registered-dietitian>).

Medical Nutrition (Certificate), Certificate (NHMNTRGRCT)

Online Degree Search Title: Medical Nutrition (Graduate Certificate)

Campus: Online

Program Description: The certificate program in medical nutrition allows working health care professionals to acquire practical nutrition knowledge that can be immediately implemented in practice.

Students learn to discuss diet therapies, supplement use and nutritional concepts with their patients and clients. Students also gain in-depth knowledge of evidence-based nutrition research and the role of nutrition in managing chronic disease.

Degree Requirements:

15 credit hours.

Required Core (15 credit hours)

NTR 510 Food and Nutrition Across the Lifespan (3)

NTR 511 Medical Nutrition in the Care and Prevention of Disease (3)

NTR 524 Chronic Inflammation and Metabolic Syndrome: The Common Pathway for Cardiovascular Disease, Diabetes (3)

NTR 525 Complementary Nutrition (3)

NTR 535 Nutrigenomics (3)

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in health, science or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- professional resume or curriculum vitae
- one reference (academic)
- personal statement
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Before starting the program, applicants are expected to have completed courses in introductory nutrition (NTR 100 or NTR 241 or equivalent) and physiology (BIO 160 or BIO 202 or equivalent).

The personal statement (one or two pages) should address the applicant's interest in the program and how the program will impact their professional goals, and describe the applicant's strengths and weaknesses that may influence their performance in the program.

Contact information for one reference is required. The reference will be contacted via email to respond to a series of questions about the applicant. The reference should be academic, such as a professor or instructor.

Attend Online:

Nutritional Science, MS (ECHNUTMS)

Online Degree Search Title: Nutritional Science, MS

Campus: Downtown Phoenix

Program Description: The MS in nutritional science prepares students to translate nutritional science into practical use for human health and wellness. Partnered with accomplished faculty, students immerse themselves in the latest nutrition topics and research as they develop practical understanding through internship experiences and their own guided research.

Building on the scientific foundations of human nutrition, students learn strong writing and problem-solving skills, grow their computer literacy and increase their interpretive expertise.

The sports nutrition track allows students to specialize in exercise science and the nutritional needs of athletes. Students in this track complete classes focusing on exercise physiology, hydration, electrolyte regulation, evaluation of sports supplements and more.

The maternal-child health track allows students to complete classes that focus on promoting the health and well-being of women and children, including policy and advocacy, leadership development, medical nutrition therapy, communication and ethics. Competitive funding may be available through the TRANSCEND program for students in the maternal-child health track (<https://transcendprogram.weebly.com>) (<https://transcendprogram.weebly.com/>).

Students who have completed an accredited didactic program in dietetics may also elect to apply to the ASU dietetic internship program (<https://chs.asu.edu/student-life/internships/dietetic-internship>) in order to meet the requirements to become a registered dietitian nutritionist (<https://chs.asu.edu/degree-programs/registered-dietitian>).

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

Dietetics, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a thesis, or 30 credit hours and a thesis - Maternal Child Health Track, or 30 credit hours and a thesis - Sports Nutrition Track, or 30 credit hours including the required applied project course (NTR 593).

Required Core (3 credit hours)

EXW 501 Research Statistics (3) or

NTR 502 Statistics in Research (3)

Restricted Electives (9 or 12 credit hours)

Open Electives or Required Track Courses (6 or 9 credit hours)

Research (3 credit hours)

NTR 500 Research Methods (3)

Culminating Experience (6 credit hours)

NTR 593 Applied Project (6) or

NTR 599 Thesis (6)

Additional Curriculum Information

Tracks in sports nutrition and maternal-child health are available. Students should contact the academic unit for more information on track requirements and a list of approved elective courses.

This degree program may be pursued concurrently with the Arizona State University Dietetic Internship (<https://chs.asu.edu/student-life/internships/dietetic-internship>) (MS-DI or MS-VA). Students must apply and be accepted to both the MS degree and the internship program.

Students who pursue the Veterans Affairs (MS-VA) Dietetic Internship are not eligible to pursue a track within the degree, but they may work with program faculty to tailor electives to their interests and career goals.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree (nutrition or science is recommended) from a regionally accredited institution. Students who are pursuing the Master of Science in nutritional science need to complete the following prerequisites: anatomy and physiology, biochemistry, general chemistry with lab, general nutrition for majors, organic chemistry with lab, and statistics.

These courses are part of the ASU didactic program in dietetics, which is required for ASU's BS degree in dietetics and for eligibility to apply for admission to an accredited dietetic internship to become a registered dietitian. If an applicant has completed a didactic program in dietetics from another university, these prerequisites are considered complete. Prerequisite courses can be in progress when the student submits the application; however, if the student is accepted to the Master of Science degree program, all prerequisites must be completed before the program begins in the fall semester.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A" in an applicable master's degree program).

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- resume or curriculum vitae
- personal statement
- three references (academic or professional)
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The personal statement should include the following:

- a description of the applicant's significant professional responsibilities
- the applicant's professional goals and the reasons they wish to enroll in ASU's program
- the applicant's strengths that will enable their success in the program and in reaching their professional goals
- the applicant's personal research interests, described as specifically as possible and including any previous research experience, along with indication of any interest in being considered for the optional track in sports nutrition or maternal-child health

Contact information of three references is required. References will be contacted via email to submit a letter of recommendation. At least one reference must be from an instructor at the applicant's undergraduate institution.

An interview is required. Finalists are invited by the program to an interview.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Integrate knowledge of research design that incorporates ethical conduct in nutrition research studies.
- Apply statistical methodology in nutrition research.
- Interpret an emerging issue as it relates to advanced practice nutrition science.

Career Opportunities: Nutritional science applies the principles of food and nutrition to health. It is a vital, growing profession with many career possibilities. In this field, graduates share their knowledge of food and nutrition to help people make healthful food choices.

Graduates have gone on to:

- apply to medical and professional school to become medical doctors, physician assistants, pharmacists, dentists and other medical professions
- become registered dietitian nutritionists
- pursue academic doctorates

Industries that graduates can work in include:

- community and public health organizations
- corporations
- food manufacturing industries

- government agencies
- hospitals and other medical facilities
- long-term care facilities
- nonprofit organizations
- schools

Professional Licensure: ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (<https://admission.asu.edu/academics/licensure>) webpage.

Nutritional Science (Dietetics), MS (ECNTRDMS)

Online Degree Search Title: Nutritional Science (Dietetics), MS

Campus: Online

Program Description: The MS program in nutritional science with a concentration in dietetics is a nonthesis option for registered dietitian nutritionists and those with a verification statement from a didactic program in dietetics who are seeking to continue their education and advance their skills as practitioners.

The program emphasizes the scientific foundations of nutrition and prepares students to have interpretive expertise, problem-solving skills, strong writing skills and computer literacy.

Designed with working professionals' and students' learning preferences in mind, the program is completely online and can be completed either full time or part time. It is an ideal option for busy schedules, with multiple start dates each year and course lengths of 7.5 weeks.

Degree Requirements:

30 credit hours including the required applied project course (NTR 593).

Required Core (3 credit hours)

EXW 501 Research Statistics (3) or

NTR 502 Statistics in Research (3)

Concentration (9 credit hours)

NTR 501 Research Methods in Nutrition (3)

NTR 503 Designing Health Behavior Change Interventions (3)

NTR 519 Nutrition Therapies for Eating Disorders and Addictions (3)

NTR 520 Nutrition-Focused Physical Assessment (3)

NTR 524 Chronic Inflammation and Metabolic Syndrome: The Common Pathway for Cardiovascular Disease, Diabetes (3)

NTR 525 Complementary Nutrition (3)

NTR 529 Pediatric Nutrition (3)

NTR 533 Food Systems, Ethics and the American Diet (3)

NTR 535 Nutrigenomics (3)

NTR 537 Evidence-based Nutrition (3)

NTR 551 Geriatric Nutrition (3)

NTR 555 Nutrition and the Athlete (3)

NTR 598 Special Topics (3)

Research (3 credit hours)

NTR 500 Research Methods (3)

Open Electives (9 credit hours)

Culminating Experience (6 credit hours)

NTR 593 Applied Project (6)

Additional Curriculum Information

Students may take three additional courses from the concentration area to fulfill the open electives requirement. Other graduate courses may be applied toward open electives with program approval.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants must be either a registered dietitian nutritionist (RDN) or have completed an accredited didactic program in dietetics (DPD), and provide either a copy of the RDN credential or the DPD verification statement with their application.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- proof of registered dietitian status or DPD verification statement
- resume or curriculum vitae
- personal statement
- two references (one professional; one academic or professional)
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Applicants with RDN certification need to submit proof of registered dietitian status by accessing the Commission on Dietetic Registration's website (<https://www.cdrnet.org>) and complete the verification process using the online credential verification search. Applicants who have completed an accredited DPD need to provide a DPD verification statement with their application.

A personal statement of one or two pages (typed, double-spaced) is required and must address the following:

- significant professional responsibilities the applicant has held
- professional goals and reasons for desiring to enroll in this program
- strengths that will help the applicant succeed in this program and in reaching their professional goals
- personal interests in research, including, if applicable, studies involving the practice of dietetics

Contact information for the two references is required. References will be contacted via email to respond to a series of questions about the applicant. At least one reference must be an employer or supervisor.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/master-science-nutritional-science-dietetics/>) for program descriptions and to request more information.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Students will be able to evaluate scientific research using appropriate design and ethical principles.
- Graduates will be able to create public health recommendations on health and disease for populations and individuals, using evidence-based nutrition research.
- Graduates will be able to analyze data using statistical software to test a research hypothesis.

Career Opportunities: Nutritional science is a vital, growing profession with many career possibilities. In this field, graduates share their knowledge of food and nutrition to help people make healthful food choices.

Settings in which food and nutrition careers can be found include:

- community and public health organizations
- corporations
- food manufacturing industries
- government agencies
- hospitals and other medical facilities
- long-term care facilities
- nonprofit organizations
- schools

Population Health, MS (NHPOPHLMS)

Online Degree Search Title: Population Health, MS

Campus: Downtown Phoenix

Program Description: The MS program in population health combines multiple disciplines to prepare students to understand the complex factors that affect the health and well-being of populations.

The program addresses the interaction between health systems and other sectors of society, including the private sector; government, nonprofit and nongovernmental organizations; media; and academia to affect population health outcomes.

The curriculum includes a strong repertoire of systems science, quantitative and qualitative research methods, epidemiology and biostatistics, and ethics courses, together with applied experience.

Degree Requirements:

30 credit hours and a portfolio, or 30 credit hours and a thesis, or 30 credit hours including the required applied project course (POP 593).

Required Core (15 credit hours)

BMI 515 Applied Biostatistics in Medicine and Informatics (3)

POP 575 Social Determinants of Population Health (3)

POP 605 Population Health Systems Science and Theory (3)

POP 633 Population Health Ethics (3)

POP 644 Epidemiology in Population Health (3)

Research (3 credit hours)

POP 641 Qualitative Research Methods (3)

Other Requirements (0 or 3 credit hours)

POP 584 Internship (3)

Electives (6 or 9 credit hours)

Culminating Experience (0 or 6 credit hours)

POP 593 Applied Project (3) or

POP 599 Thesis (6) or

portfolio (0)

Additional Curriculum Information

This program has three culminating experience options: a thesis, an applied project or a portfolio with the completion of an internship. Students who select the thesis option enroll in POP 599 for six credit hours and complete six credit hours of electives. Students who select the applied project option enroll in POP 593 for three credit hours and complete nine credit hours of electives. Students who select the portfolio with internship option must identify an internship site and complete three credits of POP 584, prepare a portfolio and complete nine credits of electives. Electives should be selected in consultation with program faculty.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a relevant health or related field from a regionally accredited college or university.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- two references (academic or professional)
- personal statement
- resume or curriculum vitae
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Before starting the program, applicants are expected to have completed a statistics course (e.g., HCD 300, STP 226 or PSY 230).

A personal statement (1-2 pages, single-spaced) must be submitted describing the applicant's knowledge, skills, experience, and goals related to the population health field.

Contact information of two references is required. References will be contacted via email to submit a letter of recommendation and respond to a series of questions about the applicant. References should be professional and academic sources familiar with your potential to be successful in the field of population health.

Career Opportunities: The population health master's degree prepares graduates for careers in:

- county and state health departments
- national governmental health organizations
- nongovernmental organizations
- nonprofits

In these roles, graduates are especially well-suited to conduct assessments and data-driven analyses to contribute to policy-making or strategic planning affecting entire populations. Potential positions include:

- director of population health
- lead population health analyst, including informatics or data analysis
- lecturer in schools of population health
- manager of wellness strategy, communications or integration
- population, public, environmental or behavioral health program director, manager, coordinator or specialist
- public health initiatives coordinator

Professional Licensure: ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (<https://admission.asu.edu/academics/licensure>) webpage.

Graduates from this program are eligible to sit for the Certified in Public Health exam upon graduation and completion of three years of relevant work experience. More information on the credential is available on the National Board of Public Health website. <https://www.nbphe.org/eligibility/>

Population Health, PHD (NHPOPPLPHD)

Online Degree Search Title: Population Health, PhD

Campus: Downtown Phoenix

Program Description: The PhD in population health brings together multiple disciplines, illustrating the complex factors that affect the health and well-being of populations.

The program addresses the interaction between health systems and other sectors of society --- including the private sector, government, nonprofit and academia --- to affect the health outcomes of entire populations.

Students personalize their program of study by completing courses from one of four tracks:

- complex adaptive systems: teaches students about theory, principles, models and techniques used to analyze complex systems and data as applied to population health
- dissemination and implementation science: trains students to identify, translate and implement research that will enable rapid dissemination of evidence
- health equity: trains doctoral students to conduct empathetic research, incorporating the lived experience of populations vulnerable to health disparities into applied research

- health services research and policy: enables students to examine access to and use of health care services, costs, quality and safety of care, health care delivery models, organization, financing, and outcomes of health care
- urban environments for health: prepares students to meet challenges from an evidence-based and transdisciplinary environmental perspective

Required courses reinforce a strong repertoire of systems science, quantitative and qualitative research methods, ethics, epidemiology and biostatistics. The practicum offers an applied experience, and the dissertation requires novel research on population health.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation - Complex Adaptive Systems Track, or 84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation - Dissemination and Implementation Science Track, or 84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation - Health Equity Track, or 84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation - Health Services Research and Policy Track, or 84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation - Urban Environments for Health Track.

Required Core (15 credit hours)

BMI 515 Applied Biostatistics in Medicine and Informatics (3)

EXW 645 Advanced Applied Methods and Data Analysis (3)

POP 605 Population Health Systems Science and Theory (3)

POP 633 Population Health Ethics (3)

POP 641 Qualitative Research Methods (3)

Track (15 credit hours)

Electives (30 credit hours)

Research (6 credit hours)

EXW 700 Research Methods (3)

EXW 701 Scientific Grant Writing (3)

Other Requirement (6 credit hours)

POP 591 Seminar: Evaluating the Population Health Literature (3)

POP 780 Population Health Practicum (3)

Culminating Experience (12 credit hours)

POP 799 Dissertation (12)

Additional Curriculum Information

Students select from tracks in complex adaptive systems, dissemination and implementation science, health equity, health services research and policy, or urban environments for health.

Students entering the doctoral program with a master's degree in a related discipline may count up to 30 credit hours from the master's degree toward the total credit hours, with program approval.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's or a master's degree in any field from a regionally accredited institution. Preference is given to applicants who completed a data-based research thesis during their master's degree program.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- resume or curriculum vitae
- three references (academic or professional)
- writing sample (6 to 10 pages)
- oral interview (via videoconference)
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

All applicants must have completed an undergraduate or graduate-level course in epidemiology (e.g., EXW 642, HEP 444, or NTR 557) and a graduate-level research statistics course (e.g., EXW 501 or NTR 502).

It is expected that students admitted to the program have documented academic training and a strong interest in public health, health care or population health. Thus, depending on the student's academic training, background, scholarly interests and focus area, they may be asked to take course deficiencies prior to or concurrently with graduate course enrollment.

The personal statement should indicate research or scholarly interest, primary program area, statement of career goals and the name of one or more potential faculty mentors. Applicants are strongly encouraged to contact one or more possible mentors to discuss their research interests prior to submitting their application.

Contact information for three references is required. References will be contacted via email to submit a letter of recommendation and respond to a series of questions about the applicant. References must be academic or professional sources who are familiar with the applicant's potential to be successful in the field of population health.

Career Opportunities: Students are strongly encouraged to pursue postdoctoral research opportunities upon graduation.

Graduates of this interdisciplinary program are prepared to become:

- executives or analysts in private industry, such as health IT startups or medical device, biotechnology, health insurance or health care delivery organizations
- faculty at research-intensive universities in schools of population health, public health, medicine or health sciences
- leaders and directors of health in local, state and federal government agencies
- program directors and officers for global health organizations, such as the World Health Organization or the World Bank
- program directors and officers of local and national nongovernmental foundations such as the American Cancer Society or the American Diabetes Association
- research or policy analysts at federal health agencies, such as the National Institutes of Health or the Centers for Disease Control and Prevention

Career examples include:

- entrepreneur
- epidemiologist
- global health professional
- health information manager or director
- health scientist
- population health analyst or manager
- postsecondary public health teacher
- professor
- public health consultant or policy advisor
- research scientist

Science of Health Care Delivery (Certificate), Certificate (NHHCDGRCT)

Online Degree Search Title: Science of Health Care Delivery (Graduate Certificate)

Campus: Online

Program Description: The online, self-paced certificate program in science of health care delivery provides students a foundation in the functions and features of health care systems, enabling them to address the current and future needs of the workforce in the health care industry.

Students can choose coursework from three focus areas:

- health policy and advocacy
- health systems management
- performance improvement in health care

Credits earned from this certificate program may be applied to the MS in science of health care delivery (<https://degrees.apps.asu.edu/masters-phd/major/ASU00/NHSHCDMS/science-of-health-care-delivery-ms>) for students interested in furthering their knowledge in this field.

Degree Requirements:

15 credit hours.

Required Core (9 credit hours)

HCD 502 Foundations of U.S. Health Systems and Design (3)

HCD 511 Health Economics and Policy (3)

HCD 575 Health Care Transformation and Leadership (3)

Focus Area (6 credit hours)

Additional Curriculum Information

Students select two courses (six credit hours) from any of the following focus areas: health policy and advocacy, health systems management, and performance improvement in health care. Students should contact the academic unit for a list of approved focus area courses.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution. The following disciplines are preferred: business or law (health care and business administration, economics, finance or law), engineering (biomedical engineering), general science (biology or physiology), health-related field (nursing, health policy or public health), or math or computer science (statistics or computer science).

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- resume or curriculum vitae
- one reference (academic or professional)
- proof of English language proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

A personal statement must be submitted that explains how the applicant plans to contribute to the health care system after obtaining the certificate, how the program will help the applicant achieve their goals, what the applicant's career aspirations are and what interested the applicant in the program.

Contact information for one reference is required. The reference will be contacted via email to submit a letter of recommendation. The reference must be an academic or professional source; recommendations from friends or relatives are not accepted.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/certificates/graduate-certificate-science-health-care-delivery/>) for program descriptions and to request more information.

Career Opportunities: Upon completion of this program, graduates will have specialized in a highly applicable industry and gain an edge in a competitive job market.

This innovative certificate program teaches skills and knowledge relevant for:

- C-suite executives and administrators
- frontline staff (respiratory therapists, occupational therapists, physical therapists and dietitians)
- health care providers (physicians, physician assistants, nurse practitioners and nurses)
- students in health-related disciplines

Contact Information:

HLTHN 401AA

Speech and Hearing Science, PHD (LAHEARPHD)

Online Degree Search Title: Speech and Hearing Science, PhD

Campus: Tempe

Program Description: The PhD program in speech and hearing science is an interdisciplinary program that trains scholars in basic and applied research in the fields of speech, language, literacy and hearing sciences.

Students develop a strong foundation to conduct impactful research by pursuing an individualized program with the unifying theme of human communication and disorders.

This program's faculty are in a unique position to provide integrated training experience because of their focus on innovative approaches to the field. Faculty members' backgrounds include expertise in speech-language pathology and auditory neural prosthetics with distinctions in education, psychology, engineering, neuroscience and health care.

Students in this program may tailor their courses to their specific interests under the guidance of their faculty committee. This doctoral program is also available with concentrations in auditory and language neuroscience (<https://degrees.apps.asu.edu/masters-phd/major/ASU00/NHSHSALPHD/speech-and-hearing-science-auditory-and-language-neuroscience-phd>) and translational genetics of communication abilities (<https://degrees.apps.asu.edu/masters-phd/major/ASU00/NHSHSTGPHD/speech-and-hearing-science-translational-genetics-of-communication-abilities-phd>).

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Core (2 credit hours)

SHS 701 Scientific Writing and Presentation in Communication Sciences and Disorders I (1)

SHS 702 Scientific Writing and Presentation in Communication Sciences and Disorders II (1)

Focused Electives (12 credit hours)

Research (21 credit hours)

SHS 792 Research (12)

research methods and statistics (9)

Electives or Additional Research (28 credit hours)

Other Requirements (9 credit hours)

professional seminars (9)

preliminary exam (0)

comprehensive exams (0)

Culminating Experience (12 credit hours)

SHS 799 Dissertation (12)

Additional Curriculum Information

Students entering the doctoral program with a master's degree in a related discipline may count up to 28 credit hours from the master's degree toward the total credit hours, with program approval.

Under guidance of a faculty mentor and supervisory committee, students complete 12 credit hours of restricted elective content-area coursework within speech and hearing science and other disciplines that can be tailored to the student's research interests. Students must fulfill teaching, grant writing and career development competencies through the professional seminars requirement.

The preliminary exam research project, completed during the first three semesters of the program, provides students with a jump start into research, preparing them for their subsequent dissertation.

Before commencing dissertation research, the student must pass written and oral comprehensive examinations covering their field of study.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's degree in a related field and do not wish to earn a clinical master's degree, or if they have earned a master's degree or equivalent in speech and hearing science, psychology, linguistics or a related discipline from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts of undergraduate and graduate study
- personal statement
- three references (academic or professional)
- resume or curriculum vitae
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The personal statement, typically one to two double-spaced pages, should address the student's motivation to pursue a PhD with a specific faculty mentor in the program and include evidence of potential to succeed in a research-intensive doctoral program, as well as goals for the future. Examples of evidence of potential to succeed include technical skills, clinical experiences, and research achievements and interests.

An optional writing sample (6 to 10 pages) may be substituted with the program application. Writing samples include publications, research manuscripts, or a sample of academic writing.

Contact information of three references is required. References will be contacted via email to submit a letter of recommendation and respond to a series of questions about the applicant. References should be individuals who can speak to one or more of the following: the applicant's academic performance, clinical performance or potential to succeed in a research-intensive doctoral program. References are typically faculty, clinical or research supervisors. If the applicant has spent some time away from a research or academic environment, it is still recommended that they include references from previous experiences, in addition to a more recent clinical or research supervisor.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Upon graduation from the Doctorate of Philosophy in speech and hearing science, students will be able to develop curriculum and instruct in key knowledge areas in their particular area of expertise within speech and hearing science.
- Students completing the Doctor of Philosophy in speech and hearing science will engage with scholars in academic and professional settings.
- Students completing the Doctor of Philosophy in speech and hearing science will master the key concepts related to research in the field at an advanced level.

Career Opportunities: Doctoral-level scientists in the field of speech and hearing science are well situated to pursue a position in which they can lead an independent research program, such as university professor, or research scientist in the private or public sector.

There is a particular need for doctoral-level scientists with speech-language pathology or audiology backgrounds in tenure-track academic positions.

Graduates are also prepared for careers in industry or health care environments.

Career examples include:

- medical science liaison
- professor or community college teaching faculty
- program officer in a nonprofit or government agency
- research scientist in a for-profit or nonprofit entity

Speech and Hearing Science (Auditory and Language Neuroscience), PHD (NHSALPHD)

Online Degree Search Title: Speech and Hearing Science (Auditory and Language Neuroscience), PhD

Campus: Tempe

Program Description: The PhD program in speech and hearing science with a concentration in auditory and language neuroscience enables students to develop a strong foundation in basic and applied neuroscience, conduct impactful research related to healthy auditory and language abilities, and explore the neural bases of communication disorders. This program's expert faculty are in a unique position to provide an integrated training experience because of their focus on innovative, cutting-edge approaches to the field of speech, language and hearing science, such as neuroimaging techniques and neuromodulation.

Faculty backgrounds include engineering, neuroscience and psychology, in addition to expertise in speech-language pathology and auditory neural prosthetics. As such, this program leverages strong research and clinical relationships between ASU and Barrow Neurological Institute, Mayo Clinic, and Banner Alzheimer's Institute. Within ASU, rich collaborations exist between the College of Health Solutions, the School of Life Sciences, the Ira A. Fulton Schools of Engineering, the Biodesign Institute and the Department of Psychology.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Core (2 credit hours)

SHS 701 Scientific Writing and Presentation in Communication Sciences and Disorders I (1)

SHS 702 Scientific Writing and Presentation in Communication Sciences and Disorders II (1)

Concentration (12 credit hours)

Research (21 credit hours)

SHS 792 Research (12)

research methods and statistics (9)

Electives or Additional Research (28 credit hours)

Other Requirements (9 credit hours)

professional seminars (9)

preliminary exam (0)

comprehensive exams (0)

Culminating Experience (12 credit hours)

SHS 799 Dissertation (12)

Additional Curriculum Information

Students entering the doctoral program with a master's degree in a related discipline may count up to 28 credit hours from the master's degree toward the total credit hours, with program approval.

In collaboration with faculty, students select concentration courses from a restricted list that focuses on issues related to auditory and language neuroscience, particularly the molecular, structural and anatomical aspects.

The preliminary exam research project must be within the field of auditory or language neuroscience. This formal research experience during the first three semesters of the program provides students with a jump start into research, preparing them for their subsequent dissertation research.

Before commencing dissertation research, the student must pass written and oral comprehensive examinations covering their field of study.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's degree in a related field and do not wish to earn a clinical master's degree, or if they have earned a master's degree or equivalent in speech and hearing science, psychology, linguistics, or a related discipline from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts of undergraduate and graduate study
- personal statement

- three references (academic or professional)
- resume or curriculum vitae
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The personal statement, typically one to two double-spaced pages, should address the student's motivation to pursue the PhD degree with a specific faculty mentor in the program, include evidence of potential to succeed in a research-intensive doctoral program, and describe goals for the future. Examples of evidence of potential to succeed include technical skills, clinical experiences, and research achievements and interests.

An optional writing sample (6 to 10 pages) may be submitted with the program application. Writing samples include publications, research manuscripts or a work of academic writing.

Contact information of three references is required. References will be contacted via email to submit a letter of recommendation and respond to a series of questions about the applicant. References should be individuals who can speak to one or more of the following: the applicant's academic performance, clinical performance or potential to succeed in a research-intensive doctoral program. References are typically faculty, clinical or research supervisors. If the applicant has spent some time away from a research or academic environment, it is still recommended that they include references from those previous experiences, in addition to a more recent clinical or research supervisor.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Students completing the Doctor of Philosophy in speech and hearing science with a concentration in auditory and language neuroscience will be able to develop curriculum and instruct in key knowledge areas within the fields of auditory and language neuroscience.
- Students completing the Doctor of Philosophy in speech and hearing science with a concentration in auditory and language neuroscience will engage with scholars in academic and professional settings.
- Students completing the Doctor of Philosophy in speech and hearing science with a concentration in auditory and language neuroscience will master the key concepts related to research in the field at an advanced level.

Career Opportunities: Doctoral-level scientists in the field of speech and hearing science are well situated to pursue opportunities to lead independent research programs as university professors or research scientists in the private or public sector.

There is a particular need for doctorate-prepared individuals with speech-language pathology or audiology backgrounds in tenure-track academic positions.

Career examples include:

- medical science liaison
- professor or community college teaching faculty
- program officer in a nonprofit or government agency
- research scientist in a for-profit or nonprofit entity

Speech and Hearing Science (Translational Genetics of Communication Abilities), PHD (NHSHSTGPHD)

Online Degree Search Title: Speech and Hearing Science (Translational Genetics of Communication Abilities), PhD

Campus: Tempe

Program Description: The PhD program in speech and hearing science with a concentration in translational genetics of communication abilities provides doctoral students with training in an innovative approach to the clinical sciences that has been pioneered at ASU. In this approach, the concepts of precision medicine are applied to all disciplines within communication sciences and disorders.

Training in molecular genetics and bioinformatics equips students to investigate the interactions among genetic, brain-based and behavioral traits.

Prior training in genetics is not required. Knowledge of genotype-phenotype associations provides the foundation for the translational components of this program:

- early identification and intervention
- individualized management
- interprofessional approaches

Students have the option to focus primarily on basic sciences aspects or clinical translations, or to explore both.

This program leverages strong research and clinical expertise at the College of Health Solutions across clinical linguistics and its expertise in the biosciences and translational clinical sciences. Collaborating units at ASU include the Biodesign Institute, the School of Life Sciences and many subspecialty areas, such as bioinformatics and psychology.

Students in this doctoral program are taught the skills to discover and understand networks of genotype-phenotype associations and to contribute to more effective clinical management of communication disorders using preventive, targeted and interprofessional methods.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Core (2 credit hours)

SHS 701 Scientific Writing and Presentation in Communication Sciences and Disorders I (1)

SHS 702 Scientific Writing and Presentation in Communication Sciences and Disorders II (1)

Concentration (12 credit hours)

Research (21 credit hours)

SHS 792 Research (12)

research methods and statistics (9)

Electives or Additional Research (28 credit hours)

Other Requirements (9 credit hours)

professional seminars (9)

preliminary exam (0)

comprehensive exams (0)

Culminating Experience (12 credit hours)

SHS 799 Dissertation (12)

Additional Curriculum Information

Students entering the doctoral program with a master's degree in a related discipline may count up to 28 credit hours from the master's degree toward the total credit hours, with program approval.

Concentration coursework focuses on issues related to translational genetics and is selected in collaboration with faculty. All doctoral graduates with this concentration are required to have foundational knowledge in genetics. Students must fulfill teaching, grant writing, and career development competencies through the professional seminars requirement.

The preliminary exam research project is to be within the field of translational genetics of communication abilities. This formal research experience during the first three semesters of the program provides students with a jump start into research, preparing the student for their subsequent dissertation.

Prior to commencing dissertation research, the student must pass written and oral comprehensive examinations covering their field of study.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's degree in a related field and do not wish to earn a clinical master's degree, or if they have earned a master's degree or equivalent in speech and hearing science, psychology, linguistics or a related discipline from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts

- personal statement
- three references (academic or professional)
- resume or curriculum vitae
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The personal statement, typically one to two double-spaced pages, should include an explanation of the student's motivation to pursue a PhD with a specific faculty mentor in the program, evidence of potential to succeed in a research-intensive doctoral program, and goals for the future. Examples of evidence of potential to succeed include technical skills, clinical experiences, and research achievements and interests.

An optional writing sample (6 to 10 pages) may be submitted with the program application. Writing samples include publications, research manuscripts or a sample of academic writing.

Contact information of three references is required. References will be contacted via email to submit a letter of recommendation and respond to a series of questions about the applicant. References should be individuals who can speak to one or more of the following: academic performance, clinical performance or potential to succeed in a research-intensive doctoral program. They are typically faculty, clinical or research supervisors. If the applicant has spent some time away from research or academia, it is still recommended that they include references from experiences that preceded their absence, in addition to a more recent clinical or research supervisor.

Career Opportunities: Doctoral-level scientists in the field of speech and hearing science are well situated to pursue positions in which they can lead independent research programs, such as a university professor or research scientist in the private or public sector.

There is a particular need for doctorate-level scientists with speech-language pathology or audiology backgrounds in tenure-track academic positions.

Career examples include:

- medical science liaison
- professor or community college teaching faculty
- program officer in a nonprofit or government agency
- research scientist in for-profit or nonprofit entities

Strength and Conditioning, MS (NHSTRCDMS)

Online Degree Search Title: Strength and Conditioning, MS

Campus: Downtown Phoenix

Program Description: The MS program in strength and conditioning focuses on specialized knowledge of human physiology and movement mechanics to optimize the physical abilities of active groups, including athletic and tactical populations, and to prevent injury-related problems.

Required courses address advances in health and performance monitoring, how to design successful exercise and recovery programs for maximum physical performance, and coaching strategies that motivate increased individual effort in sport or work.

Students gain practical experience that hones their coaching skills and refines their abilities to motivate individuals to achieve the increased workloads that are necessary for performance improvement.

This program prepares students to sit for certification examinations offered through the National Strength and Conditioning Association to become certified strength and conditioning specialists, tactical strength and conditioning facilitators, or certified performance sports scientists.

Degree Requirements:

30 credit hours and a written exam.

Required Core (24 credit hours)

KIN 520 Applied Sport Psychology (3)

KIN 530 Exercise and Sport Physiology (3)

KIN 540 Sport Biomechanics (3)
NTR 555 Nutrition and the Athlete (3)
SSP 501 Data Collection, Analysis and Interpretation in Strength and Conditioning (3)
SSP 530 Advanced Performance Programming (3)
SSP 534 Measurement and Monitoring in Sport and Fitness (3)
SSP 560 Performance Sports Coaching (3)

Other Requirements (6 credit hours)
SSP 584 Internship (6)

Culminating Experience (0 credit hours)
written comprehensive exam (0)

Additional Curriculum Information

The written comprehensive exam covers the three coaching application courses SSP 530, SSP 534 and SSP 560.

The internship is a fully immersive experience working under a certified strength and conditioning specialist. Hours are spent learning all aspects of the job in addition to best practices for improving athletic performance.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in exercise science, kinesiology, sports science, exercise physiology, human movement, physical education or a related field from a regionally accredited institution. Applicants with a bachelor's degree in another area may apply and be considered if they can demonstrate that they have experience in strength and conditioning.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- two references (academic or professional)
- letter of intent
- resume or curriculum vitae
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

If an applicant does not have a bachelor's degree in one of the areas listed above but has strength and conditioning experience, evidence must be included in either the professional resume or the letter of intent.

All applicants must have basic competencies in human anatomy and physiology with laboratories (BIO 201 and BIO 202), exercise and sport physiology (SSP 315 and SSP 316), and applied anatomy and biomechanics of sport and movement (SSP 325).

The letter of intent should address the applicant's area of professional or scholarly interest, their professional goals, and relevant experience, background and training.

Contact information for two references is required. References will be contacted via email to respond to a series of questions about the applicant.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Evaluate the skills and abilities needed of an athlete to perform in a specific sport/activity.
- Create advanced strength and conditioning programs for sport or tactical (police, military, firefighter) populations to enhance performance and reduce participant's risk of injury.
- Apply the appropriate coaching intervention based on their evaluation of the participant and their desired performance outcomes.

Career Opportunities: Graduates have acquired the fundamental skills not only to be a strength and conditioning coach but also to pursue a sports scientist career, a career as a tactical performance professional, or a career working with high-activity occupations (i.e., members of the military, police officers, firefighters or emergency medical technicians).

Career opportunities are available as:

- athletic trainers
- exercise physiologists
- fitness and wellness coordinators
- fitness trainers and aerobics instructors
- sports performance coaches or scouts
- sports scientists

Professional Licensure: ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (<https://admission.asu.edu/academics/licensure>) webpage.

Integrative Sciences and Arts, College of

Applied Biological Sciences, MS (TSAPBIOSMS)

Online Degree Search Title: Applied Biological Sciences, MS

Campus: Polytechnic

Program Description: The MS program in applied biological sciences offers advanced instruction in the ecology and sustainable management of natural and urban ecosystems. Rigorous programs of study involving field and laboratory work are custom-designed to apply ecological or biological principles to problems in species or ecosystem conservation. All programs culminate with the completion of a research-based thesis or applied project.

The program is supported by faculty members with backgrounds in:

- desert horticulture
- ecological restoration
- environmental microbiology
- environmental stress physiology
- plant-fungal ecology
- plant systematics
- riparian and stream ecology
- wildlife biology

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Applied Biological Sciences (Applied Biological Sciences), BS
- Applied Biological Sciences (Applied Ecology and Preveterinary Medicine), BS
- Applied Biological Sciences (Natural Resource Ecology), BS
- Applied Biological Sciences (Preveterinary Medicine), BS
- Applied Biological Sciences (Secondary Education in Biology), BS
- Applied Biological Sciences (Sustainable Horticulture), BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a thesis, or 30 credit hours including the required applied project course (ABS 592 and ABS 593).

Required Core (3 credit hours)

ABS 550 Vegetation Dynamics (3) or

ABS 555 Wildlife Dynamics (3)

Electives or Research (21 credit hours)

Culminating Experience (6 credit hours)

ABS 592 Research (3) and ABS 593 Applied Project (3) or

ABS 599 Thesis (6)

Additional Curriculum Information

The electives coursework is chosen to support the student's educational objectives.

Students choose a thesis or applied project option. A final oral examination covering the thesis and related subject matter is required.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Integrative Sciences and Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- resume
- statement of intent
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Applicants are expected to have completed 18 credit hours in biological sciences and closely related courses. Specific fields of study may have specific expectations regarding courses taken at the undergraduate level. Applicants not meeting these course requirements may be considered for admission with deficiencies.

The statement of intent should not exceed 600 words and should explain the applicant's interest in environmental resources, as well as their academic background and educational objectives.

The letters of recommendation should be from references who are qualified to comment on the applicant's potential in the selected area of study.

Department faculty evaluate the applications and supporting materials and recommend to Admission Services whether the applicant should be granted admission, either regular or provisional, or denied admission. If admission is provisional, the Graduate College specifies in its letter of admission the provisions that need to be met to gain regular status. The school informs successful applicants of the procedures for enrollment.

Career Opportunities: Professionals with expertise in the study of evolution, natural history and conservation of plants and animals are in high demand across sectors and industries, including county and state organizations, as well as in community management. Those with skills in laboratory work, field research and data analysis are valuable to businesses and institutions building deep connections within leading scientific and technological industries to create innovative solutions to challenging global problems in a technologically focused world. Studying biology can lead to a wide range of careers, such as research, teaching, health care and policy development.

Career examples include:

- biologists
- fish and wildlife biologists
- medical scientists
- natural science managers
- postsecondary biological science teachers

Counseling, MC (EDCOUNMC)

Online Degree Search Title: Counseling, MC

Campus: Tempe, Online

Program Description: The MC program in counseling is approved by the Arizona Board of Behavioral Health Examiners (<https://www.azbbhe.us/node/553> (<https://www.azbbhe.us/node/553>)).

The mission of the 60 credit hour program is to prepare students to become licensed professional counselors in Arizona and other states with comparable licensure requirements.

Students in the Master of Counseling program, with its strong focus on multicultural counseling across the life span, learn to promote the health of individuals, families, groups and organizations in a diverse society.

Faculty research and clinical foci include:

- advocacy
- children and adolescents
- counseling process and outcome
- couple and family relationships
- crisis assessment
- culturally responsive treatment
- mental health disparities
- nonbinary stress and resilience
- play therapy

The program instills in students the importance of research in advancing the counseling profession. The crucial link between science and practice is evident in the three complementary functions of the program's state-of-the-art Counselor Training Center: clinical service provision, high-quality training, and innovative process and outcome research.

The Master of Counseling program endorses the American Counseling Association's Code of Ethics and the following American Counseling Association competencies: ALGBTIC Competencies for Counseling LGBTQIA Individuals (2012), Competencies for Counseling the Multiracial Population (2015), Multicultural and Social Justice Counseling Competencies (2015), Competencies for Addressing Spiritual and Religious Issues in Counseling (2009) and Multicultural Career Counseling Competencies (2009).

Degree Requirements:

60 credit hours and a thesis, or 60 credit hours and a written comprehensive exam.

Required Core (39 credit hours)

CED 501 Introduction to Research and Evaluation in Counseling (3)

CED 522 Theories of Counseling and Psychotherapy (3)

CED 523 Psychological Tests (3)

CED 529 Lifespan Human Development (3)

CED 534 Occupations and Careers (3)

CED 545 Assessment and Diagnosis (3)

CED 567 Group Dynamics and Counseling (3)

CED 576 Foundations of Counseling (3)

CED 577 Counseling Prepracticum (3)

CED 645 Professional Issues and Ethics (3)

CED 671 Multicultural Counseling (3)

CED 672 Couple and Family Counseling (3)

CPY 673 Trauma in Counseling (3)

Electives or Research (6 or 12 credit hours)

Other Requirements (9 credit hours)

CED 680 Practicum: Clinic (3)

CED 684 Internship: Counseling (6)

Culminating Experience (0 or 6 credit hours)
CED 599 Thesis (6) or
written comprehensive exam (0)

Additional Curriculum Information

Students choose either a thesis or written comprehensive exam pathway. The written comprehensive exam is for students in the practitioner pathway, and they take 12 credit hours of elective coursework. The thesis option is for students who are focusing their program on research, and they take six credit hours of research coursework plus six credit hours of thesis.

The clinical portion of the program comprises CED 680 Practicum: Clinic and CED 684 Internship: Counseling. These are required for all students. CED 580 Practicum Clinic and CED 584 Internship may be taken by students who need to log required clinical hours after they have completed CED 680 and CED 684. CED 580 and CED 584 are not required unless additional clinical hours are needed.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Integrative Sciences and Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or they must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- two- to three-page personal statement
- at least two, and a maximum of three, letters of recommendation
- proof of English proficiency

Additional Admission Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. This program requires a TOEFL iBT score of at least 100.

Finalists may be invited to submit supplemental materials in support of their application, including video recordings of their responses to a set of questions. Applicants will be provided with more information about these materials during the review process.

Nonacademic, Professional or Life Experiences:

Applicants are required to submit a two- to three-page personal statement (12 pt. Times New Roman font with 1" margin, double-spaced) that indicates their qualifications (e.g., professional experiences and personal attributes) and interest in ASU's MC program. Specifically, applicants are asked to describe how their education and training, as well as volunteer and professional experiences, inform why they want to pursue the Master of Counseling degree. They also should outline how the program will help them meet their future goals. Applicants are expected to discuss their ability to work with and be sensitive to the needs of a multicultural and diverse society, including members of diverse racial and ethnic groups and sexual minority individuals.

Recommendations:

At least two, and at most three, recommendation letters are required. These should be from persons able to evaluate the applicant's academic potential (e.g., faculty member) and professional or volunteer experience (e.g., a supervisor). Applicants are discouraged from asking for recommendations from individuals or acquaintances who have not overseen their professional, volunteer or academic work.

Students should see the program website for application deadlines.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/master-counseling>) for program descriptions and to request more information.

Career Opportunities: Graduates provide clinical services in a range of settings, such as community agencies, hospitals, private practice and university counseling centers. The program also prepares graduates who wish to pursue doctoral-level studies.

Professional Licensure: ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (<https://admission.asu.edu/academics/licensure>) webpage.

Graduates of the Master of Counseling program meet the requirements for licensure as a professional counselor with the Arizona Board of
2024-25 Academic Catalog Archive 1087

Behavioral Health Examiners. Because requirements vary by state, students should consult the licensing requirements for the state in which they intend to reside.

CED 645 Professional Issues and Ethics (3)

CED 671 Multicultural Counseling (3)

CED 672 Couple and Family Counseling (3)

CPY 673 Trauma in Counseling (3)

Concentration (9 credit hours)

CED 510 Introduction to School Counseling (3)

CED 511 Career Development and Advanced Educational Planning (3)

CPY 691 Seminar (3)

Electives (3 credit hours)

Other Requirements (9 credit hours)

CED 680 Practicum: Clinic (3)

CED 684 Internship: Internship in School Counseling (6)

Culminating Experience (0 credit hours)

written comprehensive exam (0)

Admission Requirements: Applicants must fulfill the requirement of both the Graduate College and the College of Integrative Sciences and Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in psychology or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admissions application and application fee
- official transcripts
- personal statement

- two letters of recommendation
- proof of English proficiency

Additional Admission Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. This program requires a TOEFL score of at least 100 (iBT, taken in a testing center).

The Master of Counseling program requires applicants to submit a two- to three-page personal statement (12 pt. Times New Roman font with 1-inch margins, double-spaced) that indicates their qualifications (e.g., professional experiences and personal attributes) and interest in the program. Specifically, applicants should describe how their education and training, as well as volunteer and professional experiences, inform why they want to pursue the degree. Applicants should also outline how the program will help them meet future career goals. Applicants are expected to discuss their ability to work with and be sensitive to the needs of a multicultural and diverse society, including members of diverse racial and ethnic groups and sexual minority individuals.

Finalists may be invited to submit supplemental materials in support of their application (e.g., video recordings of their responses to a set of questions) and will be provided with more information about this during the review process.

Career Opportunities: Graduates are eligible to work in a variety of school systems (public, private and charter schools) and can provide consultation and counseling services to school systems. This degree can also lead to school-based administrative positions. Graduates with this concentration, using their skill sets in both counseling and administration, are eligible for employment in a variety of settings (e.g., schools, mental health agencies and practices, and consultant agencies) and in varied roles.

Career examples include:

- mental health clinician
- mental health counselor
- school administrator
- school counselor

Professional Licensure: ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (<https://admission.asu.edu/academics/licensure>) webpage.

This program leads to professional licensure in mental health counseling and a School Counselor, PreK-12 Certificate.

Counseling Psychology, PHD (EDCPSYPHD)

Online Degree Search Title: Counseling Psychology, PhD

Campus: Tempe

Program Description: This American Psychological Association-accredited PhD program in counseling psychology adheres closely to the scientist-practitioner training model in preparing graduates for employment in academic and clinical settings.

Although faculty interests are diverse, there is a common emphasis on using empirical data as the basis for culturally-responsive professional practice. The program boasts a strong commitment to diversity, equity and inclusion as evidenced in course offerings, clinical training, professional development activities and research foci.

Faculty research foci include the following:

- acculturative stress
- cultural socialization
- LGBTQ+ mental health
- mental health disparities
- microaggressions
- psychotherapy process and outcome
- retention in graduate education
- social and personal relationships

- socioeconomic status and financial stress
- trans and nonbinary minority stress and resilience

Students enjoy exceptional clinical opportunities including placement in local hospitals, university and college counseling centers, community agencies and assessment sites. The program's state-of-the-art Counselor Training Center provides practicum experiences with campus and community clients as well as clinical supervision experiences. The center supports three complementary functions: clinical service provision, high-quality training, and innovative process and outcome research.

Degree Requirements:

115 credit hours, a written comprehensive exam, a prospectus and a dissertation.

Counseling Essentials Core Area (27 credit hours)

Additional Curriculum Information

Students will take four semesters of CPY635 at one credit hour per semester. For the diversity course elective in the Counseling Theory and Method coursework, students will select from a list of electives in Area 5 as provided in the Graduate Student Handbook. Research courses should

be selected in consultation with your program advisor.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Integrative Sciences and Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or they must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- a completed biographical information form
- writing sample
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The personal statement should be single-spaced, roughly 600--800 words, and it should describe the applicant's history, academic and professional goals, and reasons for selecting the counseling psychology program at ASU.

Applicants must submit a sample of their expository writing (e.g., taken from a paper prepared for a course or a report on a project the applicant has completed in this field) not to exceed 1MB.

At least two of the recommendation letters must be from persons familiar with the applicant's academic work.

Career Opportunities: Graduates provide clinical services in a variety of settings, such as community agencies, hospitals, private practice and university counseling centers. They also are employed in academic positions in universities across the country.

Professional Licensure: ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (<https://admission.asu.edu/academics/licensure>) webpage.

Graduates of the counseling psychology doctoral program meet the licensure requirements of most states. Because requirements vary by state, it is recommend that students consult the licensing requirements for the state in which they intend to reside.

Integrative Social Science, MS (LSISSMS)

Online Degree Search Title: Integrative Social Science, MS

Campus: Polytechnic

Program Description: The MS in integrative social science is an advanced degree program that cross-educates students in the social sciences in order to meet the complex issues that confront human society in a technologically sophisticated world.

The program emphasizes the bridging of traditional disciplinary boundaries to immerse students in theories available across multiple social science disciplines. Thus, graduates of the program are prepared with theory and research skill sets that allow them to integrate multiple perspectives when addressing modern social problems.

The Master of Science program in integrative social science is intended for foresighted students who wish to make a positive impact on society. The integrative approach emphasizes both theoretical analysis and practical problem-solving abilities. The degree puts students in an excellent position to pursue either doctoral work in the social sciences or a professional career in fields that seek to improve the quality of life in society.

Students learn skills desired in many professional fields, including creative problem-solving, the capacity to work effectively in both team-centered

and self-directed contexts, advanced analysis of complex social and global issues, how to research complex problems, and professional writing and communication skills.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Integrative Social Science, BS
- Political Science, BS
- Science, Technology and Society, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours including a thesis, or 30 credit hours including the required applied project course (ISS 593).

Required Core (9 credit hours)

ISS 501 Advanced Integrated Social Research Methods (3)

ISS 502 Advanced Seminar in Integrated Social Science (3)

ISS 505 Multivariate Methodologies of Social Science (3)

Electives or Research (15 or 18 credit hours)

Culminating Experience (3 or 6 credit hours)

ISS 593 Applied Project (3) or

ISS 599 Thesis (6)

Additional Curriculum Information

Students choose either the thesis or applied project option.

For elective coursework, students choose from a list of preapproved courses for a total of 15 to 18 credit hours. Other courses may be used with approval from the academic unit.

Students are highly encouraged to participate in an internship for elective coursework. Internships are a structured practical experience that follows a contract or plan that is supervised by faculty and practitioners. Students should contact the academic unit for a list of possible elective courses and internship opportunities.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Integrative Sciences and Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any social science or interdisciplinary field, such as political science, sociology, philosophy, economics, psychology, public policy, administration or a closely related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or they must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Career Opportunities: Professionals with expertise in analyzing complex social and global issues are in high demand across sectors and industries, including business, public administration, politics and community organizations. Those who possess skills in the analysis of social phenomena and complex social problems are valuable to businesses and institutions that rely on data-driven strategies for engagement and growth.

Career examples include:

- administrators
- government agency analysts and managers

- social and community service managers
- social science research analysts
- solutions resource specialists

Liberal Studies, MLSt (LAMLSMLS)

Online Degree Search Title: Liberal Studies, MLSt

Campus: Downtown Phoenix, Polytechnic, Online

Program Description: The MLSt is an advanced degree that situates knowledge and know-how at the intersections of culture, community and profession. Its emphasis on integrative knowledge and cross-disciplinary approach cultivates students' capacity to see and understand the complex reality of societal problems and navigate challenges across cultural, professional and personal contexts. Communication, holistic analysis, perspective-taking and research are featured aspects of all core courses.

A unique aspect of the degree is the customization of learning. Working closely with faculty advisors, Master of Liberal Studies students build the majority of their program by choosing from a wide-ranging list of elective courses that best meet their interests and needs. With courses from across the humanities, social sciences, arts and natural sciences, this degree prepares students to become master learners and problem-solvers. The degree culminates in an applied learning experience under the guidance of a seasoned faculty member.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- English, BA
- History, BA
- Interdisciplinary Studies, BA
- Interdisciplinary Studies (Organizational Studies), BA
- Liberal Studies, BA
- Organizational Leadership, BA
- Organizational Leadership (Project Management), BA

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours including the required applied project courses (MLS 582 and MLS 593).

Required Core (9 credit hours)

MLS 510 Communicating in Complex Cultural Environments (3)

MLS 511 Advanced Liberal Studies and Worlds of Possibility (3)

MLS 512 Exploring and Expressing Ideas (3)

Electives (15 credit hours)

Culminating Experience (6 credit hours)

MLS 582 Applied Project Plan (3)

MLS 593 Applied Project (3)

Additional Curriculum Information

Featuring courses from English, film and media studies and art, this degree prepares students to become master learners across a wide range of cultural and social contexts. Electives are chosen in conjunction with graduate advisors.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Integrative Sciences and Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree, in any field, from a regionally accredited institution.

Applicants must have a minimum of a 3.00 cumulative GPA (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum of a 3.00 cumulative GPA (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- a letter of interest in the program
- a resume, biographical statement or curriculum vitae
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/master-liberal-studies/>) for program descriptions and to request more information.

Career Opportunities: Professionals with excellent critical problem-solving and communication skills are in high demand across sectors and industries, including business, media, entertainment, politics and community organizations. Skills in communication, creative practice, as well as the collection and critical analysis of data for the development of impactful content are valuable to businesses, nonprofit sectors and institutions relying on relevant strategies to engage and serve diverse audiences.

Career examples include:

- archivist
- business manager of artists, performers and athletes
- market research analyst
- public relations specialist
- writer or creative writer

Narrative Studies, MA (LSNRSMA)

Online Degree Search Title: Narrative Studies, MA

Campus: Polytechnic

Program Description: The MA in narrative studies is a comprehensive program that explores narrative and storytelling across a range of cultures and historical periods.

With curriculum emphasis on teaching and research, students study the structural, social, cultural, rhetorical and historical aspects of narrative and storytelling in texts, film and other media.

Graduates are primed for critical and eloquent engagement with the world beyond the university.

Degree Requirements:

30 credit hours including the required capstone course (ENG 597).

Required Core (6 credit hours)

ENG 503 History of Narrative (3)

ENG 509 Studies in Narrative Writing (3)

Electives or Research (21 credit hours)

Culminating Experience (3 credit hours)

ENG 597 Graduate Capstone Seminar (3)

Additional Curriculum Information

Students choose six courses from a restricted list for a total of 21 credit hours. Students should see the academic unit for the approved course list.

Other courses (ENG, COM, FMS, HST or appropriate field) may be utilized for up to six credit hours with approval from the academic unit.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Integrative Sciences and Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's degree (or equivalent) or master's degree from a regionally accredited college or university in a related field such as English or any humanities discipline.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- written letter of intent that includes a detailed statement of purpose
- portfolio of at least three documents
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The portfolio must include at least three documents that demonstrate the applicant's ability to write in a variety of genres. Portfolio documents can include both academic and professional writing for a range of audiences and purposes. At least one of the documents must be a sample of academic writing. One of the three documents can be a sample of creative writing. The portfolio should be 15 to 30 total pages in length. The writing samples in the portfolio are evaluated using a rubric that considers several criteria, including intellectual focus, strength of argument and documentation, awareness of audience, organization, clarity, mechanical soundness and overall effectiveness.

The letters of recommendation should be either academic or professional and speak to the background and capabilities of the applicant.

Career Opportunities: Graduates are equally prepared to become candidates for further academic studies, to advance their careers as area educators in the language arts, and to step into one of the many professions that value creativity, critical thinking and highly skilled communication, including teaching, writing, online publishing and editing.

Professionals with expertise in narrative are in high demand across many sectors and industries, including publishing, media, entertainment, marketing and politics. Skills in crafting and interpreting narratives are valuable to businesses and institutions that communicate, entertain and educate.

Career examples include:

- copy writer
- creative writer
- editor
- freelance writer
- high school teacher

Organizational Leadership, MS (LSORGLMS)

Online Degree Search Title: Organizational Leadership, MS

Campus: Polytechnic, Tempe, Online

Program Description: The MS program in organizational leadership offers a theoretically and methodologically rigorous approach to studying and creating use-inspired research needed to impact organizational leadership.

Students explore areas such as organizational dynamics, institutional evolution, strategic change, leading diverse teams, collaborative governance, conflict mediation, critical problem-solving and leadership assessment, and they learn advanced methodological and statistical skills.

The program places special emphasis on learning best practices and other applied aspects of leading organizations. Students tailor their degree to their interests through a vast array of leadership elective courses. In consultation with a faculty advisor, students choose from many different

elective courses, such as not-for-profit leadership and intercultural leadership.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- English, BA
- History, BA
- Interdisciplinary Studies, BA
- Interdisciplinary Studies (Organizational Studies), BA
- Liberal Studies, BA
- Organizational Leadership, BA
- Organizational Leadership (Project Management), BA

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

33 credit hours and a thesis, or 33 credit hours including the required applied project course (OGL 593).

Required Core (9 credit hours)

OGL 520 Organizational Leadership: Social Psychological Perspectives (3)

OGL 530 Critical Perspectives in Leadership Theory (3)

OGL 540 Evidence-Based Inquiry in Organizational Leadership (3)

Required Methods Courses (6 credit hours)

OGL 550 Leading Organizational Change (3) and OGL 570 Analyzing Organizations (3); or

OGL 574 Qualitative Data Analysis in Leadership Research (3) and OGL 575 Quantitative Data Analysis in Leadership Research (3)

Restricted Electives (12 or 15 credit hours)

Culminating Experience (3 or 6 credit hours)

OGL 593 Applied Project (3)

OGL 599 Thesis (6)

Additional Curriculum Information

Students complete either an applied project or thesis for the culminating experience.

For the required methods coursework, students complete OGL 550 and 570 if in the applied project culminating experience option. Students in the thesis option complete OGL 574 and 575.

Students select four or five courses from a restricted elective list depending on the culminating experience selected. Students should see the academic unit for the approved restricted elective list.

Other courses may be used for the methods and elective coursework with approval of the academic unit.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Integrative Sciences and Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any area or related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- letter of intent
- professional resume
- two letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency
2024-25 Academic Catalog Archive

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. The applicant is expected to have a TOEFL score of 100 on the internet-based test, or the applicant must have a passing score in the English for Graduate Admission online course through ASU Global Launch.

All applicants must submit a written letter of intent that includes a detailed statement of purpose addressing how the program goals coincide with the student's personal and professional objectives. The essay is evaluated on the basis of content, presentation and evidence of graduate-level writing ability; the essay maximum is 500 words.

The professional resume or curriculum vitae are limited to two pages in length.

Applicants must submit two letters of reference that focus on the ability of the applicant to do academic work.

Technical Communication, MS (LSTCCMMS)

Online Degree Search Title: Technical Communication, MS

Campus: Polytechnic, Online

Program Description: The MS program in technical communication teaches students how to design, produce and manage print and digital texts using a variety of tools and technologies.

The curriculum provides students with an understanding of the professional, cultural and ethical issues that shape the field; it balances theory and practice to ensure students develop the analytical approaches, technological expertise and skills necessary for success as a technical communicator.

Students complete the program as accomplished writers, editors, designers, project managers and researchers who are able to respond effectively to a range of audiences, issues and communication situations.

Degree Requirements:

36 credit hours including a thesis, or 36 credit hours including the required applied project course (TWC 593), or 36 credit hours including the required capstone course (TWC 596).

Required Core (6 credit hours)

TWC 504 Applied Rhetoric and Technical Communication (3)

TWC 505 Research in Technical and Applied Communication (3)

Restricted Electives (21 or 27 credit hours)

Other Requirement (0 or 3 credit hours)

TWC 506 Research Design and Development (3)

Culminating Experience (3 or 6 credit hours)

TWC 593 Applied Project (6) or

TWC 596 Technical Communication Capstone (3) or

TWC 599 Thesis (6)

Additional Curriculum Information

Students who do not have previous technical communication coursework or relevant industry experience must take TWC 501 Fundamentals of Technical Communication as a restricted elective. For a full list of the approved elective courses, students should inquire at the academic unit offices.

Students complete an applied project, capstone course or thesis for the culminating experience. Students who choose the capstone option will complete a total of 27 elective credit hours.

TWC 506 is a requirement for students completing an applied project or thesis only.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Integrative Sciences and Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of purpose
- portfolio
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. Since this degree requires a high degree of proficiency in English, an applicant whose native language is not English is expected to have one of the following TOEFL scores: 100 iBT® taken in a testing center or 250 computer-based.

All applicants must submit a written letter of application that includes a detailed statement of purpose as well as a portfolio of at least three

documents that demonstrate the applicant's ability to write in a variety of genres. Portfolio documents can include both academic and professional writing for a range of audiences and purposes and need not be in the area of technical communication. The portfolio should be 15 to 30 pages in length. The writing samples in the portfolio are evaluated using a rubric that considers several criteria, including a demonstration of the ability to focus on a specific purpose and to meet audience needs and show organization, clarity, mechanical soundness and overall effectiveness.

All applicants must submit three letters of reference, either academic or professional, that speak to the background and capabilities of the applicant.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/master-science-technical-communication/>) for program descriptions and to request more information.

Career Opportunities: Professionals with expertise in technical communication are in high demand across sectors and industries, including technology, business, entertainment, education and community organizations. Graduates are prepared for positions in the private, public and nonprofit sectors with plenty of professional opportunities for career advancement.

Analysis of users and data, writing and creating visuals, and managing online content are valuable skills to businesses and institutions. Maintaining rhetorical awareness and understanding of complex information is critical to impactful management and presentation of specialized content to broad audiences.

Career examples include:

- instructional designer
- interface designer
- IT project manager
- public relations manager
- social media manager
- technical writer
- user experience specialist
- web administrator

Professional Licensure: ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (<https://admission.asu.edu/academics/licensure>) webpage.

Technical Communication (certificate), Certificate (LSTECGRCT)

Online Degree Search Title: Technical Communication (Graduate Certificate)

Campus: Polytechnic, Online

Program Description: Through the technical communication program, students learn how to produce and communicate technical information using traditional and digital technologies.

Degree Requirements:

18 credit hours.

Core Requirement (9 credit hours)

TWC 501 Fundamentals of Technical Communication (3)

Choose two of the following courses:

TWC 511 Principles of Visual Communication (3)

TWC 521 Principles of Web Authoring (3)

TWC 531 Principles of Technical Editing (3)

Electives (9 credit hours)

Additional Curriculum Information

Students choose any 500-level TWC courses as their electives.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the College of Integrative Sciences and Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/certificates/technical-communication-graduate-certificate/>) for program descriptions and to request more information.

Career Opportunities: Graduates who have combined the certificate in technical communication with their major program of study may be more marketable to employers. Many decide to pursue employment in technical writing, web content development and editing.

Contact Information:

Integrative Sciences and Arts, College of
School of Applied Professional Studies

User Experience, MS (ESUSEXMS)

Online Degree Search Title: User Experience, MS

Campus: Polytechnic, Online

Program Description: The MS program in user experience addresses UX research, design, content development, communication, tone of voice and evaluation of all components and products with which end users interact.

Students learn how to research user needs, identify criteria for successful products and services, prototype those products and services, and refine them through usability testing and other user-centered evaluation methods.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Graphic Information Technology (User Experience), BS

Human Systems Engineering (User Experience), BS

Technical Communication (User Experience), BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a portfolio.

Required Core (15 credit hours)

GIT 540 Cross-media Design Solutions (3)

HSE 542 Foundations of Human Systems Engineering (3)
TWC 501 Fundamentals of Technical Communication (3)

Choose two courses from the following:

GIT 542 Usability and User Experience (3)
HSE 521 Methods and Tools in Human Systems Engineering (3)
TWC 544 User Experience (3)

Electives or Research (15 credit hours)

Culminating Experience (0 credit hours)
portfolio (0)

Additional Curriculum Information

Students should see the academic units for a complete list of approved electives and research courses. Other courses may be used with approval of the academic units.

Admission Requirements: Applicants must fulfill the requirements of the Graduate College, the Ira A. Fulton Schools of Engineering and the College of Integrative Sciences and Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in related fields such as psychology, graphic information technology, graphic design, human systems engineering, business, cognitive science, design or technical communication from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in their first bachelor's degree program or the last 60 hours of their first bachelor's degree program; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in nine semester hours of graduate coursework from a U.S. institution; or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") an applicable conferred master's degree program from a regionally accredited college or university.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- professional resume
- writing sample
- two letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Applicants should see the Graduate Admission Services website (<https://admission.asu.edu/apply/international/graduate/english-proficiency>).

Global Launch at ASU (<https://globallaunch.asu.edu/learn-english/online-english/english-for-admission>) offers an online alternative to standardized testing for international students who are seeking admission to ASU but need proof of English proficiency.

If the applicant does not meet the minimum GPA requirements, the application may still be considered. In certain cases, demonstrated aptitude through professional experience or additional postbaccalaureate education is considered, including completion of a reputable and robust certification program in user experience or user interface. Applicants are strongly encouraged to include a copy of their completed certification with their resume.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/online-user-experience-masters/>) for program descriptions and to request more information.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Integrate appropriate user experience principles into UX design processes.
- Apply user research methods to projects to uncover usability challenges.
- Evaluate designs and contexts of use to identify problems and prototype approaches for the improving user experience.
- Synthesize technical information into written and visual documentation for user experience projects.

Career Opportunities: Graduates with this degree possess the skills to be UX professionals who effectively lead teams that constantly improve products and the lives of their users, and collaborate with clients and technical personnel.

UX is a rapidly growing field. Graduates can typically expect to find jobs in the areas of:

- design research
- digital visualization design
- human-computer interaction
- human factors research
- interface design
- interaction design
- usability testing
- user experience
- user research

Interdisciplinary Arts and Sciences, New College of

Biological Data Science, MS (ASBDSMS)

Online Degree Search Title: Biological Data Science, MS

Campus: West, Online

Program Description: The MS degree program in biological data science provides students with a foundation in biology and computational methods along with hands-on training through practical projects at the interface of the natural and mathematical sciences.

Students learn to manipulate big data, including the generation and analysis of data using statistical and computational toolsets. They use their analytical skills in ecological, environmental, toxicological and other biological applications. The program incorporates multiple levels of experiential learning to ensure students gain critical thinking skills in addition to core competencies.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Applied Computing, BS
- Applied Mathematics, BS
- Biology, BS
- Biology, BA
- Environmental Science, BA
- Environmental Science, BS
- Pharmacology and Toxicology, BS
- Statistics, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

32 credit hours and a thesis, or 32 credit hours including the required applied project course (ACO 593, BIO 593 or MAT 593), or 32 credit hours including the required capstone course (LSC 586).

Required Core (12 credit hours)

ACO 501 Database Systems and Problem Solving in Python (3)

LSC 555 Integrative Biology I (3)

LSC 556 Integrative Biology II (3)

LSC 562 Applied Mathematics Techniques in Biology (3)

Other Requirements for Campus Immersion (8 credit hours)

LSC 519 Applied Learning Lab (1)

LSC 540 Statistics for Biological Data Science I (3)

LSC 541 Statistics for Biological Data Science II (3)

LSC 547 Wet Laboratory Experience (1)

Other Requirements for Digital Immersion (14 credit hours)

ACO 580 Practicum Topic: Intro to Python Programming for Problem Solving (3)

LSC 519 Applied Learning Lab (2)

LSC 540 Statistics for Biological Data Science I (3)

LSC 541 Statistics for Biological Data Science II (3)

LSC 585 Capstone I in Biological Data Science (3)

Electives (3 or 6 credit hours)

Culminating Experience (3 or 6 credit hours)

ACO 593 Applied Project (6)

BIO 593 Applied Project (6)

LSC 593 Applied Project (6)

MAT 593 Applied Project (6)

ACO 599 Thesis (6)

BIO 599 Thesis (6)

LSC 599 Thesis (6)

MAT 599 Thesis (6)

LSC 586 Capstone II in Biological Data Science (3)

Additional Curriculum Information

The Master of Science program in biological data science is delivered through the campus immersion or digital immersion modality. Culminating experiences require three or six credit hours with varying options based on modality.

Students in the campus immersion modality select either an applied project or thesis for the culminating experience based on their interests and career goals in biological data science. The applied project option usually results in a written report summarizing the work that was completed. The thesis is best suited for students who want to pursue a research career because it requires an oral defense, and the written thesis is considered a publication. These students complete the courses listed under Other Requirements for Campus Immersion and select six credit hours of electives in consultation with the academic unit.

The capstone course option is reserved for students in the digital immersion modality. These students complete the courses listed under Other Requirements for Digital Immersion and select three credit hours of electives in consultation with the academic unit. The capstone course will incorporate a work-based learning model and provide industry-relevant projects for students.

Courses from the other requirements lists above may be substituted if students receive approval from the academic unit.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the New College of Interdisciplinary Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a related field such as biology, mathematics, statistics or computing, as well as unrelated fields from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of purpose
- two letters of recommendation
- professional resume
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

It is preferred that letters of recommendation be from faculty members who know the applicant's work well; if these are not available, letters of recommendation from individuals in supervisory or professional roles will be accepted.

The statement of purpose should describe the applicant's educational background, scholarly interests, and academic and professional goals.

Depending on the applicant's educational background, deficiency courses may be required.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/biological-data-science-masters/>) for program descriptions and to request more information.

Career Opportunities: The proliferation of big data sets generated in biological science fields has dramatically increased the demand for individuals with the solid skill sets they need to manipulate and interpret this data.

Graduates are ready to enter one of the fastest-growing job markets to work with consulting firms and government agencies as well as nongovernmental organizations, in data science, informatics, data analytics, database development and mathematical modeling of biological systems that are relevant to a variety of industries. They are well suited for employment in positions such as:

- bioinformatics data scientist
- chemical biology data scientist
- clinical data analyst
- computational biologist
- data engineer or data mining engineer
- database developer
- fisheries scientist, dairy scientist or animal scientist
- genomic scientist
- natural resources data scientist
- pharmaceutical scientist

Graduates also are ready to seek advanced professional or graduate degrees, such as in medical, dental, veterinary and public health fields.

Biological Data Science (Certificate), Certificate (ASBDSGRCT)

Online Degree Search Title: Biological Data Science (Graduate Certificate)

Campus: West, Online

Program Description: This biological data science graduate certificate program sits at the intersection of biology, computing, mathematics and statistics, providing students in any of these disciplines with the valuable opportunity to develop an integrative toolkit that is in high demand for the analysis of data in the context of biological applications. The program provides students with hands-on training at the interface of the natural and mathematical sciences.

Students learn to manipulate big data, including the generation and analysis of data using statistical and computational tool sets. Students can use their analytical skills in ecological, environmental, toxicological and other biological applications, and they are prepared to work in emerging areas of interdisciplinary and transdisciplinary research.

Degree Requirements:

15 credit hours.

Required Core (3 credit hours)

LSC 540 Statistics for Biological Data Science I (3)

Other Requirements (3 credit hours)

ACO 501 Database Systems and Problem Solving in Python (3) or

ACO 580 Practicum (3)

Restricted Electives (9 credit hours)

ACO 501 Database Systems and Problem Solving in Python (3)

ACO 580 Topic: Intro to Python Programming for Problem Solving (3)

FOR 540 Advanced Topics in Human Forensic DNA Typing (3)

LSC 541 Statistics for Biological Data Science II (3)

LSC 555 Integrative Biology I (3)

LSC 556 Integrative Biology II (3)

LSC 562 Applied Mathematics Techniques in Biology (3)

STC 510 Data Wrangling (3)

Additional Curriculum Information

Other requirement and restricted elective coursework may be substituted with approval of the academic unit.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the New College of Interdisciplinary Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The statement of purpose should address the following requests in 250 words or less:

- Applicants should describe their career goals and how a graduate certificate in biological data science will help them achieve those goals.
- Biological data science is a discipline that spans a broad range of biological topics, from molecular biology to ecology, and it uses a variety of computational methods. Applicants are asked to briefly describe two aspects of biological data science that most interest them, and explain why.
- Optional: Applicants are asked to explain any extenuating circumstances that affected their undergraduate performance or that affect them now. This is not necessary if the applicant feels their application meets all the program's admission requirements.

A professional resume may be included in the application materials, but this is optional.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/certificates/graduate-certificate-biological-data-science>) for program descriptions and to request more information.

Career Opportunities: With the multiple levels of experiential learning in the program, graduates who hold the biological data science certificate are ready to enter one of the fastest-growing job markets. They have the foundation they need for a wide variety of careers that require skills in analytical reasoning, computer programming and database design in such areas as consulting firms, government agencies and nongovernmental organizations. Career fields relevant to the certificate program include:

- bioinformatics
- data management and databases
- data processing, hosting and related services
- environmental consulting
- marketing or advertising for companies with large consumer data sets
- research data analysis
- work in health care industries that involves dealing with patient data

Graduates are also prepared for pursuing advanced professional or graduate degrees.

Communication Studies, MA (ASCOMSTMA)

Online Degree Search Title: Communication Studies, MA

Campus: West

Program Description: The MA degree program in communication studies is a cutting-edge degree program designed for students who wish to advance in their existing careers or pursue a new career as a communication professional.

With special emphasis on both advocacy and social technologies, students can tailor the program to their personal goals, focusing on topics such as interpersonal, family, organizational, sport, environmental, global and intercultural communication, social media and politics, or technology-mediated interaction.

Working closely with faculty, students examine how communication improves the quality of workplaces, personal relationships, digital and face-to-face communities, public dialogues, cross-cultural interactions, and relationships between organizations and those who are influenced by their services, including citizens, customers, patients and fans. They also learn to use media and communication to advocate for themselves and others.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Applied Science, BAS
- Biology, BA
- Communication, BS
- Communication, BA
- Communication, BS
- Communication, BA
- Communication, BA
- Environmental Science, BA
- Gender, Women and Sexuality Studies, BS
- Global Management, BGM
- History, BA
- Interdisciplinary Arts and Performance, BA
- Interdisciplinary Arts and Sciences, BA
- Latin American Studies, BA
- Philosophy, Religion and Society, BA
- Political Science, BA
- Political Science, BS
- Psychology, BA
- Psychology, BS
- Social Justice and Human Rights, BA
- Social and Behavioral Sciences, BS
- Social and Behavioral Sciences, BA
- Sociology, BA
- Sociology, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

36 credit hours and a written comprehensive exam, or 36 credit hours including the required applied project course (CMN 593) and a written comprehensive exam, or 36 credit hours, a written comprehensive exam and a thesis.

Required Core (9 credit hours)

CMN 502 Theory and Practice in Communication and Persuasion (3) or CMN 522 Argumentation and Advocacy (3)

CMN 505 Methods in Applied Communication Research (3)

CMN 506 Humanistic Inquiry and Field Research in Communication (3)

Electives (21-27 credit hours)

Culminating Experience Options (0-6 credit hours)
CMN 593 Applied Project, with written comprehensive exam (3)
CMN 599 Thesis, with written comprehensive exam (6)
written comprehensive examination (0)

Additional Curriculum Information

Electives are selected in consultation with the student's program advisor and may include courses with either the CMN (communication) or the STC (social technology) prefix. When appropriate, students may take up to six credit hours outside the program (no CMN or STC prefix).

The thesis or applied project must demonstrate intellectual ability, academic ability and professional growth. The thesis is supervised and approved by the student's advisor and committee. An oral defense is required for the thesis. The applied project is supervised by the student's advisor. The achievements or results of the applied project should be made available to the public in the form of a presentation, poster, report or other form negotiated with the faculty advisor.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the New College of Interdisciplinary Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of purpose
- three letters of recommendation
- an academic writing sample (preferred) or professional writing sample
- resume or curriculum vitae (optional)
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The statement of purpose should describe the applicant's educational background, scholarly interests, and academic and professional goals.

Letters of recommendation from faculty members who know the applicant's work well are preferred; if faculty members are not available, the applicant may submit letters of recommendation from individuals in supervisory or professional roles.

Career Opportunities: The Master of Arts degree program in communication studies helps prepare graduates for jobs in corporate communication, journalism, mass media, politics, higher education or a wide range of other fields. Graduates are prepared to pursue doctoral work or careers in a variety of communication-driven fields such as digital audience management, public affairs, public relations, science communication, training and employee development, strategic communication, community relations and nonprofit advocacy. Graduates already employed may find that the skills they acquired through the program are helpful for career advancement, given that some leadership positions require a master's degree. Those interested in changing careers may pursue a master's in communication studies to align with their particular professional goals. This master's degree can also prepare graduates for doctoral studies in which they will conduct research, or a career in higher education, educating students.

Career examples include:

- academic: non-tenure track (e.g., lecturer, admission director, academic advisor)
- academic: tenure track (e.g., instructor, professor at community college, university)
- fundraising manager
- human resources manager
- internal communications manager
- journalist
- learning and development analyst
- marketing account executive, consultant or research analyst
- political campaign manager
- sales account executive
- speechwriter
- technical communication specialist

- web producer

English, MA (ASENGLMA)

Online Degree Search Title: English, MA

Campus: West

Program Description: The MA degree program in English addresses the many facets of English: its literature; its linguistic, social and cultural histories; and its capacities for persuasion, exposition and elucidation.

The program is grounded in scholarly tradition but designed for the demands of today's world. Its innovative curriculum has been developed to train present and future educators as well as individuals pursuing careers in the wide variety of professions that value advanced critical thinking, research and communication skills.

World-class faculty is ready to help enhance skill sets, deepen knowledge bases and prepare students to put the Master of Arts in English degree to work in their chosen professions.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Applied Science, BAS
- Communication, BA
- Communication, BS
- Disability Studies, BA
- English, BA
- Gender, Women and Sexuality Studies, BS
- History, BA
- Interdisciplinary Arts and Performance, BA
- Interdisciplinary Arts and Sciences, BA
- Latin American Studies, BA
- Philosophy, Religion and Society, BA
- Social and Cultural Analysis (American Studies), BA
- Social and Cultural Analysis (Ethnicity, Race and Indigenous Studies), BA
- Social and Cultural Analysis (Latin American Studies), BA
- Social and Cultural Analysis (Peace Studies), BA
- Social and Cultural Analysis (Queer and Sexuality Studies), BA
- Social and Cultural Analysis (Women and Gender Studies), BA
- Spanish, BA

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours including the required capstone course (ENG 597).

Required Core (6 credit hours)

ENG 502 Contemporary Critical Theories (3) or MAS 505 Theories of Change, Culture and Mind (3)

ENG 582 Pedagogy (3)

Electives or Research (12 credit hours)

ENG 500 Research Methods (3)

ENG 591 Seminar (3)

ENG or LIN courses (6)

Open Elective or Research Courses (9 credit hours)

Culminating Experience (3 credit hours)
ENG 597 Graduate Capstone Seminar (3)

Additional Curriculum Information

For electives or research, students should see the academic unit for the approved course list from ENG and LIN courses through New College. ENG 500 is a required research course for all students and must be included in the plan of study.

For the open elective or research courses, nine credit hours can be selected from ENG coursework offered by New College faculty. Students who wish to take ENG courses offered by faculty outside of New College, or courses with a non-ENG prefix, must first receive approval from the program director.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the New College of Interdisciplinary Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of purpose
- two letters of recommendation
- an academic writing sample (preferred) or professional writing sample
- resume or curriculum vitae (optional)
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The statement of purpose should describe the educational background, scholarly interests and academic and professional goals of the applicant.

It is preferred that the letters of recommendation are from faculty members who know the applicant's work well; if such faculty are not available, then recommendation letters from individuals in supervisory or professional roles are acceptable.

Career Opportunities: The ability to influence and motivate behavior through the power of well-crafted language is a skill valued in every industry dependent upon customers, employees, suppliers or investors.

Graduates with a master's degree in English are able to use language to accomplish organizational goals; utilize advanced critical thinking abilities and advanced skills for clear and effective verbal communication; construct well-supported and persuasive arguments; and perform complex textual analysis. They are knowledgeable about historical trends in written discourse, have an awareness of the role of literary discourse in broader social and historical contexts, and have the ability to engage in big-picture thinking.

Career fields are many and varied. Examples include:

- business communication
- community college teaching
- editing
- grant writing
- journalism
- nonprofit consulting
- public relations
- publishing
- secondary education and continuing education
- technical writing
- web (content management, social media management)

Forensic Psychology, MS (ASFPSYMS)

Online Degree Search Title: Forensic Psychology, MS

Campus: Online

Program Description: The MS degree program in forensic psychology provides working professionals with an understanding of mental health issues and human behavior with respect to crime and the criminal justice and legal systems.

The curriculum involves specialized coursework in criminal law, criminal behavior, the diagnosis and treatment of mental disorders, and legal decision-making. Students learn about the various roles for psychologists in the legal system, helping them discover which roles they might like to pursue through careers in mental health, criminal justice or through additional graduate training.

Graduates are not license-eligible for clinical practice but are well prepared to pursue advanced degree and continuing education programs in counseling and related fields.

Degree Requirements:

33 credit hours including the required capstone course (PSY 549).

Required Core (15 credit hours)

PSY 544 Advanced Psychology of Criminal Investigation (3)

PSY 545 Advanced Legal Psychology (3)

PSY 546 Advanced Forensic Psychology (3)

PSY 547 Advanced Correctional Psychology (3)

PSY 573 Psychopathology (3)

Electives (9 credit hours)

Statistics and Methods (3 credit hours)

PSY 514 Fundamentals of Forensic Psychology Research (3)

Criminal Justice System Courses (3 credit hours)

Choose one of the following:

CRJ 501 Seminar in Criminal Justice (3)

CRJ 513 Seminar in Courts and Sentencing (3)

Culminating Experience (3 credit hours)

PSY 549 Capstone in Forensic Psychology (3)

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the New College of Interdisciplinary Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in psychology, criminal justice, social science or a closely related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- one letter of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Applicants must provide evidence of successful completion of an undergraduate or graduate social science statistics and research methods course.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/master-science-forensic-psychology/>) for program descriptions and

to request more information.

Career Opportunities: The MS in forensic psychology opens the door to a wide variety of careers. The field of forensic psychology offers many career options, from consulting on public policy to working within the criminal justice system. Many forensic psychologists will work in the court system in order to help lawyers, judges and juries better understand the motivations behind criminal behavior. Some graduates choose this path to advocate on behalf of underserved populations, including African Americans, Latinos, those from lower economic areas, children or those with mental illness.

Career examples include:

- correctional counselor
- crime analyst
- forensic research psychologist
- forensic social worker
- investigative journalist
- jail supervisor
- jury consultant
- police consultant
- probation officer
- victim advocate

Forensic Science, PSM (ASFRSCIPSM)

Online Degree Search Title: Forensic Science, PSM

Campus: Online

Program Description: The PSM program in forensic science readies students for career advancement by providing them with educational depth and breadth in the forensic sciences and helps them develop new competencies related to laboratory supervision. This includes an understanding of how to work with regulatory bodies that provide the framework for oversight in forensic laboratories, consistent with the guiding principles of the National Professional Science Master's Association.

Students develop deeper scientific inquiry skills in biology, chemistry, genetics and related topics, as well as critical laboratory leadership skill sets.

Successful graduates are armed with the tools and experiences required for administrative and other advancement opportunities within and beyond the forensic science laboratory in both government and private sectors.

Degree Requirements:

30 credit hours including the required applied project course (FOR 593).

Required Core (9 credit hours)

FOR 525 Forensic Science and Governance (3)

FOR 550 Ethics in Forensic Science (3)

FOR 565 Laboratory Leadership, Policy and Practice (3)

Other Requirement (18 credit hours)

FOR 501 Forensic Toxicology (3) or FOR 532 Principles of Pharmacology (3)

FOR 502 Advanced Forensic Botany (3) or FOR 503 Forensic Entomology (3)

FOR 540 Advanced Topics in Human Forensic DNA Typing (3)

FOR 560 Quantitative Methods in Forensic Science Research (3), BMI 515 Applied Biostatistics in Medicine and Informatics (3) or HCD 501 Population Health Data Management and Analysis (3)

FOR 592 Research (3)

PSY 546 Advanced Forensic Psychology (3) or CRJ 537 Criminal Procedure of Investigations for Social and Forensic Scientists (3)

Culminating Experience (3 credit hours)

FOR 593 Applied Project (3)

Additional Curriculum Information

Other requirement courses may be substituted with approval of the academic unit.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the New College of Interdisciplinary Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in an appropriate physical, biological or computer science or related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- statement of purpose
- two letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The statement of purpose should describe the applicant's educational background, scholarly interests, and academic and professional goals.

It is preferred that the letters of recommendation be from individuals in supervisory or professional roles.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/forensic-science-psm/>) for program descriptions and to request more information.

Career Opportunities: The Master of Professional Science program in forensic science provides leadership training in the field of forensic science to practicing professionals in science and forensic science, criminalistics and medical examiner offices; to office personnel; and to members of the law enforcement and legal communities. Program graduates have the skills and experience to pursue a new career path or to advance in their current careers. Graduates with a master's degree in forensic science have gone on to careers that include jobs such as:

- biomedical researcher
- crime scene investigator
- crime or forensic laboratory director, manager or supervisor
- forensic anthropologist
- forensic engineer
- forensic nurse
- forensic scientist
- forensic toxicologist
- law enforcement officer or supervisor
- military service member
- pharmaceutical researcher

Some graduates go on to professional schools and further graduate education, including PhD programs.

Industrial and Organizational Psychology (Certificate), Certificate (ASIOPGRCT)

Online Degree Search Title: Industrial and Organizational Psychology (Graduate Certificate)

Campus: Online

Program Description: The graduate certificate program in industrial and organizational psychology trains students to be well-versed in workplace empowerment strategies and interventions that are transformational and can lead to the optimal well-being and performance of individuals within organizations.

The foundational coursework uses concepts in psychology to emphasize training and development, professional motivation, decision-making, justice and leadership. Students engage in a rigorous curriculum that fosters advanced writing and critical thinking skills to promote competence in understanding theoretical frameworks within psychology and industrial and organizational psychology research.

GI Bill® benefits

This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at <https://www.benefits.va.gov/gibill/> (<https://www.benefits.va.gov/gibill/>).

Degree Requirements:

15 credit hours.

Required Core (15 credit hours)

PSY 508 Choice and Decision Making (3)

PSY 509 Advanced Industrial and Organizational Psychology (3)

PSY 510 Professional Motivation and Leadership (3)

PSY 511 Psychology of Organizational Development (3)

PSY 556 Cultural Intelligence (3)

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the New College of Interdisciplinary Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in psychology or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admissions application and application fee
- official transcripts
- personal statement
- two letters of recommendation
- proof of English proficiency

Additional Admission Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of current residency.

It is recommended that applicants have a background in psychology, sociology, business, education or other closely related fields.

The statement of purpose should describe the educational background, scholarly interests, and academic and professional goals of the applicant.

It is preferred that the letters of recommendation are from faculty members who know the applicant's work well; if these are not available, then recommendations should be from individuals in supervisory or professional roles.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/certificates/industrial-organizational-psychology-certificate>) for program descriptions and to request more information.

Global Opportunities:

Global Experience: Study abroad (<https://goglobal.asu.edu/>) is possible for graduate students, and it allows students in the psychology program to stand out in many career fields. Students are exposed to unique differences in the human condition worldwide, are able to improve language and cross-cultural skills for effective communication, and are challenged to adapt to new social and cultural circumstances.

There are more than 50 program opportunities, with programs on every continent. Faculty-directed programs tend to be the best fit for graduate students; taking courses over the summer or during academic breaks with ASU professors offers close mentorship and professional network growth in many fields of study while earning ASU credit. Exchange program participation is also possible with careful planning.

Career Opportunities: Graduates leave this program with a broad understanding of industrial and organizational psychology. They may pursue careers in psychology, education, business or government. In addition, the industrial and organizational coursework benefits graduates working in

supervisory or management positions in corporate, government or social service professions.

Careers benefitting from the industrial and organizational psychology certificate include:

- assessment development specialist
- data scientist
- human resource specialist
- people science and strategy manager
- product manager
- psychometric analyst
- service and testing supervisor
- workforce planning manager

Interdisciplinary Studies, MA (ASINTERMA)

Online Degree Search Title: Interdisciplinary Studies, MA

Campus: West

Program Description: The MA degree in interdisciplinary studies is an innovative program in which students learn how to use two or more disciplines in an integrative method that leads to new discoveries. Founded on the conviction that solving today's problems often requires an interdisciplinary approach, this flexible program provides study of interdisciplinary and transdisciplinary perspectives, interdisciplinary research methods and modes of inquiry and practice.

The program consists of three required MAS courses, six courses of the student's choice and a capstone the final semester, and gives students access to faculty members who are active practitioners of interdisciplinary inquiry. Working with the faculty, students may define their own area of emphasis or adopt an existing area within the humanities, arts and social sciences.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Applied Science, BAS
- Communication, BA
- Communication, BS
- English, BA
- Gender, Women and Sexuality Studies, BS
- History, BA
- Interdisciplinary Arts and Performance, BA
- Interdisciplinary Arts and Sciences, BA
- Philosophy, Religion and Society, BA
- Political Science, BS
- Political Science, BA
- Psychology, BA
- Psychology, BS
- Social and Behavioral Sciences, BS
- Social and Behavioral Sciences, BA
- Sociology, BS
- Sociology, BA

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours including the required capstone course (MAS 585).
Required Core (9 credit hours)
MAS 501 Methods for Interdisciplinary Inquiry (3)

MAS 502 Perspectives in Interdisciplinary Studies (3)
MAS 505 Theories of Change, Culture and Mind (3)

Electives (18 credit hours)

Culminating Experience (3 credit hours)
MAS 585 Capstone Course (3)

Additional Curriculum Information

The core courses are designed as a sequence meant to guide students through the program, from learning about interdisciplinarity to practicing interdisciplinary research. Therefore, students are required to take each of the core courses the first time that they are available while the student is enrolled in the program.

For electives, students work with a faculty mentor to select 18 credit hours of graduate-level coursework that helps prepare them for their capstone course or reflects particular areas of specialty or interest.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the New College of Interdisciplinary Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of purpose
- two letters of recommendation
- an academic writing sample (preferred) or professional writing sample
- resume or curriculum vitae (optional)
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The statement of purpose should describe the applicant's educational background, scholarly interests, and academic and professional goals.

It is preferred that the letters of recommendation are from faculty members who know the applicant's work well, but if faculty are not available, then the recommendations are to be from individuals in supervisory or professional roles.

Career Opportunities: The program's emphasis on a variety of research methods and modes of inquiry increases students' value to many organizations. As graduates, they reach their professional goals in a multitude of industries and organization, including advertising and marketing, nonprofit leadership and media production, museum curatorship, community college teaching and modern entrepreneurship.

Career examples include:

- area, ethnic and cultural studies teachers and professors
- archivists
- education administrators
- high school teachers
- human resources managers
- interdisciplinary research specialist
- market research analysts and marketing specialists
- nonprofit manager
- professors
- research consultant

The skills and knowledge graduates acquire can be directed toward doctoral study or professional goals in any enterprise that engages in research, entrepreneurship or education.

Interdisciplinary Studies (Interdisciplinary Arts and Performance), MA (ASIDSIPMA)

Online Degree Search Title: Interdisciplinary Studies (Interdisciplinary Arts and Performance), MA

Campus: West

Program Description: The MA degree in interdisciplinary studies is an innovative program in which students learn how to use two or more disciplines in an integrative method that leads to new discoveries. The concentration in interdisciplinary arts and performance enables students to engage the study of interdisciplinary art practices and theories from a perspective developed over decades of the New College's undergraduate interdisciplinary arts and performance major.

Throughout the curriculum, interdisciplinary arts are outwardly and continually inclusive, expanding, evolving and innovative, empowering students to shape and direct their creative pathways. Students engage in a deeper collaborative investigation of multiple artistic disciplines, interacting with theoretically advanced studies in visual, sonic and performance arts to become versatile artists and art scholars, preparing them for the complex and changing world through current approaches to aesthetic innovation.

The program gives students access to faculty members who are active practitioners of interdisciplinary inquiry. Students work with the faculty to define their own areas of artistic practices.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

Interdisciplinary Arts and Performance, BA

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours including the required capstone course (MAS 585).

Required Core (9 credit hours)

MAS 501 Methods for Interdisciplinary Inquiry (3)

MAS 502 Perspectives in Interdisciplinary Studies (3)

MAS 505 Theories of Change, Culture and Mind (3)

Concentration (6 credit hours)

IAP 560 Composition: Process, Technique and Style (3)

IAP 570 Language, Culture and Performance (3)

Other Requirements (3 credit hours)

Law and Psychology, PHD (ASLPSYPHD)

Online Degree Search Title: Law and Psychology, PhD

Campus: Downtown Phoenix, West

Program Description: The PhD program in law and psychology takes a broad interdisciplinary approach to train a new generation of scholars. The program combines rigorous training in the law and psychology field with training in advanced research methodology and statistics, criminological theory, and contextual training in other subfields of psychology.

The goal is for students to use this knowledge to tackle the many important but understudied areas within the legal system which are in desperate need of empirical psychological research.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Core (21 credit hours)

PSY 515 Quantitative Analysis I (3)

PSY 516 Quantitative Analysis II (3)

PSY 517 Quantitative Analysis III (3)

PSY 544 Advanced Psychology of Criminal Investigation (3)

PSY 545 Advanced Legal Psychology (3)

PSY 546 Advanced Forensic Psychology (3)

PSY 550 Advanced Social Psychology (3)

Required Professional Development (3 credit hours)

PSY 591 Seminar: Professional Issues in Law and Psychology (3)

Electives (33 credit hours)

Required Research (15 credit hours)

PSY 500 Research Methods (3)
PSY 792 Research (12)

Culminating Experience (12 credit hours)
PSY 799 Dissertation (12)

Additional Curriculum Information

Students are required to take 15 credit hours of research coursework and 36 credit hours of elective coursework.

When approved by the student's supervisory committee and Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this degree. If students do not have a previously awarded master's degree, the 30 hours of coursework is made up of electives and research.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the New College of Interdisciplinary Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in psychology, criminal justice, social science, or a closely related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- GRE scores
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

ASU does not accept the GRE® General Test at home edition.

Career Opportunities: Graduates are sought-after for their unique skill sets melding the complexities of law and justice with human behavior. Careers can be pursued in government, academia or private enterprise.

Career examples include:

- academic researcher or instructor as a college or university professor
- criminal justice data analyst
- government or nonprofit researcher and evaluator
- legal policy researcher and evaluator
- legal or trial consultant
- mental health policy analyst or consultant
- postdoctoral research fellow

Psychology, MS (ASPGSMS)

Online Degree Search Title: Psychology, MS

Campus: West, Online

Program Description: The MS degree program in psychology, offered by the New College of Interdisciplinary Arts and Sciences, is available in two modalities (campus immersion or online) with different culminating experience options (thesis, applied project or capstone).

The campus immersion option is ideal for students who plan to pursue doctoral work or careers that involve psychological research methods such

as marketing research, education research analysis, public policy analysis, research project management or program evaluation. The program is intensive and research-oriented, and it culminates in a thesis or applied project. Students receive training in advanced research methodology and statistical analysis, grant proposal writing, laboratory instrumentation, data collection and manuscript development. Students gain firsthand exposure to designing and conducting research, analyzing data, and developing presentations and manuscripts. Students are encouraged to present research reports at professional meetings and conferences and to publish as co-authors in faculty-guided research.

The online program option gives students and working professionals an understanding of psychological theory and empirical research findings as they relate to human behavior, cognition, emotion and attitudes. The coursework is designed to help students learn about the various roles of psychologists in society today and discover which they might like to pursue. The online curriculum is focused on applications of knowledge rather than research, and students are not provided hands-on research opportunities. The online program culminates with a capstone course.

Both options offer elective courses in several areas, including abnormal psychology, affective science, behavior analysis, cognitive psychology, developmental psychology, health psychology, legal psychology, psychophysiology and social psychology.

This program is not designed to prepare students for clinical practice. Opportunities to prepare for licensure exams are not available through this degree program.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

- Psychology, BA
- Psychology, BS
- Psychology (Industrial and Organizational Psychology), BS
- Psychology (Industrial and Organizational Psychology), BA
- Psychology (Positive Psychology), BS
- Psychology (Positive Psychology), BA

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

36 credit hours and a thesis, or 36 credit hours including the required applied project course (PSY 593), or 36 credit hours including the required capstone course (PSY 553), or 36 credit hours including the required capstone course (PSY 553) - Mandarin Pathway.

Required Core (3 credit hours)

PSY 502 Professional Issues in Psychology (3)

Research and Statistics for Campus Immersion (15 or 18 credit hours)

PSY 500 Research Methods (3)

PSY 515 Quantitative Analysis I (3)

PSY 592 Research (6)

statistics and research coursework (3-6)*

*additional statistics and research coursework selected in consultation with faculty and dependent on area of research interest

Foundation, Research and Statistics for Digital Immersion (21 credit hours)

PSY 500 Research Methods (3)

PSY 513 Fundamentals of Quantitative Research (3)

foundation courses (15)

Electives (9 or 12 credit hours)

Culminating Experience (3 or 6 credit hours)

PSY 553 Capstone in General Psychology (3)

PSY 593 Applied Project (6)

PSY 599 Thesis (6)

Additional Curriculum Information

The Master of Science in psychology is delivered in person and online through digital immersion. The capstone course option is only for students in the online program and the Mandarin pathway. Thesis, applied project or capstone options are for in-person program students.

The thesis option is intended for students who are interested in later gaining admission to a doctoral program. This option has hands-on experience with research and in-depth learning on advanced quantitative analysis. Thesis students complete a written and oral prospectus before proceeding to

their thesis research, which they must defend before a committee. Thesis students complete 18 credit hours of research and statistics and nine credit hours of electives.

The applied project option provides students who are interested in pursuing a professional career in research with sufficient methodology and statistics skills to enhance their professional career opportunities. Applied project students also complete a written research proposal that is reviewed by their advisor and one additional committee member. Applied project students complete 15 credit hours of research and statistics and complete 12 credit hours of electives.

In specific circumstances, in-person students will be allowed to complete a capstone course specific to their area of study. In this case, students who complete a capstone will also complete 18 credit hours of electives.

Capstone course online options (English and Mandarin) provide students who are interested in professional development the necessary communication and methodology skills to advance in their chosen career. Students in the capstone must write a literature review paper on a research topic of their choice. Capstone course students complete 21 credit hours of Foundation, Research and Statistics coursework. They complete nine credit hours of electives.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the New College of Interdisciplinary Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program. Priority is given to applicants who have achieved a 3.25 GPA or higher.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of purpose
- two letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

At the time of application, students must identify the culminating experience that they wish to pursue. Students applying to the capstone course option are only considered for the online program. Students applying to the thesis or applied project option are only considered for the in-person program.

Applicants must provide evidence of successful completion of an undergraduate or graduate social science statistics and research methods course. Typically, these prerequisite courses should be in a social science field; however, applicants may apply with courses outside a social science field.

The statement of purpose should describe the applicant's educational background, scholarly interests and academic and professional goals.

It is preferred that the letters of recommendation be from faculty members who know the applicant's work well; if these are not available, then recommendations should be from individuals in supervisory or professional roles. Two letters of recommendation are required. However, for the in-person program, three letters of recommendation are strongly recommended.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/master-science-psychology/>) for program descriptions and to request more information.

Career Opportunities: The campus-based Master of Science degree program in psychology is specialized to prepare students for admission to doctoral programs in psychology in areas that include clinical or counseling, social, cognitive and developmental specialties. Graduates may pursue professional research careers in education, health care or marketing.

Although some graduates of the online Master of Science degree program have received admission to a doctoral program, the online curriculum is not research-intensive, and most students in the online program are pursuing the Master of Science in psychology to benefit their current or future careers in education, social service, for-profit and nonprofit organizations, or management.

Career examples include these positions:

- community health worker
- health educator
- market research analyst and marketing specialist
- medical and health services manager
- mental health counselor
- psychology teacher, postsecondary
- social and community service manager
- social and human services assistant
- social science research assistant

Psychology (Industrial and Organizational Psychology), MS (ASPGSIOPMS)

Online Degree Search Title: Psychology (Industrial and Organizational Psychology), MS

Campus: Online

Program Description: The MS program in psychology with a concentration in industrial and organizational psychology educates students to be well-versed in workplace empowerment strategies and interventions that are transformational and can lead to the optimal well-being and performance of individuals within organizations.

The core coursework uses concepts in psychology to emphasize training and development, professional motivation, decision-making, justice and leadership. Students engage in a rigorous curriculum that fosters advanced writing skills, and critical thinking and analytical skills to promote competence in understanding theoretical, methodological and statistical frameworks within psychology and industrial and organizational psychology research.

GI Bill® benefits

This new program is not yet approved for use with GI Bill® benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at <https://www.benefits.va.gov/gibill/> (<https://www.benefits.va.gov/gibill/>).

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Psychology, BA
- Psychology, BS
- Psychology (Industrial and Organizational Psychology), BS
- Psychology (Industrial and Organizational Psychology), BA
- Psychology (Positive Psychology), BS
- Psychology (Positive Psychology), BA

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours including the required capstone course (PSY 553).

Required Core (3 credit hours)

PSY 502 Professional Issues in Psychology (3)

Concentration (12 credit hours)

PSY 508 Choice and Decision Making (3) or PSY 550 Advanced Social Psychology (3)

PSY 509 Advanced Industrial and Organizational Psychology (3)

PSY 510 Professional Motivation and Leadership (3)

PSY 556 Cultural Intelligence (3)

Research (6 credit hours)

PSY 500 Research Methods (3)

PSY 513 Fundamentals in Quantitative Methods (3)

Electives (6 credit hours)

Culminating Experience (3 credit hours)

PSY 553 Capstone in General Psychology (3)

Additional Curriculum Information

Elective coursework should be selected in consultation with the program advisor.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the New College of Interdisciplinary Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in psychology, sociology, business, education or other closely related fields from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admissions application and application fee
- official transcripts
- two letters of recommendation
- written statement
- proof of English proficiency

Additional Admission Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of current residency.

It is recommended that applicants have a background in psychology, sociology, business, education or other closely related fields. Applicants must provide evidence of successful completion of either a statistics course or a research methods course. Typically, these prerequisite courses should be in a social science field; however, applicants may apply with courses outside of a social science field.

The statement of purpose should describe the educational background, scholarly interests and academic and professional goals of the applicant.

It is preferred that the letters of recommendation are from faculty members who know the applicant's work well; if this is not possible, then recommendations should come from individuals in supervisory or professional roles.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/industrial-organizational-masters/>) for program descriptions and to request more information.

Global Opportunities:

Global Experience: Study abroad (<https://goglobal.asu.edu/>) is possible for graduate students, and it allows students in the psychology program to stand out in many career fields. Students are exposed to unique differences in the human condition worldwide, are able to improve language and cross-cultural skills for effective communication and are challenged to adapt under new social and cultural circumstances.

There are more than 50 program opportunities, with programs on every continent. Faculty-directed programs tend to be the best fit for graduate students; taking courses over the summer or during academic breaks with ASU professors offers close mentorship and professional network growth in many fields of study while earning ASU credit. Exchange program participation is also possible with careful planning.

Career Opportunities: Graduates leave this program with a broad understanding of industrial and organizational psychology. They may pursue careers in psychology, education, business, consulting or government. In addition, the industrial and organizational coursework benefits graduates working in supervisory or management positions in corporate, government or social service professions.

Careers benefitting from the industrial and organizational psychology concentration include:

- assessment development specialist
- data scientist

- human resource specialist
- people science and strategy manager
- product manager
- psychometric analyst
- service and testing supervisor
- workforce planning manager

Psychology (Positive Psychology), MS (ASPGSPMS)

Online Degree Search Title: Psychology (Positive Psychology), MS

Campus: West, Online

Program Description: The MS program in psychology with a concentration in positive psychology, offered by the New College of Interdisciplinary Arts and Sciences, prepares students to apply their knowledge and skills to find meaning and fulfillment in their own lives, as well as to contribute to transformational practices in communities and organizations that can lead to optimal well-being and more harmonious, equitable and inclusive societies.

Through the lens of historical and contemporary research in positive psychology, students in the program gain a solid grounding in the basic tenets of the field, the methodologies employed, and the development and effectiveness of interventions that seek to improve peoples' lives and enable them to thrive. Coursework emphasizes a theoretical, evidence-based and experiential focus on key factors contributing to psychological well-being and optimal functioning, such as gratitude, joy, love, optimism, inspiration, compassion, creativity, resilience and mindfulness.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Psychology, BA
- Psychology, BS
- Psychology (Industrial and Organizational Psychology), BA
- Psychology (Industrial and Organizational Psychology), BS

Research (6 credit hours)

PSY 500 Research Methods (3)

PSY 513 Fundamentals in Quantitative Methods (3)

Concentration (12 credit hours)

PSY 550 Advanced Social Psychology (3) or

PSY 577 Advanced Developmental Psychology (3)

PSY 565 Psychology of Mindfulness (3)

PSY 585 Advanced Positive Psychology (3)

PSY 586 Emotion (3)

Electives (6 credit hours)

Culminating Experience (3 credit hours)

PSY 553 Capstone in General Psychology (3)

Additional Curriculum Information

Students are enrolled in a section of PSY 553 designated specifically for the positive psychology concentration. The capstone project requires students to synthesize and organize the prior research related to a positive psychology intervention, identify a gap in the prior research and develop a research study proposal that addresses the identified gap.

Admission Requirements: Applicants must fulfill the requirement of both the Graduate College and the New College of Interdisciplinary Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in psychology or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of purpose
- two letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Applicants must provide evidence of successful completion of an introductory psychology course, as well as either a statistics course or a research methods course. Typically, these prerequisite courses should be in a social science field; however, applicants may apply with courses outside of a social science field.

The statement of purpose should describe the educational background, scholarly interests, and academic and professional goals of the applicant.

It is preferred that the letters of recommendation are from faculty members who know the applicant's work well; if these are not available, then recommendations should be from individuals in supervisory or professional roles.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Global Opportunities:

Global Experience: Studying abroad (<https://goglobal.asu.edu/>) is possible for graduate students, and it allows students in the psychology program to stand out in many career fields. Students are exposed to distinct differences in the human condition worldwide, are able to improve language and cross-cultural skills for effective communication, and are challenged to adapt under new social and cultural circumstances.

There are more than 50 program opportunities, with programs on every continent. Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Career Opportunities: Graduates leave this program with an in-depth understanding of this growing field. They may pursue professional research careers in psychology, education, health care or marketing. In addition, the positive psychology coursework benefits graduates working in supervisory or management positions, training or teaching roles, or in any social services profession.

Careers benefitting from the positive psychology concentration include:

- equity and inclusion officer
- individual life coach
- positive coach in sports or organizations
- positive psychology research assistant
- social and community services manager

Graduates can also find careers in the following industries:

- business (sales and marketing manager, human resources manager, employee assistance program manager)

- community health and wellness professions (prevention specialist, youth development specialist, community health educator)
- education (high school psychology teacher, character strengths educator)
- government (health and wellness policy specialist, state department of public health or mental health program coordinator)
- social services (family interventionist, warm line worker, occupational analyst)

Psychology (Sport Psychology), MS (ASPGSSPMS)

Online Degree Search Title: Psychology (Sport Psychology), MS

Campus: West

Program Description: The MS program in psychology with a concentration in sport psychology prepares students to apply knowledge and skills to work toward the health and achievements of individuals in a sport setting along with more harmonious, equitable and inclusive societies.

Through an interdisciplinary lens including psychology, communication and health, the core coursework emphasizes multiple theoretical perspectives and applications of sport psychology, culture and diversity in sports, and cultural significance of sport fandom. Electives provide students with the flexibility to focus on areas important to their professional interests. The faculty in the sport psychology concentration are committed to providing an engaging curriculum that fosters advanced writing skills, critical thinking and analytical skills, and promotes competence in understanding theoretical, methodological and statistical frameworks within psychology and sport psychology research.

This program is not designed to prepare students for clinical practice. Opportunities to prepare for licensure exams are not available through this degree program.

Social Data Science, MA (ASSTCMA)

Online Degree Search Title: Social Data Science, MA

Campus: West, Online

Program Description: The MA degree program in social data science is designed for those interested in the social implications of big data and the ways that data science can provide insight into the understanding of social systems.

The program combines a thorough grounding in digital social science with the skills needed to analyze social data. This unique combination allows graduates to understand and contribute to building ethical social platforms, to manage creative communities, and to understand network-mediated social change. Graduates are prepared to advise institutions, businesses and government agencies on appropriate policies and to draw on large-scale trace data to help address significant social issues.

Artificial intelligence and algorithmic structures of social interaction represent significant challenges to society, and questions of equity, privacy and autonomy have become a recurring public concern. These technologies also may provide the keys for addressing substantial social issues. The critical analysis of these socio-technical systems requires both technical abilities and an understanding of social theory.

ASU offers a Master of Arts in social data science for those interested in engaging research at the intersection of data and society, preparing them to become leaders in the field. Students in the program work through a series of courses that provide a grounding in social theory and digital research methods, and they produce work that exemplifies their understanding of the state of the art in applying social data science within organizational and community contexts.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Biology, BA
- Environmental Science, BA
- Psychology, BA
- Psychology, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours including a thesis, or 30 credit hours including the required capstone course (STC 570).

Required Core (18 credit hours)

SDS 501 Theories of Data and Society (3)

SDS 510 Data Wrangling (3)

SDS 527 Ethics and Policies of Social Data (3)

SDS 537 Technologies of Community (3)

SDS 550 Computational Social Methods I (3)

SDS 551 Computational Social Methods II (3)

Electives (6 or 9 credit hours)

Culminating Experience (3 or 6 credit hours)

SDS 570 Social Data Projects (3) or

SDS 599 Thesis (6)

Additional Curriculum Information

Students complete either a three-credit hour capstone course (STC 570 Social Data Projects) or a six-credit hour thesis (STC 599). Students who choose to complete the capstone course will complete nine hours of electives. Students who choose to complete a thesis will complete six hours of electives.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the New College of Interdisciplinary Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of purpose
- an academic writing sample (preferred) or professional writing sample
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The statement of purpose should describe the applicant's educational background, scholarly interests, and academic and professional goals.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/social-data-science/>) for program descriptions and to request more information.

Career Opportunities: Graduates of the Master of Arts program in social data science are well-positioned for research roles in businesses, nonprofits and government organizations; to work with organizations to help them make ethical and effective use of social data; and for consulting roles regarding broader issues of social change and networked technologies. They also may continue on to doctoral work in cognate fields.

The program deliberately seeks to be more reflective of the diversity of those who are affected by datafication and to actively promote the careers of professionals who are underrepresented in data-related fields.

Career examples include:

- chief information officer
- communications director
- community manager
- data journalist
- intelligence or policy analyst
- program or project manager
- public affairs specialist
- research and data analyst
- social media manager
- social strategist

Social Justice and Human Rights, MA (ASJHRMA)

Online Degree Search Title: Social Justice and Human Rights, MA

Campus: West, Online

Program Description: Students in the MA program in social justice and human rights explore key topics, such as labor, migration, education and the environment, and the legal, political, historical and cultural frameworks that contextualize them. The program is well suited to those aiming to channel their interests and passions toward ethical responses to social injustice and human rights abuses.

Students may focus on specific issues in international or domestic contexts, including refugee resettlement, immigration and citizenship, human trafficking, racialized violence, and international human rights law and organizations. In theoretically and methodologically rigorous courses taught by experienced faculty from various disciplines, students develop understanding of how social justice and human rights issues are defined by multiple and intersecting forms of inequality and social identity, including gender, race, ethnicity, class, sexuality and nationality.

Many students complete internships domestically or internationally, with interns typically working alongside other researchers and advocates for social justice in order to grasp the complexities of the issues and to hone their abilities to work effectively in both research and advocacy contexts. Internships may also inform the basis of the culminating experience: a traditional Master of Arts thesis, an applied project or a capstone course.

Students gain deeper insight into the theory and practice of social justice, human rights and humanitarian efforts, and they develop practical skills in research and grant writing.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Applied Science, BAS
- Biology, BA
- Communication, BS
- Communication, BA
- English, BA
- Environmental Science, BA
- Gender, Women and Sexuality Studies, BS
- History, BA
- Interdisciplinary Arts and Performance, BA
- Interdisciplinary Arts and Sciences, BA
- Latin American Studies, BA
- Philosophy, Religion and Society, BA
- Political Science, BA
- Political Science, BS
- Psychology, BS
- Psychology, BA
- Social Justice and Human Rights, BA
- Social and Behavioral Sciences, BA
- Social and Behavioral Sciences, BS
- Social and Cultural Analysis (American Studies), BA
- Social and Cultural Analysis (Ethnicity, Race and Indigenous Studies), BA
- Social and Cultural Analysis (Latin American Studies), BA
- Social and Cultural Analysis (Peace Studies), BA
- Social and Cultural Analysis (Queer and Sexuality Studies), BA
- Social and Cultural Analysis (Women and Gender Studies), BA
- Sociology, BA
- Sociology, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a thesis, or 30 credit hours including the required applied project course (JHR 593), or 30 credit hours including the required capstone course (JHR 549).

Required Core (6 credit hours)

JHR 501 Proseminar in Social Justice and Human Rights (3)

JHR 502 Foundations in Social Justice and Human Rights (3)

Professional Development (3 credit hours)

JHR 506 Grant Writing for Social Justice and Human Rights (3)

JHR 515 Power and Inequality in Academia and Activism (3)

JHR 584 Internship (3)

Research (6 credit hours)

JHR 500 Research Methods (3)

JHR 525 Critical Methodologies in Social Justice and Human Rights (3)

Electives (9 or 12 credit hours)

JHR 503 Gender-based Violence and Sex-Trafficking (3)

JHR 504 International Law and Organizations (3)

JHR 505 Migration, Asylum and Refugees (3)

JHR 510 Problem-based Seminar in Social Justice and Human Rights (3)

JHR 540 Critical Humanitarianism (3)

JHR 550 Global Justice (3)

JHR 598 Global Racial Justice (3)

Culminating Experience (3 or 6 credit hours)

JHR 549 Capstone in Social Justice and Human Rights (3) or

JHR 593 Applied Project (6) or

JHR 599 Thesis (6)

Additional Curriculum Information

Campus students pursuing JHR 593 or JHR 599 will complete 9 credit hours of electives coursework. All online students and campus students selecting JHR 549 Capstone in Social Justice and Human Rights will complete 12 credit hours.

Course availability will be dependent on semester and modality. Students will select professional development and elective courses based on academic and professional interests as well as course availability. Additional elective courses may be approved by the academic unit.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the New College of Interdisciplinary Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree, in any field, from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in applicable master's degree program.

All applicants must submit:

- graduate application and application fee
- official transcripts
- statement of purpose
- two letters of recommendation
- an academic writing sample (preferred) or professional writing sample
- resume or curriculum vitae
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The statement of purpose should describe the applicant's educational background, scholarly interests and academic and professional goals.

It is preferred that letters of recommendation be from faculty members who know the applicant's work well; if these are not available, letters of recommendation from individuals in supervisory or professional roles will be accepted. If letters of recommendation from two faculty members are not available, then it is strongly preferred that at least one letter be from a faculty member.

A writing sample is recommended but not required for students applying to the digital immersion program. If the applicant does not meet the minimum GPA requirements, the application may still be considered.

Applicants should see the program website for application deadlines.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/social-justice-and-human-rights-ma/>) for program descriptions and to request more information.

Global Opportunities:

Global Experience: Studying abroad is possible for graduate students. There are more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

More information on available programs can be found on the Global Education Office website (<https://goglobal.asu.edu/students/graduate-students>).

Career Opportunities: Graduates with a master's degree in social justice and human rights can begin or advance their careers in advocacy work in nonprofit or government agencies, humanitarian work, international law and advocacy, as well as in careers that enable them to address forced

migration, trafficking, and gender-based or racialized violence.

Career examples include:

- advocate or lobbyist
- community organizer
- grant writer
- humanitarian aid worker
- policy analyst or researcher
- program officer
- public defender
- social justice specialist or consultant
- social service worker

Graduates from this program are well poised to pursue additional graduate education, such as law school or doctoral programs.

Journalism and Mass Communication, Walter Cronkite School of

Digital Audience Strategy, MS (CSDASMS)

Online Degree Search Title: Digital Audience Strategy, MS

Campus: ASU at Los Angeles, Online

Admission to this program is limited to students who do not have an undergraduate degree or minor in digital audiences.

Program Description: The MS program in digital audience strategy prepares students to design and execute digital strategies that connect audiences to goals through a data-driven, multidisciplinary, hands-on curriculum.

Students learn to measure and analyze how consumers interact with content online, on social media and on mobile devices. Using those measurement skills, students develop strategies and tactics to grow audiences through search engine optimization, search engine marketing, paid and organic social media campaigns, and digital content creation. They work with clients to develop, test and execute audience growth strategies in real time.

Through required coursework in media law and entrepreneurship, students learn to make sound business decisions regarding consumer privacy, digital data security and community engagement. Through elective courses, students develop additional expertise in areas such as management, audience data and intellectual property. Graduate students may also pursue an internship for elective credit.

Students graduate from the program ready to drive audience growth, lead digital marketing and further business development in the digital age.

The Master of Science in digital audience strategy is offered as an accelerated bachelor's plus master's degree with the BA in journalism and mass communication (<https://degrees.apps.asu.edu/bachelors/major/ASU00/CSJMCBA/journalism-and-mass-communication>). Interested students should visit Cronkite's accelerated master's program (<https://cronkite.asu.edu/accelerated-masters-degrees/>) page to learn about eligibility requirements and review how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Los Angeles location

Students interested in using GI Bill® benefits should consider another ASU campus.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at <https://www.benefits.va.gov/gibill/> (<https://www.benefits.va.gov/gibill/>).

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus

master's degree with::

Journalism and Mass Communication, BA

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours including the required capstone course (MCO 566).

Required Core (21 credit hours)

MCO 506 Media Law for Strategic Communication (3)

MCO 556 Media Entrepreneurship (3)

MCO 561 Defining the Digital Audience (3)

MCO 562 Search Engine Strategy for Digital Audience Acquisition (3)

MCO 563 Social Media Campaigns and Engagement (3)

MCO 564 Digital Audience Research and Behavior (3)

MCO 565 Digital Audience Analytics (3)

Electives or Internship (6 credit hours)

Culminating Experience (3 credit hours)

MCO 566 Digital Audience Management (3)

Additional Curriculum Information

For electives or internship, students should see the academic unit for the approved course list. Other coursework may be used with the approval of the academic unit.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Walter Cronkite School of Journalism and Mass Communication.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in journalism, communications, public relations or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement of intent
- professional resume
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. TOEFL scores must be at least 100 for the TOEFL iBT.

In 300 to 500 words, the personal statement of intent should describe the applicant's interest in the Master of Science program in digital audience strategy, explain how previous academic or professional experience will inform the applicant's work in the program, and how the program will help achieve personal or career goals of the applicant.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/digital-audience-strategy-ms/>) for program descriptions and to request more information.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Lead audience growth strategies using digital platforms.

- Use professional tools, technology, techniques and audience research to create effective, optimized content and campaigns for search engines, and be prepared for paid and organic search engine work in media careers.

- Able to use professional tools, technology and techniques to develop audiences, content and behavior, and be prepared for analytics tasks in media careers.

- Able to use professional tools, technology and techniques to create effective, strategic social media campaigns and be prepared for paid and organic social media work in media careers.

Global Opportunities:

Global Experience: Studying abroad is possible for graduate students. There are more than 50 program opportunities, with programs on every continent. Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning. Students can find more information on the Global Education Office (<https://goglobal.asu.edu/students/graduate-students>) website.

Career Opportunities: The digital field is rapidly growing and true experts are highly sought after. The Master of Science program in digital audience strategy equips students with the knowledge and skills they need to launch a new career in digital marketing, content creation, social media and SEO. Graduates are empowered and ready to accelerate their current communications career, able to step into leadership positions to steer digital marketing and communications teams.

Careers in this field include:

- marketing associate
- marketing manager
- market research analyst
- SEO specialist

Investigative Journalism, MA (CSINVJOURMA)

Online Degree Search Title: Investigative Journalism, MA

Campus: Downtown Phoenix

Spring and Summer applications are only open to current undergraduate Cronkite students in the accelerated master's program.

Program Description: The MA program in investigative journalism prepares students to launch high-level investigative reporting careers at the world's most prestigious news organizations.

This program is designed for career switchers who have experience in fields such as law, health, business, government and the arts, and for early career and midcareer journalists who want to develop specialization in investigative techniques.

Students combine their existing knowledge with investigative reporting techniques, multimedia production skills and interdisciplinary research methods to produce storytelling with deep public impact.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

Journalism and Mass Communication, BA

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

36 credit hours including the required capstone course (MCO 570).

Required Core (12 credit hours)

MCO 503 Media Law (3)

MCO 510 Data Journalism (3)

MCO 530 History, Philosophy and Ethics of Journalism (3)

MCO 545 Techniques of Investigative Reporting (3)

Other Requirements (9 credit hours)

MCO 502 Journalism Skills (8)

MCO 544 Accountability in Journalism (1)

Research (6 credit hours)

Culminating Experience (9 credit hours)

MCO 570 Master of Mass Communication Capstone (9)

Additional Curriculum Information

Students must complete a total of eight credit hours of MCO 502, which is offered at variable credit hours and can be taken multiple times.

Students must complete six credit hours of interdisciplinary research methods courses offered under the MCO 591 course listing. Selection of these courses will require departmental approval.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Walter Cronkite School of Journalism and Mass Communication.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any discipline or related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- three letters of recommendation
- professional resume
- letter of intent
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. Applicants must receive a score of 100 or better on the TOEFL iBT® taken in a testing center.

Applicants should provide a 300- to 500-word statement describing interest in investigative journalism, career goals, and how previous work and academic experience have prepared the student for success.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Evaluate the principles of journalism, such as accuracy, fairness, timeliness, diversity and privacy, and apply such principles to their course requirements.
- Evaluate ethical, diversity and legal standards relevant to the journalism industry and create culturally proficient communication.
- Develop the tools, technology and techniques for investigative reporting that adheres to accepted journalistic standards and practices, and which prepares them for high-level investigative reporting careers.

Global Opportunities:

Global Experience: Studying abroad is possible for graduate students. There are more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find more information on available programs on the Global Education Office website (<https://goglobal.asu.edu/students/graduate-students>).

Career Opportunities: Investigative reporting is in high demand in news organizations of all sizes, and graduates of Cronkite's Master of Arts program in investigative journalism are particularly prepared to excel in these positions, applying experience with investigative reporting techniques, data analysis and immersive storytelling using text, photo, video and audio content.

Graduates have accepted investigative positions at news organizations across the country and around the world, such as NPR, The Associated Press, Inside Climate News, the International Consortium of Investigative Journalists, OpenSecrets, Houston Chronicle, Dallas Morning News and Arizona Center for Investigative Reporting.

Journalism and Mass Communication, PHD (CSJMCPHD)

Online Degree Search Title: Journalism and Mass Communication, PhD

Campus: Downtown Phoenix

Program Description: The PhD program in journalism and mass communication at the Walter Cronkite School of Journalism and Mass Communication is a highly individualized program that attracts seasoned media professionals transitioning to academia, as well as recent graduates of master's degree-level programs in journalism and communication, social and behavioral sciences, or the humanities.

Students have access to the resources, training and mentorship they need to answer critical questions that challenge the fields of journalism, digital and social media, strategic communication and audience studies, and global mass communication.

The program is designed around core values of inclusion, collaboration and mentoring, transdisciplinarity and original research.

Students are able to develop individual programs of study, taking coursework and drawing on knowledge and methodologies from diverse fields that have a bearing on questions within mass communication. Examples include political science, film, computer and data sciences, sociology, anthropology and more.

Within the Cronkite School, students work closely with faculty mentors and fellow students on collaborative projects, develop their own research programs, and benefit from the advice and examples of senior scholars for personalized guidance.

The ultimate goal of the program is to train scholars capable of identifying key questions, designing appropriate studies to investigate those questions, and conducting independent and impactful research. Students are exposed to a wide range of theories and methods so they can forge their own scholarly identity based on interests and aptitudes.

The Cronkite School is committed to creating an environment in which everyone feels they are represented, their experience is equitable, they are

fully accepted for who they are and they are valued. The school strives daily to be a welcoming place for all members of the community, where the importance and contribution of each individual is valued and respected.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Core (18 credit hours)

Electives (18 credit hours)

Other Requirements (24 credit hours)

previous master's degree or additional hours approved by the supervisory committee (24)

Research (12 credit hours)

Dissertation (12 credit hours)

Additional Curriculum Information

Students should see the academic unit for an approved course list.

Students entering the program with a master's degree in journalism or mass communication or a related field must complete 60 credit hours of coursework. Students who are admitted to the program without a master's degree are required to complete an additional 24 credit hours of coursework.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Walter Cronkite School of Journalism and Mass Communication.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants must submit:

- graduate admission application and application fee
- official transcripts
- three letters of recommendation
- personal statement of interest
- statement of research goals
- resume
- samples of scholarly work (optional)
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. TOEFL scores must be at least 100 on the internet-based test; a Duolingo score must be at least 120.

The personal statement of interest should be approximately 1,000--1,500 words and explain why the student wants to pursue a doctorate in mass communication as well as why the Cronkite School program fits their career and personal aims.

The statement of research goals should indicate at least two Cronkite research faculty members with whom the student would like to work, supported by relevant citations of the faculty members' scholarly publications.

Students should see the program website for application deadlines and admission terms. Applicants must meet all deadlines and application requirements to be considered.

The Cronkite School's doctoral committee reviews complete applications. Recommendations for admission are made to Graduate Admission Services, where the final admission decisions are made.

Global Opportunities:

Global Experience: The Cronkite doctorate program is multicultural, with students and alumni hailing from all over the world and bringing their experiences into seminar discussions and research. There are also opportunities to work on international grant-funded research projects led by Cronkite faculty to broaden students' perspective on issues within the discipline. More information on available programs can be found on the Global Education Office website (<https://goglobal.asu.edu/students/graduate-students>).

Career Opportunities: Graduates with a doctorate in journalism and mass communication are prepared for any of a number of career opportunities.

Professionals with expertise in mass media and communications are in high demand as universities and institutions train the next generation of media professionals. Career examples include:

- industry researcher or trainer
- media analyst
- media consultant
- university professor

Mass Communication, MMC (CSMCOMMMC)

Online Degree Search Title: Mass Communication, MMC

Campus: Downtown Phoenix

Program Description: The Walter Cronkite School of Journalism and Mass Communication's MMC degree program immerses students in the practices of journalism and strategic communications, preparing them for careers in news, documentary storytelling, advocacy, community engagement or corporate communications.

This 36 credit hour master's degree program begins with a multimedia boot camp, teaching students how to tell stories with text, photo, video and audio elements. In the second semester, students choose from a selection of more advanced courses, such as those focused on narrative writing, podcasting, advanced broadcast production, documentary production, health reporting, Spanish-language news, transborder coverage, public relations research, strategic communications storytelling and media entrepreneurship.

The program culminates in a professional immersion experience in one of the Cronkite School's strategic communication labs or news bureaus in Los Angeles, Phoenix or Washington, D.C. Working under the guidance of award-winning journalists and strategists, these capstone programs (<https://cronkite.asu.edu/experiences/>) offer practical experience in a professional news or agency environment.

This program is offered concurrently (<https://cronkite.asu.edu/graduate-programs/>) with degrees from ASU's Sandra Day O'Connor College of Law and ASU's School of Sustainability. It is also offered in a dual MD/MMC degree with the Mayo Clinic Alix School of Medicine.

Concurrent Program Options:

Students can choose to create their own concurrent degree combination to match their interests by working with their academic advisor during or after their first semester of study. Some concurrent combinations are not possible due to high levels of overlap in curriculum; students should speak with their academic advisor for more details.

This degree is also offered as concurrent degree program with:

- Legal Studies, MLS
- Sustainability Solutions, MSUS

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Journalism and Mass Communication, BA
- Sports Journalism, BA

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours including the required applied project course (MCO 593)-Mid-Career, or 30 credit hours including the required capstone course (MCO 570)-Mid-Career, or 36 credit hours including the required capstone course (MCO 570)-Full Time.

Required Core (9 credit hours)

MCO 503 Media Law (3)
MCO 510 Data Journalism (3) or MCO 536 Public Relations Research (3)
MCO 525 21st-Century Media Organization and Entrepreneurship (3)

Electives (6 credit hours)

Other Requirements (12 credit hours)

MCO 502 Journalism Skills (8)
MCO 504 Cronkite Master's Seminar (1)
MCO 530 History, Philosophy and Ethics of Journalism (3) or MCO 519 Strategic Communications Leadership and Ethics (3)

Culminating Experience (3 or 9 credit hours)

MCO 570 Master of Mass Communication Capstone (3 or 9)
MCO 593 Applied Project (3)

Additional Curriculum Information

The master's degree program is a full-time, 36 credit hour program. Students with extensive professional journalism experience may be offered the opportunity to pursue the 30 credit hour mid-career option.

Students must complete a total of eight credit hours of MCO 502, which is offered at variable credit hours and can be taken multiple times.

Students should see the academic unit for a complete list of approved electives. Other requirement coursework may be substituted with approval of the academic unit.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Walter Cronkite School of Journalism and Mass Communication.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- three letters of recommendation
- personal statement of interest (350 to 500 words in length)
- resume
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. TOEFL scores must be at least 100 for the internet-based examination taken in a testing center.

The Cronkite School's graduate committee reviews complete and on-time applications. Recommendations for admission are made to Graduate Admission Services, where the final admission decisions are made.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Develop the tools, technology and techniques for content creation that adheres to accepted journalistic standards and practices, and which prepares them for careers in media and communication.
- Evaluate ethical, diversity and legal standards relevant to the journalism industry and create culturally proficient communication.

Global Opportunities:

Global Experience: Studying abroad is possible for graduate students. There are more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic

breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find more information on the Global Education website (<https://goglobal.asu.edu/students/graduate-students>).

Career Opportunities: The skills of strong reporting, research, writing and multimedia production are in high demand across industries, including in journalism, strategic communication, nonprofit leadership, international affairs, political advocacy and entrepreneurship.

Career examples include:

- digital strategist
- documentary producer
- editor
- entrepreneur
- media executive
- photojournalist
- podcast producer
- reporter
- videographer

Narrative and Emerging Media, MA (CSNEMMA)

Online Degree Search Title: Narrative and Emerging Media, MA

Campus: ASU at Los Angeles

Program Description: In the MA program in narrative and emerging media, students learn how to tell stories that aren't just watched or read --- they're experienced. In under one year, students learn innovative storytelling techniques, explore the emerging media marketplace, connect with the field's top professionals and develop critical media project management skills.

Through hands-on learning, students explore the entire landscape of emerging immersive media techniques --- including augmented reality, virtual reality, extended reality, 360 video, animated graphics, short-form digital video and documentary production --- to tell creative fictional stories or create nonfiction journalistic work. Students capture and create content for workflow in multiple industries, and they learn to lead teams of producers, engineers, writers and artists across different technologies. They build business acumen and gain enhanced insight into the research, development, and finance and business models driving the future of emerging media, which are central to the program.

Delivered exclusively at the ASU California Center --- Broadway in downtown Los Angeles, the program immerses students in a state-of-the-art emerging media hub. The building includes a state-of-the-art virtual production stage --- one of only a handful of U.S. universities to provide this incredible studio. In addition, the building has a green screen studio that allows for virtual reality productions and live broadcasts, as well as markerless motion capture. Students learn and work in these spaces to create compelling visual storytelling for client productions and their own passion projects.

Students engage in courses that anchor content creation and project management with communication theory and current case studies, along the way building a cohesive portfolio of professional work aligned with industry standards. Students also network and get critiques from industry professionals whose work may inspire their own. Students who complete the program are well-prepared to leap into creation, production and project management roles across the media industry or to pursue independent work.

This is a joint program offered by The Sidney Poitier New American Film School and the Walter Cronkite School of Journalism and Mass Communication.

Los Angeles location

Students interested in using GI Bill® benefits should consider a program on another ASU campus.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at www.benefits.va.gov/gibill/ (<https://www.benefits.va.gov/gibill/>).

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the

STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

30 credit hours including the required applied project course (NEM 693).

Required Core (21 credit hours)

NEM 501 Emerging Media (3)

NEM 510 Narrative Development and Pre-Production (3)

NEM 515 Emerging Media Production (3)

NEM 530 Emerging Media Project Management (3)

NEM 550 Diversity and Ethics in Emerging Media (3)

NEM 585 Portfolio (3)

NEM 630 Emerging Media for Clients (3)

Other Requirements (3 credit hours)

NEM 520 AR/VR/XR for Storytelling (3)

NEM 525 Virtual Production for Storytelling (3)

NEM 601 Short Form and 360 Video Production (3)

Electives (3 credit hours)

Culminating Experience (3 credit hours)

NEM 593 Applied Project (3)

NEM 585 is a one credit hour course that must be taken three times, for a total of three credit hours.

Students must complete one course from the Other Requirements list.

Admission Requirements: Applicants must fulfill the requirements of the Graduate College, the Walter Cronkite School of Journalism and Mass Communication and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- professional resume
- two letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Global Opportunities:

Global Experience: Students may use elective slots to participate in applicable study abroad experiences. Students are also encouraged to pursue work globally for their applied projects.

Career Opportunities: This degree prepares students to thrive in a growing, emerging media industry. According to a Burning Glass industry report in tandem with Epic Games, "Demand for 3D technology skills is growing quickly in the job market --- so quickly, in fact, that demand for these skills is outpacing the growth of the labor market overall." And according to EMSI data, postings for jobs that require skills in virtual reality are at an all-time high. More than 13,000 jobs were posted in August alone for roles such as advertising specialist and product developer at firms from Facebook to Deloitte.

Graduates are well-suited to careers in AR, VR, and XR production; immersive storytelling; virtual production; journalism and documentary production; and media project management, or to become entrepreneurial storytellers ready to seek funding for their own projects.

Sports Journalism, MA (CSSPJMA)

Online Degree Search Title: Sports Journalism, MA

Campus: Downtown Phoenix

Spring and Summer applications are only open to current undergraduate Cronkite students in the accelerated master's program.

Program Description: Sports media is among the fastest-growing sectors of the media industry. The Walter Cronkite School of Journalism and Mass Communication's MA in sports journalism is a 36 credit hour, three-semester program providing students with unparalleled preparation for careers in sports media and communication.

Students begin with intensive multimedia skills courses, which teach them to produce sports and news coverage across broadcast, digital and print platforms. From there, students choose advanced classes in sports reporting, videography, podcast production, live sports production, play-by-play delivery, narrative writing and documentary video before finishing the program in sports bureaus located in Phoenix or Los Angeles, or at the Cronkite Agency, an immersive strategic communications agency experience at the journalism school.

Students learn the values and principles embodied by Walter Cronkite in classes that focus on sports journalism ethics and media law, and they can complete the degree program in as little as 12 months.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

Journalism and Mass Communication, BA

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

36 credit hours including the required capstone course (MCO 570).

Required Core (15 credit hours)

MCO 503 Media Law (3)

MCO 510 Data Journalism (3)

MCO 526 Advanced Issues in 21st Century Sports and Media (3)

MCO 529 Ethics and Diversity in Sports Journalism (3)

MCO 540 Sports Reporting (3)

Electives or Research (3 credit hours)

Other Requirement (9 credit hours)

MCO 502 Journalism Skills (8)

MCO 504 Cronkite Master's Seminar (1)

Culminating Experience (9 credit hours)

MCO 570 Master of Mass Communication Capstone (9)

Additional Curriculum Information

Students must complete a total of eight credit hours of MCO 502, which is offered at variable credit hours and can be taken multiple times.

Students should see the academic unit for a complete list of approved electives.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Walter Cronkite School of Journalism and Mass Communication.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a closely related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- three letters of recommendation
- personal statement of interest (350 to 500 words in length)
- resume
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. TOEFL scores must be at least 100 for the internet-based examination.

The Cronkite School's graduate committee reviews complete and on-time applications on a rolling basis, with priority for admission and funding for applications received by December 1.

Spring and Summer applications are only open to current undergraduate Cronkite students in the accelerated master's program.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Evaluate the principles of journalism, such as accuracy, fairness, timeliness, diversity and privacy, and apply such principles to their course requirements.
- Evaluate ethical, diversity and legal standards relevant to the journalism industry and create culturally proficient communication.
- Develop the tools, technology and techniques for sports content creation that adheres to accepted journalistic standards and practices, and which prepares them for careers in sports media and communication.

Global Opportunities:

Global Experience: Studying abroad is possible for graduate students. There are more than 50 program opportunities, with programs on every continent.

Faculty-directed programs tend to be the best fit for graduate students; taking courses with ASU professors over the summer or during academic breaks offers students close mentorship and professional network growth in many fields of study while they earn ASU credit. Exchange program participation is also possible with careful planning.

Students can find more information on the Global Education Office (<https://goglobal.asu.edu/students/graduate-students>) website.

Career Opportunities: Expertise in the sports journalism field is in high demand across sports organizations, news networks and digital media outlets. The high-value takeaways and tactical skills gained in the sports journalism master's degree program turn students into competitive job candidates and sports journalism leaders.

Career opportunities for graduates with a sports journalism master's degree include:

- sports editor
- sports news reporter
- sports play-by-play announcer
- sports podcast or radio host
- sports PR and strategic communications professional
- sports television and video producer
- sports television reporter
- team, league or conference reporter

Strategic Communication, MA (CSSTRCOMMA)

Online Degree Search Title: Strategic Communication, MA

Campus: Downtown Phoenix

Program Description: Students in the MA program in strategic communication gain the media skills, techniques, critical thinking skills and leadership capacity to advance careers across media and communication in agencies, sports, corporations, government agencies and nonprofit organizations.

Students develop the ability to strategically address communication challenges through courses in strategy development, research methods, content creation, crisis communication, ethics, campaign planning and others; courses in communication management, leadership, project management and finance help learners become leaders.

Students begin their experience by developing foundations in communication history, theory and ethics. An emphasis on content creation prepares students to produce both traditional public relations campaigns, persuasive writing and media relations plans, as well as innovative strategic content including client-video storytelling and digital content hubs. Then, via the school's teaching hospital model, students receive immersive, hands-on training in advanced tools, progressive techniques, and real client work across a faculty-led, student-run agency.

Degree Requirements:

30 credit hours including the required capstone course (MCO 570).

Required Core (18 credit hours)

MCO 502 Journalism Skills (8)

MCO 504 Cronkite Master's Seminar (1)

MCO 506 Media Law for Strategic Communication (3)

MCO 519 Strategic Communications Leadership and Ethics (3)

MCO 525 21st Century Media Organization and Entrepreneurship (3)

Other Requirements (3 credit hours)

MCO 537 Strategic Communications Writing (3) or

MCO 561 Defining the Digital Audience (3)

Electives (6 credit hours)

Culminating Experience (3 credit hours)

MCO 570 Master of Mass Communication Capstone (3)

Additional Curriculum Information

Elective courses should be selected in consultation with the program advisor; some courses require department approval.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Walter Cronkite School of Journalism and Mass Communication.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of a student's first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admissions application and application fee
- official transcripts
- three letters of recommendation
- professional resume
- personal statement
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. Applicants must achieve a score of 100 or better on the TOEFL iBT, taken in a testing center. Similar English proficiency scores from other exams may be considered. ASU Global Launch does not satisfy this requirement.

Applicants should provide a 300- to 500-word statement describing their interest in strategic communication, their career goals, and how previous work and academic experience have prepared the student for success.

Global Opportunities:

Global Experience: Students may use elective course slots to participate in applicable Global Education experiences (<https://goglobal.asu.edu/students/graduate-students>) and international internships. Students also may work with international clients at the capstone level.

Career Opportunities: Content creation and campaign strategy skills are in high demand across the media industries. Many strategic communicators pursue careers in agency or corporate environments, while others leverage their skills in work with multiple clients or as media entrepreneurs.

Graduates possess skills that are transferable across communications fields and organizations, including:

- athletic teams
- colleges and universities
- communication agencies
- government agencies and political groups
- nonprofit organizations
- public relations firms
- retail and hospitality brands

Graduates can apply their advanced media skills to a variety of roles, including:

- brand storytellers
- community engagement specialists
- content creators
- digital strategists
- media executives
- media relations specialists
- PR professionals
- strategic communications leaders

Law, Sandra Day O'Connor College of

Biotechnology and Genomics, LL.M. (LWGENOMLLM)

Online Degree Search Title: Biotechnology and Genomics, LLM

Campus: Downtown Phoenix

Program Description: Today's lawyers must be prepared to handle challenges like those that surround international trade, evidentiary standards, personalized medicine, licensing and business planning, to name a few.

The LLM program in biotechnology and genomics is associated with the Center for Law, Science and Innovation, the nation's largest and oldest multidisciplinary research center focusing on the legal implications of new scientific discoveries and emerging technologies. The faculty has a long history of high-quality teaching, and a vast number hold postgraduate degrees in a wide array of sciences.

Coursework and research opportunities are diverse. Through classroom instruction and guided independent study, Master of Laws candidates examine the legal issues surrounding genetic applications such as:

- cloning
- forensic evidence
- gene testing
- gene therapy
- genetically modified organisms
- stem cells and behavioral genetics

The issues relate to:

- business planning
- confidentiality
- evidentiary standards
- intellectual property
- international trade
- liability
- licensing
- privacy
- regulation

Students in the Master of Laws program in biotechnology and genomics explore and examine the law that enables and constrains the development, control and application of biotechnology and genomics.

Forensic science and ethical constraints on the various contemplated uses are also important elements of the program.

Because the legal, ethical and policy aspects of genomics and biotechnology are of global significance, this program is also beneficial for non-U.S. lawyers. Candidates for a Master of Laws degree must have received their JD or comparable terminal law degree from another country.

Degree Requirements:

The program is designed to be completed in nine months on a full-time basis but also may be pursued on a part-time basis.

A degree candidate must complete 24 credit hours of coursework to obtain the Master of Laws degree in biotechnology and genomics. A candidate may elect to write a graduate thesis for either three or six credit hours, or elect not to write a thesis and to fulfill the equivalent credits with other coursework. Two required courses are Genetics and the Law, and Biotechnology: Science, Law and Policy.

The remaining credit hours generally are obtained from the list of elective courses. With faculty advisor approval, a candidate may satisfy up to six credit hours with courses offered by other ASU departments or by law courses that are not included on the approved elective list.

Admission Requirements: Applicants should see the program website for application deadlines.

Admission to the program is competitive. To be admitted, an applicant must have completed a Juris Doctor degree program or a law degree program at a foreign institution that would qualify the applicant to practice law or pursue license to practice in that country, and have submitted a complete application to the program. Selection is based on:

- academic background and potential
- career experience and ambitions
- diversity of experience and background
- space and resource limitations in the law school
- strength of experience related to the program sought and other factors

For an application to be considered complete, it must include the following:

- completed Law School Admissions Council electronic application form (<https://law.asu.edu/admission/llm>) linked on the ASU Law admissions page
- completed LLM Credential Assembly Service report: <https://www.lsac.org/llm-other-law-program-applicants/application-process-llm-other-law-programs> (<https://www.lsac.org/llm-other-law-program-applicants/application-process-llm-other-law-programs>)
- required application fee
- resume that does not exceed three typed pages
- personal statement that does not exceed 1,250 words (double-spaced typed pages)
- transcripts from all institutions attended, including the transcripts showing that the bachelor's degree and law degree were conferred
- two letters of recommendation
- writing sample

Additional Application Information

Transcripts and letters of recommendation or evaluations must be submitted through the Law School Admissions Council's Credential Assembly Service and will be provided to the ASU College of Law by LSAC.

Applicants with degrees from foreign institutions must meet ASU Graduate College and Sandra Day O'Connor College of Law English proficiency requirements.

Career Opportunities: Graduates of the Master of Laws program in biotechnology and genomics can excel in the following legal fields:

- agricultural law and policy

- bioethics
- biomedical research ethics and law
- biotechnology policy
- biotechnology licensing and litigation
- FDA regulation
- genetics and the law
- health law, particularly public health law
- intellectual property law
- nanotechnology law and policy
- neuroscience and the law
- patent law and patent litigation
- privacy

Health Law and Policy (Certificate), Certificate (LWHLPGRCT)

Online Degree Search Title: Health Law and Policy (Graduate Certificate)

Campus: Downtown Phoenix

Program Description: The health law and policy certificate at ASU's Sandra Day O'Connor College of Law is a pivotal component in launching a health law career.

The program is designed to immerse students in multiple areas of public health law, policy and ethics, broadening their knowledge and skills in preparation for practice in public and private sectors, policy development or academic work.

Degree Requirements:

Required Core (5 credit hours)

LAW 650 Health Law (3)

LAW 651 Public Health Law (2)

Electives (10 credit hours)

Culminating Experience

writing requirement and active participation in health law

Additional Curriculum Information

Students are required to participate in at least one of the following activities; other activities consistent with this listing also may be considered by the program or certificate director or designee:

- active participation as an officer for at least one year in the student Health Law Society
- editorial board position for at least one year with Jurimetrics
- health or public health law-based externships, upon approval from program director or designee, for at least one semester or summer session
- research assistant for at least one semester or summer session with the Public Health Law and Policy program or other centers or programs at ASU Law, provided that research is focused predominantly on health-related topics

The student must write a substantial paper on a health or public health law topic, under the guidance of a College of Law faculty member. The paper must be at least 15 single-spaced pages. Papers that satisfy the college's graduation writing requirement, flexible writing requirement or law journal requirements can fulfill this certificate requirement, including as part of seminar courses among the elective courses.

Each student must earn a cumulative average grade of at least 3.00 (scale is 4.00 = "A") for courses taken to satisfy the substantive requirements of the health law and policy certificate. A student also must earn a minimum grade of "B" in any course applied toward the certificate.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Sandra Day O'Connor College of Law.

Applicants must be existing JD or LLM students who are currently enrolled in coursework and in good academic standing with the ASU College of Law. Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- admission application for the certificate program through Law Interactive*
- proof of English proficiency

*Students should refer to the ASU Law website (<https://law.asu.edu/>).

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of current residency.

International students who need an F-1 or J-1 visa need to apply to and be accepted into a graduate degree program prior to being considered for the certificate program. International students residing in the United States on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for admission to this certificate program.

Further specific requirements for admission to the certificate program can be found on the Sandra Day O'Connor College of Law website.

Career Opportunities: ASU JD, LLM and MLS students concentrating in health law and policy are finding career placements across the United States in an array of positions from diverse employers. Among the opportunities are employment with:

- government agencies at all levels
- health care entities
- health insurers
- law firms
- policy think tanks and academic institutions

For more information, students should consult the career services office, and check out the listing of prominent health law alums and their current positions on the Center for Public Health Law and Policy website (<https://law.asu.edu/centers/public-health-law-policy>).

Human Resources and Employment Law, MHREL (LWHREMREL)

Online Degree Search Title: Human Resources and Employment Law, MHREL

Campus: Downtown Phoenix, Online

Program Description: The MHREL is a non-JD graduate program that specifically caters to both entry-level and established nonlawyer human resources, recruitment and operations professionals who wish to understand the legal and regulatory framework that governs recruiting, hiring, maintaining, promoting and dismissing employees and independent contractors in the public and private sectors.

Students identify and solve critical employment-related problems facing organizations that only trained professionals understand by learning the complex legal and regulatory framework governing HR activities.

The Master of Human Resources and Employment Law program consists of 30 credit hours that can be completed either in-person or online in one to three years, on a full-time or part-time basis.

Degree Requirements:

30 credit hours including the required capstone course (SDO 685), or 30 credit hours including the required capstone course (SDO 685).

Required Core (18 credit hours)

SDO 501 U.S. Law and Legal Analysis: Masters (3)

SDO 531 Employment Law: Masters (3)

SDO 541 HR and Employment Law: Masters (3)

SDO 551 Duties, Obligations and Rights in the Workplace: Masters (3)

SDO 552 Employment Discrimination: Masters (3)

SDO 569 Advanced HR and Employment Law: Masters (3)

Electives (9 credit hours)

Culminating Experience (3 credit hours)

SDO 685 Human Resource and Employment Law Capstone (3)

Additional Curriculum Information

Following completion of the six required core courses (18 credit hours), students in the Master of Human Resources and Employment Law program can select from varied elective courses (at least nine credit hours) that will count toward their degree. The pool of elective courses students can choose from include courses focused on employment law-adjacent subject areas such as privacy rights, dispute resolution and contracts. Students are also able to choose elective courses that present an opportunity to explore other legal areas that may interest them or be pertinent to their chosen career path.

The degree culminates in a three credit hour capstone course that focuses on the practical application of knowledge and skills gained during the program. During the capstone course, students evaluate the impact of various statutory and regulatory laws that affect the day-to-day operations of a human capital management professional, learn how to successfully navigate challenges these laws present, and manage relationships with varying employee groups at all organizational levels.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Sandra Day O'Connor College of Law.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a related field from a regionally accredited institution.

A minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of an applicant's bachelor's degree program is preferred. Prospective students may earn admission with a cumulative GPA below 3.00 if the other assets included in the application package are strong, such as:

- a personal statement that addresses a low GPA or inconsistent academic performance
- improved academic performance in subsequent degrees
- significant work history since completing a bachelor's degree

U.S.-educated applicants can apply through the FastApp process (<https://law.asu.edu/admission/mhrel>), which streamlines the application process and may allow for an offer of conditional admission to the MHREL program while the applicant continues to submit any additional requested documentation.

International or internationally educated applicants should complete the MHREL Full Application form (<https://mls.law.asu.edu/Apps/Admissions/Application/MLS/>).

All applicants must submit:

- official transcripts
- professional resume
- any other supporting documents (optional)
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. If English is not an applicant's native language, and an applicant has not completed a bachelor's degree or higher at a regionally accredited institution in the United States, they must provide evidence of English proficiency as indicated by acceptable scores. Most competitive applicants should have a TOEFL iBT score of at least 90, an IELTS score of at least 7.0, or a PTE score of at least 64. Exceptional candidates with relevant experience and background who have scores slightly below these thresholds will also be considered. ASU's institutional code is 4007.

International applicants must also submit an official transcript, two letters of recommendation, a personal statement, a writing sample and explanations of affirmative answers to any conduct questions. U.S.-educated applicants may also be asked by the admissions team to submit these resources to strengthen their application.

Applicants with foreign education credentials should have all transcripts evaluated by the Academic Credentials Evaluation Institute Inc. ACEI independently evaluates all academic documents issued in countries other than the United States.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/hr-and-employment-law/>) for program descriptions and to request more information.

Career Opportunities: Employment opportunities exist in supervisory and management positions in government agencies (federal, state and local) and the private sector. Graduates of the program may find positions as:

- compensation and benefits managers
- employment recruiters
- equal employment opportunity managers and specialists
- executive search consultants
- hiring managers
- human resources managers and specialists
- labor advocates
- labor relations specialists
- legal support workers
- ombudsmen

Human resources employment is projected to grow faster than average (employment increase of 5% or more) in the U.S. and to have 100,000 or more job openings nationwide over the period 2019 to 2029.

The Society of Human Resources Management, a premier HR professional organization with more than 300,000 members nationwide and globally, has recognized ASU Law as the first law school that is fully aligned with the SHRM curriculum guidelines. <https://www.shrm.org> (<https://www.shrm.org>)

This alignment provides students enrolled with an emphasis in human resources and employment law the opportunity to apply for the SHRM certification professional exam. Achieving this certification is an important distinction that many employers recognize in hiring and promoting HR and employment law professionals.

Current and future students who complete this degree may be eligible for the SHRM certification exam with experiential hours. Students must have a minimum of 500 hours of relevant experience to apply for the SHRM-CP exam. Students who already have SHRM certification will receive Continuing Education credit for the courses they have completed or will complete.

Professional Licensure: ASU programs that may lead to professional licensure (<https://admission.asu.edu/academics/licensure>) or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state.

Indian Law (certificate), Certificate (LWLAWGRCI)

Online Degree Search Title: Indian Law (Graduate Certificate)

Campus: Downtown Phoenix

Program Description: The Indian law graduate certificate within ASU's Sandra Day O'Connor College of Law provides ASU Law students with the legal expertise to practice Indian law. The program offers practical experiences with tribal organizations, as well as opportunities for scholarship and externships. The certificate recognizes law students who possess extensive legal knowledge in tribal law and federal Indian law.

Established more than 30 years ago, the Indian Legal Program is one of the most respected Indian law programs in the nation.

Degree Requirements:

The certificate program requires a minimum of 21 credit hours of substantive work in Indian law and related fields. The following courses are required:

- LAW 632 Federal Indian Law I
- LAW 704 Federal Indian Law II
- LAW 776 Indian Legal Clinic
- two advanced Indian law courses approved by the faculty director of the Indian Legal Program

The remaining credit hours consist of elective courses approved by the faculty director. Students must complete a substantial paper on an Indian law topic approved by the faculty director. Students must receive a grade of "C" (scale is 4.00 = "A") or above or a "Pass" in each course used to fulfill the Indian law certificate requirements.

More specific requirements for completion of the Indian law certificate can be found on the Sandra Day O'Connor College of Law website.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Sandra Day O'Connor College of Law.

Students wishing to pursue the Indian law certificate must be enrolled in the Juris Doctor degree program at the Sandra Day O'Connor College of Law and must be in good standing. Specific requirements for the Indian law certificate program can be found at the ASU Law website (<https://law.asu.edu/>).

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

International students who need an F-1 or J-1 visa need to apply to and be accepted into a graduate degree program prior to being considered for the certificate program. International students residing in the United States on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for admission to this certificate program.

Career Opportunities: Graduates stand out to employers, especially those seeking a job representing state, federal or tribal governments or representing companies that do business with tribes.

Working for tribes in public service, private practice and nonprofit organizations, Indian Law Program alumni are making a difference in Indian Country.

Juris Doctor of Law, JD (LWJDJD)

Online Degree Search Title: Juris Doctor, JD

Campus: Downtown Phoenix

Program Description: The JD degree program from the Sandra Day O'Connor College of Law prepares the next generation of legal scholars to become successful lawyers. The Juris Doctor program offers a large selection of courses with options for transdisciplinary study with other departments on campus. Students find the opportunity to take classes with a more traditional, theoretical focus and to take advantage of many options that focus on the development of practice skills. The variety of focus areas offered by ASU Law include:

- business law
- criminal law
- health law
- Indian law
- intellectual property
- international law
- international rule of law and security
- law, science and technology
- law and sustainability
- patent practice
- sports law and business
- trial advocacy

First-year Juris Doctor students take courses in civil procedure, contracts, torts, legal method and writing, property, constitutional law, criminal law, legal advocacy and professional responsibility. After the first year, all courses are electives; students must satisfy two writing requirements and an experiential requirement in order to graduate. A full list of graduation requirements (<https://law.asu.edu/aba-disclosures>) can be found on the ASU Law website.

Focus areas (<https://law.asu.edu/degree-programs>), certificates (<https://law.asu.edu/degree-programs/jd/certificates>), study abroad options (<https://law.asu.edu/experiences/abroad>), the Washington, D.C., campus and many other opportunities are available to enhance students' experiences.

Students also can pursue a Juris Doctor concurrently with other degrees from ASU, such as an MBA, MSW or MSLB, or a PhD in justice studies. Mayo Clinic School of Medicine students also have an opportunity to pursue a dual JD/MD degree. More information is available on the Mayo Clinic and ASU Alliance for Health Care website: <https://mayoclinicasualliance.org/education/dual-degree/> (<https://mayoclinicasualliance.org/education/dual-degree/>).

A flexible schedule option (<https://law.asu.edu/degree-programs/jd/jd-flexible-schedule>) is offered for students who wish to attend law school but

cannot manage full-time enrollment because of other obligations in their lives; however, it is not an evening program.

Concurrent Program Options:

Students can choose to create their own concurrent degree combination to match their interests by working with their academic advisor during or after their first semester of study. Some concurrent combinations are not possible due to high levels of overlap in curriculum; students should speak with their academic advisor for more details.

This degree is also offered as concurrent degree program with:

- Justice Studies, PhD
- Social Work - Standard Program, MSW
- Sports Law and Business, MSLB
- W. P. Carey MBA - Full-Time Program

Degree Requirements:

ASU Law JD students must complete a total of 88 credit hours to graduate.

Required Core (30 credit hours)

- LAW 515 Contracts (4)
- LAW 516 Criminal Law (3)
- LAW 517 Torts (4)
- LAW 518 Civil Procedure (4)
- LAW 519 Legal Method and Writing (3)
- LAW 522 Constitutional Law (3)
- LAW 523 Property (4)
- LAW 524 Legal Advocacy (2)
- LAW 638 Professional Responsibility (3)

Electives (58 credit hours)

Additional Curriculum Information

Students should see ASU Law's Statement of Student Policies for additional JD degree requirements.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Sandra Day O'Connor College of Law.

To be considered for admission to the JD program, applicants must have taken the LSAT (excludes applicants applying to the ASU Achievement Program) and have earned, or will earn by the time of enrollment in law school, a bachelor's degree from an institution accredited by an accrediting agency recognized by the United States Department of Education.

ASU Law requires applicants to apply electronically through the Law School Admission Council website at <https://www.lsac.org/> (<https://www.lsac.org/>).

An application for admission must include:

- electronic application
- personal statement (no more than two pages, double-spaced and font size no smaller than 11 point)
- resume (no more than two pages and font size no smaller than 11 point)
- character and fitness statement, if applicable, explaining affirmative answers to questions 1-8 in the Character and Fitness section
- binding admission contract, if applicable
- a valid LSAT score (excludes applicants applying to the ASU Achievement Program)
- transcripts from each undergraduate and graduate institution attended (must be sent to LSAC)
- proof of English proficiency for applicants whose native language is not English, regardless of their current residency

Applications may also include:

- an Arizona residency form
- an elevator pitch video
- an inclusive excellence statement
- letters of recommendation*
- an optional addenda

* Applicants may submit no more than two letters. Because letters are not required, the admission office will not wait for them to complete a file for review.

Additional Application Information

The JD program enrolls one first-year class per year, entering in the fall semester. The degree is a three-year full-time program. However, ASU Law offers a flexible scheduling option for students with circumstances that make full-time enrollment impossible, but it is not an evening program. Admission to ASU Law is competitive, and each year, ASU Law receives more applications from eligible candidates than can be accommodated.

ASU Law seeks to enroll a dynamic group of individuals who will provide an engaging learning environment. The admissions committee makes decisions after considering all the information provided by the applicant. Among the factors influencing the admission decision are LSAT performance, undergraduate grade point average, quality and grading patterns of undergraduate institutions, previous graduate education, demonstrated commitment to public service, work and leadership experience, extracurricular or community activities, history of overcoming economic or other disadvantages, uniqueness of experience and background, maturity, ability to communicate, foreign language proficiency, honors and awards, service in the armed forces and publications.

For detailed information about the Juris Doctor application process, interested applicants are asked to visit the ASU Law (<https://law.asu.edu/admission/jd>) website.

Global Opportunities:

Global Experience: Study abroad opportunities (<https://law.asu.edu/experiences/abroad>), including exchange programs through ASU's Sandra Day O'Connor College of Law, help satisfy students' interest in traveling and learning about other countries while they are studying law. Students can gain a unique perspective through studying abroad, while also enhancing their marketability to prospective employers.

Career Opportunities: According to the U.S. Bureau of Labor Statistics, employment of lawyers is projected to grow 9% between 2020 and 2030. The Juris Doctor degree can lead to a lucrative career in any of several fields.

Career examples include:

- arbitration, mediation and dispute resolution attorney
- chief legal officer
- compliance attorney
- corporate lawyer
- criminal prosecutor or criminal defense attorney
- family lawyer or divorce attorney
- judicial clerk or judge
- law school professor
- politician or member of Congress
- trial and appellate lawyer

Professional Licensure: ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (<https://admission.asu.edu/academics/licensure>) webpage.

Law and Sustainability (Certificate), Certificate (LWLSUSGRCT)

Online Degree Search Title: Law and Sustainability (Graduate Certificate)

Campus: Downtown Phoenix

Program Description: The law and sustainability graduate certificate within ASU's Sandra Day O'Connor College of Law is designed to propel ASU Law students into legal careers related to environmental sustainability.

Environmental sustainability is a primary emphasis at ASU, and this certificate program leverages that emphasis by recognizing those law students who have successively immersed themselves in sustainability-related law coursework during their time at the law school.

The certificate program provides instruction and meaningful research experiences, equipping students with the knowledge and skills necessary to become influential leaders in the global sustainability movement. The program's renowned faculty research and teach in every major area of sustainability policy, including climate change, water, energy and environmental protection. Students in the program have access to a range of externships, research opportunities, moot court experiences and mentorships.

Degree Requirements:

Required Core (6 credit hours)

LAW 619 Energy Law and Policy (3) or
LAW 631 Environmental Law (3) or
LAW 639 Natural Resource Law (3) or
LAW 643 Water Law (3)

Electives (9 credit hours)

Culminating Experience

writing requirement and active participation in sustainability law

Additional Curriculum Information

Students must select two of the required core courses from the above list.

The academic unit maintains a list of preapproved elective coursework. Students should contact the academic unit for the current list.

Students must earn a cumulative grade point average of at least 3.00 (scale is 4.00 = "A") for those courses taken to satisfy the substantive coursework requirement for the law and sustainability certificate. Students also must earn a minimum grade of "B" in any approved elective course taken outside of the Sandra Day O'Connor College of Law.

To earn the certificate, students must participate in at least two different activities from the following list:

- completion of a sustainability-focused legal externship approved by the program or faculty director
- completion of the Sustainability Law Research Seminar
- membership on the elected board of the law school's Environmental Law Society student chapter
- participation in an extramural environmental or sustainability moot court competition approved by the program or faculty director
- participation as a mentee in the Mentorship Initiative in Sustainability Law

Each student must write a substantial paper on a topic related to law and sustainability. The paper must be at least 15 pages in length and written under the guidance of a member of the Sandra Day O'Connor College of Law faculty. A sustainability-related paper written to satisfy the Sandra Day O'Connor College of Law's graduate writing requirement or flexible writing requirement can fulfill this writing requirement, including a paper written as part of a seminar course included on the list of elective courses.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Sandra Day O'Connor College of Law.

Applicants must be existing JD or LLM students who are currently enrolled in coursework and in good academic standing with the Sandra Day O'Connor College of Law. Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- an admission application for the certificate program through Law Interactive*
- proof of English proficiency

*Students should refer to the ASU Law website (<https://law.asu.edu/>).

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of current residency.

Further specific requirements for admission to the certificate program can be found on the Sandra Day O'Connor College of Law website.

Career Opportunities: Due to ASU Law's close proximity to dozens of law firms, government offices and other legal employers in sustainability-related fields, numerous ASU Law students involved in the law and sustainability program secure legal externships each year. Externships that ASU Law students have participated in recently include Arizona Attorney General's Office, Arizona Corporation Commission, Arizona Department of Environmental Quality, Arizona State Legislature, City of Mesa, City of Scottsdale, Climate Institute, Gammage and Burnham PLC, Kyl Center for Water Policy, Office of Water Master, Rose Law Group PC, Salt River Project, and the United States Environmental Protection Agency.

Law, Science, & Technology (certificate), Certificate (LWLAWSTCE)

Online Degree Search Title: Law, Science and Technology (Graduate Certificate)

Campus: Downtown Phoenix

Program Description: The law, science and technology certificate program is for students with science and technology interests and is limited to students in good standing pursuing a JD degree at the Sandra Day O'Connor College of Law.

The program is home to focus areas in intellectual property; life sciences and biotechnology; governance of emerging technologies; and data, privacy and security. In each area, the program offers a specialized graduate certificate program with robust coursework, student cohorts with attorney and faculty mentorship, and presentation and publication opportunities. In addition, the program collaborates with five ASU Law student organizations; programs in health law, international law and sustainability law; and other ASU partners to create an interdisciplinary understanding of the issues driven by science and technology that span all areas of law, policy and practice.

Degree Requirements:

Students must satisfy their graduation writing requirement on a topic related to law, science and technology. The paper must meet all of the Sandra Day O'Connor College of Law requirements for a graduation writing requirement and must be supervised by a center fellow.

A minimum cumulative GPA of 3.00 (scale is 4.00 = "A") is required for those courses that satisfy the substantive coursework requirements of the certificate. Courses used to satisfy the core or focus area requirements may not be taken for pass or fail credit. A student may take one elective course on a pass or fail basis.

Substantive coursework is required in law, science and technology subjects for a minimum of seven courses, earning at least 16 credit hours, at the Sandra Day O'Connor College of Law. Two courses are chosen from the designated core courses, and five courses are chosen from a list of elective courses.

Each student is encouraged to actively participate in the events (lectures, conferences, symposia) sponsored by the Center for Law, Science and Innovation and to participate in at least one approved activity for two semesters.

Additional details of the program requirements for the law, science and technology certificate can be found in the Sandra Day O'Connor College of Law Statement of Student Policies.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Sandra Day O'Connor College of Law.

Students wishing to pursue the law, science and technology certificate must be enrolled in the JD program at the Sandra Day O'Connor College of Law and be in good standing.

Specific requirements for admission to the law, science and technology certificate program can be found on the ASU Law website (<https://law.asu.edu/>).

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

International students who need an F-1 or J-1 visa need to apply to and be accepted into a graduate degree program prior to being considered for the certificate program. International students residing in the United States on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for admission to this certificate program.

Career Opportunities: The certificate in law, science and technology is designed for those interested in becoming an attorney and practicing law with an emphasis in law, science and technology in sectors that include intellectual property, life sciences, data, privacy and security.

Laws, LL.M. (LAWLAWSLLM)

Online Degree Search Title: Laws, LLM

Campus: Downtown Phoenix, Online

Program Description: The LLM program offers one year of post-JD study tailored to the scholarly and practice interests of participating students. Study is available in a variety of areas in which the law school holds particular strength.

With more than 250 unique courses (<https://apps.law.asu.edu/apps/registrar/CourseInfo/Default.aspx>) to choose from each year, the 24 credit hour Master of Laws program is customized to meet students' career goals with focus on popular areas of study. The graduate program is flexible, with fall and spring starts as well as full-time and part-time options.

The college also offers a Master of Laws in biotechnology and genomics (<https://law.asu.edu/emphasis-areas/biotech-genomics>) and in tribal policy, law and government (<https://law.asu.edu/emphasis-areas/indian-gaming-governance>).

To learn more, students should attend one of many provided information sessions (<https://law.asu.edu/visit>).

Emphasis areas include:

- business law (<https://law.asu.edu/emphasis-areas/business-law>)
- criminal law (<https://law.asu.edu/emphasis-areas/criminal-law>)
- entrepreneurship law and strategy (<https://law.asu.edu/emphasis-areas/entrepreneurship-law-strategy>)
- health law (<https://law.asu.edu/emphasis-areas/public-health-law-policy>)
- Indian gaming and tribal self-governance (<https://law.asu.edu/emphasis-areas/indian-gaming-governance>)
- Indian law (<https://law.asu.edu/indian-legal-program>)
- intellectual property law (<https://law.asu.edu/programs/intellectual-property>)
- international law (<https://law.asu.edu/emphasis-areas/international>)
- international rule of law and security (<https://law.asu.edu/programs/international-rule-of-law-and-security>)
- law and sustainability (<https://law.asu.edu/programs/sustainability>)
- patent practice (<https://law.asu.edu/emphasis-areas/patent>)
- science and technology law (<https://law.asu.edu/emphasis-areas/law-technology>)

Degree Requirements:

The program requires 24 credit hours. Required courses depend on the student's particular concentration in the degree. International students are required to take LAW 596 Professional Legal Writing. A candidate may elect either to write a master's degree portfolio paper or complete an applied project. The remaining credit hours generally are obtained from the list of elective courses. With faculty advisor approval, a candidate may satisfy up to six credit hours with courses offered by other ASU departments or by law courses that are not included on the approved elective list.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Sandra Day O'Connor College of Law.

Applicants are eligible to apply to the program if they have earned a Juris Doctor degree in the U.S. or a law degree at a foreign institution that would qualify the applicant to practice law or pursue license to practice in that country.

All applicants must submit:

- completed LLM application form
- official transcripts from all institutions attended
- explanations to affirmative answers to any conduct questions
- resume, not exceeding three typed pages
- statement of interest, not exceeding 1,250 words (double-spaced, typed pages)
- two letters of recommendation
- writing sample
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Applicants should see the Sandra Day O'Connor College of Law website for acceptable TOEFL scores and additional information for foreign-educated applicants.

All foreign-educated applicants are required to use the Law School Admission Council LLM Credential Assembly Service, which includes the ASU Law Electronic Application, the Document Assembly Service, and the International Transcript and Authentication Service. Students should refer to the special instructions for foreign-educated applicants at the school admission website (<https://law.asu.edu/admission/apply/foreign>).

The LSAC Electronic Application is found at <https://llm.lsac.org/login/access.aspx?appl=4007L1> (<https://llm.lsac.org/login/access.aspx?appl=4007L1>).

The CAS report must be from the current application year and is found at <https://www.lsac.org/> (<https://www.lsac.org/>).

U.S.-educated applicants have the option of applying through the LSAC LLM CAS, which includes the ASU Law Electronic Application and Document Assembly Service, or applying through the ASU Law website using the LLM application form (<https://llm.law.asu.edu/Apps/Admissions/Application/MLS/>).

ASU law alumni graduates who are interested in the LLM should refer to the Law for Life program.

Transcripts and letters of recommendation or evaluations must be submitted through the LSAC's Credential Assembly Service, and these are provided to the ASU College of Law by LSAC. Transcripts are required from all institutions attended, and transcripts showing that the bachelor's degree and law degree were conferred must be included. Applicants who encounter any problems should contact the LSAC help desk at 215-968-1001.

For applications to be considered complete, submissions must include all items in the numbered list above.

Admission to the program is competitive. Selection is based on academic background and potential, diversity of experience and background, career experience and ambitions, strength of experience related to the program sought, space and resource limitations in the law school and other factors.

Applicants should see the program website for application deadlines.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/master-of-laws/>) for program descriptions and to request more information.

Career Opportunities: According to the U.S. Bureau of Labor Statistics, employment of lawyers is projected to grow 9% between 2020 and 2030. The Master of Laws degree can lead to a number of opportunities in the legal profession at large. The program helps current lawyers advance in their careers by enabling them to refine their leadership skills, become fluent with advanced terminology, and develop a keen sense of professionalism.

Career examples include:

- chief executive officer
- chief legal officer
- judge
- law firm administrator
- law firm partner
- law school professor
- litigation support director
- politician or member of Congress
- private banker

Laws (Global Legal Studies), LL.M. (LAWLGLPLLM)

Online Degree Search Title: Laws (Global Legal Studies), LLM

Campus: Downtown Phoenix

Program Description: The LLM program allows one year of post-JD study tailored to the scholarly and practice interests of participating students.

The program draws on the unique focus of the international and transnational legal expertise in global health, the environment, human rights, trade and emerging technologies. The program emphasizes transdisciplinary study and links rigorous legal training with the research and scholarship drawn from political science, policy studies, anthropology and sustainability.

Students can take a wide variety of courses on international topics, such as international environmental law, international human rights law and international institutions. These include business-related courses such as international contracts, international taxation, international commercial arbitration and international business transactions.

Students who participate in externships gain practical experience that makes them more competitive for jobs at home and abroad. ASU Law can place every eligible enrolled student into an externship (<https://law.asu.edu/experiences/externships>) at organizations in Arizona or Washington, 2024-25 Academic Catalog Archive

D.C., such as the U.S. State Department, the World Bank, International Rescue Committee, the Department of Homeland Security and Human Rights First. The opportunity for students to network with international decision-makers, opinion leaders and top practitioners is further amplified through ASU's large presence in Washington, D.C. (<https://washingtondc.asu.edu/#why-is-asu-in-washington-dc>)

Students can develop professionally by engaging with globally minded leaders in the legal, government and business communities. For instance, the Phoenix Committee on Foreign Relations hosts events and other forums for select students to engage with prominent leaders and practitioners on trending international issues.

Each year, the Sandra Day O'Connor College of Law holds a workshop with the American Red Cross on international humanitarian law that brings students, members of the military and community leaders together to learn more about the principles governing armed conflict.

Degree Requirements:

The program is designed to be completed in one academic year (nine months) on a full-time basis but may also be pursued on a part-time basis. A degree program candidate must complete 24 credit hours of coursework. A candidate may elect either to write a master's degree portfolio paper or to complete an applied project. Required coursework includes two of the following courses:

LAW 615 Public International Law (3)

LAW 691 Seminar: International Institutions (2)

LAW 709 International Human Rights (2-3)

LAW 768 International Business Transactions (2-4)

An international student whose initial law degree is not from a U.S. law school is required to take the following course:

LAW 596 Professional Legal Writing (3)

The remaining credit hours are generally obtained from the list of elective courses in international law.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Sandra Day O'Connor College of Law.

Applicants are eligible to apply to the program if they have earned a Juris Doctor degree in the U.S. or a law degree at a foreign institution that would qualify them to practice law or pursue license to practice in that country.

All applicants must submit:

- completed LLM application form
- official transcripts
- resume, not exceeding three typed pages
- statement of interest, not exceeding 1,250 words (double-spaced typed pages)
- two letters of recommendation
- writing sample
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Applicants should see the College of Law website for acceptable TOEFL scores and additional information for foreign-educated applicants.

Applicants are encouraged to apply electronically through <https://www.lsac.org> (<https://www.lsac.org/>).

Transcripts and letters of recommendation or evaluations must be submitted through the Law School Admission Council's Credential Assembly Service and are provided to the ASU College of Law by LSAC. Transcripts are required from all institutions attended, and transcripts showing that the bachelor's degree and law degree were conferred must be included.

Admission to the program is competitive. Selection is based on academic background and potential, diversity of experience and background, career experience and ambitions, strength of experience related to the program sought, space and resource limitations in the law school and other factors.

Potential applicants should see the program website for application deadlines.

Career Opportunities: According to the U.S. Bureau of Labor Statistics, employment of lawyers is projected to grow 9% between 2020 and 2030. The Master of Laws degree can lead to a number of opportunities in the legal profession at large, helping current lawyers advance in their careers by refining their leadership skills, becoming fluent with advanced terminology, developing a keen sense of professionalism, and learning how to navigate an ever-changing global environment.

Legal Studies, MLS (LWLGSMLEGS)

Online Degree Search Title: Legal Studies, MLS

Campus: Downtown Phoenix, Online

Program Description: The MLS program is flexible; it is offered in the fall, spring and summer, full-time and part-time, in-person and online. Students may focus their program on popular areas of study listed below. To learn more or schedule a visit, students should refer to the ASU Law website (<https://law.asu.edu/visit>).

Emphasis areas offered in-person include:

- business law (<https://law.asu.edu/emphasis-areas/business-law>)
- conflict resolution (<https://law.asu.edu/emphasis-areas/conflict-resolution>)
- criminal law (<https://law.asu.edu/emphasis-areas/criminal-law>)
- entrepreneurship law and strategy (<https://law.asu.edu/emphasis-areas/entrepreneurship-law-strategy>)
- federal Indian law and tribal self-governance (<https://law.asu.edu/emphasis-areas/indian-gaming-governance>)
- health law (<https://law.asu.edu/emphasis-areas/public-health-law-policy>)
- Indian gaming (<https://law.asu.edu/emphasis-areas/indian-gaming-governance>)
- Indian law (<https://law.asu.edu/indian-legal-program>)
- intellectual property law (<https://law.asu.edu/programs/intellectual-property>)
- international law (<https://law.asu.edu/emphasis-areas/international>)
- international rule of law and security (<https://law.asu.edu/programs/international-rule-of-law-and-security>)
- law and sustainability (<https://law.asu.edu/programs/sustainability>)
- science and technology law (<https://law.asu.edu/emphasis-areas/law-technology>)

Emphasis areas offered online include:

- business law (<https://law.asu.edu/emphasis-areas/business-law>)
- conflict resolution (<https://law.asu.edu/emphasis-areas/conflict-resolution>)
- construction law (<https://asuonline.asu.edu/online-degree-programs/graduate/construction-law-emphases-mls>)
- contract management (<https://asuonline.asu.edu/online-degree-programs/graduate/contract-management-mls/>)
- corporate and health care compliance (<https://asuonline.asu.edu/online-degree-programs/graduate/corporate-and-health-care-compliance-mls>)
- criminal law (<https://asuonline.asu.edu/online-degree-programs/graduate/criminal-law-emphasis-mls>)
- federal Indian law and tribal self-governance (<https://law.asu.edu/emphasis-areas/indian-gaming-governance>)
- Indian gaming (<https://law.asu.edu/emphasis-areas/indian-gaming-governance>)
- Indian law (<https://law.asu.edu/indian-legal-program>)
- intellectual property law (<https://law.asu.edu/programs/intellectual-property>)
- law and sustainability (<https://law.asu.edu/programs/sustainability>)
- arizona legal paraprofessional (<https://asuonline.asu.edu/online-degree-programs/graduate/legal-paraprofessional-mls/>)

Pursuant to American Bar Association standards, no law credits completed prior to admission to a JD program, including credits earned in the Master of Legal Studies program, may be transferred to a future Juris Doctor program under any circumstances.

Concurrent Program Options:

Students can choose to create their own concurrent degree combination to match their interests by working with their academic advisor during or after their first semester of study. Some concurrent combinations are not possible due to high levels of overlap in curriculum; students should speak with their academic advisor for more details.

This degree is also offered as concurrent degree program with:

Information Systems Management, MS

Management, MS
Mass Communication, MMC
Real Estate Development, MRED
Sustainability Solutions, MSUS
W. P. Carey MBA - Evening Program
W. P. Carey MBA - Full-Time Program

Degree Requirements:

30 credit hours, or 30 credit hours.

The program consists of 30 credit hours of approved study. The degree program can be completed on a full-time or part-time basis. Students are required to take:

SDO 501 U.S Law and Legal Analysis: Masters (3)

Students are required to choose one of the following basic foundational courses:

LAW 518 Civil Procedure (3/5)*

SDO 510 Business Organizations: Masters or LAW 654 Business Organizations (3/4)

SDO 511 Administrative Agencies/Regulation: Masters or LAW 609 Administrative Law (3)

SDO 514 Intellectual Property: Masters or LAW 664 Intellectual Property (2/4)

SDO 515 Criminal Law: Masters or LAW 516 Criminal Law* (3)

SDO 516 Criminal Procedure-Masters or LAW 604 Criminal Procedure (3)

SDO 518 Fundamentals of Contract Law: Masters or LAW 515 Contracts* (3/4)

SDO 521 Property Law: Masters or LAW 523 Property* (3/4)

SDO 525 Tort Law: Masters or LAW 517 Torts* (3/4)

SDO 529 U.S. Constitutional Law: Masters or LAW 522 Constitutional Law* (3)

*Students may enroll in no more than two of the LAW prefix designated courses marked with an asterisk. Such courses are subject to availability.

The remainder of the credits are electives. Elective course selection is flexible to accommodate the diversity of intellectual and professional interests the program is intended to serve.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Sandra Day O'Connor College of Law.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from an accredited four-year college or university in the United States or attained a comparable degree from a foreign institution.

All applicants must submit:

- completed Master of Legal Studies application form and application fee
- official transcripts from all institutions attended
- resume that does not exceed three typed pages
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Applicants should see the Sandra Day O'Connor College of Law website for acceptable TOEFL scores and additional information for foreign-educated applicants.

Master of Legal Studies applicants with foreign education credentials must have all transcripts evaluated by the Academic Credentials Evaluation Institute Inc. ACEI independently evaluates all academic documents issued in countries other than the United States. Students should contact ACEI through that organization's website to obtain an application for an evaluation. Applicants must request a course-by-course evaluation and order an official copy to be sent directly to:

Sandra Day O'Connor College of Law
Arizona State University
Beus Center for Law and Society
Office of Admissions and Financial Aid
Mail Code: 9520
111 E Taylor St.
Phoenix, AZ 85004

Applicants who have received their bachelor's or master's degree in the U.S. can apply through the MLS FastApp application process, which streamlines the application process and may allow for an offer of conditional admission to the Master of Legal Studies program while the applicant continues to submit any additional requested documentation.

If a decision cannot be made from the FastApp, the Sandra Day O'Connor College of Law Admissions team may request additional information
2024-25 Academic Catalog Archive

from the applicant, including any or all of the following:

- explanations to affirmative answers to application questions pertaining to conduct
- two letters of recommendation
- writing sample

Admission to the program is competitive. Selection is based on a variety of factors, including academic background and potential, diversity of experience and background, career experience and ambitions, space and resource limitations in the law school and other factors.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/master-legal-studies/>) for program descriptions and to request more information.

Career Opportunities: The Master of Legal Studies degree is designed for those who are looking to obtain working knowledge of the law but do not intend to become practicing lawyers. Graduates have achieved training in complicated legal topics and lawyering skills that prove invaluable to law firms, court systems, government agencies and corporations. Graduates have many career paths, including:

- accreditation director
- fraud investigator
- operations director
- risk analyst
- senior administrator (e.g., inside a law firm)
- senior business analyst
- senior compliance director
- senior contract negotiator

Professional Licensure: ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (<https://admission.asu.edu/academics/licensure>) webpage.

Sports Law and Business, MSLB (LWSLBMSLB)

Online Degree Search Title: Sports Law and Business, MSLB

Campus: Downtown Phoenix

Program Description: The MSLB program at the Sandra Day O'Connor College of Law at Arizona State University is centrally located in vibrant downtown Phoenix. This unique program blends sports, law and business from a nationally ranked law school with world-class faculty.

The sports law and business program uses the expertise of world-class faculty and programming to provide specialized and targeted experiences for legal scholars with career aspirations in sports. It is the only law master's degree program in the U.S. that combines sports, law and business into one comprehensive program.

This in-person 36 credit hour degree program is offered in the fall semester and has both full-time and part-time student opportunities. Admitted students can apply for these opportunities: the Allan "Bud" Selig Scholarship, the SLB Student Leadership Team, and MSLB graduate assistantship positions with Sun Devil Athletics. These opportunities are only available to students who have been accepted into the Master of Sports Law and Business program.

Concurrent Program Options:

Students can choose to create their own concurrent degree combination to match their interests by working with their academic advisor during or after their first semester of study. Some concurrent combinations are not possible due to high levels of overlap in curriculum; students should speak with their academic advisor for more details.

This degree is also offered as a concurrent program with the following: Juris Doctor, JD

Degree Requirements:

Required Core (21 credit hours)

- SLB 510 Amateur Sports Law: MSLB (3) or SLB 512 Professional Sports Law: MSLB (3)
- SLB 511 Career Strategies and Business Communications in the Sports Industry (3)
- SLB 514 Negotiations and Alternative Dispute Resolutions in the Sports Industry (3)
- SLB 515 Sports Business Strategies and Executive Decisions (3)
- SLB 517 Marketing for Sports Organizations (3)
- SLB 518 Sports Analytics (3)
- SLB 581 U.S. Law and Legal Analysis Through Sport: MSLB (3) or LAW 519 Legal Method and Writing (3)

Electives or Research (12 credit hours)

- SLB 516 Revenue Generation in the Sports Industry (3)
- SLB 519 Professional Sports Team Operations and Legal Issues: MSLB (3)
- SLB 522 NCAA Compliance, Infractions and Enforcement: MSLB (3)
- SLB 523 MLB's Impact on Law and Society: MSLB (1-3)
- SLB 524 Law and Business of Sports Branding: MSLB (3)
- SLB 525 Sports Big Events: Law/Biz/Ops: MSLB (3)
- SLB 598 Topic: Applied Sports Marketing (3)
- SLB 598 Topic: Innovating Sports Organizations: Leadership and DEI (3)
- SLB 598 Topic: Regulatory Issues in the Sports Industry (3)
- SLB 598 Topic: Sports Entrepreneurship Management (3)
- SLB 598 Topic: Sports Sponsorship, Partnership and Activations (3)
- SLB 598 Topic: Strategic Planning for the Future in Sports (3)

Culminating Experience (3-6 credit hours)

- SLB 593 Applied Project (3-6)

Additional Curriculum Information

Students must complete a minimum of three credits with a maximum of six credits of an applied project to serve as their culminating experience. This allows for additional applied projects for those who want to apply their studies to varying experiences.

Admission Requirements: Applicants must fulfill and complete all requirements in order for their application to be reviewed. Applicants who submit an incomplete application or do not provide all of the required documents will not be reviewed by the admissions committee.

In addition to the MSLB application, applicants are required to submit the following documents:

- official transcripts or unofficial transcripts
- resume (one or two pages)
- personal statement; a minimum of 1,250 words is required
- two professional references
- video pitch

Additional application requirements may be requested. For updates on these items, students may visit the ASU Law website (<https://law.asu.edu/admission/mslb>).

Applications are reviewed on a rolling admissions basis. Once an application has been reviewed, an applicant may be selected for an interview based on the qualifications presented in the application.

A minimum of a bachelor's degree from a regionally accredited four-year college or university in the United States or a comparable degree from a foreign institution is required.

Admission to the sports law and business program is only offered for the fall semester; applicants do not have the option for a spring or summer semester start date.

International Student Application Information

An applicant whose native language is not English must provide proof of English proficiency as indicated by acceptable scores regardless of their current residency. Applicants should have a TOEFL score higher than 250 (computer) or 100 (internet). Exceptional candidates with relevant experience and background who have scores of at least 243 (computer) or 96 (internet) also are considered. ASU's institutional code is 4007. This proof of English proficiency is required for international students and must be included in the MSLB application documents.

Applicants who have received undergraduate or graduate degrees from foreign institutions must have their transcripts evaluated by World Education Services, and WES must send that evaluation to the offices of the Sandra Day O'Connor College of Law. Evaluation of international transcripts must be reviewed and included in the application.

Additional Application Information

Transcripts

Official transcripts from all postsecondary institutions of higher education attended must be submitted to mslbasu@asu.edu (mailto:mslbasu@asu.edu) or mailed to the ASU Law admission office. An official transcript is a transcript certified by the issuing school and sent directly to ASU or delivered to ASU in a sealed envelope with a seal intact.

Character and Fitness

If an applicant answers Yes to any of the questions in this section, a separate statement or electronic attachment providing a complete description of the actions and full details of the charges and sanctions against the applicant must be included. The applicant also must include any charges that have been expunged, sealed or set aside, even if told by a judge or attorney it is not necessary to include. Additionally, the applicant should provide a personal account of the events that led to the charges or discipline. Failure to include this information results in an incomplete application. Incomplete applications will not be reviewed by the admission committee.

Admission to the Master of Sports Law and Business program is very competitive. Selection is based on a variety of factors, including academic background, experience and background in the sports industry, personal statement and goals, and other factors determined through the application process.

Career Opportunities: Graduates are equipped to understand the sports market and the regulatory forces at play in the U.S. and globally.

Phoenix is a destination for the next generation of sports professionals, boasting opportunities for working, learning and networking in every major industry in American sports.

ASU Law's Master of Sports Law and Business program prepares graduates for a career in the sports industry at the highest levels and is geared toward those who want to master legal principles that impact sports organizations such as the NBA, NFL, NCAA, MLB or PGA.

Trial Advocacy (Certificate), Certificate (LWTAGRCT)

Online Degree Search Title: Trial Advocacy (Graduate Certificate)

Campus: Downtown Phoenix

Program Description: The graduate certificate program in trial advocacy (<https://law.asu.edu/degree-programs/jd/certificates/trial-advocacy>) provides students interested in pursuing a career in criminal prosecution, criminal defense or civil litigation with a prescribed course of study to help prepare them for practice.

Degree Requirements:

Required Core (6 credit hours)

LAW 602 Civil Procedure II (3) or LAW 604 Criminal Procedure (3)

LAW 605 Evidence (3)

Alternative Dispute Resolution Requirement (2 credit hours)

Litigation Requirement (3 credit hours)

Electives (4 credit hours)

Other requirements

practical experience in client representation

Additional Curriculum Information

To earn the certificate, a student must take classes in courtroom practice and procedure as well as alternative dispute resolution, participate in experiential learning either through simulation-based instruction in litigation and courtroom advocacy or by representing clients in a clinical setting, and gain additional practical experience through pro bono service, participation in a moot court competition or enrollment in a Rule 38 externship.

Students must complete four credit hours of electives from a selection of over 40 classes.

For the Alternative Dispute Resolution requirement, students must complete a minimum of two credit hours from the Alternative Dispute Resolution requirement course list.

For the Litigation requirements, students must complete a minimum of three credit hours from the Litigation requirement course list.

Students must gain practical experience in client representation by completing one of the following while maintaining continuous enrollment:

- completion of a Rule 38 externship, or
- pro bono service --- minimum of 50 hours working with an approved legal services organization, or
- representation of the College of Law in a regional, national or international moot court competition

Additional information on what specific courses can be used to fulfill the certificate requirements can be found on the College of Law trial advocacy page.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and the Sandra Day O'Connor College of Law.

Applicants must be existing JD program students who are currently enrolled in coursework and in good academic standing with the ASU College of Law. Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A";) in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- trial advocacy certificate application
- graduate application through Law Interactive*
- proof of English proficiency

*Students should refer to the ASU Law website (<https://law.asu.edu/>).

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of current residency.

International students who need an F1 or J1 visa first need to apply to and be accepted into a graduate degree program prior to being considered for the certificate program. International students residing in the United States on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for admission to this certificate program.

Further specific requirements for admission to the certificate program can be found on the Sandra Day O'Connor College of Law website.

Career Opportunities: The trial advocacy graduate certificate serves as a credential representing to future employers and clients that a JD student has a demonstrated interest in trial advocacy and a solid foundation in the knowledge and the skills needed to succeed in the field.

Tribal Policy, Law and Government, LL.M. (LWTBLMLAWS)

Online Degree Search Title: Tribal Policy, Law and Government, LLM

Campus: Downtown Phoenix

Program Description: This LLM program is designed for lawyers and law school graduates who plan to work on issues related to tribal law and federal Indian law at the professional and academic levels.

The Master of Laws program in tribal policy, law and government can be focused in one of three areas: Indian gaming; tribal self-governance; or tribal policy, law and government. Core curricular offerings focus on domestic tribal law, federal Indian law and American institutions of law and government. The program explores the expression of domestic law within contemporary administrative, governmental and judicial institutions.

Home to the nationally known Indian Legal Program, the Sandra Day O'Connor College of Law leads the nation in producing graduates specializing in Indian law. Candidates benefit from the extensive resources committed to the Indian Legal Program, including a director, experienced Native faculty and staff, and an Indian law clinic.

Arizona State University is located in the heart of the southwestern U.S., home to roughly one-third of the Native population in the U.S. and where many of the largest Indian nations in the country are located. The university is the academic home for several nationally known scholars

researching American Indian issues, and it houses many unique resources for such scholarship, including the Labriola Collection at Hayden Library.

Degree Requirements:

The program is administered by the Indian Legal Program and is oriented toward students who seek practical experience in tribal law and federal Indian law. It provides intensive instruction to students who graduated from a law school that had few or no courses in Indian law and who now seek to practice in these areas at a professional level. This degree program requires a minimum of 24 credit hours of study. A thesis is not required.

Students immerse themselves in the study of tribal law and federal Indian law, and they apply the knowledge and experience they gain through the practical component of the degree program, which may consist of research projects for tribal courts and governments; state, tribal and federal court practice; and tribal code drafting.

Graduates are well equipped for professional positions that require knowledge of and expertise in tribal law and federal Indian law. Students have the option of pursuing the degree on a part-time basis.

Admission Requirements: Applicants must fulfill both the Graduate College and the College of Law English proficiency requirements.

Admission to the program is competitive. To be admitted, an applicant must have completed a JD degree or law degree at a foreign institution that would qualify the applicant to practice law or pursue license to practice in that country, and have submitted a complete application to the program.

Selection is based on academic background and potential, career experience and ambitions, diversity of experience and background, space and resource limitations in the law school, and the applicant's strength of experience related to the program sought, as well as other factors.

Applicants are encouraged to apply electronically through the Law School Admission Council website: <https://www.lsac.org> (<https://www.lsac.org>).

To be considered complete, the application must include the following:

- the completed LLM application form
- the required application fee
- a resume that does not exceed three typed pages
- a statement of interest that does not exceed 1,250 words, typed and double-spaced
- transcripts from all institutions attended, including the transcripts showing that the bachelor's degree and law degree were conferred
- two letters of recommendation
- a writing sample

Transcripts and letters of recommendation or evaluations must be submitted through the Law School Admissions Council's Credential Assembly Service and are provided to ASU Law by LSAC.

Students should see the program website for application deadlines.

Career Opportunities: According to the U.S. Bureau of Labor Statistics, employment of lawyers is projected to grow 9% between 2020 and 2030. The Master of Laws in tribal policy, law and government program can lead to a number of opportunities in Indian law, at large, helping current lawyers advance in their careers by refining their leadership skills, becoming fluent with advanced terminology, and developing a keen sense of professionalism.

Graduates of the program are prepared for lucrative careers in government, economic development or health care positions that impact Native populations.

Career examples include:

- chief executive officer
- chief legal officer
- court justice
- election director for Native communities
- judge
- law firm administrator
- law firm partner
- law school professor
- litigation support director
- politician or member of Congress
- private banker for Native communities

Liberal Arts and Sciences, The College of

Actuarial Science, MS (LAACTMS)

Online Degree Search Title: Actuarial Science, MS

Campus: Tempe

Program Description: The MS program in actuarial science emphasizes broad awareness and appreciation of current issues faced by insurance industry practitioners as well as innovative resolutions provided by actuaries.

Students advance their knowledge base by applying mathematical and statistical concepts and data analytics to the disciplines of risk management, finance and insurance. The program also includes a new, focused set of professional learning outcomes aligned with the needs of the ever-evolving insurance industry, while keeping the core technical learning outcomes in place. These guide students' development of professional competencies through coursework, independent projects and opportunities outside the classroom, while remaining firmly based on a strong foundation of scholarly technical work in actuarial science.

Actuaries must pass a series of intensive professional exams to become credentialed. Program graduates are prepared for the examinations required to become credentialed professionals by the Society of Actuaries or Casualty Actuarial Society and to be competitive employees in the insurance and finance industries.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

Actuarial Science, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours including the required applied project course (ACT 593).

Required Core (6 credit hours)

ACT 560 Regression Modeling In Insurance (3)

ACT 561 Machine Learning and Risk Management Applications (3)

Electives or Research (21 credit hours)

Culminating Experience (3 credit hours)

ACT 593 Applied Project (3)

Additional Curriculum Information

For electives and research, students select seven courses from an approved list. Students should see the academic unit for the approved course list. Other courses may be used with approval of the academic unit.

Only six credit hours of 400-level coursework are allowed on the plan of study, per Graduate College policy.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's degree (or equivalent) or master's degree from a regionally accredited college or university in a related field, such as mathematics, statistics, business, economics or predictive analytics.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- letter of intent or written statement
- two letters of recommendation
- professional resume
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Applicants should have completed the following courses with a "B" or better (scale is 4.00 = "A"). ASU equivalents are given in parentheses. Courses may be substituted with approval of the academic unit:

Linear Algebra (MAT 342 or MAT 343)
calculus sequence 1-3 (MAT 270, 271, and MAT 272)
Applied Statistics (STP 420)
upper-division probability (ACT 415 or STP 421)

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Apply appropriate techniques to analyze insurance datasets in coursework.
- Conduct all analyses in the field of actuarial science that appear on the preliminary actuarial exams.
- Use traditional and nontraditional predictive analytics to analyze large insurance data sets from real world problems.

Career Opportunities: Risk is a part of daily life, and wherever there is risk, there are opportunities for actuarial intervention. Many actuaries work with insurance companies to calculate premiums, to determine reserves needed to ensure an organization's financial health, and to ensure that organizations conform to stringent, complex legal mandates. Others help companies to establish retirement plans or are employed as consultants.

Graduates possess skills that are transferable to any industry and any organization that requires risk modeling and management, including:

- consulting
- energy, such as utilities, oil and gas
- environment (on issues such as climate change and the financial impact or risk of extreme events)
- financial services, such as banking and investment management
- government agencies, such as the Social Security Administration, the Department of Labor, and the Centers for Medicare & Medicaid Services (to manage social programs and to develop regulations and legislation)
- higher education
- insurance
- retirement and pensions
- transportation, such as shipping and air travel

Graduates can also apply the advanced problem-solving skills to a variety of other professional positions, such as:

- analyst
- business operations specialist
- consultant
- teacher

Professional Licensure: ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (<https://admission.asu.edu/academics/licensure>) webpage.

Addiction and Substance-Use Related Disorders (certificate), Certificate (LAASRDGRCT)

Online Degree Search Title: Addiction and Substance-Use Related Disorders (Graduate Certificate)

Campus: Online

Program Description: Addiction and substance abuse is one of America's top public health problems, and there is a growing need for well-trained addictions counselors.

The graduate certificate program in addiction and substance-use related disorders pairs state-of-the-art research by internationally recognized experts in addictions with clinical expertise of licensed psychologists and licensed substance abuse counselors who have decades of experience providing substance abuse treatment.

This program is valuable for those in counseling, social work, psychology, medicine and various fields of therapy who provide services to individuals and families suffering from addiction and substance use disorders.

The addiction certificate program meets all the curricular requirements of the Arizona State Board of Behavioral Health Examiners for licensure in substance abuse counseling as well as most national and state certification requirements.

Degree Requirements:

21 credit hours.

Required Core (18 credit hours)

PSY 570 Psychopharmacology (3)

PSY 601 Addiction and Substance Abuse: Assessment and Diagnosis (3)

PSY 602 Comorbidity in Substance Use Related Problems (3)

PSY 603 Evidence-Based Interventions for Substance Use Related Problems (3)

PSY 604 Multicultural Issues Related to Substance Use Related Problems (3)

PSY 605 Group Therapy for Substance Use-Related Problems (3)

Other Requirements (3)

PSY 591 Topic: Ethics (3)

Additional Curriculum Information

For students interested in pursuing licensure in substance abuse counseling, this graduate certificate meets all seven of the core content curricular requirements for the Arizona State Board of Behavioral Health Examiners. In addition, the program is in compliance with national certification curriculum guidelines.

PSY 591 can be substituted with approval of the academic unit.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any health, behavioral health or counseling-related field from a regionally accredited institution or an equivalent degree from an international institution that is officially recognized by that country.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- curriculum vitae or resume
- one letter or recommendation
- personal statement
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/certificates/addiction-and-substance-use-related-disorders-graduate/>) for program descriptions and to request more information.

Career Opportunities: Substance abuse counseling can be incredibly rewarding, and the field offers a wide variety of experiences. Jobs are available in substance abuse treatment centers; community mental health agencies; primary care, integrated health and criminal justice facilities; hospitals; schools and universities; and military and veterans affairs centers. The U.S. Bureau of Labor Statistics expects employment of substance abuse counselors to grow 22% between 2018 and 2028, much faster than other occupations. Job prospects are expected to be very good for counselors who are licensed.

Career examples include:

- addiction counselor
- licensed addiction counselor
- licensed substance abuse counselor
- substance abuse counselor
- substance abuse technician

Professional Licensure: ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (<https://admission.asu.edu/academics/licensure>) webpage.

Addiction Psychology, MS (LAADPSYMS)

Online Degree Search Title: Addiction Psychology, MS

Campus: Online

Program Description: The MS program in addiction psychology pairs state-of-the-art research from internationally recognized experts in addictions with clinical expertise from licensed psychologists and licensed addiction counselors who have decades of experience providing addiction treatment.

This program provides the knowledge, skills and experience necessary for graduates to pursue state licensure for becoming an addiction counselor.

Degree Requirements:

45 credit hours including the required applied project course (PSY 593).

Required Core (27 credit hours)

PSY 570 Psychopharmacology (3)

PSY 601 Addiction and Substance Abuse: Assessment and Diagnosis (3)

PSY 602 Comorbidity in Substance Use Related Problems (3)

PSY 603 Evidence-based Interventions for Substance Use Related Problems (3)

PSY 604 Multicultural Issues Related to Substance Use Related Problems (3)

PSY 605 Group Therapy for Substance Use-Related Problems (3)

PSY 606 Case Management for Substance Use Related Problems (3)

PSY 607 Family and Adolescent Treatment for Substance Use Related Problems (3)

PSY 608 Supervision of Addictions Counselors (3)

Research (3 credit hours)

PSY 600 Research Methods (3)

Other Requirements (9 credit hours)

PSY 591 Seminar: Ethics (3)

PSY 680 Practicum (6)

Culminating Experience (6 credit hours)

PSY 593 Applied Project (6)

Additional Curriculum Information

Students complete six credit hours of practicum, which consists of 600 hours of applied work as an addiction counselor under supervision of licensed substance abuse counselors. With support from program advisors, students arrange for a supervision experience at a licensed addiction treatment center where they are located that provides supervision as part of the training experience. Program staff verify the licensure status of the agency and supervisor, and maintain a practicum training agreement. The practicum course also includes a weekly didactic class that facilitates the

training process and monitors for any problems and successful completion of the practicum experience.

The culminating experience is a six credit hour applied project. For the applied project, students evaluate existing research on addiction treatment, identify gaps in the literature, and generate a study or recommendations that contribute to the field of addiction psychology. The applied project course also includes completion of a practice licensing exam that helps prepare students to obtain state licensure as an addiction counselor.

Courses listed for other requirements may be substituted with approval of the academic unit.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in health, behavioral health, psychology, counseling or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- professional resume
- two letters of recommendation
- written statement
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/addiction-psychology-masters/>) for program descriptions and to request more information.

Career Opportunities: Substance abuse counselor jobs can be incredibly rewarding and offer a wide variety of experiences. Graduates can find employment in substance abuse treatment centers; community mental health agencies; the primary care, integrated health and criminal justice fields; hospitals; schools and universities; and military and veterans affairs offices and hospitals.

Professional Licensure: ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (<https://admission.asu.edu/academics/licensure>) webpage.

Completion of the Master of Science program in addiction psychology does not result in licensure as an addictions counselor. Pursuit of state licensure is a part of career development and occurs subsequent to completion of a terminal degree.

State governments administer licensing and have several requirements, including educational and training requirements, which this program meets; supervised work experience as a part of employment after completion of the degree; and passing a licensing exam that is administered through the state licensing entity. This program prepares students for this licensing exam, but the exam is taken after completion of the degree.

African Studies (certificate), Certificate (LAAFRICACE)

Online Degree Search Title: African Studies (Graduate Certificate)

Campus: Tempe

Program Description: The graduate certificate program in African studies focuses on interdisciplinary study of the peoples, history and cultures of Africa and the multifaceted experiences of people of African descent in Europe and the Americas. Students gain access to an extensive range of information and systematic knowledge committed to the new model of African and African diaspora studies that focuses on the intersections of race, culture and gender with transdisciplinary perspectives.

Courses examine interdisciplinary approaches to studying race, ethnicity, social justice, gender, citizenship and economic development. Students study issues in African and African American history, migration patterns, art, literature, religion, family life and education, as well as how race and institutional racism have impacted the development of African descended people in America and around the world.

As this certificate program offers students an international dimension to the study of peoples and cultures of African descent, students enhance their knowledge about global issues and further expand their research pursuits. The program characterizes the faculty members' intellectual and research strengths and the curriculum's transdisciplinary strategies and research approaches that highlight the continuities and disjuncture of history and experiences throughout Africa and the diaspora.

Degree Requirements:

15 credit hours.

Required Core (3 credit hours)

AFR 502 Africa and African Diaspora World (3)

Electives (12 credit hours)

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution. Students who are not regularly admitted to a graduate degree program may still pursue the certificate.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program. When applicable, applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in a master's degree program.

Applicants must submit:

- graduate admission application and application fee
- official transcripts
- proof of English proficiency

Additional Admission Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

International students who need an F-1 or J-1 visa need to apply to and be accepted into a graduate degree program prior to being considered for the certificate program. International students residing in the United States on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for admission to this certificate program.

Official copies of transcripts must be submitted from all colleges and universities where the applicant earned a bachelor's or master's degree.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Graduates will be able to employ appropriate theory and methods in the study of the African diaspora at a graduate level.
- Graduates will be able to practically and professionally apply knowledge of the African diaspora.

Career Opportunities: Students who earn a graduate certificate in African studies have many career opportunities, including:

- pursuing a career in journalism, teaching, law enforcement, social policy, human rights or civil rights
- starting their own business
- writing novels or screenplays

They also may attend graduate school in any number of disciplines, including anthropology, archeology, history, political science, psychology and sociology, or attend medical school or law school.

American Indian Studies (Cultural Resource Revitalization and Sustainability), MS (LAAISCMS)

Online Degree Search Title: American Indian Studies (Cultural Resource Revitalization and Sust), MS

Campus: Tempe

ASU is not currently accepting applications for this program.

Program Description: This transdisciplinary MS program in American Indian studies provides students with an intellectual and practical understanding of the issues facing American Indian populations, and the ability to apply that knowledge.

Students acquire problem-solving skills that are useful in a range of professional arenas, including government, private and nonprofit agencies. The curriculum's focus is on languages, cultures, arts, activism, histories, legal policy and education from an American Indian studies paradigm perspective. Delivery is mainly through in-person courses.

Through the cultural resource revitalization and sustainability concentration, students explore the development and implementation of American Indian-focused cultural resource management processes and analyze how policies and laws can improve or hinder the protection of American Indian cultural and funerary patrimony.

Degree Requirements:

30 credit hours and a thesis, or 30 credit hours including the required applied project course (AIS 580).

Required Core (9 credit hours)

AIS 501 American Indian Studies Paradigms (3)

AIS 502 American Indian Studies Research Methods (3)

AIS 503 Contemporary Issues of American Indian Nations (3)

Concentration (9 credit hours)

Electives (6 credit hours)

Culminating Experience (6 credit hours)

AIS 580 Practicum (6) or

AIS 599 Thesis (6)

Additional Curriculum Information

Students may select a thesis or nonthesis option. Thesis students are involved in a major research project under the direction of their faculty advisors, culminating in a thesis. Students should select this option if they have an interest in a research-oriented position within an organization or agency or wish to pursue a doctoral degree. Nonthesis students complete an applied project that identifies and addresses an applied problem or issue relevant to a partner agency or organization under the direction of their faculty advisors. Students should select this option if they are interested in a leadership or managerial-level position within an organization or agency.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited college or university of recognized standing in a related field such as history, justice studies, sociology, ethnic studies, anthropology, political science or education.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Career Opportunities: After leaving ASU, many graduates:

- conduct research related to Indigenous culture revitalization
- direct or manage Indigenous culture organizations or companies
- facilitate Indigenous community partnerships and projects

American Indian Studies (Indigenous Rights and Social Justice), MS (LAAISIMS)

Online Degree Search Title: American Indian Studies (Indigenous Rights and Social Justice), MS

Campus: Tempe

Program Description: The MS program in American Indian studies is a transdisciplinary program that provides students with an intellectual and practical understanding of the issues facing American Indian populations and helps students strengthen their ability to apply that knowledge. Students acquire problem-solving skills in a range of professional arenas, including governmental, private and nonprofit agencies.

The program focuses on languages, cultures, the arts, activism, histories, legal policies and education through an American Indian studies paradigm and perspective. Delivery is through in-person courses.

The Indigenous rights and social justice concentration explores the historical dimensions of colonization on American Indian political, economic and cultural institutions. Students analyze the legal, political and social implications of American Indian relationships with federal, state and local governments, and they investigate processes that American Indian nations and community members use to strategize and work toward social justice and Indigenous rights.

Concurrent Program Options:

Students can choose to create their own concurrent degree combination to match their interests by working with their academic advisor during or after their first semester of study. Some concurrent combinations are not possible due to high levels of overlap in curriculum; students should speak with their academic advisor for more details.

This degree is also offered as a concurrent program with the following: Social Work - Standard Program, MSW

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

American Indian Studies, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a thesis, or 30 credit hours including the required applied project course (AIS 580).

Required Core (9 credit hours)

AIS 501 American Indian Studies Paradigms (3)

AIS 502 American Indian Studies Research Methods (3)

AIS 503 Contemporary Issues of American Indian Nations (3)

Concentration (9 credit hours)

Electives (6 credit hours)

Culminating Experience (6 credit hours)

AIS 580 Practicum (6) or

AIS 599 Thesis (6)

Additional Curriculum Information

Students may select a thesis or nonthesis option. Thesis students are involved in a major research project under the direction of their faculty advisors, culminating in a thesis. American Indian Studies (Tribal Leadership and Governance), MS (LAAISTMS)

Online Degree Search Title: American Indian Studies (Tribal Leadership and Governance), MS

Campus: Tempe

Program Description: The MS program in American Indian studies is a transdisciplinary program that provides students with an intellectual and practical understanding of the issues facing American Indian populations and helps students strengthen their ability to apply that knowledge.

The program focuses on languages, cultures, arts, activism, histories, legal policy and education from an American Indian studies paradigm and perspective. Delivery is through in-person courses.

Within the tribal leadership and governance concentration, students explore traditional and modern concepts of Indian education leadership, tribal government leadership, tribal governments, decision-making and legislation, constitutional reform, planning, economic development, community development, nation-rebuilding, tribal courts, administration and planning.

Concurrent Program Options:

Students can choose to create their own concurrent degree combination to match their interests by working with their academic advisor during or after their first semester of study. Some concurrent combinations are not possible due to high levels of overlap in curriculum; students should speak with their academic advisor for more details.

This degree is also offered as a concurrent program with the following: Public Administration, MPA

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

American Indian Studies, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. American Indian Studies (Visual and Oral Culture), MS (LAAISVMS)

Online Degree Search Title: American Indian Studies (Visual and Oral Culture), MS

Campus: Tempe

ASU is not currently accepting applications for this program.

Program Description: The MS program in American Indian studies is a transdisciplinary program that provides students with an intellectual and practical understanding of the issues facing American Indian populations, and the ability to apply that knowledge.

Students gain problem-solving skills in a range of professional arenas, including governmental, private and nonprofit agencies. The program focuses on the languages, cultures, arts, activism, histories, legal policy and education from an American Indian studies perspective. Delivery is through in-person courses.

The visual and oral culture concentration explores and contributes to American Indian culture and history as it exists in visual, material and written forms through creative writing, literature, poetry, film, photography, performing arts, digital arts, oral tradition, history and communication from an American Indian studies paradigm.

Degree Requirements:

30 credit hours and a thesis, or 30 credit hours including the required applied project course (AIS 580).

Required Core (9 credit hours)

AIS 501 American Indian Studies Paradigms (3)

AIS 502 American Indian Studies Research Methods (3)

AIS 503 Contemporary Issues of American Indian Nations (3)

Concentration (9 credit hours)

Electives (6 credit hours)

Culminating Experience (6 credit hours)

AIS 580 Practicum (6) or

AIS 599 Thesis (6)

Additional Curriculum Information

Regarding concentration and electives options, students should see the academic unit for approved courses.

Students select a thesis or nonthesis option. Both are research projects, but the applied project is more applied in nature. Thesis students are involved in a major research project under the direction of their faculty advisors, culminating in a thesis. This is the option students should select if they have an interest in a research-oriented position within an organization or agency or wish to pursue a doctoral degree. Nonthesis students complete a practicum project that identifies and addresses an applied problem or issue relevant to a partner agency or organization under the direction of their faculty advisors. This is the option students should select if they are interested in a leadership or managerial-level position within an organization or agency.

The required core classes emphasize the knowledge and skills all graduates must have. Concentrations and electives are designed so that students can concentrate in the areas of visual and oral culture, Indigenous rights and social justice, cultural resource revitalization and sustainability, or tribal leadership and governance.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited college or university of recognized standing in a related field such as history, justice studies, sociology, ethnic studies, anthropology, political science or education.

Applicants must have a minimum cumulative GPA of a 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of a 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Career Opportunities: After completing the program, many graduates:

- conduct academic research
- curate and produce Indigenous festivals and events
- direct or manage Indigenous art companies, studios or dance-related organizations
- facilitate community partnerships and projects with Indigenous communities

American Studies, MA (LAAMSTMA)

Online Degree Search Title: American Studies, MA

Campus: Tempe

Program Description: ASU's MA program in American studies trains students in interdisciplinary approaches aimed at understanding the American experience in local and global contexts.

The array of disciplines spans the arts, humanities and social sciences, and faculty expertise covers a broad variety of ethnographic, historical, literary and media studies as well as interdisciplinary and community-based approaches. Given its geographical location in the American Southwest, ASU's American studies program values an exploration of diasporic and transnational influences in U.S. cultures and social and political history.

The American studies faculty have strengths and expertise in the areas of critical ethnic studies, Indigenous studies, gender studies, Black studies, immigration studies, justice studies, disability studies, queer studies, Latino studies, transborder studies, Asian American studies, cultural studies, environmental humanities and sports studies, allowing students to focus their education around these areas.

Students gain expertise from working in a community of scholars dedicated to addressing critical questions of what America means, what American studies uncovers and how to expand the boundaries of the new American conversation. Graduate students are immersed in conversations of how one develops, conducts and engages in research on the American experience in academia and beyond. Additionally, faculty and students explore the field of American studies as the interdisciplinary analysis of American culture from multiple critical perspectives within transnational dynamics and exchanges.

American studies graduates can bridge a strong theoretical foundation with applied research to equip them to enter national and international dialogues.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

Asian Pacific American Studies, BA

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a thesis, or 30 credit hours including the required applied project course (AMS 593).

Required Core (3 credit hours)

AMS 502 American Studies: Theory and Method (3)

Other Requirements (3 credit hours)

Methods Course (3)

Electives or Research (18 or 21 credit hours)

Culminating Experience (3 or 6 credit hours)

AMS 593 Applied Project (3) or

AMS 599 Thesis (6)

Additional Curriculum Information

Students must complete one methods course for the degree, with academic advisor approval; AMS 502 cannot be used to meet this requirement. These courses can be drawn from a wide array of units across the various ASU campuses, but students should take advantage of the SST graduate methods courses. The academic unit sends lists of SST methods courses once per semester; students should consult with their faculty advisor or chairperson and get approval from the graduate chairperson in American studies to determine the best courses to take.

For electives or research, students should see the academic unit for the approved course list. Students choose 18 credit hours for the thesis option or 21 for the applied project option.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of purpose
- writing sample
- curriculum vitae
- two letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. This program requires a TOEFL iBT score of at least 90.

The writing sample may be an article, published or unpublished; a research paper; a seminar paper; or any other extended sample of expository skill. A minimum of 4,000 words is required. The document should not be password protected.

The statement of purpose must be about 500 words and should be addressed to the American Studies Graduate Studies Committee. It must explain the applicant's scholarly background and training, career goals, the area of study they wish to pursue, and why they want to pursue graduate study at ASU.

Two references are required. Applicants should contact the faculty or professional supervisors they intend to use for references before listing them on the application and inform the intended recommenders that they will receive an email from the ASU American studies program asking them to complete a questionnaire and provide comments on the applicant's suitability for graduate study. Applicants should confirm references' email addresses before submitting them on the application. References from family members or relations are not recommended.

Career Opportunities: Graduates may go on to law school, graduate school or other professional degree programs. Graduates of the Master of Arts program in American studies find success in a number of areas in local and international contexts, including:

- business
- communications
- education
- government
- journalism
- law and medical fields
- nonprofits
- political consulting
- professional writing
- public engagement and community relations

American Studies (Certificate), Certificate (LAAMSGRCT)

Online Degree Search Title: American Studies (Graduate Certificate)

Campus: Tempe, Online

Program Description: The certificate program in American studies consists of interdisciplinary inquiries into the diverse cultures, global impact, social systems, gendered experiences, socioeconomic realities and political thought of the United States. The field of American studies has evolved to include an understanding of diversity in U.S. society; how the U.S. national community represents and imagines itself; how this resonates globally; and the role of social movements seeking to achieve political, legal and economic change.

The program trains students in:

- applied research methods, particularly those that involve community involvement and engagement
- critical methodologies, including how alternative voices are key in research, politics and policy, and social justice work

- explorations of racial literacy, gender, sexuality and socioeconomic experiences grounded in historical contexts that facilitate understanding of contemporary U.S. populations
- the history and trajectory of the field of American studies
- the use of storytelling and narratives to represent diverse communities and facilitate broader understanding across groups

Degree Requirements:

15 credit hours.

Required Core (3 credit hours)

AMS 502 American Studies: Theory and Method (3)

Methods (3 credit hours)

AMS 500 Research Methods (3)

Electives (9 credit hours)

Additional Curriculum Information

For electives, students select courses from an approved list provided by the academic unit.

AMS 500 may be substituted with an alternative methods course as approved by the academic unit.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or they must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- letter of intent
- written statement
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of current residency.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/certificates/american-studies/>) for program descriptions and to request more information.

Career Opportunities: This certificate program prepares students for careers in policy, education and teaching, urban planning, sustainability, sociopolitical movements, environmental impacts, advocacy, nonprofit organizations, government, journalism, law and justice, public safety and health. This certificate program is also well-suited to be paired with other professional degrees that prepare students for these careers.

Animal Behavior, PHD (LAANBPHD)

Online Degree Search Title: Animal Behavior, PhD

Campus: Tempe

Program Description: The PhD program in animal behavior is a transdisciplinary graduate degree program that provides doctoral-level training in mechanistic and functional approaches to understanding behavior in a variety of animal taxa.

The study of behavior is at the interface of several scientific disciplines, including anatomy, ecology, evolution, neuroscience and physiology. This

program offers the diverse but specialized array of skills and knowledge needed to produce excellent research in animal behavior.

Students gain expertise with applied scientific value in areas such as veterinary science and mental and behavioral health in humans. The ecological focus of the program feeds into local, state and global priorities in biological conservation and ecosystem sustainability.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, an oral and written exam, a prospectus and a dissertation.

Required Core (8 credit hours)

ANB 601 Research Strategies in Animal Behavior (4)

ANB 602 Current Issues in Animal Behavior (1)

Electives or Research (64 credit hours)

Culminating Experience (12 credit hours)

ANB 799 Dissertation (12)

Additional Curriculum Information

Core course ANB 602 is a one credit hour course taken four times.

The department and the student's advisor determine a plan for elective and research courses in conjunction with the student.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a related discipline from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants must submit the following:

- graduate admissions application and application fee
- official transcripts
- academic record form
- personal statement
- curriculum vitae or resume
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Review the literature relevant to the research question in animal behavior that they address in their dissertation.
- Execute a research plan of their own design that addresses a significant scientific question about animal behavior.
- Communicate the rationale and results of their research, both orally and in writing.

Career Opportunities: A doctorate in animal behavior provides strong preparation for academic careers at every level, including community colleges and research universities. The skills and knowledge obtained in this program are also valuable for government careers in federal and state agencies responsible for wildlife management and conservation, and for conservation-related careers in nongovernmental organizations.

Career examples include:

- animal scientist
- biology professor
- conservation biologist

- postsecondary biology teacher
- wildlife biologist

Anthropology, PHD (LAANTHRPHD)

Online Degree Search Title: Anthropology, PhD

Campus: Tempe

Program Description: The School of Human Evolution and Social Change is an excellent choice for students interested in pursuing a PhD in the classic fields of anthropology:

- archaeology
- bioarchaeology
- evolutionary anthropology
- sociocultural anthropology

It is also an ideal environment for students who want to combine these approaches and other disciplines to explore specific issues or research questions within a transdisciplinary context. The flexible graduate curricula are designed to encourage students to design innovative plans of study in order to pursue their interests while receiving broad training in key areas. The anthropology faculty actively engage with faculty in other disciplines, including:

- applied mathematics
- chemistry
- environmental economics
- epidemiology
- formal modeling
- genetics
- sociology
- sustainability
- technology and society
- urban planning

The training students receive in this program prepares them to become expert scholars who are able to contribute not only to their chosen field but also to finding solutions to humankind's greatest challenges. This program provides training in data analysis and research design within the context of human evolution, archaeology and the wider field of anthropology. Through anthropological coursework, students learn how to ask important questions about the human species and employ statistics to analyze and extract meaning from data. Students will learn to appreciate humanity's place in nature and the long history of human societal change.

Degree Requirements:

84 credit hours, a written comprehensive exam, a prospectus and a dissertation.

Students entering with a master's degree in a related field may be granted up to 30 credit hours toward the 84 credit hours required for the doctorate. This leaves 30 credit hours of coursework, 12 credit hours of research and 12 credit hours of dissertation (54 credit hours total) to be earned post-admission.

Students entering without a master's degree must earn an additional 30 hours of graduate credit, produce a research portfolio which is formally evaluated by a faculty committee, and present that research in a public forum before continuing on in the later stage of the doctorate.

All students must maintain a GPA of 3.20 (scale is 4.00 = "A") in their courses and complete degree requirements per the program's satisfactory progress policy.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or they must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement outlining educational and professional goals
- current curriculum vitae or resume
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Undergraduate coursework in anthropology is not a prerequisite for admission but is generally advisable. Students may be admitted without such a background and may be required to acquire knowledge of general anthropology in a manner to be specified at the time of admission.

Applicants also may submit with their application materials an optional scholarly writing sample not to exceed 30 double-spaced pages.

Career Opportunities: The demand in the job market for people with an anthropology background is stimulated by a growing need for researchers and analysts with keen thinking skills who can manage, evaluate and interpret large amounts of data. As the many spheres of human interaction expand globally, people trained in anthropology are increasingly sought-after for their broad, holistic knowledge and perspectives, which are the hallmarks of anthropology. Some career opportunities include:

- acting as legal advocates in international cases
- analyzing and proposing policies
- conducting postgraduate academic research
- consulting for private and public organizations
- curating cultural resources
- directing nonprofit organizations
- directing programs in the private or public sector
- managing culture or heritage resources in private or public sectors
- modeling infectious diseases
- planning communities
- teaching

Anthropology (Complex Adaptive Systems Science), PHD (LAANTHCPHD)

Online Degree Search Title: Anthropology (Complex Adaptive Systems Science), PhD

Campus: Tempe

Program Description: The School of Human Evolution and Social Change is an excellent choice for students wanting to pursue a PhD in the classic fields of anthropology: archaeology, bioarchaeology, evolutionary anthropology and sociocultural anthropology. It is also an ideal environment for students who want to combine these approaches and other disciplines to explore specific issues or research questions within a transdisciplinary context.

The flexible graduate curricula are designed to encourage students to design innovative plans of study to pursue their interests while receiving broad training in key areas. The anthropology faculty actively engage with faculty in other disciplines; these include applied mathematics, chemistry, environmental economics, epidemiology, formal modeling, genetics, sociology, sustainability, technology and society, and urban planning.

The complex adaptive systems science doctoral concentration trains the next generation of scientists in advanced concepts and methods needed for approaching diverse phenomena in the social and life sciences. The program is tightly integrated with diverse, ongoing, university-wide research on complex adaptive systems science at Arizona State University and emphasizes the value of a complex adaptive perspective to give better insight and a more active role in seeking solutions to a broad array of critical issues facing society today. The training students receive in this program prepares them to become expert scholars able to contribute not only to their chosen field but to finding solutions to humankind's greatest challenges.

This degree program provides training in data analysis and research design within the context of human evolution, archaeology and the wider field of anthropology. In this program, through anthropological coursework, students learn how to ask important questions about the human species and

employ statistics to analyze and extract meaning from data. Students learn to appreciate their place in nature and the long history of human societal change that brought them to where they are today.

Degree Requirements:

84 credit hours, a written comprehensive exam, a prospectus and a dissertation.

Students entering with a master's degree in a related field may be granted up to 30 credit hours toward the 84 credit hour total required for the doctorate degree program. This leaves 30 credit hours of coursework, 12 credit hours of research and 12 credit hours of dissertation (54 credit hours total) to be earned post-admission.

Students entering without a master's degree must earn an additional 30 hours of graduate credit, produce a research portfolio which is formally evaluated by a faculty committee, and present that research in a public forum before continuing on in the later stage of the doctoral degree program.

All students must maintain an average GPA of 3.20 (scale is 4.00 = "A") in their courses and complete degree requirements per the program's satisfactory progress policy.

For the concentration in complex adaptive systems science, 12 credit hours are selected from an approved list of applicable courses related to complexity.

Student doctoral dissertations should include the application of complex adaptive systems concepts and methods in their field of study and they typically have a member of the complex adaptive systems science graduate faculty as a member of their doctoral supervisory committee.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement outlining educational and professional goals
- current curriculum vitae or resume
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Undergraduate coursework in anthropology is not a prerequisite for admission but is generally advisable. Students may be admitted without such a background and may be required to acquire knowledge of general anthropology in a manner to be specified at the time of admission.

Career Opportunities: The demand in the job market for people with an anthropology background is stimulated by a growing need for researchers and analysts with keen thinking skills who can manage, evaluate and interpret large amounts of data. As the many spheres of human interaction expand globally, people trained in anthropology are increasingly sought for their broad, holistic knowledge and perspectives, which are the hallmarks of anthropology. Some career opportunities include:

- acting as legal advocates in international cases
- analyzing and proposing policies
- conducting postgraduate academic research
- consulting for private and public organizations
- curating cultural resources
- directing nonprofit organizations
- directing programs in the private or public sector
- managing culture or heritage resources in private or public sectors
- modeling infectious diseases
- planning communities
- teaching

Anthropology (Urbanism), PHD (LAURBPHD)

Online Degree Search Title: Anthropology (Urbanism), PhD

Campus: Tempe

ASU is not currently accepting applications for this program.

Program Description: The School of Human Evolution and Social Change is an excellent choice for students wanting to pursue a PhD in the classic fields of anthropology:

- archaeology
- bioarcheology
- evolutionary anthropology
- sociocultural anthropology

It is also an ideal environment for students who want to combine these approaches and other disciplines when exploring specific issues or research questions within a transdisciplinary context. The flexible graduate curricula are designed to encourage students to design innovative plans of study to pursue their interests while receiving broad training in key areas. The anthropology faculty actively engage with faculty in other disciplines, including:

- applied mathematics
- chemistry
- economics
- environmental
- epidemiology
- formal modeling
- genetics
- sociology
- sustainability
- technology and society
- urban planning

The training students receive in this program prepares them to become expert scholars able to contribute not only to their chosen field but to finding solutions to humankind's greatest challenges. The concentration in urbanism leverages the varied interests in urbanism and helps emerging scholars as they attempt to compare, contrast and take stock of urbanism. Working with faculty from across a range of departments and programs at ASU, doctoral students are able to capture the creative tensions that scholarship on urbanism has inspired in order to stimulate a provocative, constructive kind of inquiry.

This degree program provides training in data analysis and research design within the context of human evolution, archaeology and the wider field of anthropology. In this program, through anthropological coursework, students learn how to ask important questions about the human species and employ statistics to analyze and extract meaning from data. Students learn to appreciate their place in nature and the long history of human societal change that brought them to where they are today.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Students entering with a master's degree in a related field may be granted up to 30 credit hours toward the 84 credit hour total required for the doctorate. This leaves 30 credit hours of coursework, 12 hours of research credit and 12 hours of dissertation credit (54 credit hours total) to be earned post-admission.

Students entering without a master's degree must earn an additional 30 hours of graduate credit, produce a research portfolio which is formally evaluated by a faculty committee, and present that research in a public forum before continuing on in the later stage of the doctorate.

All students must maintain an average GPA of 3.20 (scale is 4.00 = "A") in their courses and complete degree requirements per the program's satisfactory progress policy.

For the concentration in urbanism, 15 credit hours are selected from an approved list of applicable courses related to urbanism. These courses include the core urbanism course, GCU 516, as well as one course from each of the four urbanism clusters. These clusters are:

- built form
- culture and society
- institutions and governance
- natural environment

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement outlining educational and professional goals
- current curriculum vitae or resume
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Undergraduate coursework in anthropology is not a prerequisite for admission, but is generally advisable. Students may be admitted without such a background and may be required to acquire knowledge of general anthropology in a manner to be specified at the time of admission.

Applicants may include with their application materials an optional scholarly writing sample, not to exceed 30 double-spaced pages.

Career Opportunities: The demand in the job market for people with an anthropology background is stimulated by a growing need for researchers and analysts with keen thinking skills who can manage, evaluate and interpret large amounts of data. As the many spheres of human interaction expand globally, people trained in anthropology are increasingly sought for their broad, holistic knowledge and perspectives, which are the hallmarks of anthropology. Some career opportunities include:

Applied Behavior Analysis, MS (LAAPBAMS)

Online Degree Search Title: Applied Behavior Analysis, MS

Campus: Tempe

Program Description: The MS program in applied behavior analysis is a full-time, two-year program designed to align with the Behavior Analyst Certification Board's current test content outline, encompassing 345 classroom hours and 2,000 hours of supervised practicum fieldwork.

Graduates develop skills with a primary focus on three areas delineated by the certification board: foundational behavior-analytic skills, client-centered responsibilities and the accumulation of essential knowledge.

Within this program, students are immersed in the intricacies of behavior-analytic principles such as positive reinforcement, shaping and communication training. They gain a strong foundation in effecting positive behavior change, addressing behavioral excesses and deficiencies, and challenging behaviors through evidence-based interventions.

This advanced degree program places an emphasis on the ethical conduct of applied behavior analysis, preparing students to navigate the field with integrity. Students also have the opportunity to enhance their communication and leadership skills while training others on applied behavior analysis.

Mastery of behavioral measurement techniques is central to this program. Students learn to collect and interpret data effectively and develop proficiency in understanding experimental designs to uncover relationships among measurements, relevant variables and behavior.

Degree Requirements:

45 credit hours including the required applied project course (PSB 593).

Required Core (27 credit hours)

PSB 501 Basic Principles of Applied Behavior Analysis (3)

PSB 510 Basic Principles of Experimental Analysis of Behavior (3)

PSB 511 Advanced Research Methods (3)

PSB 520 Ethical Issues and Professional Standards in Applied Behavior Analysis (3)

PSB 530 Behavioral Observation and Functional Assessment (3)

PSB 540 Development of Applied Behavioral Intervention Programs (3)

PSB 563 Basic Principles of Organizational Behavior Management (3)

PSB 573 Advanced Principles of Learning and Analysis of Behavior (3)

PSB 578 Applied Behavior Analysis in Developmental Disorders (3)

Electives or Research (4 credit hours)

PSB 591 Seminar (2)

PSB 598 Special Topics (2)

Other Requirements (9 credit hours)

PSB 580 Practicum: Applied Behavior Analysis (5)

PSB 583 Fieldwork: Applied Behavior Analysis (4)

Culminating Experience (5 credit hours)

PSB 593 Applied Project (5)

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's degree in psychology, human development, sociology or a closely related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of purpose form
- curriculum vitae or resume
- two letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The application is completed online through the ASU Admission Services website. Applicants should upload their unofficial transcripts to the application before submitting.

It is strongly recommended that applicants download and print the Master of Science in applied behavior analysis admission checklist from the Department of Psychology website to ensure completion of the application process and inclusion of all the required supplemental forms.

The statement of purpose form should describe professional and academic aspirations.

Applicants must submit two letters of recommendation from professionals or faculty who can speak to the applicant's abilities.

Career Opportunities: With a strong foundation in evidence-based practices, graduates have obtained the essential knowledge, skills and practical experience needed to pursue state licensure and establish themselves as proficient Board-Certified Behavior Analysts®. This program prepares students for highly sought-after roles within the human services sector, and upon graduation, students are well-prepared to pursue rewarding

careers such as:

- assistant clinical director
- behavior specialist
- clinical director

Professional Licensure: ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure (<https://admission.asu.edu/academics/licensure>) webpage.

Applied Linguistics, PHD (EDAPLPHD)

Online Degree Search Title: Applied Linguistics, PhD

Campus: Tempe

ASU is not currently accepting applications for this program.

Program Description: Applied linguistics combines research topics in the linguistics sciences and education to pursue principled approaches to language-related concerns. The PhD program in applied linguistics is focused on simultaneous and developmental bilingualism in children and adolescents.

Faculty participate in the program from within multiple curricular units across the institution's four campuses. The program encourages transdisciplinary study, and its flexible requirements enable students to pursue those aspects of the disciplines that interest them the most.

Degree Requirements:

84 credit hours, a written comprehensive exam, a prospectus and a dissertation.

Foundation Coursework (18 credit hours)

Overview of the Field: A three-credit course providing a survey of the field of applied linguistics is required. (3)

Linguistics: Coursework in theoretical linguistics, including one approved linguistics elective, is required. (15)

Teaching Internship (1 credit hour)

Colloquia (8 credit hours)

A four-semester sequence of two-credit colloquium meetings is required for students in the first two years.

Research Methods (6 credit hours)

Students must take two courses in research methods, selected in consultation with the advisor.

Research Specialization (33 credit hours)

In consultation with the program director, students take 11 three-credit courses in their field of specialization.

Breadth (6 credit hours)

Two courses in a secondary concentration area are required.

Dissertation (12 credit hours)

Additional Curriculum Information

An oral defense of the dissertation is required.

There must be a minimum of 54 credit hours beyond the master's degree level, including a minimum of 12 units of dissertation credit. All students in the program must satisfy 18 credit hours of foundation coursework.

Because applied linguistics is transdisciplinary in nature, applicants may differ from one another with regard to their prior experience and preparation. For instance, while some applicants may have substantial prior training in core theoretical linguistics (foundations), others may have considerable preparation in an area related to a supported concentration. Students should consult the program director for assistance in planning their degree programs. The program director may address potential redundancies in a student's program requirements with prior academic preparation by allocating a maximum of 30 credit hours from an awarded and approved graduate degree toward the applied linguistics program requirements, or the director may permit the student to take additional elective courses in lieu of introductory courses covered in an undergraduate program.

Language Requirement: Students in the applied linguistics doctoral program must demonstrate proficiency in a second language equivalent to two years of study. A language appropriate to the student's area of interest is selected in consultation with the advisor. The language requirement must be satisfied by examination or coursework prior to advancement to candidacy. Computer or other nonhuman languages may not be used to satisfy this requirement. Students for whom English is a second language may use their first language to satisfy the requirement by examination. Course credit used to satisfy the language requirement cannot be used to satisfy other program requirements and cannot be counted toward the total required 84 credit hours.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of purpose
- resume or curriculum vitae
- three letters of recommendation
- academic writing sample relevant to the field
- GRE general test scores
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency. Students should see the Department of English website for specific details about English proficiency requirements.

ASU does not accept the GRE® General Test at home edition.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

-
-
-

Career Opportunities: Graduates with research expertise in applied linguistics work in a variety of professional contexts, such as academia, government, business, health care, legal settings, publishing, the private sector and nongovernmental organizations.

Career examples include:

- computer-assisted language learning expert
- data analyst
- forensic linguist
- language policy or documentation expert
- language program director
- language researcher
- linguistic consultant
- teacher trainer
- university professor

Applied Mathematics, PHD (LAAPMPHD)

Online Degree Search Title: Applied Mathematics, PhD

Campus: Tempe

Program Description: This PhD program in applied mathematics is intended for students with superior computational and mathematical modeling ability. It emphasizes a solid mathematical foundation and promotes creative scholarship in an application discipline.

The School of Mathematical and Statistical Sciences has faculty in applied mathematics with outstanding transdisciplinary research programs that have strong external funding. Current research interests include mathematical epidemiology and mathematical ecology, mathematical neuroscience, environmental fluid dynamics and high-performance computing, imaging and inverse problems, supply chain dynamics, control and optimization, computational methods for ordinary and partial differential equations, analysis of differential equations, and geophysical and environmental fluid dynamics.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, a prospectus and a dissertation.

Required Core (3 credit hours)

APM 505 Applied Linear Algebra (3)

Other Requirements (12 credit hours)

APM 501 Differential Equations I (3)

APM 502 Differential Equations II (3)

APM 503 Applied Analysis (3)

APM 504 Applied Probability and Stochastic Processes (3)

APM 506 Computational Methods (3)

Electives and Research (57 credit hours)

Culminating Experience (12 credit hours)

APM 799 Dissertation (12)

Additional Curriculum Information

Students must pass:

- two qualifying examinations
- a written comprehensive examination
- an oral dissertation prospectus defense

Students should see the department website for examination information.

Each student must write a dissertation and defend it orally in front of five dissertation committee members.

Electives are chosen from math or related area courses approved by the student's supervisory committee.

Students choose four out of the five courses listed for other requirements.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in mathematics, applied mathematics, economics, engineering or a natural science from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- statement of education and career goals
- resume
- three letters of recommendation

- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

To demonstrate their competitiveness in an applicant pool, applicants must show evidence of coursework in linear algebra (equivalent to ASU course MAT 342 or MAT 343) and advanced calculus (equivalent to ASU course MAT 371). It is desirable that applicants have scientific programming skills.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Apply concepts and skills from applied mathematics to conduct original research.
- Able to complete original research in applied mathematics.
- Apply advanced computational methods in their coursework and research.

Career Opportunities: Foundational knowledge in mathematics is required for building careers in science and technology. It can be applied in many different types of professions in fields that include engineering, life sciences, business, and economic and social sciences. These are just a few of the top careers possible with a doctorate in applied mathematics:

- biostatistician
- data scientist
- engineer
- financial analyst
- government and military researcher
- industrial researcher
- mathematical modeling expert
- mathematician
- medical researcher
- operations research analyst
- university instructor and faculty member

Applied Prevention Science (Certificate), Certificate (LAAPSGRCT)

Online Degree Search Title: Applied Prevention Science (Graduate Certificate)

Campus: Tempe, Online

ASU is not currently accepting applications for this program.

Program Description: This graduate certificate program provides foundational and theoretical knowledge necessary for employment in the field of mental illness prevention and health promotion.

The program offers five courses totaling 15 credits. Training is self-directed, with one-on-one feedback from faculty. Specific training areas and assignments are highly relevant to job demands, including community-based program evaluation; evidence-based psychosocial interventions; prevention ethics including in diverse settings and with diverse populations; and community psychology, advocacy and funding seeking for prevention programming initiations and sustainment.

Degree Requirements:

15 credit hours.

Required Core (15 credit hours)

PSY 563 Prevention Planning and Evaluation in Service Settings (3)

PSY 564 Prevention Education, Communication and Service Delivery (3)

PSY 567 Prevention Organization and Community Change (3)

PSY 569 Professional Ethics, Growth and Responsibility in Prevention (3)

PSY 678 Preventive Psychosocial Interventions that Work (3)

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.
2024-25 Academic Catalog Archive

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in psychology or in any health, mental health, or counseling-related field, from a regionally accredited institution, or an equivalent degree from an international institution that is officially recognized by that country.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

International students who need an F1 or J1 visa first need to apply to and be accepted into a graduate degree program prior to being considered for the certificate program. International students residing in the USA on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for admission to this certificate program.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/certificates/applied-prevention-science-graduate-certificate/>) for program descriptions and to request more information.

Career Opportunities: The certificate program in applied prevention science is valuable for those aspiring to work in fields that provide services to children and families in diverse settings such as schools, courts, community health centers and mental health agencies, child welfare, home visiting programs, foster care services and tribal behavioral health.

Career examples include:

- behavioral health specialist
- community and social service specialists
- community health worker
- prevention specialist

Asian Languages and Civilizations (Chinese), MA (LACHINAMA)

Online Degree Search Title: Asian Languages/Civilizations (Chinese), MA

Campus: Tempe

Program Description: The Chinese graduate program in the School of International Letters and Cultures offers an MA degree with a focus in one of two areas: culture (literature, linguistics, religion) or pedagogy.

The two areas of instruction are designed to prepare students to succeed in Chinese language environments with cultural competence. Each of these two areas also introduce students to the fundamentals of sinology and East Asian studies, which can prepare them for further scholarly, educational and professional pursuits.

The focus on culture (literature, linguistics, religion) provides disciplinary training that allows students to achieve in-depth command of spoken, aural and oral Mandarin Chinese as well as written literary Chinese.

The pedagogy focus is intended for students whose major interest is in teaching modern Chinese in K-16 environments. Students are trained in communicative and task-based language teaching approaches embedded within appropriate cultural contexts, as well as developing solid foundations in teaching Chinese literacy, pronunciation and linguistic systems.

Degree Requirements:

30 credit hours and a thesis, or 30 credit hours including the required applied project course (CHI 593).

Required Core (3 credit hours)

CHI 501 or JPN 501 Proseminar: East Asian Humanities (3)

Concentration (3 credit hours)

SLC 596 Second Language Methodologies (3)

Electives (15 credit hours)

Other Requirements (3 credit hours)

CHI 598 Topic: History of the Chinese Language (3)

Culminating Experience (6 credit hours)

CHI 593 Applied Project (6) or

CHI 599 Thesis (6)

Additional Curriculum Information

The Master of Arts in Asian languages and civilizations has concentrations in Chinese and Japanese. Students in the Chinese concentration take CHI 501 as required core and students in the Japanese concentration take JPN 501 for core. The course is cross-listed.

Electives are selected in consultation with the program chairperson.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in Chinese or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- writing sample
- resume
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The writing sample should represent the applicant's thinking and writing skills on a topic connected with Chinese culture.

Candidates for the master's degree should present the equivalent of an undergraduate major in Chinese upon entrance to the program. Those who lack this background but show strong potential and meet the Graduate College admission requirements, including those with regard to English proficiency, may be admitted to a graduate program on a provisional basis, pending removal of specified deficiencies. These deficiencies must be completed in addition to the regular plan of study for the master's degree.

Career Opportunities: Professionals with this degree can confidently move into academic, business and international fields. Skills developed through this program are valued for teaching positions, translation work or work in larger sectors such as governmental, diplomatic and international business.

Career examples include:

- foreign service
- historians
- interpreters and translators
- lawyers
- reporters and correspondents
- social and community service managers
- state department employees
- supply chain managers
- teachers and professors of area, ethnic and cultural studies

- teachers and professors of foreign language and literature

Asian Languages and Civilizations (Japanese), MA (LAJAPANMA)

Online Degree Search Title: Asian Languages/Civilizations (Japanese), MA

Campus: Tempe

Program Description: The Asian languages faculty in the School of International Letters and Cultures offer a graduate program leading to an MA in Asian languages and civilizations with a concentration in Japanese.

ASU's Japanese master's degree program allows students to pursue their interests in Japanese history, literature and culture through advanced training in modern and classical Japanese, and through in-depth study of specific historical and cultural periods.

The training equips students with the skills to do original research in primary sources and with the critical and methodological background to understand their chosen fields. Areas of particular faculty strength include early modern and modern literature; film, animation and popular culture; translation studies; modern history; Japan's warrior cultures; and transnational studies, especially Sino-Japanese literary and cultural relations and kanshibun genres.

Degree Requirements:

30 credit hours and a thesis, or 30 credit hours including the required applied project course (JPN 593).

Required Core (3 credit hours)

CHI 501 or JPN 501 Proseminar: East Asian Humanities (3)

Concentration (3 credit hours)

JPN 586 History of Japanology (3)

Electives (18 credit hours)

Culminating Experience (6 credit hours)

JPN 593 Applied Project (6) or

JPN 599 Thesis (6)

Additional Curriculum Information

The MA in Asian languages and civilizations has concentrations in Chinese and Japanese. Students in the Chinese concentration take CHI 501 as required core and students in the Japanese concentration take JPN 501 for core. The course is cross-listed.

Electives are selected in consultation with the program chairperson.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in Japanese or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00= "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- resume
- writing sample
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency
2024-25 Academic Catalog Archive

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The writing sample should represent the applicant's thinking and writing skills on a topic connected with Japanese culture. An academic writing sample, such as a research paper from a previous course, is preferred. The personal statement should highlight the applicant's motivations and skills and indicate why they are interested in the Japanese graduate program. Candidates for the program should present the equivalent of an undergraduate major in Japanese upon entrance to the program. Those who lack this background but who show strong potential and meet the Graduate College admission requirements may be admitted to a graduate program on a conditional basis, pending removal of specified deficiencies. These deficiencies must be completed in addition to the regular plan of study for the master's degree.

Students should see the School of International Letters and Cultures website for more information.

Career Opportunities: Professionals with this degree can confidently move into academic, business and international fields. Skills developed through this program are valued for teaching positions, translation work or work in a larger sector such as governmental, diplomatic and international business career opportunities.

Career examples include:

- foreign service
- interpreters and translators
- lawyers
- reporters and correspondents
- social and community service managers
- state department
- supply chain managers
- teachers and professors of area, ethnic and cultural studies
- teachers and professors of foreign languages and literature

Asian Studies (certificate), Certificate (LAASIANCE)

Online Degree Search Title: Asian Studies (Graduate Certificate)

Campus: Tempe

Program Description: The graduate certificate program in Asian studies offers graduate students a transdisciplinary specialization in Asian language and area studies.

The certificate program is available in two tracks. The East Asia track includes China, Japan and Korea, and the Southeast Asia track includes Burma, Laos, Thailand, Vietnam, Malaysia, Singapore, Indonesia, the Philippines, Brunei and Timor Leste.

Degree Requirements:

18 credit hours.

Required Core (6 credit hours)

two courses at the 500 level or above dealing with Asian content from a single discipline

Electives (6 credit hours)

two courses at the 500 level or above dealing with Asian content from a discipline other than that chosen for the core courses

Other Requirements (6 credit hours)

language proficiency requirement: two courses at the 400 level or above in one Asian language (Chinese, Indonesian, Japanese, Korean, Thai, Vietnamese)

Additional Curricular Information

Students work closely with a faculty advisor from the Center for Asian Research to develop a cohesive curriculum tailored to their individual goals and interests.

Some of the coursework from the discipline in which the student is earning a graduate degree may be used to satisfy these requirements.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Graduate students currently enrolled in any discipline may pursue a certificate in Asian studies in conjunction with their degree program.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

International students who need an F1 or J1 visa first need to apply to and be accepted into a graduate degree program prior to being considered for the certificate program. International students residing in the USA on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for admission to this certificate program.

Career Opportunities: The graduate certificate program in Asian studies provides students with training and knowledge relevant to careers in government, nongovernmental organizations, nonprofit organizations, global relationships, intercultural understanding, foreign service, researchers, professional writing and community college teaching.

Career examples include:

- cultural center associate
- historical society and exhibit curator
- language interpreter
- teacher or instructor

Astrophysics, PHD (LAASPHPHD)

Online Degree Search Title: Astrophysics, PhD

Campus: Tempe

Program Description: The PhD program in astrophysics develops creative scholarship in students and prepares them for professional careers in astrophysics, astronomy or related fields.

Students in this program take graduate-level courses in stars and interstellar media, galaxies and cosmology; obtain quantitative skills through analysis and modelling; may have observing opportunities through regional and international telescope observatories; and conduct independent, fundamental astrophysical research. Graduate students work closely with a research advisor on a wide range of topics including theoretical physics, cosmology, galaxy dynamics, stellar evolution, exoplanets, and the development and building of instrumentation.

Graduate students in astrophysics become leaders in observational and theoretical research. They participate in NASA- and NSF-funded space missions and study topics such as how stars are born and die, how galaxies interact and evolve, and how the universe changed as it developed from its earliest beginnings.

The program's world-class faculty have research expertise across the full breadth of astrophysics including the solar system, stars and galaxies from the Milky Way and the most distant galaxies in the universe. Current ASU research applies both computational and observational approaches to the exploration of a range of topics such as fundamental cosmology and whether there is life on exoplanets.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Core (1 credit hour)

SES 502 Exploring SESE Research (1)

Electives or Research (53 credit hours)

Other Requirements: Astrophysics Sequence (9 credit hours)

AST 521 Stars and Interstellar Medium I (3)

AST 522 Stars and Interstellar Medium II (3)

AST 591 Seminar: Astrophysics (2)

SES 501 SESE Colloquium (1)

Other Requirements: Galaxies and Cosmology Sequence, pick one (3 credit hours)

AST 531 Galaxies and Cosmology I (3)

AST 532 Galaxies and Cosmology II (3)

AST 533 Galaxies and Cosmology III (3)

Other Requirements: Exoplanets and Planetary Science Sequence, pick one (3 credit hours)

AST 598 Topic: Origins of Solar Systems (3)

AST 598 Topic: Exploring Exoplanets (3)

SES 598 Topic: Water in the Solar System (3)

Other Requirements: Instrumentation and Techniques Sequence, pick one (3 credit hours)

AST 552 Astronomical Instrumentation and Data Analysis (3)

SES 598 Topic: An Introduction to Astro-statistics (3)

SES 598 Topic: Spectroscopy for Astrophysics (3)

SES 598 Topic: Introductory Radio Astronomy (3)

Culminating Experience (12 credit hours)

SES 799 Dissertation (12)

Additional Curriculum Information

When approved by the student's supervisory committee and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree in a related field to be used for this degree.

Substitutions for Other Requirement courses may be made per department approval.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or they must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admissions application and application fee
- official transcripts
- statement of purpose
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Career Opportunities: Professionals with expertise in astrophysics are in high demand across all sectors and industries, including remote sensing, data science, instrument building, computational science, defense industries and scientific research. Coding and numerical modeling skills translate across many domains, even beyond astrophysics. Skills in the measurement and analysis of data related to the physics, chemistry and structure of the universe and exoplanetary systems are valuable to businesses and institutions relying on data-driven strategies to explore beyond the Earth and solar system.

A doctoral degree in astrophysics is required for some careers in post-secondary education and research.

Career examples include:

- astrophysics professor
- data scientist
- instrument builder
- project manager
- research astronomer
- telescope operator

Astrophysics and Astronomy, MS (LAASPHMS)

Online Degree Search Title: Astrophysics and Astronomy, MS

Campus: Tempe

Program Description: The MS program in astrophysics and astronomy provides fundamental graduate training in both astrophysics and astronomy.

Students take graduate-level courses in stars and interstellar media, galaxies and cosmology; obtain quantitative skills through analysis and modelling; and they may have observation opportunities through regional and international telescope observatories.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Aerospace Engineering (Aeronautics), BSE
- Aerospace Engineering (Astronautics), BSE
- Aerospace Engineering (Autonomous Vehicle Systems), BSE
- Earth and Space Exploration, BS
- Earth and Space Exploration (Astrobiology and Biogeosciences), BS
- Earth and Space Exploration (Astrophysics), BS
- Earth and Space Exploration (Exploration Systems Design), BS
- Earth and Space Exploration (Geological and Planetary Sciences), BS
- Electrical Engineering, BSE
- Electrical Engineering (Electric Power and Energy Systems), BSE
- Mechanical Engineering, BSE

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a thesis, or 30 credit hours including the required capstone courses (SES 510 and SES 599).

Required Core (1 credit hour)

SES 502 Exploring SESE Research (1)

Electives or Research (5 credit hours)

Other Requirements: Astrophysics Sequence (9 credit hours)

AST 521 Stars and Interstellar Medium I (3)

AST 522 Stars and Interstellar Medium II (3)

AST 591 Seminar: Astrophysics (2)

SES 501 SESE Colloquium (1)

Other Requirements: Galaxies and Cosmology Sequence, pick one (3 credit hours)

AST 531 Galaxies and Cosmology I (3)

AST 532 Galaxies and Cosmology II (3)

AST 533 Galaxies and Cosmology III (3)

Other Requirements: Exoplanets and Planetary Science Sequence, pick one (3 credit hours)

AST 598 Topic: Origins of Solar Systems (3)

AST 598 Topic: Exploring Exoplanets (3)

SES 598 Topic: Water in the Solar System (3)

Other Requirements: Instrumentation and Techniques Sequence, pick one (3 credit hours)

AST 552 Astronomical Instrumentation and Data Analysis (3)

SES 598 Topic: An Introduction to Astro-statistics (3)

SES 598 Topic: Spectroscopy for Astrophysics (3)

SES 598 Topic: Introductory Radio Astronomy (3)

Culminating Experience (6 credit hours)

SES 510 Graduate Exploration Project I (3) and SES 511 Graduate Exploration II (3) or SES 599 Thesis (6)

Additional Curriculum Information

Substitutions for other required courses may be made per department approval.

For their culminating experience, students in an accelerated program complete capstone courses SES 510 and 511. All other students complete SES 599.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or they must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admissions application and application fee
- official transcripts
- statement of purpose
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

Atmospheric Science (certificate), Certificate (LAATMOSCE)

Online Degree Search Title: Atmospheric Science (Graduate Certificate)

Campus: Tempe

This program is not currently accepting applications.

Program Description: The transdisciplinary certificate in atmospheric science is administered by an executive committee composed of faculty from the Ira A. Fulton Schools of Engineering and The College of Liberal Arts and Sciences. The objective of this program is to recognize Arizona State University graduate students who complete a dissertation on a topic related to the atmospheric or oceanic sciences under the supervision of a faculty member from one of the cooperating departments.

Degree Requirements:

16 credit hours.

A minimum of 16 credit hours is required in order to qualify for the atmospheric science certificate, consisting of:

three 3 credit hour courses from a list of courses in the core disciplines (9)

two 3 credit hour courses from a list of electives at the 400 level or above (6)

a capstone seminar (1)

Considering the diversity of courses and in order to ensure a transdisciplinary flavor, all prospective recipients have the certificate program approved by the certificate executive committee. Certificates only are awarded to students who are enrolled in an MA, MS, MNS or PhD program at ASU. The student's thesis or dissertation must also be related to some aspect of atmospheric science.

The core courses are offered at least once every other year, so the certificate may be completed within two years.

Specific requirements are:

approval by the certificate committee of the student's proposed course selection

completion of one course from each of the core disciplines with a grade of "B" (3.00) or better

completion of two courses from the list of electives with a grade of "B" (3.00) or better

completion of the capstone seminar, which is one credit hour

completion of a dissertation on a topic related to the atmospheric or oceanic sciences

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or they must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- resume
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency

(<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

International students who need an F1 or J1 visa first need to apply to and be accepted into a graduate degree program prior to being considered for the certificate program. International students residing in the USA on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for admission to this certificate program.

Biochemistry, MS (LABIOCHMS)

Online Degree Search Title: Biochemistry, MS

Campus: Tempe

Program Description: Students who earn an MS degree in biochemistry in the School of Molecular Sciences are trained in the fundamental aspects of the discipline, but most also choose to learn by joining transdisciplinary teams that work on larger, mission-based contemporary problems in areas such as:

- biogeochemistry
- energy and sustainability
- fundamental chemical biology
- materials and nanoscience
- medicine and health
- structure function and dynamics

The master's degree program in biochemistry provides students with the training they need to solve biological problems at the molecular scale and contribute to research on current challenging societal issues.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

30 credit hours and a thesis, or 30 credit hours including the required capstone course (BCH 597).

Required Core (4 credit hours)

BCH 501 Current Topics in Biochemistry or CHM 501 Current Topics in Chemistry (4)

Electives (12 or 18 credit hours)

Other Requirements (5 or 8 credit hours)

BCH 501 Current Topics in Biochemistry or CHM 501 Current Topics in Chemistry (2)

BCH 591 Seminar (3)

BCH 592 Research (8)

Culminating Experience (3 or 6 credits)

BCH 597 Capstone (3)

BCH 599 Thesis (6)

Additional Curriculum Information

For the required core, students complete four credit hours of any combination of BCH 501 or CHM 501. Students will choose one of the culminating experience options listed above. The credit hours required for the electives and other requirements depend on the culminating experience chosen, as all students must complete 30 credit hours for this degree program. Students who choose the thesis option complete 12 credit hours of electives as well as BCH 592 for eight credit hours. Students who choose the capstone option complete 18 credit hours of electives as well as two additional credit hours of CHM 501 or BCH 501 and three credit hours of BCH 591.

The program consists of coursework and seminars as well as a research component (extensiveness dependent upon culminating experience).

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in chemistry, biochemistry or a closely related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Career Opportunities: Professionals with training achieved in pursuit of a graduate degree in biochemistry have opportunities in five general areas: industry (research and development, quality control), academia (high school and higher education), government (research, policy), nonprofit (policy, public education), and entrepreneurship (consulting, startups). In addition to specialized technical skills, graduates possess many high-demand skills, like critical thinking, teamwork and collaboration, and time management.

Some career examples include:

- chemistry lecturer
- drug discovery scientist
- government scientist
- high school teacher
- pharmacology scientist
- research and development scientist
- science consultant

The American Chemical Society also provides helpful resources and a more exhaustive list of possible careers on their website at <https://www.acs.org/careers/chemical-sciences.html> (<https://www.acs.org/careers/chemical-sciences.html>).

Biochemistry, PHD (LABIOCHPHD)

Online Degree Search Title: Biochemistry, PhD

Campus: Tempe

Program Description: The PhD program in biochemistry through the School of Molecular Sciences provides students with the training they need to solve biological problems at the molecular scale and to be successful, independent scientists who can challenge current societal issues.

Students earning a doctoral degree in biochemistry are fully trained in all fundamental aspects of the discipline. Most also choose to join transdisciplinary teams that work on larger, mission-based contemporary problems in areas such as:

- biogeochemistry
- energy and sustainability
- fundamental chemical biology
- materials and nanoscience
- medicine and health
- structure function and dynamics

Students should visit the prospective student site (<https://sms.asu.edu/graduate-study>) to learn more about this doctoral program and the graduate research page (<https://sms.asu.edu/Graduate-Study/Research>) to learn more about the advanced transdisciplinary research being conducted in the School of Molecular Sciences.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.
six graduate-level courses (12--18)
enrollment in a BCH 501/CHM 501 seminar (8)
BCH 792 Research (46--52)
BCH 799 Dissertation (12)

Additional Curriculum Information

The program consists of coursework and seminars selected by the student in consultation with the student's supervisory committee and based on the student's area of research. Qualifying exams consisting of a written comprehensive exam, an oral comprehensive exam and a prospectus are required to advance to candidacy. Students must successfully defend their dissertation during a public final oral defense. Students must also

maintain a minimum GPA of 3.00 (scale is 4.00 = "A") or better.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in chemistry, biochemistry or a closely related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

In addition to the admission application, applicants must complete an online supplemental application to the School of Molecular Sciences. The supplemental application is available 24 to 48 hours after submission of the admission application. The personal statement and contact information for the letters of recommendation are submitted as part of the supplemental application. Information about the supplemental application can be found on the department's website. Applications lacking a supplemental application are not reviewed.

Career Opportunities: The doctoral program in biochemistry prepares students for professional careers in industry, government and academia. Professionals with training achieved in pursuit of a graduate degree in chemistry or biochemistry have opportunities in five general areas:

- academia (high school and higher education)
- entrepreneurship (consulting, startups)
- government (research, policy)
- industry (research and development, quality control)
- nonprofit (policy, public education)

In addition to specialized technical skills, graduates possess high-demand skills like critical thinking, teamwork and collaboration, time management and many others.

Some career examples include:

- chemistry lecturer
- drug discovery scientist
- government scientist
- pharmacology scientist
- research and development scientist
- research group leader
- science consultant
- university professor

The American Chemical Society also provides helpful resources and a more exhaustive list of possible careers on their website at <https://www.acs.org/careers/chemical-sciences.html> (<https://www.acs.org/careers/chemical-sciences.html>).

Biology, MS (LABIOMS)

Online Degree Search Title: Biology, MS

Campus: Tempe, Online

Program Description: The MS in biology is a flexible degree program based around a student's individual interests, allowing them to explore areas of biology that thrive outside of traditional boundaries. This degree complements other, more specialized life sciences programs, allowing both interdisciplinary and traditional approaches. Courses include laboratory, field and theoretical work.

This program currently admits students to either a thesis-based pathway or a coursework and capstone option. Students in the thesis pathway receive hands-on training and craft an individualized plan of study focused specifically on their own research interests. They work closely with an advisor from ASU's faculty of top-tier scientists doing research at the forefront of their fields. Students develop foundational research skills in the course of designing and completing their own research project.

In the coursework and capstone pathway, students build an individualized curriculum from a wide variety of courses taught by global experts. In their final semester, they delve more deeply into their own area of interest by completing a capstone project. This option is ideal for students who do not need intensive research training but want to deepen and expand their biological knowledge and skills. The coursework and capstone pathway is also available in an online format.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

- Biological Sciences, BS
- Biological Sciences (Biology and Society), BS
- Biological Sciences (Biomedical Sciences), BS
- Biological Sciences (Conservation Biology and Ecology), BS
- Biological Sciences (Genetics, Cell and Developmental Biology), BS
- Biological Sciences (Neurobiology, Physiology and Behavior), BS
- Microbiology, BS

Microbiology (Medical Microbiology), BS
Molecular Biosciences and Biotechnology, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a thesis, or 30 credit hours including the required applied project course (BIO 593), or 30 credit hours including the required capstone course (BIO 597).

Required Core (1 credit hour)

BIO 610 Introduction to Responsible Conduct of Research (RCR) in Life Sciences (1) or BIO 611 Current Topics in Responsible Conduct of Research (RCR) in the Life Sciences (1)

Other Requirements (2 credit hours)

BIO 541 SOLS Seminar Series (1)

BIO 542 SOLS Current Topics in the Life Sciences (1)

Electives (21 or 24 credit hours)

Culminating Experience (3 or 6 credit hours)

BIO 593 Applied Project (3)

BIO 597 Capstone (3)

BIO 599 Thesis (6)

Additional Curriculum Information

Students choose one of three culminating experience options listed above. The credit hours required for the electives depends on the culminating experience chosen as all students must complete 30 credit hours for this degree program.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in biology or a related discipline from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants must submit the following:

- graduate admission application and application fee
- official transcripts
- academic record form
- personal statement
- curriculum vitae or resume
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

It is desired that applicants have research experience.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/biology-ms/>) for program descriptions and to request more information.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Qble to review the literature relevant to a research topic in their chosen area of biology.
- Able to execute a research plan of their own design that addresses a significant scientific question about their chosen area of biology.
- Able to communicate the rationale and results of their research, both orally and in writing.

Career Opportunities: This master's degree program prepares students for life sciences careers in educational, medical, industrial and governmental institutions.

The thesis pathway is ideal for those pursuing research-intensive careers in academic or business settings. The coursework and capstone option is for those seeking careers in which deeper biological knowledge is valuable, such as secondary school teachers reaching for higher certifications, biotechnicians who want to add conceptual depth or analytical abilities to their laboratory skills, and writers who want to expand their scientific expertise.

Career examples include:

- food, agriculture and health care scientists in academic, private and industrial labs
- instructors at community colleges
- researchers and technicians in government labs and nonprofit organizations
- science teachers in elementary and high schools
- science writers
- wildlife, animal and conservation scientists

Biology, PHD (LABIOPHD)

Online Degree Search Title: Biology, PhD

Campus: Tempe

Program Description: The PhD program in biology offers individualized courses of study tailored to students' interests that include laboratory, field and theoretical work. Flexibility in the program is achieved by requiring only one core class, which is a choice between two topics that cover the breadth of the research directions in this program.

Electives are also as flexible as possible and include areas outside of biology. The major goal is to provide students with the opportunity to create an adaptable and general degree program that allows both traditional and interdisciplinary approaches in any area of biology.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Core (3 or 4 credit hours)

BIO 514 Statistical Models for Biology (4) or

BIO 620 Research Prospectus Writing (3)

Electives (67 or 68 credit hours)

Other Requirements (1 credit hour)

BIO 610 Introduction to Responsible Conduct of Research in Life Sciences (1)

Culminating Experience (12 credit hours)

BIO 799 Dissertation (12)

Additional Curriculum Information

The program is tailored to the needs of the individual student. The plan of study is developed by the student and a supervisory committee consisting of a major professor and three additional faculty members. The electives credit hours are comprised of coursework showing breadth in biology subdisciplines, seminars and research.

An oral comprehensive examination is required in order to advance to candidacy, and a formal defense of the final written dissertation is required prior to graduation.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in biology or a related discipline from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants must submit the following:

- graduate admission application and application fee
- official transcripts
- academic record form
- personal statement
- curriculum vitae or resume
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Research experience is desired for entry into this program.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Able to review scholarly literature as they develop specialized expertise in their selected research area.
- Able to perform research that they have designed to address important and challenging questions in the field of biology.
- Able to communicate the findings and originality of their research, both orally and in writing.

Career Opportunities: Those who have earned a doctorate in biology are prepared for academic careers at every level, from community colleges to research universities. Their skills and knowledge are also valuable for government careers with federal and state agencies responsible for wildlife management and conservation, and for careers in industry and nongovernmental organizations.

Career examples include:

- food, agriculture and health care scientists in academic, private and industrial labs
- principal investigators in government labs and nonprofit organizations
- professors or instructors in universities and colleges
- science teachers in elementary and high schools
- wildlife, animal and conservation scientists

Biology (Biology and Society), MS (LABIOSMS)

Online Degree Search Title: Biology (Biology and Society), MS

Campus: Tempe

Program Description: In the biology and society concentration of the MS program in biology, students examine topics in which biology intersects with society.

The concentration tailors individual plans of study to individual needs and interests, with a solid grounding in the life and related sciences and with a rigorous analytical and interdisciplinary education. The program offers suggested courses for those wishing to focus on these areas: bioethics, policy and law; biology education research; ecology, economics and ethics of the environment; and history and philosophy of science.

Bioethics, policy and law --- Students are trained in the pressing moral, policy and legal issues raised by the biosciences and biomedicine and in the disciplinary methods necessary to address these issues.

Biology education research --- This focuses on using education research to identify ways to improve undergraduate biology education broadly.

Ecology, economics and ethics of the environment --- This area trains students in the theory and empirical methods for understanding, analyzing and shaping policy for coupled human-natural systems.

History and philosophy of science --- Students are trained in the conceptual foundations of science, especially the epistemological and methodological assumptions that shape science and its progress.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website.

The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Biological Sciences, BS
- Biological Sciences (Biology and Society), BS
- Biological Sciences (Biomedical Sciences), BS
- Biological Sciences (Conservation Biology and Ecology), BS
- Biological Sciences (Genetics, Cell and Developmental Biology), BS
- Biological Sciences (Neurobiology, Physiology and Behavior), BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours and a thesis.

Required Core (1 credit hour)

BIO 610 Introduction to Responsible Conduct of Research (RCR) in Life Sciences (1) or BIO 611 Current Topics in Responsible Conduct of Research (RCR) in the Life Sciences (1)

Concentration (2 credit hours)

BIO 615 Biology and Society Lab (1), taken two times

Electives or Research (21 credit hours)

Culminating Experience (6 credit hours)

BIO 599 Thesis (6)

Additional Curriculum Information

The open electives or research section allows an individual student program to be developed in consultation with the student's advisor and committee.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- academic record form
- personal statement
- curriculum vitae or resume
- writing sample
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Students are expected to have completed the equivalent of core requirements for an undergraduate major in biology or a related discipline (typically evolution, genetics and other courses appropriate to the student's particular interests). Students without an undergraduate-level competency in the sciences may be considered for conditional admission to the biology and society concentration.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Able to articulate an understanding of current literature on scientific developments and their relevance to society in scholarly writing.
- Able to contribute to original biology and society research in scholarly writing.
- Able to communicate biology and society research results in presentations.

Career Opportunities: Those who have earned a Master of Science in biology with a concentration in biology and society are prepared for academic careers. Their skills and knowledge are also valuable for government careers in federal and state agencies responsible for management and conservation and for careers in industry and nongovernmental organizations.

Career examples include:

- food, agriculture and health care scientists in academic, private and industrial labs
- instructors at community colleges and research universities
- researchers and policy developers in government labs and nonprofit organizations
- science teachers in elementary and high schools
- wildlife, animal and conservation scientists

Biology (Biology and Society), PHD (LABIOSPHD)

Online Degree Search Title: Biology (Biology and Society), PhD

Campus: Tempe

Program Description: In the biology and society concentration of the PhD program in biology, students examine topics with biological and social dimensions that are best understood together rather than in isolation. The concentration provides plans of study tailored to individual needs and interests. It encompasses a solid foundation in life sciences and related sciences and provides a rigorous analytical and interdisciplinary education. Students may further specialize in one of four tracks:

Bioethics, policy and law --- This track focuses on pressing moral, policy and legal issues raised by biosciences and biomedicine, as well as methods to address them.

History and philosophy of science --- This track focuses on the conceptual foundations of science, especially the epistemological and methodological assumptions that shape science and its progress.

Ecology, economics and ethics of the environment --- This track focuses on the theory and empirical methods for understanding, analyzing and shaping policy that steer society toward a more productive, equitable and sustainable ecological future.

Biology education research --- This track focuses on using education research to identify ways to broadly improve undergraduate biology education.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website.

The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Core (3 or 4 credit hours)

BIO 514 Statistical Models for Biology (4) or
BIO 620 Research Prospectus Writing (3)

Electives (68 or 69 credit hours)

Culminating Experience (12 credit hours)
BIO 799 Dissertation (12)

Additional Curriculum Information

An individual student program is developed in consultation with the student's advisor and committee.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution. Students are expected to have completed the equivalent of core requirements for an undergraduate major in biology or a related discipline, typically evolution, genetics and other courses appropriate to the student's particular interests. Biology (Complex Adaptive Systems Science), PHD (LABIOCPHD)

Online Degree Search Title: Biology (Complex Adaptive Systems Science), PhD

Campus: Tempe

Program Description: The PhD program in biology with a concentration in complex adaptive systems science trains the next generation of scientists in advanced concepts and methods needed for approaching diverse phenomena in the social and life sciences.

The program is tightly integrated with diverse, ongoing university-wide research at Arizona State University on complex adaptive system science. It emphasizes the value of a complex adaptive perspective to give students better insight and a more active role in seeking solutions to a broad array of critical issues facing society today. Students become fluent in the common language of complexity while also receiving a solid foundation in the domain knowledge of existing academic disciplines.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, a prospectus and a dissertation.

Student doctoral dissertations should include the application of complex adaptive systems concepts and methods in their field of study, and candidates typically have a member of the complex adaptive systems science graduate faculty as a member of the doctoral supervisory committee.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit the following:

- graduate admission application and application fee
- official transcripts
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Only students admitted to participating doctoral programs may apply for a complex adaptive systems concentration. A letter of application from the student must be sent to the chair of the complex adaptive systems science graduate faculty. The application is reviewed by members of the graduate faculty who make final admission recommendations to the Graduate College.

Career Opportunities: A doctorate in biology with a concentration in complex adaptive systems science provides strong preparation for academic careers at every level, from community colleges to research universities. The skills and knowledge graduates obtained in this program are also valuable in government careers with federal and state agencies responsible for wildlife management and conservation and for careers in industry and nongovernmental organizations.

Career examples include:

- food, agriculture and health care scientists in academic, private and industrial labs
- principal investigators in government labs and nonprofit organizations
- professors or instructors in universities and colleges
- science teachers in elementary and high schools
- wildlife, animal and conservation scientists

Chemistry, MS (LACHEMMS)

Online Degree Search Title: Chemistry, MS

Campus: Tempe

Program Description: Students earning an MS degree in chemistry in the School of Molecular Sciences are trained in the foundation disciplines of analytical, organic, physical, inorganic and environmental chemistry and geochemistry. Most also choose to learn by joining transdisciplinary research teams that work on larger, mission-based contemporary problems in areas such as:

- energy and sustainability
- frontiers of chemical measurement
- fundamental molecular science
- geologic and biospheric science
- materials and nanoscience
- medicine and health
- structure function and dynamics

The master's degree program in chemistry provides students with the training they need to solve molecular scale problems and to contribute to research in current challenging societal issues.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

30 credit hours and a thesis, or 30 credit hours including the required capstone course (CHM 597).

Required Core (4 credit hours)

BCH 501 Current Topics in Biochemistry or CHM 501 Current Topics in Chemistry (4)

Electives (12 or 18 credit hours)

Other Requirements (5 or 8 credit hours)

CHM 501 Current Topics in Chemistry or BCH 501 Current Topics in Biochemistry (2)

CHM 591 Seminar (3)

CHM 592 Research (8)

Culminating Experience (3 or 6 credit hours)

CHM 597 Capstone (3)

CHM 599 Thesis (6)

Additional Curriculum Information

Students will choose one of the culminating experience options listed above. The credit hours required for the electives and other requirements depend on the culminating experience chosen, as all students must complete 30 credit hours for this degree program. Students who choose the thesis option complete 12 credit hours of electives as well as CHM 592 for eight credit hours. Students who choose the capstone option complete 18 credit hours of electives as well as two additional credit hours of CHM 501 or BCH 501 and three credit hours of CHM 591.

The program consists of coursework and seminars as well as a research component (extensiveness dependent upon culminating experience).

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in chemistry, biochemistry or a closely related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Career Opportunities: Professionals with training achieved in pursuit of a graduate degree in chemistry or biochemistry have opportunities in five general areas: industry (research and development, quality control), academia (high school and higher education), government (research, policy), nonprofit (policy, public education) and entrepreneurship (consulting, startups). In addition to specialized technical skills, graduates possess many high-demand skills, like critical thinking, teamwork and collaboration, and time management.

Some career examples include:

- chemical technician
- chemistry lecturer
- environmental science specialist
- government scientist
- high school teacher
- materials scientist
- military scientist
- science consultant

The American Chemical Society also provides helpful resources and a more exhaustive list of possible careers at <https://www.acs.org/careers/chemical-sciences.html> (<https://www.acs.org/careers/chemical-sciences.html>).

Chemistry, PHD (LACHEMPHD)

Online Degree Search Title: Chemistry, PhD

Campus: Tempe

Program Description: The PhD program in chemistry in the School of Molecular Sciences provides students with the training they need to solve molecular scale problems and to be successful independent scientists who can contribute to current challenging societal issues.

Students earning a doctorate in chemistry from the School of Molecular Sciences are trained in the foundation disciplines of analytical, organic, physical, inorganic, environmental or geological chemistry, and most also choose to join transdisciplinary research teams that work on larger, mission-based contemporary problems in areas such as:

- energy and sustainability
- frontiers of chemical measurement
- fundamental molecular science
- geologic and biospheric science
- materials and nanoscience
- medicine and health
- structure function and dynamics

Students should visit the department's prospective student webpage (<https://sms.asu.edu/graduate-study>) to learn more about this doctoral program and the graduate research webpage (<https://sms.asu.edu/Graduate-Study/Research>) to learn about the advanced transdisciplinary research being conducted in the school.

The doctoral program in chemistry prepares students for professional careers in industry, government and academia.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.
six graduate-level courses (12--18)
enrollment in a BCH 501 or CHM 501 seminar (8)
CHM 792 Research (46--52)
CHM 799 Dissertation (12)

Additional Curriculum Information

The program consists of coursework and seminars selected by the student in consultation with the student's supervisory committee and based on the student's area of research.

Qualifying exams consisting of a written comprehensive exam, an oral comprehensive exam and a prospectus are required to advance to candidacy. Students must successfully defend their dissertation during a public final oral defense.

Students must also maintain a minimum GPA of 3.00 (scale is 4.00 = "A") or better.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in chemistry, biochemistry or a closely related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

In addition to the admission application, applicants must complete an online supplemental application to the School of Molecular Sciences. The supplemental application is available 24 to 48 hours after submission of the admission application. The personal statement and contact information for the letters of recommendation are submitted as part of the supplemental application. Information about the supplemental application can be found on the School of Molecular Sciences website. Applications lacking a supplemental application are not reviewed.

Career Opportunities: Professionals with training achieved in pursuit of a graduate degree in chemistry or biochemistry have opportunities in five general areas: industry (research and development, quality control), academia (high school and higher education), government (research, policy), nonprofits (policy, public education) and entrepreneurship (consulting, startups). In addition to specialized technical skills, graduates possess high-demand skills like critical thinking, teamwork and collaboration, time management and many other vital skills.

Some career examples include:

- chemistry lecturer
- environmental science specialist
- government scientist
- materials scientist
- military scientist
- research and development scientist
- research group leader
- science consultant
- university professor

Classical Liberal Education and Leadership, MA (LACLEDLMA)

Online Degree Search Title: Classical Liberal Education and Leadership, MA

Campus: Tempe

Program Description: The MA program in classical liberal education and leadership is an interdisciplinary course of study that fosters student engagement through the Socratic method of classroom dialogue. Students in this program join a community of students and faculty oriented to the holistic pursuit of knowledge, and they can focus on a particular field of study, which helps them become more competitive in their area of employment.

The curriculum ranges across disciplines and topics, including classical antiquity and American civics. It combines theory with practice and ideas with application. This program inquires into the meaning of the good life and the practical challenge of leading others, including nations, societies and individuals. Students grapple with the perennial questions of the human experience: What is the best form of government? The most just economy? What is the proper relationship between the self and the state?

From Plato and Locke to Jefferson and Lincoln, the great thinkers of the past guide students through the age-old debates about how individuals and societies flourish or flounder. As Aristotle taught, there is no substitute for doing the right thing in the right way. This is true in how children are educated, coexistence with neighbors and governance of nations. The classical liberal education and leadership program aims to prepare the next generation's teachers, scholars and statesmen to meet the challenges ahead with integrity, prudence and imagination.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Civic and Economic Thought and Leadership, BS
- Civic and Economic Thought and Leadership, BA

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours including a thesis, or 30 credit hours including the required applied project course (CEL 593).

Required Core (9 credit hours)

CEL 501 Literary Leaders (3)

CEL 503 Classic Texts in Political Philosophy and Justice (3)

CEL 513 Classic Texts in Leadership and Statesmanship (3)

Restricted Elective (3 credit hours)

LAT 421 Roman Literature (3)

SLC 598 Topic: Greco-Roman Ideas of Leadership and Politics (3)

SLC 598 Topic: The Classical Tradition (3)

SLC 598 Topic: Tragedy and Comedy in the Greek Polis (3)

Open Electives or Research (12 or 15 credit hours)

Culminating Experience (3 or 6 credit hours)

CEL 593 Applied Project (3)

CEL 599 Thesis (6)

Additional Curriculum Information

For the restricted elective, students select one course from the list of options. Students should see the School of Civic and Economic Thought and Leadership for the most current list. Other courses may be substituted with approval of the academic unit.

Open electives and research are selected in consultation with the academic advisor.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in liberal arts, political science, history, philosophy, theology, the natural sciences or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- three letters of recommendation from people in education or leadership positions

- written statement
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Career Opportunities: Graduates of this program draw from the wisdom of the past to confront the challenges of the future. They possess specialized knowledge to advance in a chosen field. As the workforce evolves, a graduate degree shows that employees are dedicated to enhancing their industry expertise and credibility.

A master's degree can open many career doors, including certain career fields, advancement opportunities and higher salaries in the following areas:

- civic leadership and engagement
- education, at all levels
- government
- nonprofit work
- politics

Communication, MA (LACOMMOMA)

Online Degree Search Title: Communication, MA

Campus: Online

Program Description: The MA program in communication provides advanced training in communication skills and competencies for working professionals, preparing them for success in their careers and a dynamic job market.

The flexible nature of this online program benefits those with busy schedules. The faculty at ASU's Hugh Downs School of Human Communication are highly experienced in developing and delivering quality online coursework that prepares students for success in their careers.

Students gain necessary skills required in today's workplace, including conflict transformation, cross-cultural communication, and other essential leadership qualities.

The program concludes with a capstone course in which students work with an organization and create a training and development project to solve a communication problem within the organization. The final project can be implemented by the organization or shown to future potential employers.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Business (Communication), BA
- Communication, BS
- Communication, BA

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours including the required capstone course (COM 550).

Required Core (12 credit hours)

COM 501 Research Methods in Communication (3)

COM 504 Theories and Models in Communication (3)

COM 530 Training and Development (3)

COM 540 Conducting Communication Research (3)

Electives (15 credit hours)

Culminating Experience (3 credit hours)

COM 550 Capstone (3)

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in communication or a closely related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/communication-ma/>) for program descriptions and to request more information.

Career Opportunities: This program is designed for individuals looking to change career trajectories or get ahead in their current professions.

Graduates with a master's degree in communication can expect to find work in:

- fundraising
- government
- health care
- human resources
- management
- marketing
- nonprofits
- public relations
- sales
- teaching

Communication, PHD (LACOMMOPHD)

Online Degree Search Title: Communication, PhD

Campus: Tempe

Program Description: The Hugh Downs School of Human Communication offers a transdisciplinary graduate program leading to the PhD in communication.

This program provides coursework and resources in critical-cultural communication and rhetoric, health communication, intercultural communication, interpersonal communication, organizational communication and performance studies. Students receive training in communication theory, research methodology and multiple areas of emphasis, and they actively participate in one or more of the school's collaborative research initiatives.

The program is designed to meet the needs of students whose interests transcend traditional disciplinary boundaries and to prepare scholars for research-oriented careers in universities and in the public or private sectors.

Degree Requirements:

96 credit hours, a written comprehensive exam, an oral comprehensive exam, a prospectus and a dissertation.

Required Core (9 credit hours)

COM 604 Theory Construction in Communication (3)

Choose two:

COM 607 Contemporary Rhetorical Methods (3)

COM 608 Multivariate Statistical Analysis of Data in Communication (3)

COM 609 Advanced Qualitative Research Methods in Communication (3)

Electives (45 credit hours)

Other Requirements (24 credit hours)

COM 691 Seminar (24)

Research (6 credit hours)

COM 792 Research (6)

Culminating Experience (12 credit hours)

COM 799 Dissertation (12)

Additional Curriculum Information

When approved by the student's supervisory committee and the Graduate College, this program allows 30 credit hours from a previously awarded master's degree to be used for this degree; 66 credit hours are required beyond an appropriate master's degree.

At least six elective credit hours must be coursework outside of the communication field.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree, in any field, from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants must submit:

- graduate admission application and application fee
- official transcripts
- resume or curriculum vitae
- statement of goals
- three letters of recommendation
- writing sample
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Most commonly, students enter with a research-based MA in which they have completed a master's thesis.

Applicants should visit the Hugh Downs School of Human Communication website for further details.

Career Opportunities: A doctoral degree in communication opens doors to a variety of careers in research, teaching, training and consulting. Graduates typically obtain jobs in research and teaching institutions that range from large research universities to four-year teaching schools and community colleges. A number of career opportunities appear in government agencies and organizations, both for-profit and nonprofit.

Graduates have obtained jobs as:

- academic administrators
- academic advisors
- campaign managers
- consultants
- policy advocates
- professors
- program directors

- researchers

Comparative Culture and Language, PHD (LAILCPHD)

Online Degree Search Title: Comparative Culture and Language, PhD

Campus: Tempe

Program Description: The PhD program in comparative culture and language offers professional training that is linguistically well-grounded, historically and culturally informed, and methodologically transdisciplinary through courses and supervision of research. Central to the program is the critical inquiry of primary texts, media and cultural expressions, aiming at an original understanding of cultures and social groups in their formations, interactions and transformations throughout history.

This degree program is attentive to the various roles of language in societies and in the different perspectives through which language can be studied --- among other aspects, its variations, transformations, hybridizations and processes of acquisition. The doctorate in comparative culture and language focuses particularly on research questions and themes that cannot be fully explored within the traditional disciplinary boundaries; instead, it fosters dynamic collaboration across disciplines in order to engage in the production of knowledge that is crucial to understanding transnational and transcultural interactions across time and space.

The program offers the opportunity to pursue, with the guidance of faculty who are comparatists and specialists in particular fields, transdisciplinary research and teaching. In consultation with their advisor, students do their coursework in a primary and a secondary area of emphasis. Both areas are organized around interdisciplinary study and research in more than one language; students are expected to have advanced proficiency in one language other than English (this is the language of primary emphasis) and at least reading knowledge in a second language other than English (language of secondary emphasis).

For example, a student might choose to study medieval European theater for the primary area of emphasis and medieval book culture for the secondary area. For the primary area of emphasis, then, the student could demonstrate advanced proficiency in one European language, such as French or Italian, depending on the requirements of their research. Then, for the second language other than English, the student would have at least reading knowledge, say, of Latin. Another example: The student chooses to study the representation of the migrant experience in contemporary East Asian cultures as the primary area of emphasis, and film and media studies as the secondary area. Their primary area of emphasis would require advanced proficiency in a certain East Asian language, such as Chinese, Japanese or Korean, and the secondary area reading knowledge of one more non-English language, pertinent to their comparative research.

Faculty members are drawn from the School of International Letters and Cultures and other programs in the humanities and social sciences across Arizona State University.

Degree Requirements:

84 credit hours, a written comprehensive exam, an oral comprehensive exam, two foreign language exams, a prospectus and a dissertation.

Required Core (3 credit hours)

SLC 602 Comparative Cultural Theory (3)

Restricted Electives (36 credit hours)

primary field of study (18)

secondary field of study (18)

Electives and Research (33 credit hours)

Culminating Experience (12 credit hours)

SLC 799 Dissertation (12)

Additional Curriculum Information

Students do coursework in a primary and a secondary area of emphasis. Both areas are organized around interdisciplinary study and research in more than one language; students are expected to have advanced proficiency in one language other than English (this is the language of primary emphasis) and at least reading knowledge in a second language other than English (language of secondary emphasis). Students complete 12 credit hours of foreign language coursework in the electives and research coursework.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in any field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.30 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.30 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

- graduate admission application and application fee
- official transcripts
- personal statement
- resume or curriculum vitae
- writing sample
- three letters of recommendation
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The personal statement should describe the questions, issues or challenges the student plans to explore through the doctoral program in comparative culture and language and explain how previous studies, training or professional experiences have prepared the student for this research. It should include a proposed plan of study based on the current graduate-level offerings at ASU. In a brief statement, the student should indicate how those courses will be preparation for the dissertation, how the plan fits with the description and goals of this doctoral program, and why the proposed program does not fit some other degree program.

Applicants must provide a 15- to 20-page writing sample in English; a writing sample in the primary language of interest may also be requested at the discretion of the admission committee. The writing sample should reflect the student's analytical and critical skills.

Career Opportunities: Professionals with this doctoral degree can confidently move into a variety of fields as an expert on concentration topics. Their skills are valued in the academic and international sectors for teaching positions, translation work, and for work in government, diplomacy and international business.

Career examples include:

- area, ethnic and cultural studies teachers and professors
- education administrators
- foreign language and literature teachers and professors
- interpreters and translators
- philosophy and religion teachers and professors
- reporters and correspondents

Computational Life Sciences, MS (LACLSMS)

Online Degree Search Title: Computational Life Sciences, MS

Campus: Tempe, Online

Program Description: The MS program in computational life sciences introduces students to a burgeoning new field. Huge leaps in processing technologies have thrown open the doors for new research techniques and exciting opportunities for interdisciplinary collaborations, focusing heavily on genomics data generation, analysis and interpretation.

Students are introduced to a suite of statistical tools and computational approaches that enable them to uncover correlations, glean new understanding and help solve scientific problems.

Students examine many different types of data generated from a wide range of fields, including ecology, botany, evolutionary biology, neuroscience, molecular and cellular biology, and animal behavior. Students have the opportunity to investigate topics such as DNA, RNA, protein, imaging, conservation and even historical data from long-term ecological research sites.

Finally, students explore the ethical implications of collecting, analyzing and sharing the results of computational life sciences data.

STEM-OPT for International Students on F-1 Visas:

This program may be eligible for an Optional Practical Training extension for up to 36 months. This OPT work authorization term may help international students gain skills and experience in the U.S. Those interested in an OPT extension should review ASU degrees that qualify for the STEM-OPT extension (<https://issc.asu.edu/f-1j-1-students/employment/stem>) at ASU's International Students and Scholars Center website. The OPT extension only applies to students on an F-1 visa and does not apply to students completing the degree through ASU Online.

Accelerated Program Options:

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with::

- Biochemistry, BS
- Biochemistry (Medicinal Chemistry), BS
- Biological Sciences, BS
- Biological Sciences (Biology and Society), BS
- Biological Sciences (Biomedical Sciences), BS
- Biological Sciences (Conservation Biology and Ecology), BS
- Biological Sciences (Genetics, Cell and Developmental Biology), BS
- Biological Sciences (Neurobiology, Physiology and Behavior), BS
- Data Science, BS
- Microbiology, BS
- Microbiology (Medical Microbiology), BS
- Molecular Biosciences and Biotechnology, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply (<https://acceleratedmasters.asu.edu/how-apply>).

Degree Requirements:

30 credit hours including the required applied project course (BIO 593), or 30 credit hours including the required capstone course (BIO 597).

Required Core (1 credit hour)

BIO 610 Introduction to Responsible Conduct of Research (RCR) in Life Sciences (1)

Restricted Electives (18-20 credit hours)

Choose two computing in life sciences courses for six to seven credit hours:

BIO 539 Computing for Research (3)

BIO 591 Topic: Quantitative Methods in Conservation and Ecology (4)

BIO 598 Topic: Medical Genetics and Genomics (3)

BIO 598 Topic: Transcriptomics (3)

Choose two statistics and mathematics courses for six to seven credit hours:

BIO 514 Statistical Models for Biology (4)

BIO 579 Data Analysis and Visualization in R (3)

BIO 598 Topic: High-Throughput Genomics Analysis and Visualization (3)

BIO 598 Topic: General Linear Models for Biology (3)

Choose two biology courses for six credit hours:

BIO 543 Molecular Genetics and Genomics (3)

BIO 544 Discovering Biodiversity (3)

EVO 601 Principles of Evolution (3)

MCB 540 Functional Genomics (3)

Electives or Research (6-8 credit hours)

Culminating Experience (3 credit hours)

BIO 593 Applied Project (3)

BIO 597 Capstone (3)

Additional Curriculum Information

For restricted electives students complete two computing in life sciences courses, two statistics and mathematics courses and two biology courses. Restricted elective and electives or research credit hours are variable.

Students pursuing the applied project or capstone course complete three to six credit hours of electives or research. Students should consult the academic unit for a list of approved electives and research course requirements.

Courses not selected for the restricted electives may be used as elective coursework on the same plan of study. Students should check with their academic advisor to ensure that the total number of credit hours of their plan of study is equal to 30.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in biology, statistics or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admissions application and application fee
- official transcripts
- personal statement
- professional resume
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/graduate/computational-life-sciences/>) for program descriptions and to request more information.

Career Opportunities: Career opportunities for graduates include working at biotechnology companies, working as a lab research technician in academia, and working for government or nonprofit labs doing computational life sciences analyses. The median annual pay for those who hold a master's degree in a computational research science is approximately three times the median annual wage for all workers.

Computational Life Sciences (Certificate), Certificate (LACMLSGRCT)

Online Degree Search Title: Computational Life Sciences (Graduate Certificate)

Campus: Tempe, Online

Program Description: Students in the computational life sciences graduate certificate program develop expertise in the understanding, interpretation and analysis of diverse data types generated from a variety of life sciences disciplines, including ecology, botany, evolutionary biology, neuroscience, molecular and cellular biology, and animal behavior.

Degree Requirements:

16 credit hours including a portfolio.

Required Core (1 credit hour)

BIO 610 Introduction to Responsible Conduct of Research (RCR) in Life Sciences (1) or

BIO 611 Current Topics in Responsible Conduct of Research (RCR) in Life Sciences (1)

Electives (15 credit hours)

Culminating Experience (0 credit hours)
portfolio (0)

Additional Curriculum Information

Elective coursework is selected from a restricted list in consultation with the academic unit.

Admission Requirements: Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in life sciences or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

Applicants are required to submit:

- graduate admission application and application fee
- official transcripts
- written statement
- proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency (<https://admission.asu.edu/apply/international/graduate/english-proficiency>) regardless of their current residency.

The written statement should discuss the applicant's future career goals to better assist the student with selecting the most applicable set of courses in computational life sciences.

International students who need an F1 or J1 visa first need to apply to and be accepted into a graduate degree program prior to being considered for the certificate program. International students residing in the U.S. on other types of visas must adhere to all Graduate College policies and procedures regarding admission to be considered for admission to this certificate program.

Attend Online:

ASU Online: ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page (<https://asuonline.asu.edu/online-degree-programs/certificates/computational-life-science-graduate-certificate/>) for program descriptions and to request more information.

Program Learning Outcomes:

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Summarize key computational concepts, such as algorithms and relational databases, and their applications in the life sciences, and apply statistical concepts used in computational life sciences.
- Write simple computer scripts to find, retrieve, and organize various types of biological data, using command-line bioinformatics tools.
- Interpret the ethical, legal, medical, and social implications of biological data.
