REL	338	Daode Jing: Way to the West	At 5,000 words, the Daode Jing [Tao-te ching, "the Scripture of the Way and its Powers," attributed to the Sage Laozi] is perhaps the shortest religious book in the world. In the West, missionaries, new-age pundits, hippies, rock-stars, mystics and LSD advocates each claim to understand the "true meaning" of Laozi's mystical words. But "the farther one travels, the less one knows..." Students read representative samples of these explanations to understand why this brief book of wisdom has endured for over 2000 years. ROM	442	Dracula and Vampire Lore	Vampire stories are not only local phenomena placed in Transylvania, as the common stereotype is incessantly spread. Legends about Dracula and the Count himself may be "untrue," but events that took place during the life and reign of the Wallachian Voevode Vlad Tepes, better known as Vlad the Impaler, are nonfictional. He ruled during the time of the Ottoman Empire extension to Europe and his fight against the Turks give us thought on the altered understanding of Vlad as a vampire figure. Occurring and recurring in continuously changed environments, Count Dracula affects everyone to the same degree, but still remains as secret and elusive as before, pitted against a vision of mysterious spaces that evoke the faraway castles from Whitby, UK (the origin of Stoker's Dracula), from Bran and Poenari Castles in Transylvania as well as the visions of Jules Verne's Castle of the Carpathians. RUS	241	Russian Pop Culture: Protest and Propaganda	How does Russian culture reflect recent history? How does official culture and various counter movements frame Russia's political present, the country's relationship with its neighbors and multiethnic communities at home? From mainstream entertainment to independent alternatives, Russian artists are addressing changes happening in a country rocked by authoritarianism, corruption and militarism. Under the guise of strengthening the nation's "spiritual bonds," Russian authorities are promoting nationalism, religious dogmatism and uncritical nostalgia for the Soviet past. RUS	439	Art in Exile: Vladimir Vladimirovich Nabokov	In English. The scandalous success of Lolita (1955) allowed Vladimir Nabokov to retire from teaching at Cornell University and move to Switzerland to devote himself to fiction, translation, criticism and lepidoptery. Examines the Russian roots of Nabokov's Russian (in translation) and American novels about exile: his first novel, Mary (1926), The Defense (1929), Glory (1932), and his tribute to 19th-century Russian literature, The Gift (1938), which he considered his greatest Russian novel. These are followed by Lolita (1955), Invitation of a Small Guest (1957) and Pale Fire (1962), his memoirs, Speak, Memory (1966), and some essays and short stories. SEA	201	Ocean Conservation	Over 70% of our planet is covered in oceans, more than 80% of the world's population lives within 50 miles of the coast, and fish products are a primary source of animal protein for approximately 40% of the world. We rely extensively on oceans, but this relationship is not always a healthy one. Our reliance often leads to conflicts between people and ocean resources including overfishing, loss of ocean biodiversity, marine pollution and coastal and marine habitat degradation. Focuses on the health and well-being of the world's oceans and the people who depend on them. Examines not simply the oceans' ecosystems, but the social, economic, political, cultural and institutional forces that shape our interactions with them. Evaluates how and why people interact with oceans and marine resources today, with an eye to understanding how it shapes the oceans of tomorrow.	N	LEC	N	GNA	College of Global Futures	School of Ocean Futures	3	SUST	
SEA	202	Ocean Communities: Introduction to Ethnobotany	The ocean makes up 71% of earth's surface. People have used the ocean and resources within the ocean, plants and animals, to survive and curate new lands. Students will study relationships between people and plants with immersion in the global cultural relationships that plants and animals have on humanity's history, present and future. Through an ethnobotanical lens, students explore from the mountains to the oceans how various human communities engage, exchange and build relationships with regional resources. Uses Hawaii as a starting example for topics to expand on plant domestication and agriculture; plant biogeography and human migration; plant use in religious, traditional medicines and indigenous traditions; cultural aspects of plant conservation. From an Islander's perspective, the ocean connects us. The ocean contributes to trans-regional relationships between land-based communities. Encourages students to identify how their relationships to plants, animals and the ocean influence their evolving outlook on society. SES	106	Habitable Worlds	Are we alone in the Universe? If so, why? If not, where are our cosmic cousins? Such questions, once the domain of science fiction, are on the verge of being answered with science facts. Astronomers are discovering planets around other stars. Planetary scientists are exploring the worlds in our solar system. Biologists are unlocking the secrets of metabolism and evolution. Geoscientists are determining how the Earth supports life. And as we struggle to build a sustainable future for ourselves, all of us are finding out how technologically advanced civilizations rise and how they might fall. This course surveys these topics. In the process, students master basic concepts from across the major areas of science and learn what makes the Earth a habitable world.	N	LEC	N	OPT	College of Liberal Arts and Sciences	School of Earth and Space Exploration	4	SCIT OR SQ	
SES	107	A Solar System Journey	Introduces modern planetary science--the exploration of our solar system by astronomers, geologists, chemists, physicists, engineers, astronauts and even biologists. Studies the historical and modern science of the Sun, planets, moons, rings, asteroids and comets in our solar system, and about new planets being found in other solar systems. Covers the scientific method as well as the specific techniques used in modern planetary science and space exploration that enable us to apply what we learn about our solar system neighbors to the study of our home planet, and vice versa.	N	LEL	N	GNA	College of Liberal Arts and Sciences	School of Earth and Space Exploration	4	SCIT OR SG	Credit is allowed for only SES 107 or SES 194 (A Solar System Journey)
SES	121	Earth, Solar System and Universe	The Earth, solar system and universe are diverse and dynamic, featuring galaxies, solar systems, suns, planets and moons. Each type of feature is characterized by a suite of processes and features, such as volcanoes, landslides and climate. As scientists and engineers, we want to understand what is going on in our world. Understanding past events helps begin to predict future events. With the Earth, we examine past events and current natural processes to understand how this past and these processes affect humans. Accordingly, this course examines the processes, materials and features observed and inferred on the Earth, in the Solar System, and in the Universe. The course is purposely designed to be rather holistic, exploring concepts from stellar evolution, atmosphere and oceans on Earth and in extraterrestrial objects, plate tectonics, volcanoes and mountain building. Both SES 121 and SES 123 must be taken to secure General Studies Gold SCIT credit or General Studies Maroon SQ credit.	N	LEC	N	OPT	College of Liberal Arts and Sciences	School of Earth and Space Exploration	3	SCIT OR SQ	
SES	122	History of the Earth and Solar System	The Earth and solar system have a long and interesting history, spanning nearly five billion years. Earth and other objects in the solar system have evolved over time, punctuated by a series of events, such as mountain building, volcanic eruptions, impacts and extinctions. As scientists and engineers, we want to understand what events have occurred in our world and which aspects directly affect us or are most interesting. Understanding past events helps us comprehend what has happened and begin to predict future events. With the Earth, examines past events and current natural processes to understand how this past and these processes affect humans. Accordingly, examines the history of the Earth and solar system in the context of the processes, materials and features that can be observed and inferred. Explores the history of the Earth and solar system from a broad, interdisciplinary, perspective. SES	126	Exploration of the Universe	Introduces the basic principles of modern astronomy, with a focus on "Exploration Science," or the methods by which we explore our planet, our solar system, other stars, and even other galaxies. How do we explore? What is the "scientific method"? How is modern science carried out? Study of such questions helps form a solid foundational core for a major in the science of astrophysics--a major that spans many aspects of the universe as a whole. Don't be surprised if class includes stories about how ASU research is proceeding, or how a lesson in class is relevant to some research experience. SLC	358	Saving the Roman Empire	In his autobiographical epitaph, the Res Gestae, Augustus, founder of the Roman Empire, claimed to have restored Rome to her former glory. His moral, social and political reforms solidified Roman control of the world and the imperial family's hold on ruling her. Through the next five hundred years, as the power of the empire waned and waxed, Augustus's successors turned time and again to reforming the empire and restoring her to her former glory - to saving the Roman Empire. In doing so they had to deal with problems both external and internal; sometimes their ideas worked, often they did not. Ultimately they failed, and Rome and the western empire fell in CE 476. Examines the rise, decline and fall of the Roman Empire from the perspective of internal and external problems the Empire faced, and asks which reforms worked, which did not work, and why. What could have been done differently? Should anything have been done differently, or was the western Roman Empire always doomed? SLC	439	Art in Exile: Vladímir Vladimirovich Nabokov	In English. The scandalous success of Lolita (1955) allowed Vladimir Nabokov to retire from teaching at Cornell University and move to Switzerland to devote himself to fiction, translation, criticism and lepidoptery. This was only one of the many metamorphoses that Nabokov, a Russian noble, underwent while in exile, moving from Russia to the Crimea, Cambridge UK, Berlin, Paris, Cambridge MA, Ithaca, Hollywood and finally Montreux. Examines the Russian roots of Nabokov's Russian (in translation) and American novels about exile: his first novel, Mary (1926), The Defense (1929), Glory (1932), and his tribute to 19th-century Russian literature, The Gift (1938), which he considered his greatest Russian novel. These are followed by Lolita (1955), Pnin (1957) and Pale Fire (1962), his memoirs, Speak, Memory (1966), and some essays and short stories. SLC	442	Dracula and Vampire Lore	Vampire stories are not only local phenomena placed in Transylvania, as the common stereotype is incessantly spread. Legends about Dracula and the Count himself may be "untrue," but events that took place during the life and reign of the Wallachian Voevode Vlad Tepes, better known as Vlad the Impaler, are nonfictional. He ruled during the time of the Ottoman Empire extension to Europe and his fight against the Turks give us thought on the altered understanding of Vlad as a vampire figure. Occurring and recurring in continuously changed environments, Count Dracula affects everyone to the same degree, but still remains as secret and elusive as before, pitted against a vision of mysterious spaces that evoke the faraway castles from Whitby, UK (the origin of Stoker's Dracula), from Bran and Poenari Castles in Transylvania as well as the visions of Jules Verne's Castle of the Carpathians. For example, cells interact to produce organs and tissues, which in turn interact to produce physiological processes (i.e., the capacity to metabolize food to produce new compounds and energy) and physical infrastructure (skeletal and muscular structure) which produce organisms. Organisms, (e.g., humans) interact to form groups, villages, cities, nations. We now know that we face rapid climate change and the consequences of changes in land use, water resources, and ecosystems. Critical to planning a response to, or mitigation of, environmental change is understanding how the Earth surface works. Focuses on how changes to the environment manifest themselves in the critical zone-- in the form and function of the Earth's surface (landforms, water resources, soils, ecosystems). Offers a quantitative introduction to the form and function of the processes impacting the Earth's critical zone to build an understanding of the interactions of physical, chemical and biotic processes in shaping the surface and determining fluid, solute and sediment fluxes. SOS	456	Human Rights and Sustainability	Addresses the connections between human rights and environmental sustainability. Legal and scholarly approaches linking these areas present new perspectives for addressing some of the greatest challenges of our time, given the important resource dimensions of economic and social rights and the human dimensions of sustainability. SOS	480	Achieving Career Success in Sustainability	The need for sustainability-minded workers and leaders has never been more important than right now. Yet sustainability as a career track is still very new and means different things to different people. Challenges students to explore their own ambitions and "personal brands," to shape their work personas, to model the behaviors and competencies that build long-term career success, and to uncover the sustainability potential of any job, whether or not "sustainability" is in the job title.	N	SEM	N	GNA	College of Global Futures	School of Sustainability	3		Pre- or corequisite(s): SOS 110, SOS 111, PUP 190 with C or better if completed; Credit is allowed for only SOS 480 or SOS 494 (Achieving Career Success in Sustainability)
SOS	483	Should I Eat Fish? Economics, Ecology and Policy of Sustainable Seafood	Begins with a seemingly simple question about a personal choice, "should I eat fish?" and uses it as the launching pad for an in-depth exploration of seafood as a food system. Participants become more informed seafood consumers, but the main goal is familiarizing students with the structures and processes in the global seafood system in both Global North and Global South contexts, and teaching students how to evaluate tradeoffs in a rigorous way. Tradeoffs are inherent to all conservation and sustainability questions: whether in personal contexts, like the choice of which food to eat, or in public contexts, like evaluating the potential consequences of changes in policies for the management of natural resources. Students emerge from this course with a sense of how their personal role as seafood consumers interacts with the broader seafood food system. SOS	539	Human Well-Being and Sustainability	Many of us take it for granted that human well-being is the ultimate end of sustainability or sustainable development. But what is a well-being, really? Social scientists collect empirical data and develop indices, indicators and other proxies to represent and measure well-being; but is it the kind of phenomenon that can be explained? In other words, is there a correct theory of human well-being? How does one measure well-being? Moreover, what are we to make of the relationship between well-being and sustainability? Where do these two concepts coincide? Where do they come apart? Does human well-being presuppose a commitment to sustainability? If the ultimate end of sustainability is human well-being, then is sustainability a redundant concept? This interdisciplinary course tackles such questions by critically examining the most prominent philosophical theories of well-being and by considering how they might be reconciled with relevant empirical evidence. Also spends considerable time reflecting on the problems that arise with respect to measuring well-being, particularly in the context of public policy. SOS	656	Human Rights and Sustainability	Addresses the connections between human rights and environmental sustainability. Legal and scholarly approaches linking these areas present new perspectives for addressing some of the greatest challenges of our time, given the important resource dimensions of economic and social rights and the human dimensions of sustainability. Explores these tensions and opportunities by examining three substantive areas: urban ecology and human rights, the human right to food, and the human rights implications of extractive industries such as oil and mining. Following an introduction to the key concepts of human rights and sustainability, explores the substantive areas through theoretical and empirical readings on each; grassroots accounts of struggles over environment-related human rights; and selections from literature and film that illustrate the environmental justice issues at stake. TGM	204	Principles of Marketing for Global Organizations	Explores the ways in which global marketing strategies reflect a deep understanding of markets and create valuable offerings for customers globally. Targeting is the process by which we analyze opportunities and identify those customers where our business has the greatest prospects for success. Positioning is the process of assembling the "total offering" (product, service, distribution and price) and communicating the benefits of this "total offering" to the members of our target market. Challenges students to think critically about global competition. As such, rote learning of terms and concepts is not sufficient to prepare students to manage a business in global markets. TGM	556	Global Strategic Services Marketing	Services have come to dominate our economy. Yet there remains a naïve belief that services marketing and management is a simple adaptation of goods marketing and management. Unlike physical goods, services are co-produced with customers at a time, and in a place, of the customer's choosing. This co-production directly involves an organization's front-line employees. As a result, it is more difficult for services to be inventoried and checked for quality assurance. Provides a thorough understanding of the management and continuous improvement of service operations, including a thorough understanding of the role of customers in service operations such that service firms can design effective service experience so as to minimize service failure. Provides students with an end-to-end hands-on customer experience management (e.g., customer satisfaction and loyalty), project that involves survey design, customer experience model development, data collection, data analysis, and recommendations. Researches the different aspects of space regulation, the challenges of keeping regulation up to speed with the pace of technology and looks at some of the tradeoffs that exist within the regulatory process. Examines traditional regulatory issues as well as future-oriented ones. Explores the various risks of commercial space enterprises. TGM	730	Systems Change and Transformation in the Anthropocene	Transnational hyper-connectivity is an essential feature of our time. Yet in government, business and civil society, our approaches to power, leadership and organization remain locked in the competition-based frameworks of the 20th century. To understand these all too common problems, we need to move beyond linear models--based on a fairly detailed knowledge of the present situation and supposed to be able to make reasonable forecasts of the future--which underlie much formal policy analysis and design. Understanding the implications of strategic behavior, nonlinear feedbacks and heterogeneous actors on policies is needed. Equally we need to understand the impact of policies at multiple scales and across a wide range of stakeholders. Assesses these topics through systems change and how this has led to transformation in the Anthropocene. The foundational premise of this course is that the traditional discipline for achieving objectives in global affairs--statecraft--is necessary but not sufficient for the networked age. New tools and strategies are needed to understand and influence a world based on connectivity. Network theory provides a starting point. Covers basic principles of network theory and helps understand their relevance to the design, development and management of fit-for-purpose networks involving business, civic organizations and nonprofits, and government. Examines case studies of different global problems--from health to human rights, war to economic renewal, the environment to terrorism. Much progress has been made in the scientific understanding of the kinds of systems--under the name of complexity. Explores the consequence of these new insights for policy. Discusses salient policy and management implications of a complex adaptive system frame. TGM	740	Leading and Managing Global Organizations: Advanced Topics	Organizations, private (business) and public (government, nonprofit and hybrid), all face chronic management and leadership problems that pose significant challenges to them. Organizations are complex and problematic entities, which is especially true for government organizations. These problems include the difficulty of designing organizations capable of coping with highly dynamic and rapidly changing environments, the challenge of developing strategies and structures for hypercompetitive conditions, and the greater complexity of managing global enterprises. Further issues addressed are the difficult task of shaping a corporate culture, managing politics and conflict between individuals and organizational units, and motivating employees who are more mobile than ever. Students learn to design incentive systems, as well as effectively lead teams. Covers how leaders of these organizations deal with these challenges. Helps students gain a deeper understanding of the nature of organizational change and the complexities that underlie them (through conceptual frameworks, organizational structure and design, the interaction of organizations with their environments and the behavior of individuals and groups within organizations; readings; and; discussions). Illuminates skills needed for managing change. Enhances sensitivity to the contribution and consequences of the human element as related to change. Helps students think about how to "thrive on and in change." Takes its theoretical framework from a radical 1960s manifesto called SCUM Manifesto by Valerie Solanas and from the French feminist philosophies of Julia Kristeva, who theorized the abject as a relationship with the grotesque that reveals the deep-seated fear of death. Uses these theoretical positions to examine trash, both abstractly and literally. Works through a variety of concepts ranging from actual trash, garbage, waste, toxic sludge, pollution and dirt, and tackles more abstract notions of trash such as the knowledge produced on the fringe in circuses, amusement parks, "trailer trash" zones, freak shows and the bodies of those marked as "Other" or different. WWS	460	World War II	Explores the causes, conduct and consequences of World War II. When did World War II start? How was it fought, and what did that mean for soldiers, the homefront and millions of civilians in Japanese or German occupied regions? What did the world that emerged in its wake look like? The course explores these fundamental questions with an emphasis on multiple explanations of the causes of the war in Asia and Europe and the contingency of Allied victory. Explores the war as both a total and a global war in which perceptions of race, class and gender shaped the experience of combatants and noncombatants, many of whom died in indiscriminate bombing campaigns. Racial ideologies also led to the brutalization of soldiers, which in turn fueled the violence against civilians, as exemplified by the Holocaust and Japanese war crimes. Finally, the course turns to the global order emerging after the war and the different narratives that emerged from it.	N	LEC	N	OPT	College of Liberal Arts and Sciences	School of Historical, Philosophical and Religious Studies	3	HUAD OR HU & H & G	Prerequisite(s): minimum 45 hours; Credit is allowed for only HST 460 or HST 494 (Introduction to World War II Studies) or HST 494 (World War II Studies) or JST 460 or WWS 460 OR Visiting University Student
WWS	561	Decision Points I	In-depth analysis of the origins, impact and controversies over the key decisions related to the beginning and early years of World War II, with an emphasis on the contingent nature of historical events.	N	LEC	N	OPT	College of Liberal Arts and Sciences	School of Historical, Philosophical and Religious Studies	3		Prerequisite(s): degree- or nondegree-seeking graduate student
WWS	562	Decision Points II	In-depth analysis of the origin, impact and controversies over the key decisions related to the later years and the ending of World War II, with an emphasis on the contingent nature of historical events. WWS	563	The Lived Experience of World War II	Using the vast oral history collection of the National World War II Museum in New Orleans, Louisiana, this course examines how individuals experienced the war. A number of factors shaped how people experienced the war--whether one was a soldier, non-combatant, resistor or collaborator. Focuses on how ordinary people made sense of their experiences during the war. In addition, students explore the theory and practice of collecting and using oral histories.	N	LEC	N	OPT	College of Liberal Arts and Sciences	School of Historical, Philosophical and Religious Studies	3		Prerequisite(s): WWS 561; WWS 562
WWS	564	The Global War	Examines the global dimensions of World War II with particular focus on those regions which have been deemphasized in Western historical discourse. WWS	566	World War II Today	Analyzes the impact and legacy of World War II, with an emphasis on the roots of contemporary problems and issues. A global conflict that impacted millions of people, World War II fundamentally reshaped the political and cultural landscape of our planet. Explores the new global order that emerged after the end of World War II in 1945. While the war had immediate impacts in the postwar era, the legacy of the war continues to inform current conflicts across the globe and resonates in the current social and political order. This is especially apparent in how contemporary narratives situate, remember and memorialize the war. Uses themes to help us think historically and uncover the historical roots of the present order. AMS	469	Trash Talk	Examines the possibilities inherent in "theorizing from the gutter"; looking at the world not from a lofty "Ivory Tower" but from the slime, the muck, the dumpster, the trash heap, the wasteland, the discarded and the downtrodden. Takes its theoretical framework from a radical 1960s manifesto called SCUM Manifesto by Valerie Solanas and from the French feminist philosophies of Julia Kristeva, who theorized the abject as a relationship with the grotesque that reveals the deep-seated fear of death. Uses these theoretical positions to examine trash, both abstractly and literally. Works through a variety of concepts ranging from actual trash, garbage, waste, toxic sludge, pollution and dirt, and tackles more abstract notions of trash such as the knowledge produced on the fringe in circuses, amusement parks, "trailer trash" zones, freak shows and the bodies of those marked as "Other" or different. ARS	100	Introduction to Art	Provides an introduction to the understanding and enjoyment of art through the study of painting, sculpture, design, photography, and the decorative arts. Students gain an awareness of meaning, functions, and significance of art, while learning an art-related vocabulary and a set of analytical tools for discussing and understanding art from around the world.	N	LEC	N	OPT	Herberger Institute for Design and the Arts	School of Art	3	HUAD OR HU	Prerequisite(s): Non-Art majors; Credit is allowed for only ARS 100 or ARS 300 OR Visiting University Student
ARS	101	Art from Prehistory Through Middle Ages	History of Western art from the Paleolithic period through the Middle Ages.	N	LEC	N	OPT	Herberger Institute for Design and the Arts	School of Art	3	HUAD OR HU & H	
ARS	102	Art from Renaissance to Modernism	Introduces art history through a study of visual art, architecture and material cultures from the 15th century to the present. Develops an understanding of artistic terms and process within the framework of a chronological, and at times thematic, survey. Includes the political, cultural, social, economic and religious changes throughout history that are depicted in art. Provides an opportunity for students to reflect on how art was and is used as a vehicle to communicate, reflect, inspire and provide evidence of cultural shifts, changes and shared human experiences. Art history is comprised of various classes with different focuses on time, place or theme; these courses all work to teach human history through a visual approach. The focus on visual literacy, historical contextualization and an image-based framework directs the instruction toward a student-centered dynamic; students work directly in engaging their own understanding by learning how to interpret art works from lectures and texts.	N	LEC	N	OPT	Herberger Institute for Design and the Arts	School of Art	3	HUAD OR HU & H	
ARS	120	Introduction to Global Museum Studies	Exposes the broad scope of what museums do by exploring their history and the critical issues they face today. Acquaints students with the historical and contemporary function of museums and the concepts they currently engage with, such as authorship, authenticity, identity, education, interpretation, storytelling, technology, ethics, cultural heritage, public engagement and diversity. Enhances reading materials with talks by museum professionals, films and discussion boards.	N	LEC	N	GNA	Herberger Institute for Design and the Arts	School of Art	3		Credit is allowed for only ARS 120 (ARS 350) or ARS 394 (Introduction to Museums)
ARS	121	Introduction to Global Heritage Studies	Heritage is something that can be passed from one generation to the next, something that can be conserved or inherited, and something that has historic or cultural value. For instance, there are 1121 physical sites across the globe that the United Nations has designated as World Heritage, ranging from the Grand Canyon National Park to Stonehenge and the Alhambra, from Auschwitz Birkenau and Machu Pichu to the Great Barrier Reef. Heritage can be a physical site like these places, but it can also be intangible, as in language, culture, popular song, food, literature or dress. Focuses on key concepts, definitions, theories and debates central to understanding what heritage is, and on heritage studies as a field of inquiry.	N	LEC	N	GNA	Herberger Institute for Design and the Arts	School of Art	3		Credit is allowed for only ARS 121 or ARS 494 (Intro to Global Heritage Studies) or SGS 494 (Intro to Global Heritage Studies)
ARS	194	Special Topics	Covers topics of immediate or special interest to a faculty member and students.	Y	LEC	Y	OPT	Herberger Institute for Design and the Arts	School of Art	1-4

ARS	221	Museum and Heritage Histories, Theories and Debates	Establishes the theoretical foundation for students interested in pursuing future work and studies in museums and/or heritage institutions across the globe. Through readings and discussions, explores a broad range of topics, including the history and philosophy of museums; intangible versus tangible heritage; cultural patrimony and repatriation; the social, economic and political contexts that shape museums; the influence of the digital age on these institutions; and the main functions of museums and historic sites--collection and care of objects, exhibits, interpretation, education and governance.	N	LEC	N	GNA	Herberger Institute for Design and the Arts	School of Art	3		Credit is allowed for only ARS 221 or ARS 494 (Museum Histories, Theories, And Debates)
ARS	222	Museums as Sites of Extraction	Introduces concepts and theories around museums and possible problematic and extractive collection practices. Looks at histories of collections, where and how collections come into being and how to find new ways forward for broadening collections. By problematizing museum collections, analyzes and suggests more ethical and equitable practices for the field. Also looks at labor and funding models, hiring practices and interaction(s) with the communities specific museums reside within. ARS	223	Introduction to Museums and Social Justice	A recent spate of scandals and protests have forced some of the world's greatest museums and heritage institutions to face up to some difficult ethical issues. These include reassessments of their board-vetting procedures to avoid reputational controversies, a more thorough review of corporate sponsors vis-a-vis a museum's mission, the development of action plans to address the legacy of colonial theft and Nazi looting. Nonprofit organizations and heritage institutions are also reassessing staffing demographics, salary differentials, and discussing ways to address racial and gender diversity in acquisition policies, permanent collection displays and exhibition schedules. Examines past and current controversies and investigates the ways in which these unprecedented events are fundamentally changing the definition of what constitutes arts and heritage institutions in the twenty-first century. ARS	323	Curatorial Activism	Current art world statistics demonstrate that the fight for gender and race equality in the art world is far from over: only 14% of the work displayed at MoMA in 2016 was by non-white artists; only a third of artists represented by U.S. galleries are female, but over two-thirds of students enrolled in art and art-history programs are young women. However, there are many curators working worldwide to offset these racial and gender disparities. Arranged in thematic sections focusing on feminism, race and sexuality, this course examines and illustrates pioneering examples of exhibitions that have broken down boundaries and demonstrated that new approaches to curating are possible, from Linda Nochlin's "Women Artists" at LACMA in the mid-1970s to the Whitney Biennial of 2019. This course profiles key exhibitions by pioneering curators, including Okwui Enwezor, Nan Goldin, Marcia Tucker, Catherine de Zegher, Fred Wilson, Jonathan Katz, and other curators who understand that institutions must be a driving force in this area and a vital source of inspiration for today's expanding new generation of curators. ARS	331	18th- and 19th-Century European Jewelry Design	The 18th century was defined by stylish sociability that included beautiful dress, sumptuous interiors and exquisite, fashionable jewelry. Who were the influencers for jewelry design during this period? How was society defined by these ornaments? What were the rules of engagement? Did these opulent ornaments affect social strategies? How did jewelry materials evolve into more modern and recognizable forms? All of these questions are answered in this course. The cultural history of jewelry design mirrors the historical and collective customs of society from the established aristocracy, to the rising middle classes, to the expansion of cultural awareness among every world citizen when travel became widely available. So much so, that upon the turn of the 19th century, jewelry design shifted from appearing as solely a status of power and wealth to an eloquent symbol of worldly knowledge and cultural awareness. Considers issues of style; changes in clothing production (such as brocades, cotton, silk, furs); and the function of accessories in defining identities in art. Examines fashion magazines, historical events and social change and dress as distinct from fashion. Finally, seeks to understand how art serves to heighten the meaning, display and performance of fashion in terms of the portrait subjects and the intended spectators. ARS	555	Museums and Social Justice	A recent spate of scandals, protests and a global pandemic have forced museums and heritage institutions to face up to some difficult ethical and financial issues. In the wake of the Black Lives Matter protests, these include reassessments of staffing demographics, salary differentials, and discussions of how best to address racial and gender diversity in acquisition policies, permanent collection displays and exhibition schedules. The #MeToo movement has resulted in difficult conversations about sexual harassment and gender discrimination in museums as well. Other recent public controversies have demanded reevaluations of board vetting procedures to avoid reputational controversies, a more thorough review of corporate sponsors vis-a-vis a museum's mission, and the development of action plans to address the legacy of colonial theft and Nazi looting. Covid-19 has also greatly affected museums--attendance, annual budgets--and has resulted in mass layoffs and organizational restructurings, as museums are left to wonder about their financial viability moving forward. Also discusses whether museums have a moral responsibility to respond to and become engaged with compelling social justice issues like race, immigration, health care, climate change--or whether they should remain neutral. Indeed, the question of museums and social justice has plagued the museum world's preeminent professional organization, the International Council of Museums (ICOM), which, since 2017, has been attempting to redefine the museum as a site for public discourse on urgent topics; amidst debate and turmoil, a possible redefinition of museums of the 21st century as sites for social justice. ART	114	Expanded Arts Studio	Expanded arts has often mystified diverse publics around the world, as well as within the art world itself. Expanded arts has also been referred to throughout contemporary art history as new genres, intermedia, experimental art, conceptual art, and art in the expanded field. Although there is often a sense of confusion about art forms that do not reflect the classic notions of art, such as painting and sculpture, it is important to note that contemporary art is largely defined by emerging mediums and forms of expression that cannot always be framed as pictures or mounted to a plinth. By taking an "always emerging" approach to art, this seminar and studio course will not attempt to define expanded arts, but will instead provide foundational knowledge for further pushing the boundaries of what art can be and do in the world. ART	443	Performance Art: Actions, Gestures, Journeys	Performance art is the act of doing. It is not about representing, recounting, re-enacting or acting. It is an art form of direct action. Students work with the elements of time, space and the body as material to speak to cultural histories and collective contemporary experience while learning critical thinking skills and gaining knowledge about historical and contemporary performance artists. Students create performances and context-specific projects by making connections between art, life and public space. Since performance art and live art cannot be separated from the body who makes it, this course continually investigates the meaning and significance of performance art. For instance, what distinguishes an action as art? Is it different from an everyday action like brushing your teeth? What makes it different? When is a job or labor a performance? How does a person (artist or audience) know when the art begins or when it ends? All performances are documented and presented in video or still photography examples online. Select works are posted on the Live Art Platform website at the end of the semester. ART	543	Performance Art: Actions, Gestures, Journeys	Performance art is the act of doing. It is not about representing, recounting, re-enacting or acting, or but simply doing. It is an art form of direct action. Students work with the elements of time, space, and the body as material to speak to cultural histories and collective contemporary experience while learning critical thinking skills and gaining knowledge about historical and contemporary performance artists. Students create performances and context-specific projects by making connections between art, life and public space. Since performance art/live art cannot be separated from the body who makes it, this course continually investigates the meaning and significance of performance art. For instance, what distinguishes an action as art? Is it different from an every day action like brushing your teeth? What makes it different? When is a job or labor a performance? How does a person (artist or audience) know when the art begins or when it ends? All performances are documented and presented in video or still photography examples online. Select works are posted on the Live Art Platform website at the end of the semester. Emphasizes concept and content development in preparation for the production and post-production of an 8-10 minute documentary video art work by each student. Each student's documentary video art work is archived on the "ASU Documentary Video Art" Vimeo account that is viewable by the public. Each student produces a 4-minute excerpt of the longer 8-10 minute documentary for purposes of screening it at the Scottsdale Museum of Contemporary Art. ART	546	On Walking	Artists have often made use of walking as a source of inspiration, or a starting point for the creation of art works. The act of walking is located in histories of landscape art, conceptual art, cultural ritual and political protest. From Paul Klee to Marina Abramovic, covers a range of artists engaging walking in their art practice. From the philosophical to the contemplative, discusses artist writings, literature and histories of walking related to studio practice, sustainability, indigenous culture and contemporary art. Encourages students to consider walking as a creative medium and to think of the pedestrian as an active creator of public space. Physically engages the body in space by walking in urban and rural places and implements ways in which this experience can be documented to be re-presented in another context, i.e., gallery, museum, film festival, etc.	N	STO	N	GNA	Herberger Institute for Design and the Arts	School of Art	3		Prerequisite(s): degree- or nondegree-seeking graduate student; Credit is allowed for only ART 446 or ART 494 (On Walking) or ART 546 or ART 598 (On Walking)
