Barrett Academic Course Requirements

Honors students must maintain high standards of academic performance and show progress toward completion of graduation requirements in their disciplinary majors and in Barrett. In order to graduate from Barrett, students must complete the following, which includes a total of 36 credit hours of honors course work:

1. *HON 171* and *HON 272 The Human Event* must be completed in sequence during a student's first two semesters in the college.
2. Thirty additional credit hours of honors course work must be earned with a letter grade of "C" (2.00) or higher. This may include HON prefix classes, honors sections of classes, honors enrichment contracts or any automatic honors courses.
3. Included in the 36 credit hours of honors course work are at least 18 hours of upper-division or graduate-level honors credits for an earned letter grade of "C" (2.00) or higher, including six credit-hours of honors course work outside the academic major. Students should investigate specialized honors, upper-division tracks within their majors.
4. Those admitted as upper-division transfer students (defined as 48 post-high school university credits completed by the time of planned enrollment in Barrett) must complete *HON 370 History of Ideas* in addition to the 18 required hours of upper-division honors course work. Six of the 21 honors credits must be outside the academic major. A total of 21 hours of upper-division honors course work are required for these upper division transfers.
5. Students are required to complete an honors thesis or creative project for at least three credit-hours, though some units may allow students to complete six credit-hours of thesis or creative project work. These credit hours may be included in the 18 required hours of upper-division, honors course work. The honors thesis or creative project is launched with a prospectus due one academic year before the defense. Prior to enrolling in credit for thesis or creative project work, students must complete a required preparatory workshop or course. The final copy of the honors thesis or creative project must be filed by the posted deadline during the student's graduation semester.
6. ASU graduation requirements in an academic major must be met.
7. Students must maintain a cumulative ASU GPA of 3.25 or higher.

Barrett course requirements may be met in a variety of ways. Only courses in which a student receives a grade of "C" (2.00) or higher may be used to meet Barrett requirements.

Those entering the college as lower-division students may take as many as 18 lower-division honors credits, which include *HON 171* and *272 The Human Event*, and at least 18 upper-division credits (total honors credits must be 36). HON 171 and 272 *The Human Event* are crossdisciplinary seminars that acquaint students with ideas that form the foundation of a university education and emphasize critical thinking, discussion and writing.

Those who enter as upper-division students must take 21 upper-division honors credits, including *HON 370 History of Ideas* taught by an Honors Faculty Fellow. Junior-level seminar courses introduce students to critical thinking, discussion and writing in a topical area chosen by the instructor. All students are expected to complete this course during the first semester upon transferring.

Departmental honors-only courses are limited to honors students. Enrollment in these courses is limited. Compared to their nonhonors equivalents, these courses are designed to offer a richer, more complex intellectual experience appropriate to the discipline and the level of the course for all students enrolled. Other disciplinary honors courses group honors students in small cohorts to work on research projects of common interest.

Honors enrichment contracts are available in many departmental courses allowing honors students to contract with the instructor of designated nonhonors courses to earn honors credit by pursuing enrichment activities, which include supplemental sessions with the instructor. Honors enrichment contracts must be filed by the student during the first four weeks of class and completed during the semester in which the course is offered. The enrichment contract form offers guidelines to aid students and faculty in developing appropriate contracts.

Course numbers listed in the online ASU Class Search/Course Catalog 492 *Honors Directed Study*, 493 *Honors Thesis*, 497 *Honors Colloquium*, all classes with the HON prefix, and those with departmental prefix that carry the honors designation as a notation are reserved for students in Barrett and always count for honors credit.

The departmental courses with the numbers 492 and 493 are reserved for honors students completing their honors thesis or creative project. A student may enroll for these courses only with the approval of the sponsoring academic department and of the faculty member who serves as the student's thesis or creative project director. Course numbers listed in the online ASU schedule of classes as 493 fulfill the student's upper-division literacy and critical inquiry (L) General Studies requirement.

There are specific courses that carry automatic honors credit. These include *ENG 105 Advanced First-Year Composition* (any in-person section), *FSE 104 EPICS Gold Feasibility and Planning*, *FSE 150 Perspectives in Grand Challenges for Engineering*, *GRK 101 Elementary Ancient Greek*, *CHE 211 Introduction to Chemical Processing*, *CPI 310 Web-Based Information Management Systems*, *CEE*/*CNE 212 Engineering Mechanics II: Dynamics*, *CEE 486 Integrated Civil Engineering Design*, *CSE 230 Computer Organization and Assembly Language Programming*, *EEE 230 Computer Organization and Assembly Language Programming*, *ACT 310 Mathematics of Finance, ACT430 Mathematics of Financial Derivatives, LAT421 Roman Literature, PHY201 Mathematical Methods in Physics I* and *PHY 333 Electronic Circuits and Measurements*. Graduate level courses, 500 level and above, taught in an in-person format automatically earn honors credit. For a full list of honors courses, including those that carry automatic honors credit, visit the Barrett Signature Courses webpage and review the Honors Courses document.

- All students pursuing a B.S. or B.S.P. degree in the College of Liberal Arts and Sciences must complete two courses from the Science and Society list found at https://clas.asu.edu/advising-and-academic-services/science-and-society. At least one of the two courses must be upper division. Students must earn a C or better in the courses, and no more than one of the two can also be used to simultaneously fill a requirement of the major, minor or related area. Science and Society courses cannot also be used to fill the general studies HU, SB, SQ or SG requirements.

- The object of the degree is to prepare students to sit for the exams to gain certification as an actuary. One of the optional certifications that individuals may pursue is completion of the VEE requirements from Society of Actuaries or Casualty Actuarial Society. This certification requires additional experience not covered in the maximum allowed for the degree. However, students may decide to take these additional courses in their 15 hours of elective credit. ASU courses that meet VEE requirements include:
    - ECN 211 and ECN 212 - requirement sequence for Economics
    - FIN 300 - requirement for Corporate Finance (prerequisites: ACC 231 and ACC 241)
    - STP 429/ECN 425 and ECN 410 - requirement sequence for Applied Statistical Methods (current prerequisites can be found in the course catalog)
