| EMS | 504 | Communications and Sustainability I | One of the greatest challenges for leadership in sustainability is multidisciplinary communications. Currently, sustainability itself lacks meaning and emotion, which leads to a lack of commitment and execution. Therefore, all future executives must be proficient communicators who can convey vision and human context to the organization's sustainability initiatives. Helps you survey your internal communications environment, understand students target audiences and their unique customer centricities and develops their voices through the use of proven story structure. | N | LEC | N | OPT | School of Sustainability | School of Sustainability | 2 | | Prerequisite(s): EMS 502, 503. | EMS | 506 | Global Context II | As material sustainability issues are identified and prioritized and as the organization applies sustainability as core success platform, the organization looks to mitigating risks outside of its control, shaping the risks it can control, and creating new opportunities and leveraging those identified in the process. Global context comes into focus not only in expanding resource relationships and concerns, but also across dimensions of time, responsibility, success and a growing need to engage with an ever-growing group of stakeholders and potential partners. Organizations and leaders must innovate and execute at all levels of the organization to match the evolving reality. Explores and applies global sustainability as a knowledge platform for ongoing success, organizational innovation and effective organizational leadership. | N | LEC | N | OPT | School of Sustainability | School of Sustainability | 2 | | Prerequisite(s): EMS 504, 505; Corerequisite(s): EMS 507 |
| EMS | 507 | Strategic Sustainability II | As sustainability becomes a core strategic goal of any organization, it impacts all aspects of the organization from informing risk and reward to the definitions and dimensions of innovation and overall success. Uses reframing, re-visioning and backcasting via a sustainability lens as constructs for introducing strategic sustainability across all aspects of an organization--both internally and externally. Applies various methods such as natural capitalism, design for sustainability/method of sustainable product design, Anderson method, cradle-to-cradle and framework for strategic sustainable development to develop flexible action platforms for sustainable enterprises. Students create a strategic vision, action plan for an organization, including critical external partnerships with communities and institutions. | N | LEC | N | OPT | School of Sustainability | School of Sustainability | 2 | | Prerequisite(s): EMS 504, 505. Corerequisite(s): EMS 506 |
| EMS | 508 | International Immersive | The international immersive experience takes place in a compelling location where all the challenges and opportunities of sustainability are in play. It is designed as a dynamic vehicle to make real-world connections to sustainability leaders, projects and communities, and is among the most memorable experiences of the program. Students "see" and "feel" sustainability from another country and culture's perspective and see the overlap and conflict to their own context. Extending one's professional network to other host countries and generating a reflective experience and analysis report are experiential learning artifacts that are generated from this experience. Collaborative teams work through a sustainability case study and present their solutions. | N | SEM | N | OPT | School of Sustainability | School of Sustainability | 2 | | Prerequisite(s): EMS 506, 507 |
| EMS | 509 | Communications and Sustainability II | Marketing and communication professionals in all industries are attempting to keep up with the rapidly expanding landscape of multichannel communications. This is especially true in sustainability, given that the Chief Sustainability Officer must understand and appreciate the modes of communications across all platforms, not just in the consumer market. Maps internal, external and target audiences/markets; strategizes channels to reach them with sustainability stories; and creates a multichannel communications plan that incorporates modes of engagement for all audiences. | N | LEC | N | OPT | School of Sustainability | School of Sustainability | 2 | | Prerequisite(s): EMS 506; EMS 507; Corequisite(s): EMS 510 |
| EMS | 510 | Sustainability Leadership II | As sustainability emerges as a core strategic platform for an organization, leadership and sustainability intertwine; leadership opportunities--and responsibilities--greatly expand; thus requiring innovation. Individual leadership and organizational leadership are asked to find opportunity via extended definitions of critical systems; value webs, increased roles for diverse internal and external partnerships, and the need to lead within increasingly complex and unpredictable global systems. Engage students to challenge their prior definitions of systems, responsibility and community from the perspective of sustainability and leadership and provides a toolbox for leading with sustainability as a fundamental success platform. | N | LEC | N | OPT | School of Sustainability | School of Sustainability | 2 | | Prerequisite(s): EMS 506; EMS 507; Corequisite(s): EMS 509 |
| EMS | 511 | Global Context III | Sustainability leaders help their organizations recognize when material issues require solutions that extend beyond their control or capabilities, and when to look for, participate in and potentially lead industry, cross-industry, regional or other collaborative approaches. Global sustainability context becomes an increasingly proactive concept where individual and organizational responsibility and success extends to a global scale. Organizations organize themselves as agents of change toward sustainability that aligns with more traditional organizational success. Students learn from successes and failures of current and past attempts and assess the implications for this change in leadership perspective to their organizational context. | N | LEC | N | OPT | School of Sustainability | School of Sustainability | 2 | | Prerequisite(s): EMS 509, 510. Corequisite(s): EMS 512 |

| EMS | 512 | Strategic Sustainability III | Organizations that aim at sustainability come to recognize that they must be part of sustainable success on all scales, from local to global, from internal to external and for today and tomorrow. Tools such as resource plans, investment pathways, stakeholder engagement and policy influencers set the theatre for sustainability-oriented organization to challenge the status quo and advance agendas that embed both success and sustainability. Students apply their enhanced strategic sustainability skills to examine select case studies on international sustainability in corporate and nongovernmental agencies. | N | LEC | N | OPT | School of Sustainability | School of Sustainability | 2 | | Prerequisite(s): EMS 509, 510. Corequisite(s): EMS 511 |
| EMS | 513 | Communications and Sustainability III | Most stories of sustainability are driven and told with data as its central character. Unfortunately, data is nearly meaningless to our minds unless it is placed in an illuminating human context. The best chief sustainable storytellers bring meaning to data through the use of metaphor brought to life by thought-provoking narrative. Story grips the mind and propels people forward. Students develop proof of concepts for campaigns, expand social media presence and influence, create and record a 20-minute presentation in the style of a TedTALK, and become a leader in sustainable communications. | N | LEC | N | OPT | School of Sustainability | School of Sustainability | 2 | | Prerequisite(s): EMS 511, 512. Corequisite(s): EMS 514 |
| EMS | 514 | Sustainability Leadership III | Lasting, sustainable change fully takes hold once ownership and accountability extends well into the organization and community. Engages the student to identify and apply pathways to inspire, persuade and influence others to act toward a shared global vision. Future orientation, reframing organizations to be globally scalable and still be locally focused, leadership best practices for diverse, multinational, and international human talents and redefining success and growth using sustainability as a success lens are great tasks that sustainability leaders face. | N | LEC | N | OPT | School of Sustainability | School of Sustainability | 2 | | Prerequisite(s): EMS 511, 512. Corequisite(s): EMS 513 |

| ENG | 205 | Introduction to Writing, Rhetorics and Literacies | How do we understand the ways in which people in systems--both small and large--social, political, and economic, throughout the world use language and other symbolic resources to carry out work? Three fields of study take this kind of questioning especially seriously: studies in writing, studies in rhetoric, and studies in literacy. Inquiry--that persistent, deliberate commitment to question and to build methods sufficient to that questioning--is a generative force in each of these fields of study. Familiarizes students with such questioning traditions and to help them judge for themselves what each is good for. The goal is to strengthen your own repertoire and decision-making power for producing and circulating work (widely defined across material, print, and digital media) that matters in our risk-ridden world. Quite simply, then, this is a course in asking good questions and in evaluating responses to situations that spur questioning. | N | LEC | N | GNA | Liberal Arts and Sciences | Department of English | 3 | | Prerequisite(s): ENG 102, 105, or 108 with C or better |

| ENG | 390 | Methods of Inquiry | Studies in writing, rhetoric and literacy are multiple and diverse because these areas deal with complicated ways people create meaning, circulate meaning, and understand meaning in a variety of contexts and a variety of modal formats. Examines ways of developing research problems and questions, designing studies and conducting, reading and evaluating research in the areas of writing, rhetoric and literacy. Qualitative methods (e.g., case study, ethnographic methods, interviewing); historical methods (e.g., archival, document analysis and artifact interpretation); rhetorical analysis and discourse analysis; feminist approaches to research and analysis; and recent advances in research in the fields of rhetoric, writing and literacy studies. | ENG | 391 | Writing in Context | How do we understand the ways in which people use written language to carry out work in professional, academic, social and/or personal contexts? How does our understanding of the ways writing is produced for an audience shift between and among these different contexts? More importantly, how do writers adapt their writing practices in order to facilitate audience understanding as well as cultivate an audience's capacity for action? Familiarize students with rhetorical practices that position them to read, assess and respond to the rhetorical demands of a wide range of writing contexts. Strengthens students' existing rhetorical skill sets and problem-solving capacities for producing and circulating work (widely defined across material, print and digital media) that responds to a range of problems in an applied manner. Assesses the rhetorical demands of writing contexts and in developing and producing tailored, audience-specific texts that forward work in complex, interdisciplinary environments. | N | LEC | N | GNA | Liberal Arts and Sciences | Department of English | 3 | | Prerequisite(s): ENG 102, 105, or 108 with C or better |
| ENG | 392 | History of Rhetorical Theory | Begins in ancient Greece with the rise of the art of public oratory (known as rhetoric) and ends in the present, an era dominated by mass media. Engages in a great deal of reading—lots of very old writings as well as some newer ones. Covers a great many topics and ideas; focuses by continually returning to the subject of public discourse. Challenging readings designed to emphasize the connection between systems of philosophy (or "worldview") and systems of communication. By focusing on big ideas, students become a better thinker and communicator in any chosen career. | N | LEC | N | GNA | Liberal Arts and Sciences | Department of English | 3 | | Prerequisite(s): ENG 102, 105, or 108 with C or better |
| ENG | 393 | Theories of Literacy | While theories of literacy have, for the most part, been determined by the primacy of reading and writing script, more recent scholarship in literacy theory and history has served to challenge such limitations. Many contemporary perspectives on literacy view scripted text as one component of complex acts and practices of written communication that occur in social contexts. Studies that examine such communicative acts in their local contexts reveal that literate practices and the texts that are produced are imbued with social and cultural values and traditions and the needs and desires of individuals. As the statements above illustrate, theories of literacy themselves are embedded within the values and assumptions of individuals, institutions, and academic specialization. Examines some of these theories, their influences on academic scholarship and pedagogy, the ideological assumptions that inform them, and how we might view these theories within broader social-cultural landscapes. | N | LEC | N | GNA | Liberal Arts and Sciences | Department of English | 3 | | Prerequisite(s): ENG 102, 105, or 108 with C or better |

| GLG | 327 | Earth's Critical Zone | The Earth's near surface environment (the "critical zone") supports most life and is the dynamic interface between the solid Earth and its fluid envelopes where much of the geologic record is produced. We now know that we face rapid climate change and the consequences of changes in land use, water resources, and ecosystems. Critical to planning a response to, or mitigation of, environmental change is understanding how the Earth surface works. Focuses on how changes to the environment manifest themselves in the critical zone—in the form and function of the Earth's surface (landforms, water resources, soils, ecosystems). Offers a quantitative introduction to the form and function of the processes impacting the Earth's critical zone to build an understanding of the interactions of physical, chemical and biotic processes in shaping the surface and determining fluid, solute and sediment fluxes. | N | LEC | N | OPT | Liberal Arts and Sciences | School of Earth and Space Exploration | 3 | | Prerequisites with C or better: GLG 101 & 103 or SES 121 & 123; MAT 170 or 171 or 210 or 251 or 265 or 270; PHY 101 or 111 or 121 or 150 or CHM 101 or 107 or 113 or 114 or BIO 100 or 181 or 182 or 281 or 282. | HST | 404 | Conquest | How did Hernan Cortés and Francisco Pizarro defeat the Aztec and Inca Empires? Despite numeric inferiority, limited provisions, and little knowledge about the Americas, Cortés and Pizarro defeated advanced civilizations that had experienced warriors and millions of inhabitants. Possible explanations include the conquistador's valor, advanced weaponry, superior military strategy, Indian allies, and biological attacks. In their encounters with native peoples of the Americas, Europeans were not always conquerors. Alvar Núñez Cabeza de Vaca and Lope de Aguirre failed both in their attempt to conquer a large Indian civilization and in their effort to find mineral wealth. A few Europeans such as Bartolomé de Las Casas spoke out against the abuses committed against the Indians during the conquest. Explores these issues from the perspective of both Europeans and native peoples and looks at the long-term impact for Latin America and its peoples. | N | LEC | N | OPT | New Interdis Arts & Sciences | School of Humanities, Arts, and Cultural Studies | 3 | L & G | Pre-requisites: ENG 102 (or 105 or 108) with C or better; Minimum 30 hours; Credit is allowed for only HST 404 or 494 (Conquest & Encounters) |
