| TGM | 204 | Principles of Marketing for Global Organizations | Explores the ways in which global marketing strategies reflect a deep understanding of markets and create valuable offerings for customers globally. Targeting is the process by which we analyze opportunities and identify those customers where our business has the greatest prospects for success. Positioning is the process of assembling the "total offering" (product, service, distribution and price) and communicating the benefits of this "total offering" to the members of our target market. Challenges students to think critically about global competition. As such, rote learning of terms and concepts is not sufficient to prepare students to manage a business in global markets. | N | LEC | N | GNA | Thunderbird Sch of Global Mgmt | Thunderbird School of Global Management | 3 | | Prerequisite(s): Thunderbird School of Global Management undergraduate student |

| AIS | 512 | Historical Trauma, Healing, and Decolonization | In recent years, scholars have begun to explore the prevalence of historical trauma among American Indian communities. As a result of this violence and oppression, they have developed models of recovering healthy nations while challenging violations of their human rights in the domestic and international arenas. This history has given rise to a widespread cultural revitalization movement often referred to as decolonization. Scholars from an array of academic disciplines are producing a growing body of literature about decolonization. | N | SEM | N | GNA | Liberal Arts and Sciences | American Indian Studies Program | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |
| AIS | 513 | Urban Indian Issues | According to the 2010 Census, 64.1% of the American Indian/Alaskan Native population resides in a place outside of tribal areas. What are the social, political, and economic implications for a family who lives off the reservation and away from tribal homeland? Course explores these issues and dynamics and challenges the student to examine the unique identity and contributions of urban Indians. Students learn the history of Indigenous migrations to the city and assess current needs and concerns through consultation work coordinated with Phoenix area Indian Centers and nonprofit organizations. | N | SEM | N | GNA | Liberal Arts and Sciences | American Indian Studies Program | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |

As such, Deloria has also been labeled "the Dean of American Indian Studies" because of his work at shaping the intellectual and political agenda, which began in 1969 with the seminal publication of Custer Died for Your Sins: An Indian Manifesto and continued posthumously with works on the medicine man traditions throughout North America and a reflection on Carl Gustav Jung's analyses of american indian customs and beliefs. this seminar, the first of its kind, takes a comprehensive look at Deloria's philosophical and legalistic legacy by examining his major works and analyzing, in addition to critiquing, the ideas and opinions that shaped his intellectual career. | N | SEM | N | GNA | Liberal Arts and Sciences | American Indian Studies Program | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |

| AIS | 523 | Community Development with American Indian Communities | Tribal community development is more complicated than large urban population centers or even rural communities because tribal communities continue to struggle with years of colonial, paternalistic, and assimilationist federal policies that have impeded their efforts to become self-determined and self-governing nations. Provides students with the knowledge and skills they need to support community development in American Indian communities within a self-determined and self-governing context. Content includes: (1) a framework for review of current economic, political, social, and cultural issues facing American Indian communities; (2) an overview of community development theories, of the underlying values behind those ideas, and of the linkages between theory and practice in American Indian and other Indigenous communities; and (3) a sampling of intervention strategies and tactics for effective community development in American Indian communities. | N | SEM | N | GNA | Liberal Arts and Sciences | American Indian Studies Program | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |

Traces that evolution, looks at current examples of hybrid cultural processes and outcomes, and discusses possible future trends. Discusses how these changes are influencing the work and career possibilities of people involved in all aspects of human culture. Comprises diverse readings, media products, class interaction, group discussion and hands-on collaborative projects exploring concepts covered in class. These prototypes do not have to be functional tools, but they must be functional stories, effectively sharing the creator's vision with others. Just as the Star Trek communicator inspired early cellphones, these prototypes will help shape new conversations about the future we want to build. Surveys a series of creative paradigms for inspirational prototyping, including design fiction, rapid fabrication and 3D printing, science fiction prototyping, gaming and virtual world-building. | N | LEL | N | GNA | Herberger Inst Design & Arts | Arts, Media and Engineering Sch T | 3 | | Credit is allowed for only AME 130 or AME 194 (Prototyping Dreams) |

| AME | 220 | Programming for the Web | Introduces a range of technologies used for Web development: marking up content with HTML, styling with CSS and interaction using Javascript. Explores the latest foundational Web standards such as HTML5 and CSS3 to learn how to create compelling content for the World Wide Web. Goes beyond simply coding a Web page to understanding how the Web works. The World Wide Web is used in an incredible variety of applications that we now find integral to our lives, from talking to our friends on Facebook to discovering music on the iTunes Music Store, paying bills from our bank's Web site to finding the route to our vacation destination on Google maps. Investigates how Web standards have enabled the creation of dynamic applications delivered over the Internet. | N | LEL | N | GNA | Herberger Inst Design & Arts | Arts, Media and Engineering Sch T | 3 | | Credit is allowed for only AME 220 or AME 294 (Programming for the Web) |

| AME | 310 | Media Literacies and Composition | When we integrate computational systems into the core of our cultural and social practices, we reinvent how we tell stories. The roles of creators, critics and audiences are blurring at the same time that digital tools allow us to infinitely reproduce and remix narratives, radically changing what we mean by the "work" or "text." These new media platforms empower us to create, share and respond to cultural narratives that defy traditional notions of how stories operate, demanding new literacies. Explores our powers and responsibilities as readers, writers and creators of new cultural languages, including new forms such as games, digital video, electronic literature and social media. Students study relevant media narratives and cultural ecosystems from the 20th and 21st centuries, acquiring a set of literacies that they hone through practices of authorship, critique and collaboration, culminating in the presentation of their own digital media narratives. | N | LEL | N | GNA | Herberger Inst Design & Arts | Arts, Media and Engineering Sch T | 3 | | Prerequisite(s): Digital Culture major; minimum 45 hours. Credit is allowed for only AME 310 or AME 394 (Media Literacies & Composition) |
| AME | 320 | Motion Capture for Integrative Systems | Presents the broad principles and techniques for movement study in oneself and others that includes applied, dynamic anatomy. Also presents the functional techniques for motion capture with a special emphasis on the capture of human movement from visual sensors. Students understand the technology behind motion capture; a high-level understanding of movement and anatomical systems; the ability to perform motion capture and customize it to suit the requirements of specific creative applications in animation, sound and live performance as well as applications in movement rehabilitation and education. Looks at the technology behind various modern motion capture systems based on markers, inertial sensors, accelerometers, and depth sensors, so the student appreciates the technical capabilities and limitations of each technique. | N | LEL | N | GNA | Herberger Inst Design & Arts | Arts, Media and Engineering Sch T | 3 | | Prerequisite(s): Digital Culture major; minimum 45 hours. Credit is allowed for only AME 320 or AME 394 (Motion Capture for Integrative Systems) |
| AME | 340 | Compositional and Computational Principles for Media Arts | In much of today's contemporary art practice there is a tight coupling of compositional form, content and underlying computational mechanisms. This integration holds the potential to yield new modes of expression and wholly new art experiences as is evident in emerging forms of real-time generative art, network-based art, game-based art, and interactive performance. As both practitioners and participants, we must develop a critical understanding of the relevant compositional and computational principles that frame this work. Students study relevant media art works from the 20th and 21st century, develop a working understanding of fundamental compositional and computational principles, and apply their understanding through the realization of exploratory media artworks that are presented at the end of the semester. | N | LEL | N | GNA | Herberger Inst Design & Arts | Arts, Media and Engineering Sch T | 3 | | Prerequisite(s): Digital Culture major; minimum 45 hours. Credit is allowed for only AME 340 or AME 394 (Compositional & Computational Principles for Media) |

| BIO | 112 | Discovery: Why Sex? | "Why?" is a question that animates the youngest of children to the most seasoned of scientists. The acts of asking and answering "Why?" highlight the integrated nature of scientific knowledge and discovery. Demonstrates scientific disciplines are not walled cities in which knowledge is neatly segregated from lines of inquiry and knowledge in other disciplines. Instead, scientific concepts weave throughout and between disciplines and scientists increasingly rely on colleagues from different scientific fields to find answers to scientific questions. So our journey to find responses to the question "Why Sex?" takes us not just to biology, but also to earth science and to physics. Along the way, scientists are linked together not only through concepts that crosscut the disciplines, but also in their reliance upon key scientific skills such as the ability to observe, think critically, measure, gather data and communicate their findings. | N | LEL | N | GNA | Liberal Arts and Sciences | School of Life Sciences | 4 | SG | Credit is allowed for only BIO 112 or BIO 194 (Discovery: Why Sex?) |

| BIO | 429 | Human Impacts on Ecosystem Functioning | Explores our current understanding of how humans are impacting the functioning of ecosystems and how changes in ecosystems would affect provisioning of ecosystem services and ultimately human well-being. The two primary drivers of ecosystem change are growth of the human population and increased consumption per capita. These drivers affect the Earth's cycles of carbon, nitrogen and water, as well as regional and global-scale changes in biodiversity and climate. Includes an in-depth discussion of scenarios for the next 50 and 100 years, which articulate costs and benefits of alternative development pathways in terms of climate change, food production, clean water and biodiversity. Scenarios of change in biodiversity lead to the topic of the consequences of biodiversity change for the functioning of ecosystems from the point of view of their productivity and stability. | BMY | 501 | Essentials of Biomimicry | Offered as a sampler of the various topics (discipline, emulate, ethos, (re)connect and iSites, human-nature connection, biomimicry yhinking, and life's principles) within the discipline of biomimicry. Each week is devoted to a specific topic and is led by a different instructor. Provided a basic overview of each aspect of the discipline with ample opportunity for conversation and dialogue around the specific components, with an understanding that greater depth into each topic can be learned by taking the advanced BMY courses. | N | LEC | N | OP2 | Liberal Arts and Sciences | School of Life Sciences | 1 | | Prerequisite(s): degree- or nondegree-seeking graduate student |
| BMY | 502 | Life's Principles | Life's principles are nature's universal design guidelines based on 3.8 billion years of successful strategies across all life. With instruction by Dr. Dayna Baumeister, this 16-week online course takes participants on a deep dive of life's principles, including the review and study of life's operating conditions, the six primary principles and their related sub-principles. Gives participants the experience necessary to bring these design guidelines into practice. | N | LEC | N | OP2 | Liberal Arts and Sciences | School of Life Sciences | 4 | | Prerequisite(s): degree- or nondegree-seeking graduate student |
| BMY | 503 | Biology Taught Functionally | Biomimicry teaches biology through the lens of function, thereby providing a core understanding in biology for all students, no matter their background. Explores how biologists gather and research information and how that knowledge can inform other disciplines. Also introduces the art of translating biological concepts into strategies for application, which is then carried throughout all the courses. Students learn how to work with biologists on a biomimicry team and how to weave biology and biomimicry together. The biologists in the cohort not only learn to look at nature through the function lens, but also act as subject matter experts for their interdisciplinary teams and teaching assistants. | N | LEC | N | OP2 | Liberal Arts and Sciences | School of Life Sciences | 4 | | Prerequisite(s): degree- or nondegree-seeking graduate student |
| BMY | 504 | Biomimicry Thinking | Biomimicry thinking is the practice of biomimicry from a methodology-based approach. 16-week intensive in the methodology of biomimicry reviews how biology and biomimicry can be incorporated into the four major phases of any design process: scoping, discovering, creating and evaluating. Covers the art of translating biological concepts into strategies for application and building a taxonomy of design principles. | N | LEC | N | OP2 | Liberal Arts and Sciences | School of Life Sciences | 4 | | Prerequisite(s): degree- or nondegree-seeking graduate student |

| BMY | 511 | Biomimicry and Design | Biomimicry is innovation inspired by nature, or the conscious emulation of nature's genius. Prepares participants to design sustainable innovations using the biomimicry philosophy and methodology. Participants complete a 16-week series of lectures and assignments to demystify the design thinking process, understand how to harness the potential of approaching challenges with a design mind, distill a design challenge, understand user needs, build a bridge between biology and design, use a methodology for discovering models from nature, abstract design principles from bio-inspired strategies, and translate those principles into sustainable innovations. Participants both with a design background and without equally experience a deep immersion into the world of biomimetic design. | N | LEC | N | OPT | Liberal Arts and Sciences | School of Life Sciences | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |
| BMY | 512 | Biomimicry and Engineering | Prepares participants to understand the field of engineering; identify the types of engineers and what each one does; what constrains engineers' work under, materials selected by engineers, how to present biological ideas to engineers and how to integrate ideas from their discipline into sustainable engineering designs using biomimicry principles. Most examples used are of large engineered structures. These structures play critical functions in human systems, have a significant impact on the environment and last for over a 100 years, so it is important to imbed as much sustainability into their design as possible. Requires a final team project designed to put these ideas into practice. | N | LEC | N | OP2 | Liberal Arts and Sciences | School of Life Sciences | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |
| BMY | 516 | Biomimicry and Business | Addresses business topics from the biomimicry point of view, explains mechanisms and tools for comparing and contrasting business and nature. Challenges participants to question conventional ways of conducting business and come up with new approaches based on a different point of view. | N | LEC | N | OP2 | Liberal Arts and Sciences | School of Life Sciences | 3 | | Prerequisite(s): degree- or nondegree-seeking graduate student |
| BMY | 517 | Human-Nature Connection | Grounds the emerging discipline of biomimicry as a continuation of our ancestral connection with nature. Human-Nature Connection (HNC) engages participants in an exploration of the meaning and value of connecting with nature. Topics include defining humans, nature, and our connection with nature; establishing the evolutionary, personal, and socio-cultural influences on the different expressions of this connection; and illustrating the relevance of biomimicry to the human-nature connection. | N | LEC | N | OP2 | Liberal Arts and Sciences | School of Life Sciences | 2 | | Prerequisite(s): degree- or nondegree-seeking graduate student |
| BMY | 530 | Virtual Design Lab Practicum | Practicum designed to allow participants to dive deep into the biomimicry tools and resources presented during the program and to apply them selectively to a specific and unique opportunity of the student's choosing.
